RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "1."

American Railroad Journal.

Saturday, May 4, 1872.

Stock Exchange and Money Market.

Money has been offered with more freedom, and rates have been quoted more favorable to the borrowing interests, call loans ranging from 5@7 per cent., and choice to good discounts, from 7@12 per cent. per annum, as the extremes. The demand for accommodation, though quite active on speculative account, has been promptly met in most instances within the range of current quotations. The banks have been more liberal of aid; and private lenders have been making advances with more confidence. The U. S. Sub-Treasury office reduced its coin balance ⅜ths of a million and enlarged its currency reserve nearly a million. The city banks added to their loan and discount average about 1⅞ millions during the week, and reduced their outstanding circulation slightly. The U. S. Sub-Treasury held a currency balance at the close of business on Tuesday of $4,747,040, and a coin reserve, of $71,058,471.

The city banks, in their latest return, show an increase of $5,618,100 of legal tender notes, with a reduction of $165,900 of specie, and an increase of $7,508,400 of deposits; and of $1,865,900 in their loan and discount averages, with a reduction of $71,500 in their item of circulation. The city bank exchanges, last week, averaged 183⅓ and thus far, this week, about 127 millions daily. The banks now hold $5,895,125 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $18,112,500, against $15,597,189 same time last year. The city bank deposits are now $203,139,100, against $222,349,225 week ending April 29, 1871. The legal tender reserve amounts to $45,527,400, against $60,426,291 same time last year. The circulation now stands at $27,840,000 against $31,461,929 same time last year. The loans are now $274,926,500 against $287,554,538 at this date last year.

The coin reserve of the city banks is now about 18⅛ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 45⅛ millions against $46,616,000 on the statement of February 10th.

The U. S. Sub-Treasury augmented its currency balance $984,780, and reduced its coin reserve $398,194 as the result of the week's business. The receipts of the office were $3,254,104 in coin, and $3,537,077 in currency; payments, $3,922,298 in coin, and $2,552,297 in currency. The office received $3,109,000 in coin or its equivalent, from customs; and disbursed $2,052,885, of coin interest. The receipts of the office from all sources in April were $81,147,759, including $14,829,276 from customs; payments, $78,041,565, including $3,118,000 of coin-interest.

Government revenues have shown a fair yield through the week. The excises yielded within the week about two millions, and thus far since July 1, 1871, $105,694,143. The customs at the port of New York last week were $3,054,204; at the outports, equal to about a million more, all in coin, or coin certificates.

The cash balances of the Treasury Department on Monday were: Coin, $129,617,930; currency, $9,105,433. Coin certificates were outstanding for $25,272,500.

Gold has been quite brisk and buoyant in price, on a more confident demand, mainly on speculative account, though the later dealings have shown less firmness in the general market. The customs call has been fair; while the export drain has been more extensive, though not equal to the coin interest disbursements of the Treasury office.

Under the May programme of the Treasury Department, Government proposes to sell during the month, at least ten millions of Gold as follows: Thursday, May 2, $2,000,000; Thursday, May 9, $2,000,000; Thursday, May 16, $2,000,000; Thursday, May 23, $2,000,000; Thursday, May 30, $2,000,000. And to buy in ten millions of Five-Twenty bonds as follows: Wednesday, May 1, $2,000,000; Wednesday, May 8, $2,000,000; Wednesday, May 15, $2,000,000; Wednesday, May 22, $2,000,000; Wednesday, May 29, $2,000,000.

The range of the price during the week has been from 112⅛@113¼ and the closing quotation on Wednesday was 112⅛ against 112@112⅛ the preceding Wednesday. The specie outflow, last week, was $1,715,619. The Gold Exchange Bank clearances have averages about 54⅞ millions per day during the week.

The customs demand for Gold last week, averaged $518,170 a day; thus far, this week, it

has averaged $525,000 a day, or equal to a weekly aggregate of $3,150,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $31,630, and since Jan. 1, 1872, $622,639 against $2,971,893 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, has been $133,594,403 against $124,502,575 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to April 27, 1872, $65,087,254, against $72,281,841 same time in 1870-'71.

The export drain of specie was $1,715,619 last week, against $3,332,493 same week preceding year. The shipments since July 1, 1871, have been $31,540,250 against $65,037,194 same time in 1870-'71.

Foreign Exchange has been firmer as to price, and in more request. Bankers' sixty day bills on London closed on Wednesday at 109⅝@109¾; sight bills on London, 110½@110⅝.

The produce exports from this port, week ending with April 30, were to the currency value of $4,790,733.

Government securities have been in fairly active demand and quoted stronger. The offerings have been on a limited scale, in nearly all instances.

U. S. sixes of 1881 closed here on Wednesday of the current week at 118@118⅛; U. S. Five-Twenties of 1862, (other than the bonds called in) ex May coupon 112⅛@112¼; U. S. Five-Twenties of 1864 at (ex May coupon) 112@112¼; U. S. Five-Twenties of 1865, ex May coupon 112¾@113; U. S. Five-Twenties of 1865 consolidated, 114⅓@114⅝; U. S. Five-Twenties of 1867, 115@115¼; U. S. Five-Twenties of 1868, 115¾@115⅞ U. S. Ten-forties at 110⅜@110⅝; U. S. Fives of 1881 (Funding Loan) ex May coupon, 111⅛@111⅜; Six per cent. currency bonds, 116½@116¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

*Ex May interest.

State bonds have been in generally good request and have been quoted firmer in price, though closing irregularly.

There has been a fairly active call for the better class of Railway Bonds at firmer rates. The older issues have been scarce in the open market. Central Pacific Sixes have been in more request at 102¾@103. Chesapeake and Ohio have been in good demand at 94 per cent. and accrued interest.

The Chesapeake and Ohio through line of railway is rapidly progressing toward completion. The company have now over 325 miles of their line ready for traffic, and the work is already so far advanced on the unfinished intermediate link of 100 miles, that track-laying will be continued, with but slight interruption, during the Summer, until the entire line is completed, from the navigation of the James to that of the Ohio River. The three tunnels on the New River and Greenbriar sections are nearly completed, upward of 5,000 men being employed on the work. It is the confident expectation of the company that they will have the road ready for a large tourist travel in the Autumn of this year, and that the line will have a valuable coal and iron business soon after its through line is opened, as well as a large through transportation of Western products to the seaboard.

The Northern Pacific Railroad 7.30 Gold bearing First Mortgage Bonds have been more sought after for investment purposes at par and accrued interest in currency. These bonds are an absolute lien on all the property and rights of the company, which will eventually embrace more than two thousand miles of road, with rolling stock, buildings and all other equipments; together with over twenty-three thousand acres of land to every mile of finished road, the land extending in a broad, fertile belt from Wisconsin, through the richest portions of Minnesota, Dakota, Montana, Idaho, Oregon and Washington, to Puget Sound. Both principal and interest on the bonds are payable in Gold coin, at the office of JAY COOKE & Co., New York City—the principal at the end of thirty years, and the interest (at the rate of seven and three-tenths per cent. per annum) first of January and July. The eminently responsible financial agents of the loan recommend the bonds, after the fullest investigation, with the same entire confidence with which they commended Government Bonds to all classes of buyers for investment.

Railway and Miscellaneous share property, has been more active, and generally firmer in price on a livelier speculative call.

In the Metal trade the movements of the week have been on a restricted scale. The offerings of Pig-iron continue light, and values more or less nominal, though quoted about as before, for prompt delivery; 225 tons Nos. 1 and 2 American sold on private terms. Wrought Scrap-iron has been quiet, but quoted steady at $64@$65 with sales reported of 100 tons from dock on private terms. Iron Rails have been in moderate demand at about previous figures with sales reported of 300 tons Double-headed, and 455 tons do. do. on private terms. Foreign lead has been more sought after and quoted stronger in price, on the basis of 6¼c.@6⅜c., gold, for ordinary; sales, 100 tons on private terms. Spelter has been inactive at unchanged quotations. Pig-tin has been dull and heavy, with Straits, quoted down to 40c., gold. Tin Plates have been held with confidence, on a moderate inquiry, with sales reported of 1,000 boxes assorted Charcoal at $13 75, and 2000 boxes Charcoal Terne part to arrive, mainly 1-5th X, at $12 @$12 25, gold, per box. Musselman Zinc sold to the extent of 10 casks at 9¼c., gold, per lb. Copper, in less request and irregular as to price.

General business has been fairly active, in the line of domestic produce, with prices quoted stronger though closing less buoyantly in most instances. Middling upland cotton closed on Wednesday at 23¾ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,557,623 bales, against 3,584,500 bales same time in the preceding year; exports 1,740,498 bales against 2,608,446 bales in the previous year; stock at the ports at latest dates, 295,954 bales against 490,613 bales same date 1871.

At the Live Stock Markets, Beeves have been in moderate demand at 9¾@13¾ cts.; Veals at 5@9 cts.; Sheep at 7½@10½; Lamb 12@18 cts. Swine, at 4¾@5cts. per lb., all live weight. The week's receipts were 7,928 Beeves, 3,426 Veal Calves, 14,013 Sheep and Lambs; and 33,797 Swine.

Foreign goods have been in fair demand at generally firm prices. The week's imports of foreign goods reached the amount of $9,573,956, including $2,433,735 of dry goods.

Ocean freights have been more active and quoted steadier as to rates.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

HARVEY FISK. A. S. HATCH.

FISK & HATCH, BANKERS,

No. 5 NASSAU ST., New York.

We can recommend only such securities as we *know* to possess the essential qualification of *unquestionable security.* The securities to which we have given the necessary attention to enable us thus to recommend them, are:

THE BONDS OF THE CENTRAL PACIFIC RAILROAD Co., originally negotiated by us, and which we now buy and sell at market rates. They are widely known and highly esteemed in all the principal money markets of the world, and are dealt in at all the principal Stock Exchanges in this country and Europe, where they take rank in popularity and market value next to the Bonds of the United States Government. Present market price, about 102½.

THE 6 PER CENT. GOLD BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY, secured by a First Mortgage upon their great East and West Trunk Line of Railroad extending from the Chesapeake Bay to the Ohio River, forming a short, easy, low grade and economical through route for the transportation of Western products to the sea, and traversing the wonderful Iron and Coal deposits of Virginia and West Virginia, which are well known to be among the most important, varied, and valuable on this continent.

We have these bonds still for sale for account of the Company at 94 and accrued interest. Interest payable May and November. Principal and interest payable in Gold in the City of New York. Denominations $1,000, $500, and $100, Coupon or Registered.

Full information furnished on application.

We buy and sell GOVERNMENT BONDS; receive deposits, and allow interest on balances; make collections; issue Certificates of deposit, and do a general banking business.

FISK & HATCH.

☞ The Calumet and Hecla Mining Company will pay on the 15th inst., the usual quarterly dividend of $5 per share on its full complement of 80,000 shares, or at a rate of $1,600 000 in dividends per annum. Competent judges estimate that the net profits of this company for 1872 cannot fall short of $3,200,000, equal to $40 per share.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Secured as they are by a first mortgage on the Road, Land Grant, Franchise and Equipments, combined in one mortgage, they command at once a ready market.

A Liberal Sinking Fund provided in the Mortgage Deed must advance the price upon the closing of the loan. Principal and interest payable in *gold.* Interest at eight (8) per cent. per annum. Payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000, $500 and $100, Coupon or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

Can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.,

BANKERS,

NO. 11 WALL STREET.

The Public Debt.

By the monthly report of the public debt for April we learn that the debt was reduced during the month $12,688,082 62. The total principal of the debt outstanding is $2,278,519,598 54, on which there is due and unpaid of interest $42,552,780 77—giving a total of principal and interest of $2,321,072,379 31. There was at the same time cash in the Treasury, of coin, $108,953,738 68, and of currency, $14,475,199 91—giving a total of $123,328,938 58; reducing the total debt, less cash in the Treasury, to $2,197,743,440 72. The debt, less amount in the Treasury on the 1st of April 1872, was $2,210,331,529 34—showing a decrease during the past month of $12,688,088 62. Decrease since March 1, 1872, $28,070,057 26. Decrease of the debt since March 1, 1871, $215,481,968 64. Decrease of the debt from March 1, 1869, to March 1, 1872, was $299,649,762 03.

☞ Among the outward bound passengers, by the Steamship Russia, on the 24th ult., was Mr. J. A. Garland, junior member of the banking firm of Messrs Jay Cooke & Co. who, after years of close, assiduous, and intelligent devotion to the business interests of his firm, mainly in the New York house, where he has endeared himself to hosts of friends—now visits Europe, for the first time, for a few months, of rest and recreation.

Grand Trunk Railway of Canada.

DIRECTORS' REPORT.

The gross receipts upon the whole undertaking, including the Buffalo and Champlain lines, have been 935,341*l.* Deduct ordinary working expenses (being at the rate of 59.70 per cent., against 67.12 of the corresponding half of last year) 558,567*l.*, and renewals, &c., of the permanent way and works in the half year debited to revenue 154,157*l.*, making a total of 712,724*l.*, leaving an available balance earned in the half-year of 222 617*l.* Less amount of sundry expenditure as per revenue account 43,540*l.*—179,077*l.* Deduct loss on American currency, 18,183*l.*—balance 160,894*l.*, with 116,593*l.* at the corresponding period of 1870.

To this sum of 160,894*l.* has to be added the balance carried from the net revenue account of last half-year of 18,311*l.*, making a total balance of 179,205*l.* From this, however, has to be deducted the amount of postal and military revenue due for the half-year to the Postal bondholders of 17,025*l.*, leaving the balance of 162,180*l.* applicable for the following payments, viz.—

Interest on hired cars (six months)		£40,069
Interest &c., paid on lands	£1,647	
On mortgage to Bank of Upper Canada	4,423	
On loans, bankers' balances, promissory notes, European exchange, &c.	1,814	
On British American Land Company's debentures	616	
On Montreal Seminary debenture	616	
On Island Pond debentures	2,700	
Half-yearly instalments on Portland Sinking Fund	2,568	
Contribution to Chicago Fire Fund	1,000	
		15,387
Atlantic and St. Lawrence lease (in full)	29,501	
Detroit lease (in full)	11,250	
Montreal and Champlain	13,705	
Buffalo and Lake Huron	27,500	
		81,957
1st Equipment bond interest		15,000
2d " " "		8,115
Balance carried forward		1,650
		£162,180

Comparing this half-year with the corresponding period of 1870, the gross receipts show an increase of 141,601*l.*, or 17.84 per cent. There was an increase in the passenger receipts of 15,997*l.*, or 5.18 per cent., and in the freight receipts of 125,462*l.*, or 25.93 per cent. The total number of passengers was 961,432 against 937,879; and the freight conveyed was 789,231, against 691,301 tons. The average receipt per passenger was 6s. 1d., against 5s. 11d.; and per ton of freight 15s. 5d., against 14s.

[It is shown by a table, which gives the charges for passengers and freight during the past nine years, that the rate per ton for freight was higher in the past half-year than in 1870, but still lower than in 1868 and 1869; and that the fare per passenger, though higher than in 1870, was lower than in any previous half-year since 1863. The charges for the past six months were thus, for passengers and goods, below the average which has been obtained in the past and which may fairly be anticipated in the future. It is further to be observed from the table that the steady growth of traffic referred to in the last report has continued; and this result is the more satisfactory, inasmuch as a large part of the increase in the gross revenue is owing to improvement at almost every point of the company's system in local freight business.]

The expenses for the half-year amounted, including renewals, to 712,724*l.*, or 76.18 per cent. as against 668,863*l.*, or 84.26 per cent. of the gross receipts for the corresponding six months of 1870. Excluding the renewals, the ordinary working expenses were 59.70 against 67.12; but in the accounts now presented the amounts paid to different companies for the hire of rolling stock are not included in the ordinary working expenses, as was the case in 1870. Those amounts are now placed—as in the accounts for the June half-year of 1871—amongst the interest charges, because they may properly be considered, except the proportion chargeable for the maintenance and repairs of the adjustable gauge cars, to represent interest upon what would, if the company had been in a position to incur the outlay, have been expended on capital account. The increased expenditure in the half-year, which amounted to 43,861, was at the rate of 6.67 per cent., as against an increase of 17.84 per cent. in the receipts. In other words, the additional revenue of 141,600*l.* was earned at a cost (including 18,000*l.* extra for renewals) of 43,860*l.*, or a little less than 31 per cent. of the gross increase. This reduction in the cost of working was due to the improved condition of the road and rolling stock.

The total train miles run were 3,642,556, against 3,193,290, showing an increase of 449,226 miles; and the increase in the car mileage was 7,288,865 miles. The cost per train mile in the locomotive department was reduced from 26.71 cents for December 1870, to 26.40 cents for the past half-year. This increased mileage was performed with a small addition to the engine stock; showing that each engine was doing a larger amount of work, and that the condition of the engine stock was generally improved.

The number of miles of permanent way relaid during the half year was 137¼ of which 53 miles were laid with steel, The total length of steel rails laid up to the 31st December last was 109 miles. The number of sleepers inserted during the year 1871 was 673,703, against 520,670 in 1870; oak blocks were placed under the joints of the rails for 75 miles, and the ballasting of 96 additional miles was completed.

The items charged to capital during the half-year are fully explained in the accounts. The total addition is 468,472*l.*; but there is on the other hand a credit of 16,438*l.* received from the Port Hope, Lindsay and Beaverton (now the Midland), on account of advances made to that company in 1857. Of the balance, amounting to 452,034*l.*, the principal charge of 445,835*l.* represents the capitalised interest for the past half-year on the first, second, third and fourth preference bonds and stocks; and the remainder includes amounts paid for new rolling stock.

The receipts in American currency during the half-year amounted to $2,387,000 against $2,032,000; the increase having been due to the greater amount of "through traffic" carried; and $956,599 were converted into sterling, against $425,977 in the corresponding period of 1870. There was a loss on conversion of 18,183*l.* in the half-year, against 8,284*l.*, partly in consequence of the larger amount converted for the purpose of sending money to England, and partly because the conversions were made at less favourable rates. These causes will not operate to the same extent in the present half-year, because it will not be necessary to transmit money to England, and because the currency receipts will be employed to a considerable extent in paying for rolling stock ordered in the United States.

[A table here shows the gross and net earnings from January 1862 to December 1871 in mixed currency and gold, the expenditure in renewals, and the direct loss sustained by the company from the depreciation of American currency.]

It will be in the recollection of the proprietors that Captain Tyler proceeded to Canada last October, mainly for the purpose of advising in regard to the works of the International Bridge, the completion of which had been delayed in consequence of difficulties experienced in founding certain of the deep-water piers. Preparations have accordingly been made during the past winter for prosecuting the works in a mode by which these difficulties will, it is believed, be surmounted. The additional expense which will be incurred by the alterations required to be made in the original plans by the Government engineers of the United States, and subsequently, and as finally settled during Captain Tyler's visit to America, will amount to 27,500*l.*; and for this extra sum the contractors have bound themselves to complete the bridge by 1st December next. Captain Tyler made a full report to his colleagues on his return on the condition of the works, the difficulties which had been encountered, and the means and appliances which were required to overcome them. As regards those portions of the work which had been constructed, he said—"I have examined the masonry of the piers and abutments completed, in the manner and to the extent above described, and the iron superstructure for three spans that has been placed upon them; and I am satisfied, as the results of observation and inquiry, that the work on those piers and abutments and on the three spans in the main river has been performed in a satisfactory and efficient manner. The piers are constructed, not of 'dressed,' but of 'rocked-faced ashlar' masonry, and with a sandstone which presents appearances of iron-bands, flaws, and seams, on the surface. This sand-stone, from Georgetown, Ontario, has previously been extensively used on the Grand Trunk; and I have no hesitation in saying that the masonry of these piers and abutments, though not constructed in a costly or highly finished manner, is sound, durable, and well adapted for the purposes for which it is required. I have had the opportunity of seeing the same description of stone in the Credit Viaduct, with piers 110ft. high, and in other structures; and of observing that while showing similar bands, seams, and flaws, it exhibits in those structures no appearance of deterioration after being exposed to the influence of a Canadian climate for seventeen years. I have made particular inquiry into the thickness and force of the ice which these piers will have to resist, and have visited numerous other structures exposed to the action of ice under various circumstances; and I have come to the conclusion that the cut-waters of the three piers now erected are calculated, when shod with iron, with the slope on which they are constructed—of ¼ to 1, to cut through and to resist, without danger of failure, any ice which can come in contact with them."

Captain Tyler also tested the ironwork of one of the spans, 190ft, in the clear, with a load of 217 tons of old rails which happened to be at Fort Erie on their way to the ironworks at Buffalo. These rails having been laid on the cross girders and equally distributed over the whole span, there was a deflection at the centre of 1¾in., at 6ft. from the centre of 2in, and at 18ft. from each side of the centre of 1¾in. The various parts of the bridge did their duty well while the load was upon it, and the test was in every respect satisfactory.

As regards the general condition of the permanent way and works of the Grand Trunk, Captain Tyler reported that he observed a great improvement as compared with what he saw at the period of his previous visit in 1867. The rolling stock had not only been increased but was improved; 12 miles of sidings had been added; additional station accommodation for passengers and freight had been provided; and altogether "the system generally was in a far more efficient and healthy condition than when I inspected it in 1867."

The condition and prospects of the undertaking have formed during the half-year a subject of anxious deliberation to the directors. The Arrangements act of 1862 expires, as the proprietors are aware, at the end of the present year. It was clearly to the interest alike of bondholders and of stockholders to avoid on the one hand the inconveniences attending the preparation and carrying out of a second Arrangement act, and on the other hand the complication which might arise if the full interest of 6 per cent. were not paid on the 1st and 2d preference bonds and stocks in 1873. Proceeding on careful calculations the board have taken measures for placing the whole concern in the best possible condition as regards means of conveyance, siding, and station accommodation, with a view to the paramount object of increasing the net earnings to the required amount for the payment of interest on the preference bonds in 1873. By the sale of the remainder of the second equipment mortgage bonds at par, and with the net revenue as estimated to the

end of the year, all the funds required for these purposes will, it is believed be provided without trenching upon the other assets now in hand. The permanent way will, at the end of the present year, be in an improved and the rolling stock in a thoroughly good condition. The Grand Trunk will, on the completion of the International Bridge, be in a good position for carrying through traffic between New York and the West with advantage to the freighter and traveling public and profit to themselves. The prospects as to through rates are brighter, especially since the break up of the Erie Ring in New York. Canada is growing in population and wealth. The opening of the Intercolonial will tend to lessen the loss heretofore experienced at the eastern end of the line. Under these circumstances the directors would ask the proprietors to exercise for another year the patience which is necessary to enable them to reap the first portion of the fruit of their past sacrifices.

Certificates for the capitalised interest for the year 1871 on the preference bonds and stocks will be issued shortly after the meeting.

The directors who retire by rotation are Messrs. Ferrier, Menzies, Potter, and Swift, and the retiring auditor is Mr. Child. These gentlemen are eligible, and offer themselves for re-election.

The New City on the Ohio.

The rapid and vigorous growth of some of our great Western cities, twenty-five or thirty years ago, which seemed so much like magic, or like a tale of the Arabian Nights, seems to be repeating itself in these later times nearer home, in the sudden birth and growth of the new city of Huntington, on the Ohio River, at the terminus of the Chesapeake and Ohio Railroad. Where, a year ago, there were half a dozen or more farms adjoining each other, and as many straggling farm houses, there is now a well laid out and generously planned city, duly incorporated, and with an organized city government, containing already about five miles of graded streets and avenues, over 200 buildings, and a population of from 1,000 to 1,500, to which additions are daily made from all sections of the country, preparing as rapidly as energy and capital and enterprise can accomplish it for the establishment and carrying out, on an extensive scale, of all the various manufacturing business industries which go to make up a thriving and prosperous town, and for which the situation is peculiarly favorable. The western shops and depots of the Chesapeake and Ohio Railroad Company are located here, and are now being erected on an extensive and substantial plan. Preparations are being made for the establishment here of rolling mills, car-wheel manufactories, manufactories of agricultural implements, building materials, etc., etc., for the western markets. Cheap fuel, cheap iron, cheap timber, and unfailing communication by rail and water with all the principal markets of the country combine to concentrate at Huntington all the elements of a great manufacturing and business centre. It will be the focal point at which all the railroads through Kentucky and Ohio, now building and projected to connect with the Chesapeake and Ohio, will concentrate. It must also become the great depot for the shipment and distribution of the coal of the Kanawha Valley, with which it is already connected by the western division of the C. and O. Railroad, and which is destined to be the great source of the supply of coal for the Western and Southwestern markets. Its situation at the head of reliable navigation on the Ohio River and at the western terminus of the Chesapeake and Ohio Railroad whose immense through tonnage and extensive coal and iron business must contribute to its rapid growth, assures its future as a populous and flourishing city.

New York and Albany Railroad.

(From the Albany Evening Journal April 24.)

The Assembly passed a bill last evening authorizing the Delaware and Hudson Canal Company to guarantee the payment of the principal and interest of any bonds (not exceeding $1,100,000) which the city of Albany may issue in aid of the New York and Albany Railroad Company. This will result in a satisfactory compromise of the disagreement between the city and Railroad company in regard to the issue of stock authorized some time since by a written approval of a majority of the tax-payers of the city. The guarantee of the Delaware and Hudson Canal Company ensures the city of Albany against loss, and the loan of the credit of the city to the amount named ensures the early construction of the West Shore New York and Albany road.

We congratulate all the parties concerned in view of this judicious and honorable compromise. It is another proof of the influence and sagacity of those who have this great enterprise in charge. The following is the bill:

AN ACT to facilitate the construction by the New York and Albany Railroad Company of a railroad on the west side of the Hudson river, by authorizing the city of Albany to issue its bonds, and the Delaware and Hudson Canal Company to guarantee the same for the purpose of aiding in such construction.

SEC. 1. The city of Albany is hereby authorized to issue its bonds in ordinary form, payable to bearer, to run not exceeding thirty years, and for an amount in the aggregate not exceeding eleven hundred thousand dollars, for the purpose of aiding in the construction of the New York and Albany Railroad, upon the following conditions and obligations, to be entered into by the said New York and Albany Railroad Company, and the Delaware and Hudson Canal Company, which conditions, obligations and contracts the said corporations are hereby authorized to make.

The said Delaware and Hudson Canal Company is hereby authorized to contract with the said New York and Albany Railroad Company of the second part and the city of Albany of the third part, that if the said city of Albany shall issue its bonds to an amount not exceeding that hereinbefore stated, and to run a period not exceeding that hereinbefore stated, and shall receive therefor the stock of the said New York and Albany Railroad Company to an amount estimated at par value equivalent to the amount of bonds so issued, it, (the said Canal Company) will simultaneously with the issue of said bonds, bind itself to pay the interest falling due thereon after the first two years from their date, as it shall become due, and will guarantee and indemnify the city of Albany against the principal thereof, and all liability to pay the same, in consideration of the Delaware and Hudson Canal Company receiving the said stock from the city of Albany, together with all dividends accruing or declared upon the same.

And with a view to such arrangement, the said three corporations are authorized to enter into any agreementsand contracts for the leasing of said New York and Albany Railroad to the said Canal Company, and the creating of a sinking fund for the retirement of the said bonds when falling due, and the indemnifying the city of Albany from liability thereupon, as may be proper and judicious for the above purposes.

§2. Nothing herein shall be construed to authorize the issue of any bonds by the city of Albany except upon the terms and conditions above described.

§ 3. This act shall take effect immediately.

THE

CANADA SOUTHERN

RAILWAY COMPANY

Are now offering through the undersigned the

REMAINING $5,000,000

OF THEIR

First Mortgage Sinking Fund

30 Years

7 PER CT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

THE ROAD runs from Buffalo to the Detroit River, connecting there with the Chicago and Canada Southern, now being built to Chicago, and will thereby form the

SHORTEST TRUNK LINE BETWEEN BUFFALO AND CHICAGO, or, in other words, will be the SHORTEST LINK IN THE GREAT LINE OF TRAFFIC BETWEEN THE EAST AND WEST, connecting the GREAT SYSTEM OF RAILWAYS which diverges from Buffalo, Toledo and Chicago.

A branch also runs from St. Thomas to St. Clair, where it forms connections with the various roads leading into the lumber and mineral regions of Michigan.

THE MAIN LINE from Buffalo to the Detroit River is 229 miles long. The branch from St. Thomas to St. Clair is 61 miles, and runs through the great Canada oil region.

OF THE entire line (290 miles) *Two hundred and twenty* miles are *graded, bridged, and ready for the superstructure.* The remaining 70 miles are under contract to be ready for the superstructure early in the Summer.

OF THE 800,000 ties required, 600,000 are on hand and the remainder are coming in daily.

SIX THOUSAND FIVE HUNDRED TONS of rails are delivered and paid for, and the balance contracted to be delivered early in the Summer, those for the main line being STEEL, all 60 lb. to the yard.

ALL the materials for the stations, and a part of the equipment are purchased.

TRACK LAYING will be begun as soon as the frost is out of the ground.

The entire line will be ready for business on or before Dec. 31, 1872.

THE ROAD is being built by the most experienced railroad men in the country, who are confident of a profitable business for it from the day of its opening.

THE ROAD will be

33 Miles Shorter than any other Road,

either BUILT or in contemplation between Buffalo and Chicago.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety six per cent.of the road IS STRAIGHT.

The Canada Southern (including its branch of 61 miles to St. Clair) and the Chicago and Canada Southern, with their light grades, direct alignment, being the shortest route between Buffalo and Chicago, will admit of the most speedy, economical, and safe transit attainable for both passengers and freight.

The road thus far has been built by cash subscriptions, and the proceeds of the bonds now offered will complete and fully equip it. The principal and interest of the bonds are payable either in New York, London, or Frankfort.

We have no hesitation in recommending the bonds AS A PERFECTLY SAFE as well as a PROFITABLE INVESTMENT.

LEONARD, SHELDON & FOSTER,

No. 10 Wall-St.

Schuylkill Navigation Co.

The dissatisfaction that has for some time existed as to the situation of the Schuylkill Navigation Company, there is reason to hope, was amicably adjusted at the adjourned meeting of the Company yesterday. Many of the stockholders would have preferred the proposition of the committee reported at the last previous meeting of putting the works into the control of the Reading Railroad Company, and a resumption of full dividends under the lease on the 1st of July next, but to this there were found some legal difficulties, which, added to the personal objections known to exist, rendered most advisable the conclusions arrived at yesterday, namely, that the Reading shall continue its annual payment of $10,392 for maintenance of organization, but that only $5000 of that sum after the current year shall be applied to that purpose, the remainder going towards the payment of claims; that the Navigation Company shall resume the payment of 50 cents per share semi-annually on the preferred and 25 cents semi-annually on the common stock—being two-thirds of the dividend named in the lease. The entire dividends annually paid by the Reading to the Navigation Co. are $80,556 on the preferred and $28,360 on the common stock—giving a total of $108,916. One-third of this sum being withheld from the stockholders amounts to $36,305, to which if is added the $5,392 withheld from the item of organization expenses, gives an aggregate of $41,169 to be applied annually to the extinguishment of the floating debt, which is put down at $104,000. Thus, under this arrangement, the floating debt will be paid off in two and a half years, while stockholders will regularly get two-thirds of their full dividends, and when the floating debt is paid the Company will thereafter have whatever excess there may be in the annual item of $10,392 organization charges, as the nucleus on which to grow a surplus. The committee having the matter in charge joined with loanholders, stockholders and officers in the compromise, and long-waiting stockholders may now safely be congratulated on once more finding their stock among the reliable investments. At the present price of 16 for the preferred shares they pay 6 per cent. on their cost, with the probability of 10 per cent. at the end of two and a half years.—*Phila. Ledger, April* 25.

Toledo and Sotuhwestern Railway.

The prospects of this new project, flattering as they have been from the outset, are constantly brightening, and at this date, are more gratifying than those of any new enterprise of the kind now occupying the attention of the Northwest. Meetings have been held at all the principal points between this city and Willshire, and the attendance and enthusiasm surpasses anything of the kind that has ever been witnessed in connection with a railroad project. This interest has been greatly hightened by the passage of the Boesel bill by the legislature, as it enables the people along the route to increase the amount which they feel willing to put into the road; and there is no doubt that the aid which will be voted coupled with the large individual subscriptions which have been made, will enable the company, as soon as it is formally organized, to commence work along the entire line of the Ohio Division. More than sufficient money has already been pledged to construct the road-bed, and at every point between Grand Rapids and Willshire, via Van Wert, the people are at work with an energy and zeal that promises an early completion of the enterprise.—*Toledo Blade.*

Journal of Railroad Law.

RAILROAD COMPANIES—BILL OF LADING GIVEN AFTER SHIPPER HAS PARTED WITH HIS GOODS DOES NOT CONTROL VERBAL AGREEMENT MADE AT TIME OF SHIPMENT.

The case of Bostwick *vs.* The Baltimore and Ohio Railroad Company, (45 N. Y., 712,) was an action brought to recover the value of sixteen bales (part of fifty-four bales) of cotton, shipped by the plaintiff from Cincinnati to New York. The cotton was conveyed by rail to Baltimore, and there shipped on steamers for New York. Thirty-eight bales went through safely to New York. The sixteen bales were never delivered. The District Court non-suited the plaintiff and the General Term affirmed it.

The following is the opinion of the Court delivered by

RAPALLO, J.—No evidence was introduced on the part of the defendant showing any limit to the authority of Cooke in making contracts for transportation by the line in question. That he was the agent of the defendant and the other companies for the making of such contracts, is shown by the facts, that a portion of the bales shipped under the contract made by him were carried through, and that the defendant received the freight for the entire distance on all the bales, according to the contract; that on the face of the bill of lading, of which the defendant claims the benefit the name of Cooke is printed as agent, at Cincinnati, of the line of transportation of which the defendant's road forms a part, which purports to be a through line, and that the bill is signed by him as such agent.

In the absence of any explanation by the defendant, these facts were at least *prima facie* evidence of the authority of Cooke to make the verbal contract testified to by the plaintiff.

There was no contradiction attempted of the evidence of the plaintiff that he made a verbal contract with Cooke for the transportation of the fifty-four bales through to New York by "all rail" and agreed to pay the all rail route. The goods were shipped under this verbal agreement, before any written contract or bill of lading had been tendered to the plaintiff.

The verbal agreement had been acted upon, and under it the plaintiff had parted with all control over his goods.

The rule that prior negotiations were merged in a subsequent written contract does not apply to such a case as this.

If the plaintiff had expressly assented to the terms of the bill of lading subsequently delivered to him, such assent would operate as a change of the terms of the contract originally made, and under which he had parted with his property. But after the verbal agreement had been consummated and rights had accrued under it, the mere receipt of the bill of lading, inadvertently omitting to examine the printed conditions, was not sufficient to conclude the plaintiff from showing what the actual agreement was under which the goods had been shipped.

In the case of Corey *vs.* The N. Y. Cent. R. R. Co., decided in April 1871, not reported, we held that conditions contained in a bill of lading, not delivered until after the shipment and loss of the goods, though before the loss was known, did not control the rights of the shippers.

The present case is analagous in principle to the one cited.

The goods having been shipped under an agreement that they should be carried "all rail" a loss occasioned by their being carried by sea is no excuse for their non-delivery to the plaintiff.

There was also some evidence of delay in sending forward the portion of the goods which was lost. This delay, unexplained, tended to show negligence on the part of the defendant.

It is true that there is no allegation of negligence in the complaint. But the complaint alleges the non-delivery of the goods, which was a breach of duty on the part of the defendant, unless excused.

The defendant sets up, in excuse, the conditions of the bill of lading, and the loss of the goods by the dangers of navigation. Even if the conditions were binding upon the plaintiff, it was competent to rebut this defence by showing that the goods became exposed to the danger by reason of the default of the defendant, and that if they had been forwarded with due diligence, they would not have been on board of the vessel which was lost. (Michaels *vs.* The N. Y. Cent. R. R. Co. 30 N. Y. 564.)

If there was negligence on the part of the defendant in sending forward the goods, the conditions of the bill of lading would not exempt the defendant from liability.

The judgment should be reversed and a new trial ordered, costs to abide the event.

So Ordered.

☞ The Le Roy (N. Y.) *Courier* of 26th ult., says: "We are gratified in being able to announce that John L. Mapes, chief, with his corps of engineers, is now engaged in re-running the line of the New York and Chicago Railway east from this village to the Genesee river. They have just finished the line west from Batavia to the Niagara river. We are informed that the whole line through the State has now been run, and the grades and curves are within the maximum as required by General Stewart, the chief engineer. The survey from Syracuse to Black Rock is probably as near a direct line as any road of equal length in the United States."

☞ The track on the narrow-gauge North and South railroad having been laid for one mile out from Columbus, Ga., the first locomotive trip was made over it on the 26th ult. Construction trains will hereafter run regularly. Track laying will be continued at the rate of about five miles per month.

☞ The Sandwich *Gazette* says that owing to the great increase in the price of iron, the extension of the Cape Cod Railroad, from Wellfleet to Provincetown, will be abandoned until another year. The grading of the road will be completed this summer as contracted.

☞ The estimated earnings of the Erie Railway for the week ending April 23 1872, were $434,175; against $351,108 for the corresponding period of 1871—an increase of $83,067. Total earnings since April 1, 1872, $1,213,709—an increase over the same time in 1871 of $210,545.

☞ The estimated earnings of the Kansas Pacific Railway for the second week in April were $73,397 62.

Atlantic and Gt. Western Railroad.

The following is a summary of a Report made to the New York Stock Exchange by the Committee on Securities;

	Miles.
Length of main line from Salamanca, N. Y., to Dayton, Ohio	388
Franklin branch	32
Hubbard	14
Silver Creek	6
Leases—Cleveland and Mahoning	67
Total number of miles	507

In addition to the above, the company own an interest in the lease of the Cincinnati, Hamilton and Dayton Railroad, 67 miles.

First mortgage seven per cent. bonds, dated December 16, 1871. Mature January 1, 1902. Principal and interest payable in gold in London. Interest payable January 1 and July 1, in London	$18,000,000
Second mortgage seven per cent bonds, dated December 16, 1871. Mature March 1, 1902. Principal and interest payable in gold in London. Interest payable March 1 and September, in London	12,000,000
Third mortgage seven per cent bonds, dated December 16, 1871; mature May 1, 1902; principal and interest payable in gold in London. Interest payable (when earned) May 1 and November 1, in London, but no interest is be paid unless earned above all expenses and additions to road	29,000,000
Total issue of bonds	$59,000,000
Capital stock, common and preferred, to be issued to creditors of the old company	50,000,000
Total capital	$109,000,000
Receipts for October, 1871	$397,934 74
Receipts for November, 1871	291,376 26
Receipts for December, 1871	357,102 67

Of the first mortgage bonds $9,500,000 are held by the company to redeem outstanding first mortgage bonds on the Ohio division, and the outstanding stock of the reorganization trustees, and $1,500,000 remain in the treasury of the company, leaving $7,000,000 to the creditors of the old company. Of the second mortgage bonds, $8,000,000 are issued to creditors of the old company, and the remainder are in the treasury.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.
NEW YORK, May 2, 1872.

THE ANNUAL MEETING OF THE SHAREholders of the Illinois Central Railroad Company for the election of directors and the transaction of other business will be held at the office of the Company, in the city of Chicago, on Wednesday, the 29th day of May instant, at 11 o'clock A. M.

The transfer books of the Company will be closed after the fourteenth instant until the first day of June next.

CAIRO AND FULTON RAILROAD CO.

First Mortgage, Sinking Fund

Land Grant Bonds,

Due 1891 in Gold.

INTEREST 7 PER CENT. GOLD, FREE OF GOVERNMENT TAX.

Payable January 1st and July 1st, in New York.

THE CAIRO AND FULTON RAILROAD IS the main artery for travel across the State of Arkansas. It is the continuation of the St. Louis and Iron Mountain Railroad, and under the same management. It will connect the St. Louis Rail roads and the Illinois Central Railroad with the International Railroad, the Southern Pacific Railroad and the Texas system of roads. Its length is 301 miles, and it deviates from a straight line but six miles. It has no grades over 15 feet to the mile. It passes through the most thriving counties and the Capital, Little Rock. The Land Grant of 1,926,400 acres "is one of the most extensive and valuable ever made to any road by Congress." The whole road is under contract for building, 52 miles are now operated, and tracklaying will go on at the rate of about half a mile a day until the connection of Little Rock with St. Louis is completed. The First Mortgage Bonds, $8,000,000, are the first lien upon the road, rolling-stock and lands, and are recommended as a safe investment. The officers are:

THOMAS ALLEN, (St. Louis) ..... President.
H. G. MARQUAND, (120 Broadway) .. Vice-Pres.
D. W. McWILLIAMS, (120 Broadway). Treasurer.
W. R. DONALDSON, (St. Louis) ..... Secretary.

NEW YORK DIRECTORS.

WM. H. SWIFT, HENRY G. MARQUAND,
WM. T. BLODGETT, JOHN H. SWIFT,
H. M. ALEXANDER, ALANSON TRASK.

The Union Trust Company, Trustee of the Bonds. Price 90 and accrued interest in currency. The Company reserves the right to advance the price at any time. Marketable securities received in exchange at full market rates and Express charges paid. Maps and pamphlets may be obtained on application to

H. G. MARQUAND, 120 Broadway.

TRAUTWINE'S

CIVIL ENGINEER'S POCKET-BOOK.

SECOND EDITION REVISED.

THE CIVIL ENGINEER'S POCKET-BOOK OF MENSURATION, TRIGONOMETRY, SURVEYING, HYDRAULICS, HYDROSTATICS, INSTRUMENTS AND THEIR ADJUSTMENTS, STRENGTH OF MATERIALS, MASONRY, PRINCIPLES OF WOODEN AND IRON ROOF AND BRIDGE TRUSSES, STONE BRIDGES AND CULVERTS, TRESTLES, PILLARS, SUSPENSION BRIDGES, DAMS, RAILROADS, TURNOUTS, TURNING-PLATFORMS, WATER STATIONS, COST OF EARTHWORK, FOUNDATIONS, RETAINING WALLS, etc., etc. In addition to which the elucidation of certain important principles of construction is made in a more simple manner than heretofore. By John C. Trautwine, Civil Engineer, 648 pages, with nearly one thousand illustrations, executed expressly for the work; forming, altogether, the most complete and concise work of the kind ever published.

The well-known ability of the Author, and his wide-spread reputation as a Civil Engineer, is a sufficient guarantee of the completeness of the work, and renders further recommendation unnecessary.

Bound in Morocco, Tucks, Gilt Edges. Price, $5.

[From the London Builder, Feb. 10, 1872.]

"This work elucidates some important principles in construction. It is a very valuable little book—a cyclopædia in miniature."

Kellogg Bridge Works.

The Kellogg Bridge Company are constructing in their works eight viaducts for the Long Island Railroad. One iron trestle bridge, 2,105 feet long, 8½ feet from centre to centre of chord, to be in spans of 30 feet, for the Wisconsin Central Railroad. Four bridges for the Philadelphia, Wilmington and Baltimore Railroad, the first to be 153 feet deck, double track; the second 61 feet deck, double track; the third 41 feet deck, double track; and the fourth 40 feet through, double track. A viaduct 600 feet long, and a bridge 110 feet long, in one clear span, for the Sodus Point and Southern Railroad. Three bridges for the Wellsboro and Lawrenceville Railroad, the first 47 feet, the second 73 feet, the third 80 feet, all single track. Six bridges for the Boston and Maine Railroad, double track; and are working on their contract for the iron work for the New York post office. They have several other contracts not yet commenced. The company have engaged the services of R. P. Tomassek as engineer, a gentleman of excellent reputation in his profession.

Philadelphia and Southern Mail Steamship Company.

The annual meeting of the Stockholders of this company was held in Philadelphia on the 1st inst. Mr. James C. Hand presided, and Mr. Charles S. Teal acted as Secretary. The annual report of the Board of Managers was read. It shows that during the year the steamers of the Company have made 18 round trips to Wilmington, N. C.; 48 to Savannah, Ga.; 19 to New Orleans, via Havana, and 2 direct to New Orleans. The balance to the credit of the Wilmington line is stated at $7049 72; the Savannah line, $44,659, 46, the N. Orleans line, $24,846 94. The whole receipts were $81,998 57. The expenses were $73,824, 34, leaving a net profit over all expenses of $8,174 23. Among the expenses were $62,587 38 for extraordinary repairs to the steamer Yazoo, and $25,293 68 for extraordinary repairs to the steamer Pioneer. The steamers are all in good condition except the Tonawanda, which will need a new boiler during the current year. The total assets of the company are given at $562,785 42, of which $475,804 23 is given as the value of four steamers. The liabilities are given at $562,785 42, of which $387,625 is capital stock.

The passenger traffic on the Savannah and Wilmington line has not been found to pay, and the accommodations therefor have been removed from the Pioneer and Tonawanda, and will be removed from the others. The New Orleans line, consisting of two steamers valued at $286,000, has fallen short of the expenses by $17,740 44. The suggestion has been made that the ships of the New Orleans line be withdrawn and placed on the Savannah line, and one of them be placed on the Wilmington line, to run in connection with the Pioneer.

The reports were accepted and ordered to be printed.

The meeting then went into an election for directors for the ensuing year, when the following were chosen: S. Flanagan, Henry Winsor, Winfield S. Russell, Richard Wood, William Massey, George N. Allen, James A. Wright.

☞ The Philadelphia *Ledger*, of 6th inst., reports the net anthracite coal tonnage for the week from all sources at 408,598 tons, and for the year 5,011,167 tons, against 1,617,520 tons to the same date last year, being an increase in the tonnage of anthracite coal of 3,393,647 tons. The production of bituminous coal for the week was 55,401 tons, and for the year 628,829 tons, against 521,430 tons to the corresponding time last year—an increase of 107,399 tons. The total production of all kinds of coal for the week was 463,999 tons, and for the year 5,639,989 tons, against 2,138,950 tons to corresponding time last year, showing an increase of 3,501,039 tons.

Soldiers' Homesteads.

Soldiers are making inquiries since the passage of the recent Soldiers' Homestead bill relative to the location, extent and character of the public lands, subject to the provisions of the law. The New York *Times* gives some valuable information on this subject:

The eastern part of Kansas and Nebraska has nearly all been taken up by actual settlers or by purchases by private entry.

* * * * *

In Colorado the most desirable localities for settlement will be found along the eastern base of the mountains, and in the valley of the Arkansas river, in the southern section of the Territory.

* * * * *

In Montana the most desirable localities for settlement will be found in the western section of the Territory, in the valleys of the Gallatin, Jefferson, Missouri, Wisdom, Blackfoot and Hell Gate rivers.

* * * * *

The Northern Pacific Railway Company examine each forty acres of land within the limits of their grant, including the Government sections as well as those granted to the Company, as fast as surveyed by the Government, with a view to ascertaining the quality of the soil, value and amount of timber and adaptability of tract for agriculture or grazing purposes. The notes of these examinations are systematically arranged, so that the agents of that Company may be enabled to give persons seeking to purchase lands of the Company, or settle upon the reserved sections belonging to the United States, such information as will enable them to select desirable tracts without being at the expense of going into the field to themselves make explorations.

In this new law there is a provision which provides that, instead of the five-years' actual residence that was required under the previous law, before a title could be given, the time any soldier was in the service is to be deducted from that time, and the residence required is made so much the shorter as a soldier was in the army. Thus, a soldier who served three years will have to remain upon his land but two years to secure a patent, he who served two years only three, and he who served one year four, and so on.

Lee and Hudson Railroad.

The Lee and Hudson Railroad Company was permanently organized on the 2d inst. by the election of the following board of directors: Elizur Smith, P. C. Baird and S. S. Rogers of Lee; George Towers of Hudson, John B. Hull and H. J. Dunham of Stockbridge, C. W. Kniffin of West Stockbridge, T. O. Hurlburt of South Lee, and John M. Seely of Housatonic. All but $15,000 of the capital stock ($200,000) has been subscribed. The Directors subsequently elected S. S. Rogers President, George Towers Vice-President, H. J. Dunham Clerk, and P. C. Baird Treasurer. H. J. Barker of South Adams was appointed engineer, to locate and lay out the road. The Directors will endeavor to effect an arrangement with the Housatonic Railroad, by which the new road may be laid upon their land and parallel to their track, for a portion of the route, thus forming a double track for the convenience of up and down trains.

Chesapeake and Ohio Railroad.

Mr. Whitcomb, chief engineer of the Chesapeake and Ohio Railroad, has just returned from a tour of inspection of the whole line of the road, and brings information that the work on the western division is going ahead finely. He asserts that unless some unforeseen difficulties occur—difficulties not apprehended—the cars will run through from Richmond to Huntington, on the Ohio River, by the first or middle of October. The embankment and the tunnelling are in such a state of forwardness that he does not hesitate to make this promise.

To morrow the work of laying the track from the White Sulphur Springs westward will begin. It is intended to continue this work with all possible speed at both ends until a junction is effected.

On Saturday morning the passenger train crossed the big fill at Lick run, just beyond Millboro', and thus we have an end of the temporary track at that place, which has so long been a bore to travellers.—*Richmond Dispatch, May* 6.

South Carolina Railroad.

The earnings of this road for the years ending December 31, 1870 and 1871, were as follows:

	1870.	1871.
From passengers....	$292,853 35	268,038 32
" freight.....	1,148,945 83	1,035,259 10
" mails.....	26,541 35	22,144 58
" incidentals....	3,680 06	.....
	$1,472,020 59	$1,325,442 00
Expenses viz:		
Conducting transp....	$316,528 06	$294,015 15
Motive power.....	216,838 71	221,392 80
Maintenance of way...	271,150 13	253,836 76
Maintenance of cars ..	58,651 88	60,715 37
General expenses.....	52,927 04	49,898 55
	$916,095 82	$879,858 63
Leaving net earnings..	$555,924 77	$445 583 37

Compared with 1870, the earnings of 1871 show a decrease of $146,578 59; with a decrease in expenses of $36,237 19—making a decrease in the net earnings of $110,341 40. The president in his report says:

The board of directors respectfully submit their report of the transactions of the company for the year 1871, and of its condition on 31st December last.

The report of the vice-president upon the operations of the road, and the condition of the property in his charge; of the auditor, upon the accounts; and of the treasurer, exhibiting the financial movements in his department during the year, are also submitted.

They are all executed in very full detail, and will be found interesting, and it is hoped satisfactory.

The income of the company, as represented in these statements, appears as follows, viz:

Earnings of road		$1,325,442 00
Expenses of road.....		879,858 63
Balance of earnings.....		$445,583 37
Add received from dividends on bonds and stocks.....		19,207 93
Balance of income.....		$464,791 80
Against this have been charged		
For interest sterling.....	$75,397 31	
" " domestic....	276,119 02	
Dividend No. 44.....	58,194 00	
		$409,710 83
and the balance transferred to profit and loss.....		$55,080 97

The board do not find any cause of discouragement in the comparison of earnings. For though the reports of competing lines, exhibiting much greater proportionate losses, demonstrate that we have not suffered from competition; and as well, that certain general causes have affected the railroad earnings of the South; your road, you will remember, for two months of the year, was almost isolated by a malignant fever, and cut off in a great measure from important sources of revenue by apprehensions as unintelligible as they were hurtful. When to this cause then, so sufficient of itself to account for the larger portion of your loss, are added the influence of the very low prices of produce prevalent the first half of the year upon the movement of general merchandise to the interior, and the diminished shipments of cotton to the sea—the result of a short crop—it would rather seem a matter of wonder that we have suffered so little. It is, however, not to be disguised, that yearly the profitable working of railroads becomes more difficult. The establishment of new lines not needed by the wants of the country, and not developing new and supporting sources of revenue, necessarily divides the business of the older companies; whilst their management, based upon principles not suited to our condition, is influencing rates of transportation to an extent that, in no long time, will be seriously felt by all. We deprecate, earnestly, a condition of things which we regard unwise and unnecessary; and have always been ready to unite with competing lines and act in a direction which will allow competition to benefit communities, without sacrificing railroad corporations; but failing that, we are equally ready and determined to protect ourselves and our connexions, and maintain our tonnage.

The "Reduction of Expenses," as above stated, is in a less ratio, in comparison with the expenses of '70, than the loss of earnings—the former being 3 95-100 per cent., and the latter 9 95 100 per cent. To a great extent, this may be briefly explained thus: It is not easy, if practicable at all, to accommodate expenses in some of the departments to a fluctuating and uncertain business, (and here is one of the greatest difficulties in the management of Southern Railroads,) but, when with a road put in good condition for legitimate business and manned to meet the demands of the public, a violent epidemic is encountered, whose duration cannot be determined, or influence measured—calculation is at fault and expenses grow.

At the earliest possible moment, the board is quite satisfied, proper efforts were made, to bring down the expenses of management, to just relations to the business requirements.

The exhibits of the treasurer contain no features worthy of special notice. The bond and general indebtedness remain without material change from the report twelve months since.

The issues and retirements of bonds during the year are very nearly equal, leaving the account substantially unchanged. The bills payable show a considerable increase, in comparison with the outstandings, at same date, in 1870, amounting to $452,581 34 and is accounted for by the treasurer as follows:

Purchase of Macon and Augusta Railroad Co. stock.....	$250,000 00
To retire due and past due bonds and interest	46,700 00
To provide for sterling Interest and fractional balances in exchange of sterling bonds.....	52,760 00
To retire certificates of Indebtedness.	9,985 00
To meet dividends, declared prior to 1871	56,200 00
Verdict in cases Gilbert and Central Railroad Co., Costs and professional services.....	19,509 00
Loans for general purposes.....	17,436 84
	$452,581 34

As before observed, the general result of the bond and other indebtedness of the company differs in no essential degree from that of the preceding years.

THE FOREIGN BOND DEBT,

which, since its maturity in 1866, has been in an unsettled and unsatisfactory condition, is now, the board are happy to report, in a position which relieves them from all anxieties connected with it. The history of this debt is doubtless familiar to the stockholders, as it has been the subject of comment in all the late annual reports. It is known to them, that shortly after the maturity in 1866, of the Old State Guaranty Bonds, the assent of the State to an extension of the guaranty and the acceptance by the foreign holders of new bonds, with such guaranty were obtained by the board. That in consequence of the refusal of the American holders to unite in the exchange, they were compelled to abandon further efforts to arrange this debt upon the plan first contemplated, and seek some other which would be satisfactory to all; and that after mature deliberation, a new issue of bonds, secured by a first, and only mortgage, was resolved upon, prepared and offered to the holders of the "Old Guaranty," as well as those of the "New," previously exchanged.

An arrangement in the judgment of the board so favorable to all, and particularly to the foreign bondholders, who had exchanged for "New Guaranty Bonds," was promptly accepted by the American bondholders, but, strangely enough, obstinately refused by the former, who seemed to entertain rooted prejudices in favor of what they denominated national guarantees over mortgage securities. To meet these objections and establish the superior character of our first mortgage bonds, the Hon. C. M. Furman went over to England in the summer of 1868, and remained there fourteen months. Mr. Furman succeeded so far as to obtain the assents of a number sufficient to fulfil the requirements of the mortgage deed, and justify the expectation of the board, that the exchange would proceed without further difficulty or delay. But the lapse of more than a year unaccompanied by any report of progress in the Exchange by our agents in London, could not fail to excite the lively apprehension of the board. To allay these, to ascertain what new causes of doubt or changes of purpose had arisen, and to forward the settlement of this business, with all practicable energy, the president of the company went over to London in July last, and remained there until the latter part of the following month. Upon his arrival in London, the president found that not a bond had been exchanged, and no progress whatever made beyond the "Assents" already referred to, and the force of those weakened by time, change of ownership, and other circumstances not requiring further notice here. It had become necessary that he should assume active control of the negotiation and proceedings in such direction as seemed most promising of success. With the friendly and valuable co-operation of Mr. Edward Horsley Palmer, actual exchanges of bonds to the amount of £235,000, were accomplished in a few weeks. This sum, since increased to $239,000, being considerably in excess of the four-fifths required to be exchanged before the mortgage deed was vitalized, there was no further occasion for the pressure of the

president in England. All the holders of any magnitude had exchanged—the residue held in small amounts, and by numerous parties was only expected to be sent in slowly, perhaps to no considerable extent, until the January dividend was called for. It is the impression of the president, that the major portion of the "Outstandings" will then be exchanged. He knows only of a single case of positive objection to our proposals, and does not believe that in that instance there is the slightest disposition to press, or of an unfriendly character.

The amount of new bonds to be given for the old and interest, as the exchange stood in October, was about £80,000; but as the exchanged bonds have not yet arrived, nor the statements of our London agents, with full particulars of later exchange, the accounts remain unchanged on the treasurer's books.

The board has already referred in this report to the influences exercised by unnecessary and unwise competition—closely allied to, but much more potential, than this danger to the earnings of our road, is another, which the board could no longer ignore, the joint product of ambitious corporations and superabundant capital. The rapid absorption and consolidation of contiguous roads, and their unmistakeable approach to the acquisition of our most important connections left the board no choice, however financially unprepared for such a policy—not to act was to submit to a circumscription of territory, so narrow as to be unable to afford support to the road, and to disastrous injury to the commercial interests of Charleston. They did not, therefore, hesitate to adopt the bolder, and, under the circumstances, the wiser course. They have purchased and acquired a controlling interest in the Macon and Augusta, and the Greenville and Columbia Railroads. The former secures to us the great benefit of free and cheap approach to the heart of a prosperous and growing section of Georgia. The latter retains to our road and chief city a connection, whose loss would inflict injury it would not be easy to estimate now. These movements have elicited such general, prompt and cordial expressions of approbation throughout the state, that the board feel little apprehension of dissatisfaction on the part of the stockholders. As the arrangement in connection with the Greenville Railroad was not completed until after the 1st of January, the particulars of the transactions do not appear in the accounts of the year.

In the matter of the Southwestern Railroad Bank, the board have to report, that in conformity with the resolutions of the stockholders, there have been paid over to the railroad company the following sums, which are duly credited in the treasurer's accounts to the bank.

Sterling bonds and coupons	$76,944 44
Amount received in case of bank versus Ryan	1,967 04
	$78,911 48

The board regret to report that during the past year, their valued associate H. H. DeLeon, Esq., under the influence wholly of private and personal considerations, resigned his seat.

Subsequently the vacancy was filled by the election of Mr. W. L. Ellis, of Macon, Georgia.

The board, under the influence of considerations suggested by the reduced business of the road, the high cost at which alone a large floating debt can be carried in a market such as ours, where money capital is so limited, and to a great extent by the necessity too plain to be mistaken, of using the means and credit of the company in pursuance of a bold and liberal policy, in meeting efforts to circumscribe our own territory and divert our business, concluded to postpone the further declaration of dividends for the present.

They believe this measure to be in the direction of the greatest benefit to the stockholders' permanent interest, and any considerable decline in the value of the shares, without question, temporary. An improving property, an increasing income, and a debt in process of reduction, are the greatest guarantees of sound and solid values, which, sooner or later, never fail to assert their claims to the notice of capital. Our confidence in the future of the road is unshaken.

We present to the stockholders the property of the company in high condition—in condition equal to any it has known in its palmiest days—inferior to none in the Southern country. It has stood the severest tests which we believe can be opposed to it, and we confidently anticipate for it a bright and prosperous future.

From the Report of the Treasurer we learn that the Domestic Bond Debt has been decreased during the year in the sum of $9,963 29. The issues have been:

For subscription to steamships	$13,500 00	
For past due bonds	5,500 00	
For bills payable and interest	121,500 00	
For cash—bonds sold	5,000 00	
For purchase of real estate	7,000 00	
		$152,500 00
The amount outstanding December 31, 1870, was		2,942,733 33
Total		$3,094,733 33
During the year there have been retired bonds to the amount of		162,463 29
Amount outstanding December 31, 1871		$2,932,270 04

Of the past due Domestic Bonds there remained unpaid December 31, 1871, $24,000.

Bills payable December 31, 1870, stood at		$316,340 89
And loan account at		108,250 39
Total		$424,590 78

During the year 1871 there were issued:

For loans	$682,600 00	
For past due bonds	114,000 00	
For coupons	12,000 00	
For rail iron	28,404 84	
For materials	8,200 57	
For purchase of stock in Macon and Augusta Railroad Company	250,000 00	
		1,095,205 41
		$1,519,796 19
Retired during the year		642,624 07
Amount of bills payable December 31, 1871		$877,172 12

The sterling bond debt has been slightly changed during the year by the exchange of a small portion for domestic bonds, and by bringing to the credit of the Southwestern Railroad Bank the amount of past due bonds and coupons which they held and which were transferred to this company.

The company have 43 locomotives, 21 first class passenger cars, 25 second class passenger, mail and baggage cars, 369 box, 14 stock and 103 platform, wood and coal cars. Miles run by locomotives with passenger trains, 245,748; with freight trains, 431,359; distributing 87,118; switching, 44,184—total, 808,409, against 840,910 in 1870—a decrease of 32,501. The tonnage for the year has been: westward, 107,845 tons; eastward, 120,219 tons—total, 228,064 against 238,919 tons in 1870, a decrease of 10,855. The number of passengers transported in 1871 was: first-class, 97,032; second-class, 100,830—total, 197,862, against 186,880 in 1870—an increase of 10,482.

The gross tonnage has been equivalent to 21,703,245 tons carried one mile, at an average rate of 4.77 cents. The number of passengers transported has been equivalent to 8,446,831 carried one mile, at an average rate of 3.17 cents. The average distance traveled by each passenger was 42.7 miles. The ratio of expenses to earnings in 1871 was 66.38; in 1870, 62.23.

The renewals of rails amount to 1,452 tons, equal to 16⅛ miles of track. There have also been used in repairs 60,750 lbs. spike, 1,000 chairs, 6,098 sets fish bars, 129,330 cross ties and 72 frogs.

The running expenses per mile for repairs, fuel and stores in 1871 was 13.12 cents, against 13.96 cents in 1870.

President.—WM. J. MAGRATH.

Directors.—Wm. J. Magrath, George A. Trenholm, L. D. DeSaussure, John Hanckel, Andrew Simonds, George W. Williams, Henry Gourdin, Francis J. Pelzer, B. H. Rice, James Conner, W. L. Ellis, William A. Courtenay, James P. Boyce, Daniel Tyler, James S. Gibbes.

Vice President.—ALFRED L. TYLER.

Treasurer.—J. T. WELSMAN.

Auditor.—J. R. EMERY.

☞ The prospects of the construction of the Baltimore and Drum Point Railroad are greatly improved by the favorable votes of Anne Arundel and Calvert counties on the question of subscribing to the stock of the company. Anne Arundel gives $200,000 and Calvert $100,000 which added to private subscriptions is sufficient to justify the commencement of work immediately, which we understand is to be done.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of April, were:

ENTERED FOR CONSUMPTION.

	1871.	1872.
Manufactures of wool	$1,997,015	$1,697,511
" cotton	1,879,016	2,041,486
" silk	2,836,649	2,222,776

1871-2	124,360,989

Great Western of Canada and Grand Trunk Railways.

How it is the Great Western of Canada pays not only all its debenture interest in full, its preferance dividends in full, and all charges prior to the claims of the ordinary shares, and after paying them yields dividend at 6 per cent. per annum, while the Grand Trunk barely pays its rents and equipment interest, giving neither dividend to its four preference stocks nor dividend on its ordinary stock, is a problem easy of solution. The Great Western of Canada is 359 miles long; the Grand Trunk 1,377. The Grand Trunk of Canada is thus nearly four times the length of the Great Western, but has the Grand Trunk four times the revenue of the Great Western of Canada? It has not double the latter's revenue. Last half-year the gross revenue of the Great Western of Canada was £527,351, and the Grand Trunk £935,341. It may be stated roughly that the annual gross revenue of the one is £1,000,000, and of the other £1,700,000. To be equal with the Great Western of Canada in gross revenue, mile for mile of line, the Grand Trunk should have nearer £4,000,000 than the £1,700,000 a year it now has. There is also at present a wide difference in the percentage at which the two lines are worked; for instance, last half-year the percentage of the working expenses of the Great Western of Canada, renewals included, was 59.47 per cent., of its receipts a fraction under 60 per cent., but the Grand Trunk's was 76.18 per cent. We do not however, think that this wide difference in working expenditure will long obtain. By and bye, but perhaps not before one or two years have elapsed, both concerns will be worked at about the same percentage. They may never have the same traffic per mile, but that is no reason why they should not be worked at about the same percentage of the receipts, following the rule of English lines.

Both these great Canadian railways adopt a like plan in charging their current revenues enormously for permanent way maintenance and renewals, the greater part of the charge being for renewals, that is, in a large measure, for *improvements*. The maintenance and renewals of the Great Western of Canada last half-year came to 20.04 per cent. of its revenue, and the Grand Trunk to 24.44 of which 16.48 per cent. was for renewals, only 7.96 being for ordinary maintenance—the Great Western of Canada do not make the distinction in their accounts between ordinary maintenance and renewals, but like the English Companies, lump them together. The distinction made by the Grand Trunk enables us to see that the ordinary maintenance of a railway in Canada is not very materially different from the cost in England. The Grand Trunk's is a shade under 8 per cent. (7.96 per cent.) That which is so vastly different is the renewal part of the expense. The Grand Trunk's renewals last half-year were as we have said, as high as 16.48 per cent., but then the Grand Trunk is rapidly improving their line, and charge the whole cost of steel rails against revenue. The maintenance and renewals charge of the Grand Trunk during the last six months amounted to nearly a fourth of their whole gross revenue!—to 24.44 per cent. of it—and the Great Western of Canada's was also extremely heavy (of their large revenue, too) namely 20.04. At some future time we expect both will fall to about 12 per cent., at the outside, as against 9 per cent. in England. The much greater severity of the Canadian climate will always render the maintenance and repairs of railways more costly than in England, but we should think that 12 per cent. would ultimately be a very ample figure for Canadian maintenance and renewals.

The capital cost per mile of the Great Western of Canada and Grand Trunk is not remarkably different. The Grand Trunk railway is nearly four times longer than the Great Western of Canada, and the capital of the former is about four times that of the latter. The capital expenditure of the Great Western of Canada up to January 31, 1872, is £5,985,563, but deducting the £250,000 investment in the Detroit and Milwaukee, and £248,989 spent on the Glencoe and Buffalo ("Air") line, we find the real capital cost of the Great Western of Canada to be about £5,500,000. The Grand Trunk's is above £20,000,000, or nearly four times the capital of the Great Western of Canada, as the Grand Trunk line is nearly four times the length of the Great Western of Canada, showing them to stand at abont the same cost per mile, and indeed the cost per mile of the Great Western of Canada will be somewhat materially lowered when the "Air" line is opened. In capital cost mile for mile there is hardly a straw's difference to split between them.

As to the rapid improvement railway property in Canada, as in America, is capable of undergoing, many of our readers must remember the time when Great Western of Canada £20‡ shares, now at a premium, were at £8 each, and carried no dividend! Perhaps no line on the whole continent of America has experienced more than the Great Western of Canada the severity of competition, and yet in the very teeth of it, and while the line was not so well appointed to meet and contend against its opponents as it is now, the Great Western of Canada has gained traffic, and from no dividend made a good one! Those who think that the Great Western of Canada is on the eve of meeting with a heavy fall from the competing line under formation, should study the history of the Great Western of Canada, and should also bear in mind that in America (and the Great Western of Canada is a link in a great line of railway from Chicago to New York) all is competition. There is no such thing as monopoly in that great, free, and rising country. Between the west and the east, in the direction of the flow of the great stream of traffic, there are several competing lines. It is the best equipped and the best placed which takes the largest share of the traffic, and as the Great Western of Canada will, when its "Air" line is made, occupy a most improved position on the face of the map, and possess equipments of almost unrivalled excellence, we do not think that the least apprehension need be entertained as to its future; indeed, we believe the future may be looked forward to with much hope. We could give several potent reasons why the Great Western of Canada will improve its rate of dividend, but as that rate is now fair, and nothing that we could say would influence it, we content ourselves with saying the Great Western of Canada will at least manfully hold its own.

We have not seen so rapid an improvement in the fortunes of the Grand Trunk as in those of the Great Western of Canada, but its traffic has, like the Great Western of Canada's increased greatly. We shall, however, in a few year's time, witness in the Grand Trunk a mighty change for the better. The very weight of that which now so heavily depresses it will add to its future buoyancy—to wit its heavy renewal charges for laying down steel rails, &c. The greater this charge now the lighter will be the maintenance charge in future, a future big with vast traffic increase. There is no great competing line to be formed against the Grand Trunk, on the other hand there are several most important feeders in store for it. There is the long Intercolonial railway which will complete its route to Halifax. There is the International Bridge to yield it additional traffic at its other end. There are numerous small offshoots which are being made in Canada at various points. And need we say, there is the general improvement which is so strikingly taking place in Canada in everything which constitutes the material wealth of a country, an improvement in which its great trunk line will of necessity participate. From all these sources the Grand Trunk will derive a large additional income, but although its revenue has already this year (1872) considerably increased over the corresponding period of last year, we are not so sanguine as to expect that 1872 will have an increase equal to 1871's. 1871's increase was so large, that in its second half it amounted to £141,601, while in the whole year 1871 it (the increase) was £212,916, averaging an increase of upwards of £4,000 per week all the year round! It is after 1872 that we must look for the great

increase the Grand Trunk is destined to acquire.
—*Herapath.*

Who made the First Anthracite Iron?

TRENTON, N. J., May 4th, 1872.

MR. EDITOR:

DEAR SIR: In the Journal of March 30th last, you published for me a communication containing some extracts from a work issued during the year 1841 by Prof. Walter R. Johnson, of Philadelphia, entitled "Notes on the use of Anthracite in the Manufacture of Iron; with some remarks upon its evaporative power."

My object in sending you that article was simply to defend my former partners and myself from the detractive remarks made in a letter written by David Thomas, Esq., of Catasaqua, Pa.; he having stated that our furnace at Mauch Chunk *chilled up in about one week after blowing in*: whereas it, in fact, was not allowed to chill up at any time.

Since my communication was written I have read two or three articles from different papers asserting that I was detracting from the credit due Mr. Thomas.

I have no wish to claim any "glory" rightfully belonging to Mr. Thomas, or to others. I merely, in defending the firm of B., G. & Co. from Mr. T's unjust remark, quoted authentic history published more than thirty years ago, and which has never been contradicted.

Some of the parties who have been writing in behalf of Mr. Thomas, but who evidently know little about the smelting of iron-ore, speak rather contemptuously of us because we operated with a small furnace.

In a matter which at that time was looked upon, even by Iron Masters, with much uncertainty as to its ultimate success, it would have been very unwise to go to the expense of building a large furnace at a cost of many thousands of dollars, when it was known that if the thing could be accomplished with a *small furnace, it could be done much more easily, and far more profitably, with a large one.*

We did not enlarge our furnace, as one writer has stated, but simply the hearth; and we blew it out because it was too small to work at profit; and not having funds with which to construct large works, we returned the property on which the furnace was built to the L., C. & N. Co., from whom it was leased, which was the last we had to do with it.

A few years afterward I was introduced to a gentlemen from Pottsville, who upon being informed by our friend that I had been connected with the Mauch Chunk furnace, asked if I recollected a committee of the citizens of Pottsville visiting us one night. I answered in the affirmative, and asked him what conclusion they arrived at. He replied—"We watched you all night long, and returned home with the full conclusion that it was a perfect success."

Within the past week or two I have seen one or two articles from the pen of Mr. Jas. Pott of Harrisburg, who claims for his father, Mr. John Pott, the credit of having been the first in this country to smelt iron-ore with anthracite. He dates his first success so far back as 1836 and '37. A more unpresuming and candid letter than that of Mr. Pott I have never read, and if we are to look outside of published history for the one who was first successful, I should say that without a doubt (so far as I can learn) Mr. John Pott, of the Manheim furnace, was the man.

Very respectfully yours,

F. C. LOWTHORP.

Railways in War.

A bit of news received by the cable, to the effect that the Carlists in Spain had destroyed a railway bridge at a certain point, is a forcible reminder of the important functions which railways perform in war.

It is but a few years since their influence in that connection began to be felt, and in that time they have served to change many of its features, and to effect materially the probabilities respecting results. Indeed the influence of steam navigation in the prosecution of hostilities was not fully demonstrated until the Crimean war. In that struggle, by means of steamships, Russia was placed almost as much at a disadvantage, as if she had been carrying on offensive operations upon French soil. The Crimea is a distant and semi-detached portion of the Russian Empire, and the Russian government, in recruiting and maintaining its armies there, was subject to nearly the same difficulties, and encountered nearly the same obstacles, that were encountered in the same work, a hundred years ago. With but few railways, and steam navigation to only a limited extent, the Russian armies were compelled to make long marches to reach the scene of action, and were provisioned and equipped only after incredible labor. The allies on the contrary, could despatch steamships to the very camps of their armies, and were thus practically nearer the place of hostilities than the Russian authorities. There is no doubt that these facts had a large influence in determining the result of that bitter contest. So much of the Russian strength and resources were exhausted in transportation that its efforts in the field were not equal to the emergency. The United States Government made use of steam navigation in the war against Mexico, but only to a very moderate extent, and probably with little influence upon the result.

The first use of railways in war upon an extended scale was during the hostilities between France and Austria in 1856. Then Napoleon III. seems to have conceived an idea of the important work in war which might be performed by railways in concentrating troops rapidly against a given point, to overwhelm the enemy while yet in the process of concentrating his forces. In the manner in which he carried out this idea, he developed not a little of the genius of his great uncle. In the terrible battles of Magenta and Solferino, his forces were so well in hand, and so perfectly equipped, that the Austrians, fighting with heroic bravery, but less favorably situated in other respects, were overborne at all points, and a contest which, under other circumstances, might have lasted for years, was concluded in a few months; a single compaign, with such facilities for waging war as the railways afforded, was sufficient to exhaust one of the combatants, or convince him that it were useless to resist the demands of him who had been successful in the first onset. The late war between Prussia and France was another occasion in which the railways of both countries played a most important part.

The late civil war in the United States brought home to us, in a most forcible manner, the uses of railways, not only in winning victories, but retreiving defeats and averting disasters. Steam River Navigation was hardly less conspicuous for the part which it then performed. After the defeat of the Federals at second Bull Run, and Lee had crossed into Maryland, nothing apparently kept the Federal Capital from falling into the hands of the Confederates, but the rapidity with which the railways enabled the Federal Government to place its reserve forces and some hastily raised troops on the field. After the defeat of Rosecranz at Chicamauga, the entire loss of his army, by surrender, was averted only by the transportation of two army corps by rail to his assistance, a work that took scarcely more days than it would have required months in the last century. In the prolonged struggle which preceded the fall of Richmond, for many months the principal fighting was to obtain on one side and keep on the other the possession of a miserable single track railway. Some of the best judged and most skillful work of the war was in operating and maintaining long railways in the face of the enemy. After the investment of Vicksburg by General Grant, a curious contest arose. The armies of the combatants were nearly equal. The Confederates put forth great efforts to raise the siege and relieve Pemberton. They had the railways of the South to aid them in the work. The Federals made equal efforts to reinforce General Grant. They had no railways, but controlled the Ohio and Mississippi Rivers. We all know what the result was. Men and munitions of war could be transported much more rapidly by steamboats than by steam cars. But this detracts nothing from the consideration which is due the railways. Such rivers as the Ohio and the Mississippi are few and far between, and the case of Vicksburg is an exceptional one. The South, with all the navigable rivers which remained within its limits, could make but little use of them in concentrating troops to meet emergencies; they did not run in the right direction.

But not only must railways continue to perform a conspicuous part in the prosecution of wars, and in shortening their duration, but their influence in preventing wars must grow with their growth. Promoting commerce and social intercourse, they serve to soften asperities and remove prejudices; and when a collision does occur, the care of the sick and wounded is promoted by the facilities which railways afford, and in many ways they mitigate the horrors of war.

With the work of re-constructing the Union, so far as it is constructed by politicians and Statesmen, it is neither our province nor our inclination to interfere; but we can tell them that the railway must perform no inconsiderable share of this work, if it is to be accomplished in spirit as well as in form. The appropriation of public lands and other resources of the General Government, to the bringing of the several sections of the country nearer together by means of railways, would be a most judicions proceeding, and one which idle clamor should not be permitted to obstruct. The railway is a great pacificator as well as a great warrior; through its agency good-will is extended and peace prolonged.

American Railroad Journal.

Saturday, May 11, 1872.

Stock Exchange and Money Market.

Money has been in active demand, on speculative account, but lenders have been generally quite prompt in meeting the requirements of responsible borrowers on call within the range of from 5@7, chiefly at 6@7 per cent. per annum, though toward the close some instances were reported of a trifling commission, added to the legal rate, having been paid by needy operators to have Stocks carried from one day to another. In the way of discounts, a freer currency has been noted for the better grades of commercial paper at from 7@10 per cent. per annum for strictly choice to very good notes, the offerings of which were not particularly urgent. The U.S. Sub-Treasury office reduced its coin balance 5⅛ millions and enlarged its currency reserve nearly 2⅛ millions. The city banks added to their loan and discount average about 3⅜ millions during the week, and again reduced their outstanding circulation slightly. The U.S. Sub-Treasury held a currency balance at the close of business on Tuesday of $7,542,725, and a coin reserve, of $65,211,640.

The city banks, in their latest return, show an increase of $1,880 of legal tender notes, $212,900 of specie, $8,497,300 of deposits, and $5,358,400 in their loan and discount averages, with a reduction of $30,200 in their item of circulation. The city bank exchanges, last week, averaged 123⅞, and thus far, this week, about 135 millions daily. The banks now hold $5,871,250 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $18,325,400, against $15,807,294 same time last year. The city bank deposits are now $211,636,400, against $227,581,540 week ending May 6, 1871. The legal tender reserve amounts to $47,707,400, against $62,099,211 same time last year. The circulation now stands at $27,809,800 against $31,394,305 same time last year. The loans are now $280,284,900 against $289,312,778 at this date last year.

The coin reserve of the city banks is now about 18⅜ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 47⅜ millions against $46,616,000 on the statement of February 10th.

The U. S. Sub-Treasury augmented its currency balance $2,057,929, and reduced its coin reserve $5,073,365 as the result of the week's business. The receipts of the office were $5,227,165 in coin, and $6,777,146 in currency; payments, $10,300,529 in coin, and $4,719,218 in currency. The office received $2,896,000 in coin or its equivalent, from customs; and disbursed $3 209,500, of coin interest.

Government revenues yielded more liberally, through the past week, particularly in the way of excises. The excises yielded within the week about 3½ millions, and thus far since July 1, 1871, $109,017,925. The customs at the port of New York last week were $2,732,750; at the outports, equal to about $900,000 all in coin, or coin certificates.

Under the May programme of the Treasury Department, Government proposes to sell during the month, Gold as follows: Thursday, May 9, $2,000,000; Thursday, May 16, $2,000,000; Thursday, May 23, $2,000,000; Thursday, May 30, $2,000,000. And to buy in Five Twenty bonds as follows: Wednesday, May 15, $2,000,000; Wednesday, May 22, $2,000,000; Wednesday, May 29 $2,000,000.

The Gold speculation has been more animated, and there has been increased buoyancy in the price influenced by the reports relative to the slow and unsatisfactory progress, of the arbitration negotiations, growing out of the *Alabama* difficulties, and also by the very large imports of foreign goods, especially as compared with the moderate outward movement of domestic produce, involving the probability of extensive exports of specie, to adjust the growing adverse trade balances. The past week's specie shipments were over a million and a half; on Tuesday, of this week the German steamship *New York* took out $750,000, and on Wednesday, the outflow reached $681,102.

The range of the price during the week has been from 112⅜@114 and the closing quotation on Wednesday was 113⅞@114 against 112½ the preceding Wednesday. The specie outflow, last week, was $1,538,259. The Gold Exchange Bank

clearances have averages about 46 millions per day during the week.

The customs demand for Gold last week, averaged $482,666 a day; thus far, this week, it has averaged $526,000 a day, or equal to a weekly aggregate of $3,156,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $15,471, and since Jan. 1, 1872, $638,110 against $2,994,181 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, has been $136,466,924 against $127,165,561 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to May 4, 1872, $67,943,970, against $74,260,231 same time in 1870-'71.

The export drain of specie was $1,538,259 last week, against $1,808,807 same week preceding year. The shipments since July 1, 1871, have been $33,275,268 against $66,846,001 same time in 1870-'71.

Foreign Exchange has been in fair demand and firmer, though closing less buoyantly. Bankers' sixty day bills on London closed on Wednesday at 109⅝@109⅞; sight bills on London, 110½@110¾.

The produce exports from this port, week ending with May 7, were to the currency value of $4,322,712.

Government securities have been moderately active at stronger prices, though the later dealings indicated rather less firmness.

U. S. sixes of 1881 closed here on Wednesday of the current week at 118@118⅛; U. S. Five-Twenties of 1862, (other than the bonds called in) ex May coupon 112¾@112⅞; U. S. Five-Twenties of 1864 at 112¾@113; U. S. Five-Twenties of 1865, 113¼@113½; U. S. Five-Twenties of 1865 consolidated, 115@115⅛; U. S. Five Twenties of 1867, 115⅝@115¾; U. S. Five-Twenties of 1868, 116¼@116½ U. S. Ten-forties at 110½@110¾; U. S. Fives of 1881 (Funding Loan) 111¼@111½; Six per cent. currency bonds, 116⅛@116¼.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	April 24.	April 30.	May 7.
Consols	92⅞	93¼	92⅞
U. S. 5-20's of 1862	*90	*90¼	89¾
U. S. 5-20s, 1865	*91¼	—	90¾
" 1867	93½	93½	93
" 10-40s	89½	—	88½
New Fives of 1881	—	90½	89¼
Erie	54	55½	53½

State bonds have been in more general demand yet irregular in price, closing rather more steadily.

There has been a good nquiry noted for railway bonds of the better class at well supported prices. Central Pacific Sixes have been in fair request at 102½@103. Chesapeake and Ohio have been selling rather more freely at 94 per cent. and accrued interest.

Railway and Miscellaneous share property, has been quite active, but more variable in price, showing decided weakness at the opening of the current week, but closing more firmly, on a more confident speculative movement.

The Central Pacific Railroad earnings in April reached the unusually liberal amount of $951,200, showing a gain of $230,271 on the earnings for the same month last year. The earnings of the road for the first four months of the current year have been $2,991,021 or $633,656 more than in the same period last year, and $1,061,651 more than for the same time in 1870.

In the Metal line, Ingot Copper has been more active but quoted easier in price; sales, 750,000 lbs. at 39c.@40c. English quoted at 34c.@34½c. Pig-iron has been inactive and irregular as to price, within the previous range; sales, 400 tons Eglinton and 200 tons American, on private terms. Iron Rails firm, but quiet. Wrought Scrap sold to the extent of 400 tons, on private terms, sales quoted as before. Of the recent movements in iron Messrs Bigelow & Johnston remark: "Pig-iron—A decided pause on the upward movement has taken place, accompanied by some little pressure and considerable irregularity. The month has been emphatically a dull one compared with its immediate predecessors. Opinions differ as to the prospects in the future, but we shall not be surprised to see considerable reaction. There is margin enough for a decline of $4@$5 per ton, and yet leave prices high. In Scotch Pig, business has been restricted by the small stock, and the fancy prices have been the order of the day. Our quotations are for such lots as are needed for immediate delivery; "to arrive" parcels are offered at lower figures. A vast quantity of iron is in process of shipment or engaged for this country. Undoubtedly a large proportion of this has long been sold for consumption, but there is enough left for resale to cause a weak feeling and some irregularity. This is not to be wondered at when it is remembered that cargoes are offering side by side, costing in the one case, perhaps $6@$7 per ton less than the other. Until the market absorbs all the parcels purchased at low figures, this irregularity in prices may naturally be expected. About one-half the month's import consists of Bessemer Pig. New Rails—Though prices have further appreciated, the business actually transacted has been of a light character, and the month closes on a very quiet market. Holders of foreign rails are very firm in view of the very great strength still manifested abroad. American Mills have also advanced their prices but are making comparatively few contracts. There is still too much discrepancy between the prices of material and those of manufactured iron. Old Rails—The arrivals have been liberal, but being mostly sold some time ago there has been no strain on the market. Prices close a very little higher than last month with, however, a very dull feeling, foreshadowing lower prices should there be the least pressure to sell. Scrap Iron—Prices are well maintained, though there has been no further advance." Lead and Spelter dull but steady. Pig-tin inactive and heavy, with Straits quoted at 39c.@39½c., gold; sales, 200 slabs. Tin Plates steady, though in but moderate request; sales, 1,000 boxes assorted Charcoal at $13 75; 1,000 boxes Charcoal Terne at $12 50, and 500 boxes Coke, 14x20, on private terms. Of Zinc, 15 casks Musselman Sheet sold on private terms.

General business has shown increasing animation, particularly in Breadstuffs, Petroleum, Tobacco, Hemp, and to some extent, in Provisions. Prices of Flour, Wheat, Rye, Oats, Butter, Eggs, Spirits Turpentine Petroleum and Tobacco showed more firmness. Cotton was in less confident demand. Middling upland cotton closed on Wednesday at 23⅝ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,576,915 bales, against 3,681,041 bales same time in the preceding year; exports 1,777,000 bales against 2,688,000 bales in the previous year; stock at the ports at latest dates, 272,255 bales against 453,982 bales same date 1871.

At the Live Stock Markets, Beeves have been in fair demand at 10@13¾ cts.; Veals dull at 4@7½ cts.; Sheep in good request at 4½@10½; Lamb 14@20 cts. Swine, dull at 4⅝@4⅞ cts. per lb., all live weight. The week's receipts were 8,287 Beeves, 3,276 Veal Calves, 11,075 Sheep and Lambs; and 30,040 Swine.

Foreign goods have been in fair demand at steady prices. The week's imports of foreign goods reached the amount of $10,190,875, including $2,966,339 of dry goods.

Ocean freights have been moderately active and quoted about steady as to rates. The demand has been mostly for room for Grain, Petroleum, Naval Stores, and Lumber.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Boston, Hartford and Erie, R. R., 9¾; do. 1st mort., 46⅝; do. guar. bonds, 52; North Missouri 1st mort., 92½; East Tenn., Va. and Ga. 1st mort., 93¼; Central of New Jersey 1st mort., 104⅞; Long Dock bonds, 97; Gt. HARVEY FISK. A. S. HATCH.

FISK & HATCH, BANKERS,
No. 5 NASSAU ST., New York.

In answer to inquiries for safe and desirable securities, we can recommend, to our friends and customers, only such investments as we have carefully examined and know to be reliable. Among these are:

THE BONDS OF THE CENTRAL PACIFIC RAILROAD COMPANY, originally negotiated by us, and which we now buy and sell at market rates. They are widely known and highly esteemed in all the principal money markets of the world, and are dealt in at all the principal Stock Exchanges in this country and Europe, where they take rank in popularity and market value next to the Bonds of the United States Government. Present market price, about 103.

THE SIX PER CENT. BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY, secured by a First Mortgage upon their great East and West Trunk Line of Railroad extending from the Chesapeake Bay to the Ohio River, forming a short, easy, low grade and economical through route for the transportation of Western products to the sea, and traversing the wonderful Iron and Coal deposits of Virginia and West Virginia, which are well known to be among the most important, varied, and valuable on this continent.

We have these bonds still for sale for account of the Company at 94 and accrued interest. Interest payable May and November. Principal and interest payable in Gold in the City of New York. Denominations $1,000, $500, and $100, Coupon or Registered.

Full information furnished on application.

We buy and sell GOVERNMENT BONDS; receive deposits, and allow interest on balances; make collections; issue Certificates of deposit, and do a general banking business.

FISK & HATCH.

☞ The estimated earnings of the Erie Railway for the week ending April 30, 1872, were $382,889; against $250,791 for the corresponding period of 1871—an increase of $132,098. Total earnings since April 1, 1872, $1,596,598—an increase over the same time in 1871 of $342,648.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Secured as they are by a first mortgage on the Road, Land Grant, Franchise and Equipments, combined in one mortgage, they command at once a ready market.

A Liberal Sinking Fund provided in the Mortgage Deed must advance the price upon the closing of the loan. Principal and interest payable in *gold*. Interest at eight (8) per cent. per annum. Payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000, $500 and $100, Coupon or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

Can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.,

BANKERS,

NO. 11 WALL STREET.

☞ The Bedford (Pa.) *Inquirer* hears of a proposal to extend the Western Maryland Railroad to connect with the Bedford and Bridgeport Railroad at Mount Dallas. Such a connection is calculated to give a valuable traffic to the Western Maryland Road, and to prove of at least equal value to the coal country of Bedford county in affording it a favorable market for its product.

☞ The Newburyport *Herald* says the Eastern Railroad Company are completing the Essex Branch Railroad, which was abandoned by the contractors last fall. The Company will build a fine depot at Essex, and propose erecting another at Woodbury's crossing, in East Hamilton, near the Essex and Hamilton lakes.

☞ The Hagerstown *Mail* says that the Western Maryland Railroad is finished to Hagerstown, and that on Wednesday last the first locomotive with a train of cars stopped at the Station on the Leitersburg pike.

☞ The North Carolina Railroad Company have declared a dividend of six per cent., payable on the 1st of July and January.

☞ The American Railroad Master-Mechanics' Association is to hold its annual meeting in Boston on the 14th inst.

Journal of Railroad Law.

RAILROAD COMPANIES—THE LAW OF ANOTHER STATE LIMITING THE AMOUNT OF DAMAGES FOR INJURIES THEREIN DOES NOT CONTROL THE COURTS OF NEW YORK IN CASE OF A PASSENGER TRAVELING BETWEEN TWO POINTS IN THE LATTER STATE.

The recent case of Dyke *vs.* The Erie Railway Company, and Floyd *vs.* The Same (45 N. Y., 113,) were actions to recover damages for personal injuries sustained by the plaintiffs while passing over the road of the defendant as passengers, caused by the negligence of the defendant's servants and agents.

Each of the plaintiffs purchased a ticket and took passage on the defendant's road, on the 14th of April, 1868, from stations in this State to the City of New York, and while in transit from the place of departure to the City of New York, and upon a part of the road in the State of Pennsylvania, sustained the injuries complained of. By an act of the legislature of Pennsylvania, passed April 4th, 1868, the recovery in actions then or thereafter instituted against common carriers or, railroad corporations for personal injuries is limited to $3,000. Upon the trials it was claimed in behalf of the defendant that the rights of recovery of the plaintiffs were controlled by this act. The claim was overruled by the judge, and each of the plaintiffs had verdicts in excess of the limit prescribed by the Pennsylvania statute; Dike for $35,000, at the Kings Circuit, and Floyd for $15,000 at the Tioga Circuit, and judgments upon such verdicts were affirmed at the Supreme Court at the General Terms. The defendant has appealed to this court.

The following is the opinion of the court delivered by

ALLEN, J.—The only question to be considered upon this appeal is as to the effect of the Pennsylvania statute, limiting the amount of the recovery in actions of this character. It is conceded that the statutes of one State are not obligatory upon the courts of other States; that, they have not, *proprio vigore*, the force of law beyond the limits of the State enacting them. But it is sought to bring these actions within the operation and effect of the foreign statute upon the ground that the contracts were made with reference to the laws of that State, and the causes of action arose there.

The generally received rule for the interpretation of contracts, is that they are to be construed and interpreted according to the laws of the State in which they are made, unless from their terms it is perceived that they were entered into with a view to the laws of some other State. The *Lex Loci contractus*, determines the nature, validity, obligation and legal effect of the contract, and gives the rule of construction and interpretation, unless it appears to have been made with reference to the law and usages of some other State or government, as when it is to be performed in another place, and then in conformity to the presumed intention of the parties, the law of the place of performance furnishes the rule of interpretation. (Prentiss *vs.* Savage, 13 Mass., 20; Medbury *vs.* Hopkins, 3 Conn., 472; Everett *vs.* Vendryes, 19 N. Y., 436; Hoyt *vs.* Thompson's Exr. id, 207; Curtiss *vs.* Leavitt, 15 N. Y., 227.)

The contracts before us were made in the State of New York and between citizens of that State. The plaintiffs were actual inhabitants and the defendant was a corporation existing by the laws of that State. The contracts were for the carriage and conveyance of the plaintiffs over the road of the defendant between two places in the same State, to wit: from stations on the line of the road in the western part of the State to the city of New York. The duty and obligation of the defendant in the performance of the contracts commenced and ended within the State of New York.

Although the route and line of the defendant's road between the places at which the plaintiffs took their passage and their destination, passed through portions of the States of Pennsylvania and New Jersey, by the consent of those States respectively, the parties cannot be presumed to have contracted in view of the laws of those States. The contracts were single and the performance one continuous act. The defendant did not undertake for one specific act, in part performance in one State, and another specific and distinct act in another of the States named, as to which the parties could be presumed to have had in view the laws and usages of distinct places. Whatever was done in Pennsylvania was a part of the single act of transportation from Attica or Waverly in the State of New York to the city of New York, and in performance of an obligation assumed and undertaken in this State, and which was indivisable. The obligation was created here and by force of the laws of this State, and force and effect must be given to it, in conformity to the laws of New York.

(Carnegie *vs.* Morrison 2 Metc., 381, Per Shaw Ch. J.) The performance was to commence in New York and to be fully completed in the same State, but liable to breach, partial or entire in the States of Pennsylvania and New Jersey, through which the road of the defendant passed; but whether the contract was broken, and if broken, the consequence of the breach should be determined by the laws of this State. It cannot be assumed that the parties intended to subject the contract to the laws of the other States, or that their rights and liabilities should be qualified or varied by any diversities that might exist between the laws of those States and the *Lex Loci contractus*. The case of the Peninsular and Oriental Steam Navigation Co. *vs.* Shand (3 Moore's P. C. 272) is somewhat analogous in principle to the case at bar. A passenger, by an English vessel belonging to an English company, from Southampton to Mauritius, *via* Alexandria and Suez, sustained a loss of his baggage between Alexandria and Mauritius, and it was held that the contract for the passage was to be interpreted by the law of England, the place where the contract was made.

The Supreme Court at Mauritius had held that the contract was governed by the French law in force in Mauritius, and refused to the defendants the benefit of an exemption from liability for loss of property to which they were entitled by the terms of the contract as interpreted by the laws of England and the judgment was reversed, upon appeal, by the privy council.

Whether the actions are regarded as actions of assumpsit upon the contracts or as actions upon the case for negligence the rights and liabilities of the parties must be judged by the same standard. The form of the action concerns the remedy but does not affect the legal obligations of the parties. On either form of action the liability of the defendant, and the rights of the plaintiffs, are based upon the contracts. The defendant owed no duty to the plaintiffs, except in virtue of the contracts and the obligations for the violation and breach of which, an action may be brought are only co-extensive with the contracts made. It follows, that the law of Pennsylvania cannot enlarge or restrict the liability of parties to contract, which for its validity, effect, and construction, is subject to the laws of New York.

The damages to which a party is entitled, upon the breach of a contract, or violation of a duty growing out of a contract, and the rule and measure of damages pertains to the right and not to the remedy. It is matter of substance, and the principal thing sought, and not a mere incident to the remedy for the principal thing. It is conceded, that the statutes of Pennsylvania have no intrinsic extra territorial force, and that they bind only within the jurisdictional limits of the State. Upon principles of comity, effect is sometimes given by the courts of a State to foreign laws. In matters of contract, such effect is accorded to statutes of other States, only to carry out the intent of and do justice between the parties, never to qualify or vary the effect of a contract between parties not citizens of such foreign State, or subject to its laws, and not made in view of the laws of such State. Effect will not be given by the courts of a State to foreign laws in derogation of the contracts, or prejudicial to the rights of citizens. (Liverpool, Brazil, &c., Steam Navigation Company *vs.* Benham, 2 Law Rep. P. C. Cases, 193; Hale *vs.* N. J. St. Nav. Co., 15 Conn., 539; Arnott *vs.* Redfern, 2 Carr & Payne, 88; Gale *vs.* Eastman 7 Met. 14.) The actions are not given by the laws of Pennsylvania. They grow out of the contracts and the duties resulting from the contracts, and are given by the common law, and therefore, the laws of another State in an action brought here cannot prescribe the measure of damages, or limit the liability of the parties.

The judgments should be affirmed.

Judgments affirmed.

☞ The stockholders of the Schuylkill Navigation Company, at Philadelphia, on the 24th ult., adopted resolutions that henceforward semi-annual dividends of 50 cents per share on the preferred stock, and 25 cents per share on the common stock, be paid out of the rental accruing under the lease of the company's works to the Reading Railroad Company.

☞ W. H. Sheridan has been appointed General Superintendent of the St. Joseph and Denver Railroad, in place of Mr. J. F. Barnard, resigned. The track of this road is now laid beyond Meridian, a town located near the confluence of the Big Sandy and the Little Blue rivers. There are now about one hundred and seventy miles of completed and equipped track, and it is continually being stretched out at a rapid rate.

☞ The Wathena *Reporter* says that "surfacing and spiking of the Wathena and Doniphan railroad is about completed, and will be turned over to the purchasers, Tanner & Co., of New York, next week. Then look out for the express train for Atchison."

Bessemer Steel Rails.

Prominent among the imports lately reported at the custom-house are the extensive importations made by the Baltimore and Ohio Railroad Company of Bessemer steel rails, purchased from the best manufacturers in England. Of these there have arrived here, within the past fortnight, 13,606 rails, weighing three thousand eight hundred and fifty-four tons, or sufficient to lay about 40 miles of track, the duties on which amounted to over one hundred and seven thousand dollars, gold. A large portion of the double track of the main line of the Baltimore and Ohio road and its Washington Branch is already laid with steel rails. The entire length of the Washington Branch, it is understood, will soon be thoroughly perfected in this respect, thus rendering it one of the finest roads in the country. The work of substituting steel for iron rails on the main line will also continue, until its whole length is relaid with this superior metal.—*Balt. Sun.*

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, April 30, 1872.

GEO. S. BOUTWELL,
Secretary of the Treasury.

☞ The South Branch (W. Va.) *Intelligencer* says that the committee appointed by the stockholders of the South Branch Railway Company, Colonel Robert White, president, and John C. Heiskell and Isaac T. Brady, directors, have returned from their mission to Baltimore and New York. They report the prospects and present condition of negotiations in regard to this highly important improvement among parties and builders as very favorable.

☞ The Frederick *Herald* says that the right of way for the track of the Frederick and Pennsylvania Line Railroad has been granted through Frederick. The engineer of the Baltimore and Ohio Railroad was brought into consultation looking to a connection with that road. This has been the obstacle in the way heretofore, and now, as it has been removed, the work of laying the track between Frederick and the Monocacy will be pushed forward without further delay.

☞ The Richmond (Va.) *Dispatch* says that Maj. A. H. Perry, general superintendent of the Chesapeake and Ohio Railroad, who is now on a tour of observation of the road, contemplates a fast line of coaches between Gauley and the White Sulphur, to make the trip through by daylight about the 20th of May.

THE

CANADA SOUTHERN RAILWAY COMPANY

Are now offering through the undersigned the

REMAINING $5,000,000

OF THEIR

First Mortgage Sinking Fund 30 Years

7 PER CT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

THE ROAD runs from Buffalo to the Detroit River, connecting there with the Chicago and Canada Southern, now being built to Chicago, and will thereby form the

SHORTEST TRUNK LINE BETWEEN BUFFALO AND CHICAGO, or, in other words, will be the SHORTEST LINK IN THE GREAT LINE OF TRAFFIC BETWEEN THE EAST AND WEST, connecting the GREAT SYSTEM OF RAILWAYS which diverges from Buffalo, Toledo and Chicago.

A branch also runs from St. Thomas to St. Clair, where it forms connections with the various roads leading into the lumber and mineral regions of Michigan.

THE MAIN LINE from Buffalo to the Detroit River is 229 miles long. The branch from St. Thomas to St. Clair is 61 miles, and runs through the great Canada oil region.

OF THE entire line (290 miles) *Two hundred and twenty* miles are *graded, bridged, and ready for the superstructure.* The remaining 70 miles are under contract to be ready for the superstructure early in the Summer.

OF THE 800,000 ties required, 600,000 are on hand and the remainder are coming in daily.

SIX THOUSAND FIVE HUNDRED TONS of rails are delivered and paid for, and the balance contracted to be delivered early in the Summer, those for the main line being STEEL, all 60 lb. to the yard.

ALL the materials for the stations, and a part of the equipment are purchased.

TRACK LAYING will be begun as soon as the frost is out of the ground.

The entire line will be ready for business on or before Dec. 31, 1872.

THE ROAD is being built by the most experienced railroad men in the country, who are confident of a profitable business for it from the day of its opening.

THE ROAD will be

33 Miles Shorter than any other Road,

either BUILT or in contemplation between Buffalo and Chicago.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety six per cent. of the road IS STRAIGHT.

The Canada Southern (including its branch of 61 miles to St. Clair) and the Chicago and Canada Southern, with their light grades, direct alignment, being the shortest route between Buffalo and Chicago, will admit of the most speedy, economical, and safe transit attainable for both passengers and freight.

The road thus far has been built by cash subscriptions, and the proceeds of the bonds now offered will complete and fully equip it. The principal and interest of the bonds are payable either in New York, London, or Frankfort.

We have no hesitation in recommending the bonds AS A PERFECTLY SAFE as well as a PROFITABLE INVESTMENT.

LEONARD, SHELDON & FOSTER,
No. 10 Wall-St.

Milwaukee and Northwestern Railroad.

We understand that negotiations are pending between the Chicago and Northwestern Road and the Milwaukee and Northwestern Company which will, without doubt, enable the latter company to secure the early completion of their road from this city to Fond du Lac. As we understand it the Chicago and Northwestern will build their road from Lodi into this city, strike the route of the Milwaukee and Northwestern near the town of West Bend, in Washington county, and running from there upon the line of the Milwaukee and Northwestern into this city. It is understood that the Chicago and Northwestern propose to build the short line from Fond du Lac to its junction with the Lodi road.

It is impossible to estimate the advantages to be gained by Milwaukee in the construction of this road, as it will give a new railroad connection with a county hitherto shut out from us completely, and enable the people of Southern Minnesota and Dakota to take advantage of the Milwaukee wheat market which is always a shade better than the Chicago market, while it saves nearly a hundred miles of lake transportation for eastern freight. At the same time it secures us the benefit of the large Fond du Lac trade which has hitherto sought the city of Chicago. This with the connection to be made with the Wisconsin Central, by the northern road and the St. Paul road with Duluth, will give Milwaukee more than a thousand miles of new railroad facilities which she has so long needed, and enable her to become in truth the commercial metropolis of the Northwest.—*Milwaukee Wisconsin.*

☞ The Harrisonburg (Va.) *Enterprise* says that work is now being vigorously prosecuted on the Valley Railroad between Harrisonburg and Staunton. As soon as practicable the permanent route will be staked off between Greenville, in Augusta county, and Buchanan in Botetourt County. The 75-foot grade through the centre of Rockbridge, making Lexington a point, has been attained after great difficulty, and the company is now in condition to comply with every phase of the law and clinch the Rockbridge subscription.

☞ Wm. Brace, superintendent of the Keystone Coal Company, whose lands lie in Somerset County, Pa., about three miles south of Myers's Mills, is authority for the statement that that company has concluded to build a narrow-gauge railroad from a point upon their coal lands to intersect the Pittsburg and Connellsville Railroad at Hoblitzell's Fire Brick Works, about two miles east of Myers' Mills. The survey for the route is now being made by Mr. Brace, and will be about five miles in length.

☞ The Lexington *Press* says that the work on the Big Sandy Railroad is progressing finely, Seven miles of the line from the city have been completed, and work has been commenced on the eighth section. The grading and trestle work have been finished.

☞ It is stated that the Alabama and Chattanooga Railroad—which was purchased at the sale in Montgomery on Monday by an agent of the State of Alabama, for $312,000—has been sold by the State to the Southern Security Company for the same price.

☞ The Erie Canal will open on the 15th inst. Boats are already gathering at Albany and West Troy and receiving cargoes.

☞ The Chicago, Dubuque and Minnesota Railroad has reached Lansing, Iowa, ninety-six miles from Dubuque.

Brooklyn Steam Transit Co.

A meeting of the corporators of this company was held on the 6th inst. Under the act incorporating the company, which was passed in 1871, they are authorized to construct a railroad from Fulton Ferry to Flatbush. It will run under the East River Bridge to the corner of Sands and Washington streets, near the bridge terminus, and then through Washington or Adams to Fulton, across Fulton and Boerum to Schermerhorn, down Schermerhorn to Flatbush Avenue, then tunneling the high hill which is encountered, it will come out at the town of Flatbush beyond Prospect Park. A Committee of nine was appointed by the chair to digest and prepare plans of the work proposed, to be submitted to a future meeting.

☞ The Chicago, Danville and Vincennes Railroad Company is pushing forward the branch to the Indiana Coal Mines. A part of the iron has already been received. The engineers find that the steepest grade will be but twenty-six feet to the mile. The new branch will bring the famous block coal region of Indiana fifty miles nearer Chicago than now, and is expected to cheapen the coal at least $1 per ton.

☞ The track of the St. Joseph and Denver Railroad is now completed some ten miles up the Big Sandy, about sixty-four miles west of Maryville, making nearly one hundred and eighty miles of completed track. The road will certainly be completed to a connection with the Union Pacific at Fort Kearney by the first of November, and probably in September.

☞ The Bedford (Pa.) *Inquirer* hears of a proposal to extend the Western Maryland Railroad to connect with the Bedford and Bridgeport Railroad at Mt. Dallas. Such a connection is calculated to give a valuable traffic to the Western Maryland road, and to prove of at least equal value to the coal country of Bedford county in affording it a favorable market for its product.

☞ A railway tunnel is now being constructed under the river Mersey, at Liverpool, to connect that city with the opposite city of Birkenhead. It will be about three miles in length, about one-third will be under the bed of the river, and it will connect nearly all the railways of England with the Birkenhead docks.

☞ At a meeting of the stockholders of the Cincinnati, Sandusky and Cleveland Railroad Company, held at Sandusky April 25, a stock dividend of 10 per cent. on the common stock was voted, payable to holders of stock at the close of business on the 20th of April.

☞ The St. Louis *Register* says that GAYLORD & Co. have under consideration the erection of two blast furnaces at Sandusky, and the removing of their rolling mill to that place from Portsmouth Ohio.

☞ The survey for the Kennebec and Wiscasset Railroad from Whitefield to Augusta has been commenced.

☞ Saline County, Arkansas, has voted, 282 against 187, to take $50,000 of stock in the Cairo and Fulton Railroad.

☞ The first bridge across the Arkansas River has been completed at Arkansas City, Kansas.

☞ The Petersboro' (N. H.) Railroad, better known as the Wilton Extension to Greenfield, has been leased to the Nashua and Lowell railroad for twenty years. The lease guarantees the stockholders six per cent. free of taxes. An assessment of twenty-five per cent. upon the subscriptions was made. Gen. Geo. Stark was appointed agent for the construction of the road, which is to be completed and delivered to the Nashua and Lowell road on or before April 1, 1873. Ground will be broken about the first of June.

☞ The Essex Company, of Lawrence, Mass., returned to its stockholders on the 18th ult., $30 per share of capital, reducing the par from $80 to $50, and capital from $800,000 to $500,000. The original capital was $1,500,000; reduced in 1858 to $1,084,200 by cancelling 4158 shares, and again to $1,000,000 in 1861 by 842 shares. In April, 1869, twenty per cent of capital was returned, reducing it to $800,000 and par from $100 to $80.

☞ The Maysville (Ky.) *Republican* says that the surveyors on the Kentucky and Great Eastern railway are vigorously at work along the river line below this city. They have purchased a covered flatboat and made their headquarters on it. It will require about two months to run the line from this point to Covington. C. B. Child, the engineer in charge, speaks encouragingly of the enterprise, and thinks the road will be built.

☞ At the recent annual meeting of the stockholders of the Waverly Land Co., the Treasurer reported that the cash assets amounted to $13,000, and that the company was free from debt with 5,500,000 square feet of land still unsold. The latest sales of land have been made on the basis of from six to ten cents per foot.

☞ A meeting of the incorporators of the Winona and Southwestern Railroad Company was held in Winona, recently, when the following officers of the company were elected: President, Wm. Mitchell; Vice-President, E. D. Williams; Secretary, Thomas Simpson; Treasurer, M. G. Norton.

☞ The St. Louis *Register* says that "arrangements have been practically completed for the Illinois Central's assuming control of McComb's New Orleans, Jackson and Great Northern road, and that, before winter sets in, the arrangement, which includes the conversion of the whole line into a first-class road, will go into effect."

☞ The train from Richmond, on the Richmond and Potomac Railroad, ran through to Quantico for the first time on the 1st inst. This makes the distance to be travelled by water on this route fifteen miles less than when the connection took place at Aquia Creek.

☞ The Missouri, Kansas and Texas railroad is nearly completed to the Red river, where it will connect with the Texas Central railroad, building north from Galveston.

☞ Surveyors are staking out the route for the Albany, Boston and Montreal railroad between Pine Plains and Chatham.

☞ The Franklin Mining Company will pay a dividend of $1 per share, on 20,000 shares, on the 15th inst.

Tea and Coffee.

The bill repealing the customs duties on tea and coffee, which has been signed by the President, goes into effect on July 1st, 1872. During the last fiscal year, ending June 30th, 1871, there were imported into the United States 317,992,048 pounds of coffee, valued at $30,992,869, and 51,364,919 pounds of tea, valued at $17,254,617. During the six months ending December 31st, 1871, there were imported into the United States 149,108,479 pounds of coffee, valued at $16,695,621, and 23,180,468 pounds of tea, valued at $8,842,683. The duties at present imposed on these articles are three cents a pound upon coffee, and fifteen cents a pound upon tea. By this measure the revenue will be reduced from eighteen to twenty millions of dollars. Tea and coffee were admitted free of duty from 1842 to 1861. By the act of August 5th, 1861, duties were imposed upon these articles in order to raise the revenue necessary to carry on the war for the suppression of the rebellion.

☞ The New York, Westchester and Boston Railroad, the New York and Croton River Railroad and the Pelham and Port Chester Railroad have been consolidated under the name of the first named railroad, for which the surveys have been completed, lines located and map filed. The officers are now negotiating for the right of way. The southern terminus will be at Port Morris.

☞ The new iron steamship recently built at Wilmington, Delaware, is pronounced by competent judges superior in many respects to the best Clyde built steamers. She is built of American iron and by American mechanics.

☞ President Geo. S. Richardson, of the Worcester Railroad, has secured in Philadelphia sufficient additional subscriptions to the stock of the company to complete the enterprise. Cars will be running to Snow Hill in time for the strawberry crop.

☞ The Rome *Courier* says the work on the Rome and Memphis Branch Railway is progressing very favorably. Two miles, which includes the heaviest work, have already been graded.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.
NEW YORK, May 2, 1872.

THE ANNUAL MEETING OF THE SHAREholders of the Illinois Central Railroad Company for the election of directors and the transaction of other business will be held at the office of the Company, in the city of Chicago, on Wednesday, the 29th day of May instant, at 11 o'clock A. M.

The transfer books of the Company will be closed after the fourteenth instant until the first day of June next.

L. A. CATLIN, Secretary.

THE WATSON MANUFACTURING CO.

PATERSON, NEW JERSEY.

CAIRO AND FULTON RAILROAD CO.

First Mortgage, Sinking Fund

Land Grant Bonds,

Due 1891 in Gold.

INTEREST 7 PER CENT. GOLD, FREE OF GOVERNMENT TAX.

Payable January 1st and July 1st, in New York.

THE CAIRO AND FULTON RAILROAD IS the main artery for travel across the State of Arkansas. It is the continuation of the St. Louis and Iron Mountain Railroad, and under the same management. It will connect the St. Louis Railroads and the Illinois Central Railroad with the International Railroad, the Southern Pacific Railroad and the Texas system of roads. Its length is 301 miles, and it deviates from a straight line but six miles. It has no grades over 15 feet to the mile. It passes through the most thriving counties and the Capital, Little Rock. The Land Grant of 1,926,400 acres "is one of the most extensive and valuable ever made to any road by Congress." The whole road is under contract for building, 52 miles are now operated, and tracklaying will go on at the rate of about half a mile a day until the connection of Little Rock with St. Louis is completed. The First Mortgage Bonds, $8,000,000, are the first lien upon the road, rolling-stock and lands, and are recommended as a safe investment. The officers are:

THOMAS ALLEN, (St. Louis) ..... President.
H. G. MARQUAND, (120 Broadway) .. Vice-Pres.
D. W. McWILLIAMS, (120 Broadway). Treasurer.
W. R. DONALDSON, (St. Louis) ..... Secretary.

NEW YORK DIRECTORS.

WM. H. SWIFT, HENRY G. MARQUAND,
WM. T. BLODGETT, JOHN H. SWIFT,
H. M. ALEXANDER, ALANSON TRASK.

The Union Trust Company, Trustee of the Bonds. Price 90 and accrued interest in currency. The Company reserves the right to advance the price at any time. Marketable securities received in exchange at full market rates and Express charges paid. Maps and pamphlets may be obtained on application to

H. G. MARQUAND, 120 Broadway.

Francis C. Bowen,

PATENT LAWYER,

No. 7 Warren Street,

NEW YORK.

Patentees, and others can secure the professional services of Mr. Bowen, in procuring United States and Foreign Patents, and conducting Patent suits for INJUNCTIONS and INFRINGMENTS in the U. S. Courts.

Address or call as above.

RAILROAD IRON.

THE UNDERSIGNED HAVE FOR SALE 1,060 tons 30-pound fish pattern rails, now on the way to New Orleans.

PERKINS, LIVINGSTON & POST,
No. 31 New-St., New York.

TRAUTWINE'S

CIVIL ENGINEER'S POCKET-BOOK.

SECOND EDITION REVISED.

THE CIVIL ENGINEER'S POCKET-BOOK OF MENSURATION, TRIGONOMETRY, SURVEYING, HYDRAULICS, HYDROSTATICS, INSTRUMENTS AND THEIR ADJUSTMENTS, STRENGTH OF MATERIALS, MASONRY, PRINCIPLES OF WOODEN AND IRON ROOF AND BRIDGE TRUSSES, STONE BRIDGES AND CULVERTS, TRESTLES, PILLARS, SUSPENSION BRIDGES, DAMS, RAILROADS, TURNOUTS, TURNING-PLATFORMS, WATER STATIONS, COST OF EARTHWORK, FOUNDATIONS, RETAINING WALLS, etc., etc. In addition to which the elucidation of certain important principles of construction is made in a more simple manner than heretofore. By John C. Trautwine, Civil Engineer, 648 pages, with nearly one thousand illustrations, executed expressly for the work; forming, altogether, the most complete and concise work of the kind ever published.

The well-known ability of the Author, and his wide-spread reputation as a Civil Engineer, is a sufficient guarantee of the completeness of the work, and renders further recommendation unnecessary.

Bound in Morocco, Tucks, Gilt Edges. Price, $5.

[From the London Builder, Feb. 10, 1872.]

"This work elucidates some important principles in construction. It is a very valuable little book—a cyclopædia in miniature."

☞ For sale by Booksellers generally.

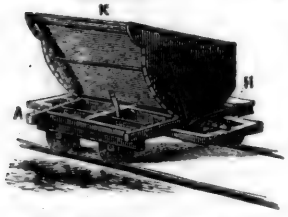
RAILROAD SECURITIES NEGOTIATED

PATENTS.

THOMAS D. STETSON.

No. 16 Murray Street, New York.

Solicitor of Patents and Scientific Expert in Patent Cases.



The best service at a fair price. The same care and zeal as heretofore to promote the interests of clients. Send for circular.

Contract for BUILDING and OPERATING at any point required.

MACHINERY and APPLIANCES for RIVER, HARBOR and BANK IMPROVEMENTS, constantly on hand, and furnished on short notice.

CAMP'S IMPROVED DUMPING CAR.

(Used by the American Dredging Company.)

RIGHTS FOR SALE BY

N. H. CAMP,

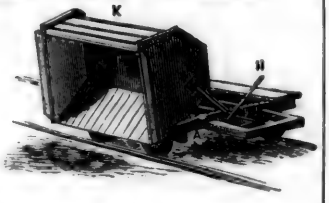


Fig. No. 1, Car Loaded. **TO DUMP THE CAR.** Fig. No. 2, Car Dumped.

The Brakeman seizes the lever H, and raises it, thus removing the step from under the box-support A, when the weight of the load causes the box to roll over to the position shown in Fig. 2.

To replace the box in readiness for another load.

The Brakeman, standing on the platform, reaches over, and grasping the corner of the box, pulls it back to its place.

Address, N. H. CAMP,
Care N. C. MILLER, 61 Broadway, New York City:
or HAWKINS, WILLARD & CO., 28 Market St., Chicago.

YORK CAR WORKS.

ESTABLISHED IN 1852.

Billmeyer & Smalls,

YORK, PENN.

This old established firm continue to build all kinds of Freight Cars to order.

Narrow Gauge Cars

having received their special attention, they are prepared to receive orders and to deliver promptly. A contract has just been made with the pioneer Narrow Gauge Road—3 ft. Gauge—on this Continent—(The Denver and Rio Grande R. W.)—for 100 cars; also for a Georgia Road.

Comparative weights of Narrow and Full Gauge Cars sent by mail free of charge.

Lake Superior and Mississippi Railroad Company.

SUPERINTENDENT'S OFFICE.

W. W. HUNGERFORD, General Superintendent.

ST. PAUL, April 29th, 1872.

F. H. CLARK, ESQ., President Lake Superior and Mississippi Railroad.

My Dear Sir :—The Wharton Switches in use on this road have given entire satisfaction thus far. I consider them far superior to any switch in use that breaks the track. They are very durable, so much so that the extra cost of the switch will be saved several times over before it will be worn out. It is also a very safe switch, as there is but little danger of throwing a train from the track, from a misplaced switch, going in either direction.

All things considered they are the best switches I have seen in use.

Yours truly,
W. W. HUNGERFORD,
Genl. Supt. and Chief Engr.

PHILADELPHIA, May 4th, 1872.

Respectfully referred to ABRAHAM BARKER.

I fully concur in the opinion expressed by Mr. Hungerford.

FRANK H. CLARK,
President L. S. & M. R. R.

A SECURE

INVESTMENT.

We offer for sale at par and accrued interest the First Mortgage Land Grant Gold bonds of the Northern Pacific Railroad Company. They are free from United States tax to the holder, and are issued in denominations from $100 to $10,000, coupon and registered.

In addition to their absolute safety, the Bonds yield an income larger, we believe, than any other first-class security. Persons holding United States 5 20s can, by converting them into Northern Pacifics, INCREASE THEIR YEARLY INCOME ONE-THIRD, and still have a perfectly reliable investment.

Further information, pamphlets, maps, etc., will be furnished on application by any of the Banks or Bankers acting as Agents for the Loan.

JAY COOKE & CO.,

New York, Philadelphia & Washington.

Steel-headed and Steel-capped Rails.

A paragraph, printed in several technical journals, stating that the engineer of the Reading Railway had reported that 25 per cent. of the steel-headed rails laid on that line had proved defective by separating at the weld, is calculated to convey some mis-information and work injury to some manufacturers of steel-headed rails. There have been various devices for steeling the heads of rails, of different degrees of merit and probably many of them have failed in experimental trials, from the fact that they are placed in very exposed positions where they are sure to receive the roughest use and the most trying test. In stating the result of these trials fairly, the name of the maker should be used, so that the responsibility for failure shall rest where it properly belongs. As a matter of justice we will give the result of the trial of a small lot of the Funcke and Elbers steel rails with iron flanges, laid in the track of the Reading Railway. The chief engineer of the road reports, March 19th, 1872, "that six bars out of 123 have been taken from the track, and that the seventh is ready to follow, and that the balance, it is hardly necessary to state, are in good condition." This is less than six per cent. of failure on a road where the traffic is exceptionally severe, and where the rails were placed on that portion of the track most exposed to hard use. Many lots of the same rail are in use in New England, with the most successful results in every particular. In one case a rail of this make was placed under a heavy steam hammer in a rolling mill, with the determination to destroy the weld, but after long and severe trial it was found impossible. These and like facts are of importance to railway men, and we are induced to mention these particular trials, because, inadvertantly, the injurious paragraph in question found its way into our columns.—*Am. Railway Times.*

Quick Transit in Cities.

The ideas on this subject, which were put forth in the JOURNAL last winter, have met with a more prompt and complete response in the action of Legislatures and capitalists, than could have been reasonably anticipated, except on the hypothesis that experience had demonstrated not only their justice, but the absolute necessity of giving them practical effect. No great public enterprise can be carried successfully forward, and secure a permanent position, under circumstances which cause it to be a palpable and direct injury to a portion of the public, or to any considerable number of individuals. The directors of steam railways must have seen for many years, that their operation in great cities has become a question of constantly growing difficulties. We are not surprised, therefore, that so sagacious a man as Com. Vanderbilt proposes to "take the bull by the horns" at once, and not only relieve the trains on the Hudson River and Harlem railways from the embarrassments under which they now enter the city, but furnish our citizens with the much needed facilities for traversing at a high speed the whole length of our Island, and reaching quickly the delightful suburban towns of Westchester County. This is a work of prime necessity. Unless New York State is to lose very many of her best citizens to New Jersey, the means of reaching cheaply and quickly equally desirable places of residence on her own borders, must be provided. In the laws which have just passed the Legislature of the State of New York, we have the preliminary steps towards the end sought. We believe they secure amply the rights of all. If a man owns a fine

mansion, he cannot easily prevent, nor justly complain, if obnoxious structures are erected or disagreeable pursuits are carried on near him, so long as the law be not violated by any of them. The public health must be guaranteed, but no man can say how long his neighborhood shall continue to be "first-class." Consequently if, in the prosecution of any underground or viaduct plan which Com. Vanderbilt and his associates may decide upon, any man finds his property depreciated in value, he will have no more right to complain, than if a proper manufactory were set up beside him. So long as locomotives are run along public highways, private rights are infringed and private safety imperilled; but the construction of a track or tracks, in such a manner that pedestrians and ordinary vehicles can have no rights upon them, involves no just claim based upon that indirect damage which may result from proximity to valuable private property.

Brooklyn, also, is moving for quick transit, by means of sunken or elevated railways, to be operated by means of steam locomotives. There is not the same necessity for this work in our great suburb, as with us. There is none of that great general travel through that city, which is continually going on through New York, or even through Jersey City. Our railways from the North and East approach us through Westchester County; those from the West and South through Jersey City. Consequently the passage of steam locomotives along and across public streets in Jersey City and New York has become a more serious matter than in Brooklyn, where the trains are local in their character, and comparatively few in number. But even there the work of providing quick transit ought to go forward. Long Island is admirably situated to receive the overflowing population of New York City. The bridge which is now in course of construction across East River will make it accessible from New York at all times, in spite of fogs or ice, and there is every reason why its Brooklyn terminus should be the point of concentration for diverging railways, sunken or elevated, and operated by steam throughout their entire length. The railroads of Long Island now approach the East River through many difficulties. The "South Side" railway cannot be expected to long retain its present privilege of running trains down by "dummies" along principal streets, occupied by a dense population, or devoted to active business; and Hunter's Point, in its rapid growth, must soon object to the running of locomotives through its streets to the river. There is no recourse, therefore, for those who wish to bring the more distant portions of Long Island into cheap, prompt and reliable communication with New York City, but to at once resort to underground or elevated railways. It is unjust to occupy prominent throroughfares to the injury of the property-owners, damaging them to benefit others, and an act of admitted injustice cannot long be perpetuated.

The construction of a single line of elevated railway, with regular stations for the accommodation of passengers, would, we make no doubt, prove so advantageous in every respect, to the convenience and safety of the public, as well as the remuneration of the stockholders, that similar works would be multiplied with rapidity in all desirable directions, thus effecting a complete revolution in the operation of railways in cities and large towns, contributing greatly to the comfort and security of their inhabitants, and facilitating and cheapening travel in many ways. As we remarked on a previous occasion, a large item in expense and time, to a passenger traveling from New England Northward, is the transit through this city, and when these are removed the better it will be for all concerned.

Illinois Central Railroad.

The statement of this Company for the month of April, 1872, is as follows:

Lehigh Coal and Navigation Co.

The annual meeting of the stockholders of this company was held in Philadelphia on the 7th inst., E. W. Clark, Esq., President, in the chair. The annual report was presented and read of which the following is an abstract:

The profits of the year from all sources were:

Net profit on railroads, less rent of Nesquehoning Valley Railroad		$719,252 78
Net profit on canals, less rent of Delaware Division Canal		169,190 95
Net profit on coal—		
From Lehigh mines, 518,800 tons	$424,921 19	
From Wyoming mines, 250,993 tons	52,214 74	
		483,135 93
Net profit on real estate sold		78,368 41
Net profit on rents		56,553 80
Miscellaneous receipts		2,714 42
		1,509,199 39
Less general expenses	$106,520 68	
Taxes chargeable to R. R.	3,133 50	
Taxes chargeable to canals	6,669 62	
Taxes chargeable to coal & coal lands	57,862 82	
Taxes on interest and capital stock	71,067 86	
Taxes on landed property & improvements	9,306 22	
Balance of interest account for 1871	982,251 86	
		1,236,813 56
Surplus		$272,385 83

The coal tonnage on the Lehigh and Susquehanna Railroad and Lehigh Canal, compared with that of 1870, was as follows:

	Tons. 1871.	Tons. 1870.
Wyoming region	1,297,561	1,247,809
Upper Lehigh region	111,758	157,532
Hazleton region	217,117	319,324
Beaver Meadow region via Nesq. V. R. R.	83,665	.....
Beaver Meadow region via L. V. R. R.	71,727	146,331
Mahanoy region	6,551	8,099
L. C. and N. Co.'s Lehigh mines	486,837	269,036
Total	2,275,206	2,143,131
Distributed as follows:		
East of Mauch Chunk by R. R.	1,328,481	1,095,050
Delivered east of Mauch Chunk by canal	740,733	789 079
Consumed above Mauch Chunk	70,901	49,425
Delivered to connecting lines in Wyoming Valley	105,225	184,267
Delivered to L. V. R. R. at Packerton	29,866	25,310
Total	2,275,206	2,143,131
Showing an increase of	132,075	

The production of the company's mines was as follows:

	1871. Tons.	1870. Tons.
Shipped by railroad	196,058	130,687
Shipped by canal	241,700	109,793
Sold and used at Mauch Chunk	6,098	6,436
Sold and used at Summit Hill	1,492	2,162
Used at planes for engines, &c.	11,285	7,994
In stock at Summit Hill and Mauch Chunk	5,500	4,115
Total from Summit mines	462,128	261,187
Room Run mines	48,933	27,616
Newport mines	112,785	58,258
Sugar Notch mines, under lease	110,245	112,440
Cook estate, near Wilkesbarre	27,963	10,559
By Greenwood Coal Company	7,789	8,671
	769,793	478,831

Assets of the company	$26,933,296 24
Liabilities	23,177,943 27
Surplus	$3,755,341 97

The results of last year's business may be regarded as entirely satisfactory, in view of the fact that our mines were not in operation after the first week in January until the middle of May, and those in the Hazleton and Beaver Meadow regions not until the close of June.

The Central Railroad Company of New Jersey, took possession of our railroads, as lessee, on the first of April, up to which date, from the first of January, only 75,000 tons of coal had been transported, and the proportion of gross receipts received from that company, as rental for the remaining nine months of the year, was about the amount of net revenue derived from the roads for the whole year.

There has been a satisfactory increase in general business under the management of the lessee, and the coal delivered on the line and forwarded east of Mauch Chunk for the year, exceeds the amount in 1870 by 229,597 tons, notwithstanding the long strike.

Our canals were opened for business on the 20th of March and suffered no injury from freshets during the year.

The boating season was terminated by ice on the 1st of December, fully two weeks earlier than usual.

The first boat was loaded on the 13th of April, but no considerable business was done until after our miners resumed work in May, and the equipment was only partially employed until the beginning of July. The five months' business thereafter was regular and satisfactory, excepting the loss of about one week's business, in the aggregate, by storms and high water. We are watching carefully the results of experiments being made

elsewhere and expect to profit by them and to render our canals more remunerative than heretofore. We have steadily improved their condition during the last two years and they are now better prepared for business and better able to resist floods than ever before.

The suspension of labor at our mines, referred to in the supplementary report last year, continued until May 15th, after which there was no material interruption until near the end of the year, when the sudden closing of the canals by ice and the fall in prices, checked the production.

The two headings in Nesquehoning tunnel met on the 15th of September, and the last blast was fired on the 20th of December. The machinery was moved, track laid and connected on the 1st of February of the present year, and the first coal train passed through on the following day. The amount of coal brought by this branch to the main line will be large from our own mines, and we have reason to expect a considerable increase from the Beaver Meadow region.

There has been paid into the sinking fund of the mortgage of October 6, 1869, of $2,000,000, $30,271 31. We have also paid into the sinking fund of the mortgage of 1864, $60,000, and that of November, 1867, $50,000 which sums were invested in bonds secured by the respective mortgages to which they applied.

The abondonment the coming summer of our Gravity or Switchback Railroad for coal transportation, although a portion of the road will still be used for the passenger travel, will render that less valuable than heretofore.

The principal asset of the company is its railroad. It has not been thought best to make any material change in this account, which stands charged at a cost of $11,989,888 45.

The canal and shipping improvements have been revalued at $3,000,000, and can hardly fail to yield a good revenue on that low appraisement.

Of our coal lands there are in the Lehigh tract of 6,000 acres, at least 5,000 acres unworked, which we consider worth not less than $1,000 per acre, or $833 33 for the whole area $5,000,000. The Wyoming tract of 9,480 acres we regard as equally low, at $3,000,000. Compared with prices paid during the past year for other bodies of anthracite coal lands, these appraisements are believed to be moderate, and below what the lands could be sold at if we desired to dispose of them.

The lease of our railroads, early in 1871, to the Central Railroad Company of New Jersey, was a close alliance of interests, securing the co-operation of a wealthy corporation in the pursuit of a line of policy which we had followed to the best of our ability for some years. The development by that company of our railroad interests has left us free to use our own resources on our coal property. While we shall profit by the development of both interests, they secure a large and increasing business for their railroad; and the alliance which has been and promises to be of the most friendly character, is and will be mutually beneficial. The recent agreement uniting the interests of the Central Railroad Company with those of the Delaware, Lackawanna and Western Railroad has no tendency to disturb these friendly relations, but rather to cement them. The natural result of that union and the alliance with this company will be the harmonizing of the policies of the three companies in the management of their coal interests, securing to all of them the advantages of controlling as a unit the production and sale of a larger amount of coal than is under the control of any other corporation.

We are now pursuing on our coal property a vigorous policy of development. We have 8 Lehigh collieries, with an aggregate capacity of 75,000 tons a month. To these we propose to add one more colliery. which we hope to have in operation before the close of 1873, and to increase the production of the others, so that the 9 collieries will have a capacity of at least 125,000 tons per month within two years; and, if deemed expedient, we can readily increase much beyond that quantity.

The use of the Nesquehoning tunnel will reduce the cost of the coal at Mauch Chunk, and a stocking yard already provided for our surplus during dull seasons on the banks of the Lehigh Canal below Mauch Chunk, will enable us to produce regularly, and at less cost, while it will in sure greater regularity to, and increase of our canal business.

The interest of our funded and floating debt, and the rent of the Nesquehoning Valley Railroad, will amount to about $1,100,000 in 1872, and it is probable that the net revenue from our railroads will nearly, if not quite, provide this sum. If this is realized we shall have the profit on our coal and canal to divide among our stockholders. With the steady growth of business on our railroads and canals, and an increase in the production of our coal mines, we have good reason to feel that the company is about entering on a period of prosperity greater than it has heretofore enjoyed.

The report was accepted and ordered to be printed.

At the conclusion of the meeting an election was held for managers for the ensuing year, and the present board was re-elected.

CIRCUIT COURT OF U. S.

Eastern District of Penna.

IN EQUITY.

REEVES v. KEYSTONE BRIDGE CO., J. H. LINVILLE, and others.

1. Illustrative drawings of conceived ideas do not constitute an invention, and unless followed up by a seasonable observance of the requirements of the patent laws, they can have no effect upon a subsequently granted patent to another.
2. The Patent of Reeves, June 17th, 1862, for improved columns, braces, shafts, &c., is valid.

Opinion by McKENNAN, Circuit Judge, April 1st, 1872.

The respondents do not deny the making and use of the column described in the complainant's patent. They deny that he was the first and original inventor of the invention claimed by him, and allege that his patent is invalid. This allegation rests upon the following specifications:

1. That the invention was originally made by Jacob H. Linville and John L. Piper.

2. That it was described in the Allegemeine Bauzeitung for September, 1861.

3. That it was illustrated by a drawing in the Dreyfuss Album, bearing the imprint of 1861.

To test the defensive sufficiency of this allegation, the nature and peculiarities of the invention must first be exactly understood.

They are stated in general terms in the patent. The patent is dated June 17th, 1862, and is for an improvement in the construction of columns, shafts, braces, &c. The invention is thus described: "I use three or more wrought iron bars, similar to those marked *a. a. a. a.* in the annexed drawing, to which reference is hereby made, of such shapes and dimensions, so that when arranged together, in the direction of their length, and fastened by rivets or bolts, *c*, through their flanges *b*, they shall form a hollow shaft or column." And the patentee claims: "The uniting together three or more pieces of wrought iron, made with flanges, in the direction of their length, so that they shall form a column or shaft, to be used as posts, and also as braces or compressive chords, in the construction of buildings, bridges, piers or other structures."

The peculiar features of this column are, that it is composed of not less than three longitudinal segments or bars of wrought iron; that the edges are flanged throughout their whole length; that when they are brought together the flanges are brought face to face; and the unity of the column is secured by bolts or rivets passing through these flanges, at short intervals.

Its distinguishing advantages are, that by using three or more pieces, each can be more easily and cheaply rolled; that by increasing the number of pieces, a post of any diameter, and any reasonable length, and of varying thickness of metal, can be made in an ordinary rolling mill as readily and cheaply by the pound as posts of small diameter; that they can be handled by workmen and put together with greater facility and with the ordinary mechanical appliances; that the material embodied in it is concentrated in its periphery, thereby increasing its diameter, and consequently its strength; and that the flanges serve as buttresses, practically extending its diameter and giving it additional strength and power of resistance.

A hollow wrought-iron column does not constitute the patentee's invention, but it consists in a hollow shaft, so made as the result of a concentration in its periphery of the metal used in its construction, composed of at least three longitudinal segments of rolled iron, with flanges throughout their whole length, which are to be brought face to face, and through which they are to be fastened by bolts or rivets. This whole organization makes up the distinctiveness of the column, and is necessary to secure the advantages in manufacture and efficiency, which are claimed to belong peculiarly to it.

Under the proofs in this case, and aside from the specific objections hereafter to be noticed, it is hardly disputable that such a post is both novel and useful. Its utility is not contested, but its novelty is denied upon the several grounds before stated, which are now to be considered:

1. The invention is claimed by Linville and Piper, two of the respondents. On the 14th of January, 1862, a patent was granted to J. H. Linville for an improvment in iron truss bridges, which is described as partly consisting in a "novel construction of the posts of wrought and cast iron." This post is composed of two rolled plates of wrought iron, semi octagonal in form, secured by rivets passing through the whole length of its diameter, or by bands shrunk around it, binding the plates firmly to distance pieces interposed between them at suitable distances to spring them apart at the middle and terminating in cast iron bases and capitals. In the second claim of his specification, the patentee, therefore, very properly described his post as "composed of two wrought iron plates or bars a, a, distance pieces b, b, and rivets J, J, or their equivalents, and cast iron bases L, L, and capitals O, O, the whole combined as herein specified."

It must be observed that the specification does not indicate the form of the post, as an appropriated or distinctive feature of the invention. The shaft is composed of two rolled iron bars, but that it must be hollow is an inference merely from the description. In comparing the invention with others, it must be considered as the product only of the elements, which the patentee has indicated as necessary to give it its distinctive character. While, therefore, it may be constructed upon the principle of expanding the metal from the centre towards the periphery, yet the special mode in which this principle is embodied in it, and is made practically available, constitutes its patented peculiarity.

Treating it then as the patentee himself does, not as a technical combination, but an organized unit, composed of the enumerated

constituents, I think it is essentially distinguishable from the complainant's post. They are alike only in this, that neither is solid, and both are made of rolled iron plates. In every other material point they are unlike. This dissimilarity consists, first, in the number of pieces of which the column is composed; second, in the use or absence of flanges to these pieces; third, in the mode of uniting or fastening the several pieces of the columns together; and fourth, in keeping the pieces in a straight line, and therefore parallel to each other, or forming them into curves by swelling the post in the middle. That these differences are essential, is apparent from Mr. Linville's specification, in which he described plates without flanges, their number, the mode of fastening them together, and their being sprung apart at the middle, as component, and, therefore, material constituents of his organzied post.

But it is unnecessary to enlarge upon this. Any other hypothesis is inconsistent with the patentee's acts. His patent imports that he was the sole inventor of the post therein described. But in 1865, in conjunction with Mr. Piper, he applied for and obtained a patent nominally for improvements in his post of 1862, but really changing its fundamental organization and seeking to fix its invention in 1860, and in fact describing and appropriating the distinctive features of Reeves' post, which had been patented three years before. Not only does this show that the post in question was not an improvement of which the post of 1862 was the basis, and that the patent of that year was not regarded as expansive enough to embrace it, but it is, in fact and in law, an impressive disclaimer of his right to make an exclusive appropriation of it.

It is vigorously urged that although the patent of 1865 to Linville and Piper is subsequent in date to Reeves, the post described in it was invented in 1860, and that they, therefore, anticipated him. It is in evidence by several witnesses, that in 1860 Linville and Piper were engaged together in getting up plans for a proposed railroad bridge over the Schuylkill, near the Arsenal, at Philadelphia, that sketches of various forms of posts were made, among them those described in the patents of 1862 and 1865, that all the forms thus delineated were rejected, except the one described in the patent of 1862, which was adopted for the construction of the posts in that bridge, that the sketches of the post described in the patent of 1865 were preserved for a time but were lost, that no post of that description was made by the patentees until after the date of that patent, and in fact that nothing beyond the making of the sketches was done to embody or carry out the alleged invention until the patent was applied for.

Will these sketches carry back the date of the invention to the time when they were made, and thus give the patentees priority over the complainant or invalidate Reeves' patent? There is no doubt that Reeves was an original inventor of the post claimed by him. It was the product of his own reflections and mechanical knowledge. He is presumed to be the first inventor of the thing patented by him, and this presumption is in no wise impaired by the subsequent grant of a patent to another for the same thing. The effect of the sketches referred to, upon his rights, must therefore be determined without reference to the patent of Linville and Piper.

A patentee whose patent is assailed upon the ground of want of novelty, may show, by sketches and drawings, the date of his inceptive invention, and, if he has exercised reasonable diligence in "perfecting and adapting" it and in applying for his patent, its protection will be carried back to such date. And in a race of diligence between rival inventors, the one who first perfects an invention and embodies it in a distinct form is entitled to priority. But can this be accorded to one who has conceived the idea of an invention, and has sketched it on paper, but has done nothing more in reference to it for a period of five years, as against the patent of an independent though subsequent inventor? Reasonable diligence in "perfecting and adapting" the invention is essential to the efficacy of such a claim. This is the express condition prescribed by the 15th section of the Patent Act of 1836, as held by Mr. Justice Story, in Reed v. Cutler, 1 Story R. 590. Independent of this provision, he is entitled to priority of right to a patent, who first reduces his invention to a fixed, positive form, adapted to practical use. Unless, therefore, the speculations of Linville and Piper in 1860 had attained the perfection of a completed and patentable invention, their inaction until 1865 would clearly deprive them of the benefit of the 15th section.

Can an invention be considered as "perfected and adapted," which has reached only the maturity of an illustration on paper? In White v. Allen, 2 Fisher, 446, Judge Clifford says: "Original and first inventors are entitled to the benefit of their inventions if they reduce them to practice, and seasonably comply with the requirements of the patent laws in procuring letters patent for the protection of their exclusive rights. While the suggested improvement, however, rests merely in the mind of the originator of the idea, the invention is not completed within the meaning of the patent laws; nor are crude and imperfect experiments sufficient to confer a right to a patent; but in order to constitute an invention in the sense in which that word is employed in the Patent Act, the party alleged to have produced it must have proceeded so far as to have reduced his idea to practice, and embodied it in some distinct form. Gayler v. Wilder, 10 How. 498; Parkhurst v. Kinsman, 1 Blatch. 494; Curtis on Patents, sec. 43. Mere discovery of an improvement does not constitute it the subject matter of a patent, although the idea which it involves may be new; but the new set of ideas in order to become patentable must be embodied into working machinery, and adapted to practical use. Sickles v. Borden, 3 Blatch. 535." And in Ellithorpe v. Robertson, Law's Dig. 428, sect. 48. Judge Ingersoll said:

"The making of drawings of conceived ideas is not such an embodiment of such conceived ideas into practical and useful form, as will defeat a patent which has been granted." Equally strong is the language of Mr. Justice Nelson in Winans v. Harlem R. R. Co., Franklin Journal, 3 ser., vol. 61, 322, where he says: "The circumstances that a person has had an idea of an improvement in his head or has sketched it on paper, has drawn it, and then gives it up, neglects it, does not, in judgment of law, constitute or have the effect to constitute him a first and original inventor." Numerous other cases affirm the same doctrine; and it must, therefore, be considered as an established rule that illustrative drawings of conceived ideas do not constitute an invention, and that unless they are followed up by a seasonable observance of the requirements of the patent laws, they can have no effect upon a subsequently granted patent to another. Applying this rule to the present case, the conclusion is unavoidable that Linville and Piper had not "perfected and adapted" an invention in 1860, and that by reason of their subsequent and long continued remissness, they lost any inchoate right they might have had to priority over Reeves.

But we are not left to speculation to determine the actual character of what was done by Linville and Piper in 1860. They were induced to make sketches of different forms of wrought iron posts by the proposed erection of the Arsenal Railroad Bridge, and their object was to devise and present the form of post best adapted to that structure. What was done very satisfactorily appears in the testimony of Edward Crueger, a witness for the respondents, who was Mr. Linville's draughtsman at the time. He says: "Mr. Linville showed and sketched for me different forms of wrought iron bars or pieces for posts; any number of them and all shapes, of angle iron, of T iron, of round iron, and of oval iron. I can't remember the number of shapes he gave me; they were so many. He had two pieces in some posts and four in others. Finally he (Linville) rejected all the other pieces except these pieces, which we employed at the Schuylkill bridge." And the testimony of Linville and Piper is in substantial accord with this. Can there be any doubt, in view of this testimony, that the efforts thus described were experimental merely as to all the forms of post except the one which was adopted? The proofs show further that the sketch of the post, then rejected, but now in controversy, was lost with other sketches, in 1863, and that it was not reproduced until 1865, when steps were taken to obtain a patent. In the meantime Reeves had invented, "perfected and adapted," and obtained a patent for his post, and was engaged in its manufacture and introduction into public use. In point of fact, then, all that Linville and Piper did before the date of Reeves' patent can only be regarded in the light of experiment, which they abandoned, and did not take up again until the lapse of more than two years after his patent was issued.

Whether the sketches made are to be considered as an incomplete invention, not prosecuted with the required diligence, or as an experiment actually abandoned, they cannot impair the right of Reeves to be treated as the first inventor.

11. The publication of the description and plates in the *Allgemeine Bauzeitung* preceded Reeves' invention. It is a public work, and describes the post illustrated by the accompanying drawing "in such full, clear, and exact terms that any one skilled in the art to which it appertains could construct it." If Reeves' post would be the product of this description, his patent cannot be sustained.

The post described in this work is cruciform. It consists of a flat iron bar, which forms the main part of the column, with two other flat bars at right angles to it, connected by means of peculiarly shaped angle irons, so that in the centre of the connection a hollow space is formed, which produces an increase of the rigidity of the column, while the section remains which is necessary for carrying the load. Now it is apparent that the single flat bar is prescribed as the main part of the column, relied upon to bear up the weight imposed upon it, that the two other bars are designed to furnish it lateral support, and that the angle irons, while they serve the purpose of connection, are further auxiliary to it by giving it additional stiffness. This I think is the fair interpretation of both Mr. Bonzano's and Mr. Both's translations. Following the description then, all these bars, or at least the single one, must necessarily be incorporated in the structure. To omit them would be to discard the part

prescribed as necessary to resist the compressive stain upon the column, and, therefore, to abandon the vital principle of its construction. Indeed, all these constituents must be embodied in it to fulfill the fundamental requirements of the text.

Now a column thus constituted is not the column of Reeves. It differs from it in the necessary elements which compose it, and in the principle of its construction and operation. Four angle bars and at least one flat cross bar must be incorporated in its structure, while in the Reeves column, three flanged bars, without any cross bar, are required, and as many more as are desired may be employed. The latter is entirely hollow and must be made so to conform to the fundamental conditions of its construction. It corporealizes the principle that increase of diameter secures additional power of compressive resistance, and, therefore, that the metal used in its construction must be thrown out as much as possible from its centre and concentrated in its periphery. Its resisting power is located exclusively in its circumference. Such a condition is certainly not indicated in the German description of that post. As before stated, the bar which traverses its diameter is an indispensable part, and as it is described as subject to the greatest compressive strain, corresponding strength for resistance must be provided in the diameter of the post. This is vital diversity, so that the two posts can only be identified by confounding the distinct principles embodied in each of them.

In Reeves' specification it is said, "the stiffness and strength of columns made in this manner may be increased at a very moderate expense, by setting plain bars of iron between the flanges of the bars a, a, a, a, and riveted to them, and extending outward from the centre; thus, in effect, increasing the diameter of the column." Hence it is argued that a post, thus constructed, is identical with the post described in the German work. To reach this conclusion the clause quoted must be construed as directing the extension of the bars set between the flanges outwardly from the centre as the beginning, and not outwardly from the flanges.

The advantages contemplated are increased stiffness and strength of the column, and it is proposed to secure them by an increase of its diameter only in the effect due to an extension of the interposed bars. An increase of actual diameter by an enlargement of the circumference to the extent of the thickness of the bars, was not designed, because that would be due only to the interposition of the bars between the flanges, not, in any sense, to their extension in either direction beyond them. An inward extension of the bars might impart increased strength to the column, but it certainly would not lengthen its diameter. As interior braces, the extensions would doubtless give additional stiffness to the column, but what would involve a distribution of material, in conflict with the general design of the patentee and the tenor of his specification, and would secure it by an agency different from the one expressly prescribed by him. An operative increase of the diameter, produced not by an expansion of the periphery, but by an extension of the interposed bars, is what the specification contemplates. A cheap method of practically increasing the diameter without a corresponding enlargement of the whole circumference is the suggestion. How is this to be attained? Solely by an exterior extension of the bars set between the flanges. When it is considered then that the effect of the extension only in increasing the diameter was contemplated, and that this will not be produced by extending the bars wholly within the column, the specification must necessarily be taken to fix the flanges as the starting point, whence the bars are to extend outwardly, or away from the centre.

III. The only remaining reference is the "Dreyfuss Album." It is a book of printed drawings, representing different forms of iron fabrics made by a Paris manufacturer, and bears the imprint of 1861. Under the head of "corniers" is a drawing representing a transverse section of an iron column, corresponding with one of the figures referred to in the specification of Reeves. When this book was printed does not appear, otherwise than presumptively from the imprint on its title page. When it was published or put in circulation does not appear at all, except that possession of it was obtained by the respondents after the institution of this suit.

The 15th section of the Patent Act of 1836—and it has been incorporated in the Act of 1870—provides that a patent may be successfully opposed by showing that the thing patented "had been described in some public work anterior to the supposed discovery thereof by the patentee." It is obvious that this provision requires—1st, a description of the alleged invention, 2d, that it shall be contained in a work of public character and intended for the public; and, 3d, that this work was made accessible to the public by publication before the discovery of the invention by the patentee.

Whether the work in evidence is a public or only a private work, intended merely for private circulation, is fairly a disputable question. It contains an illustration by a drawing of the thing intended to be represented, without verbal description; and whether this is a description at all, or such an one as the act contemplates, may well be denied on the authority of Seymour v. Osborne, 11 Wall, 516, and the cases there referred to with approval. But it is unnecessary to decide these questions, as the proof is deficient in another essential particular. It is not shown that the work was published before the date of the complainant's patent. This must be directly proved. It is not deducible from the imprint on the title page. That the work was then printed may be inferred from this imprint; but when it was put in circulation or offered to the public is a distinct fact, which must be proved independently. The intended circulation of a book of a public nature may be presumed from its being put into print; but it does not follow that a work, such as the one in question, was made accessible to the public as soon as it was printed, or that it was actually published at all. As it does not appear that this book was published before the patentee's invention, as evidence it is altogether inconsequential.

The complainant is entitled to an allowance of the prayers of his bill, and a decree will, therefore, be entered for a perpetual injunction and an account, with costs.

George Harding and R. C. McMurtrie, Esqs., for complainants.

C. B. Collier and Theodore Ouyler, Esqs., for respondents.

THE KEYSTONE BRIDGE CO. v. THE PHOENIX IRON COMPANY.

A manufacturer of iron bars is not liable as an infringer, where the bars are used by others in constructing a bridge.

Opinion by McKennan, Circuit J. April 1st, 1872.

The opinion just read in the case of Reeves v. The Keystone Bridge Company, renders it unnecessary to consider the alleged infringement of the second claim of Linville's patent of 1862, and the first claim of the patent of Linville and Piper of 1865. The only claims of these patents which it is necessary to notice relate to the lower chord bars of truss bridge structures. It is in the use of these bars that the infringment is alleged to consist.

The first claim of the patent of 1862, is for the construction of the lower chords of truss bridges of series of eye bars wide and thin, drilled eye bars, applied on edge between ribs on the bottom of the posts, &c. The form of the bars is of the essence of the claim—*wide* and *thin* bars only are claimed—and, as the only proof of infringment is, that the respondents made eye bars *round* in section, which were used in the Lasalle bridge, to perform the function of tension chords, the patent of 1862 may be dismissed from further consideration.

The third claim in the patent of 1865 is for "the use, for the lower chords of truss frames, of wide and thin rolled bars, with enlarged ends formed by upsetting the iron when heated by compression into moulds of the required shape." As the respondents are proved to have made only *round* chord bars, which were used in the Lasalle structure, it may well be doubted that they have infringed this claim; and especially as they are not employed or adapted to give vertical support to the roadway, which is an important function of the complainant's lower chords, and is the reason of their peculiar conformation. But waiving this, and assuming that the enlarged ends of the respondent's chords bars are formed as described in the claim, it is not to be doubted that the patent is limited to the *use* of the chords in bridge structures. This is distinctly set forth in the specification, where it is stated that "we do not claim the upsetting of bars in the manner described, nor any peculiar mode of performing the operation, but merely the *use* of chord bars for bridges, the ties of which are thus formed, so as to give additional strength to the bar where it is so much needed." The exclusive right to make chord bars in any mode is distinctly disclaimed; only their use, when formed as described, is appropriated by the patentees and forbidden to others. They in effect declare that any one may lawfully make the bars, and that no encroachment upon their rights is committed until the bars are used by being put into a bridge.

Now the respondents are iron manufacturers, and it is shown that the bridge at Lasalle, Illinois, was built by Kellogg & Clark, who obtained the iron for it from the respondents, and that the bottom chords used in it were like those claimed by the complainants. This is all the proof of infringement, and I think it falls far short of fixing any accountability upon the respondents. They made the bars, but did not use them—Kellogg & Clark did that. They did only what they had a legal right to do, and did not thereby assume any responsibility for the wrongful acts, or become involved in the unlawful purposes of others. Nor can this responsibility be imposed upon them, because privity with a wrong doer is not necessarily to be inferred from the exercise of a legal right.

My attention has been called to the opinion of Judge Woodruff in the case of Wallace & Sons v. Holmes and others, reported in the Official Gazette of the Pat. Off. Vol. 1, No. 6. The case is a peculiar one. It involved the infringement of a patent for an improved lamp-burner in combination with a chimney, were the respondents made and sold the burner alone, leaving the purchaser to supply the chimney, without which such burner is useless. And it was held that all who were engaged in the manufacture of the different parts of the combination, and using it, thereafter, were infringers, for the reason that "all are *tort feasors* engaged in a common purpose to infringe the patent, and actually, by their concerted action, producing that result." Now, can it be doubted that, if the respondents there had been licensed by the patentee to make and sell his improved burner, and this was all they did, the result would have been different? And yet this is substantially the attitude of the respondents here. By clear implication, the patentees have authorized the respondents to make and sell the chord bars described in their patent, and have declared that only those who use them as lower chords in bridge construction can be called to account for infringement. Having, therefore, exercised the conceded rights of manufacturers only, the respondents cannot, by any strained inferences, be implicated in the wrongful acts of others.

The bill must, therefore, be dismissed with costs.

C. B. Collier and Theodore Cuyler, Esqs., for complainants.

George Harding and R. C. McMurtrie, Esqs., for respondents.

American Railroad Journal.

Saturday, May 18, 1872.

Stock Exchange and Money Market.

Money has been offered with comparative freedom through the week, to the leading street borrowers, within the range of from 5@7 generally 6@7 per cent. on call. At these figures, the demand for accommodation has been fairly active, though not remarkably urgent, chiefly from speculative operators at the Stock and Gold Boards. In the discount line, there has been a readier market noted for the better grades of commercial paper at from 7@9 per cent. per annum. The offerings have been moderate for the season, especially so of strictly choice names.. The U. S. Sub-Treasury office reduced its coin balance about 2⅜ millions and its currency reserve nearly 1⅜ millions. The city banks added to their loan and discount average about 4¾ millions during the week, and again reduced their outstanding circulation slightly. The U.S. Sub-Treasury held a currency balance at the close of business on Tuesday of $6,203,161, and a coin reserve, of $62,839,225.

The city banks, in their latest return, show a decrease of $101,890 of legal tender notes, with an increase of $1,679,700 of specie, and $5,631,100 of deposits, also an addition of $4,717,100 to their loan and discount averages, with a reduction of $95,600 in their item of circulation. The city bank exchanges, last week, averaged 127, and thus far, this week, about 124 millions daily. The banks now hold $6,065,275 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $20,005,100, against $16,196,523 same time last year. The city bank deposits are now $217,267,500 against $231,956,018, week ending May 15, 1871. The legal tender reserve amounts to $47,305,600, against $64,252,293 same time last year. The circulation now stands at $27,714,200 against $31,321,479 same time last year. The loans are now $285,002,000 against $289,231,291 at this date last year.

The coin reserve of the city banks is now a little over 20 millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 47⅜ millions against $46,616,000 on the statement of February 10th.

The U. S. Sub-Treasury reduced its currency balance $1,380,643, and its coin reserve $2,805,417 as the result of the week's business. The receipts of the office were $4,466,244 in coin, and $5,640,960 in currency; payments, $6,771,661 in coin, and $7,021,603 in currency. The office received $2,844,000 in coin or its equivalent, from customs; and disbursed $2,563,066, of coin interest.

Government revenues have been yielding moderately, since our last. The excises yielded within the week about 2½ millions, and thus far since July 1, 1871, $111,426,114. The customs at the port of New York last week were $2,709,621; at the outports, equal to about $905,000 all in coin, or coin certificates.

Under the May programme of the Treasury Department, Government proposes to sell during the month, Gold as follows: Thursday, May 23, $2,000,000; Thursday, May 30, $2,000,000. And to buy in Five Twenty bonds as follows: Wednesday, May 22, $2,000,000; Wednesday, May 29, $2,000,000.

Gold has been quite active and generally stronger, though variable, under the conflicting reports relative to the pending *Alabama* treaty negotiations. The speculative call has been quite spirited, most of the week; while the export drain has been more extensive, exceeding four millions last week, and 1½ millions the first half of the current week. The customs call has been moderate.

The range of the price during the week has been from 113⅛@113⅝ and the closing quotation on Wednesday was 113¾@113⅞ against 113⅞@114 the preceding Wednesday. The specie outflow, last week, was $4,063,885. The Gold Exchange Bank clearances have averaged about 70 millions per day during the week.

The cash balances of the Treasury Department on Monday were: Currency, $13,602,100; coin $103,318,656. Certificates were outstanding for $25,425,300.

The customs demand for Gold last week, averaged $474,000 a day; thus far, this week, it has averaged $552,000 a day, or equal to a weekly aggregate of $3,312,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $1,502, and since Jan. 1, 1872,

$639,612 against $3,011,127 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, has been $139,313,437 against $130,958,568 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to May 4, 1872, $70,507,036, against $77,833,173 same time in 1870-'71.

The export drain of specie was $4,063,885 last week, against $2,833,236 same week preceding year. The shipments since July 1, 1871, have been $37,339,153 against $69,674,237 same time in 1870-'71.

Foreign Exchange has been in moderate demand at rather less buoyant rates. Bankers' sixty day bills on London closed on Wednesday at 109⅛@109¾; sight bills on London, 110⅜@110⅝.

The produce exports from this port, week ending with May 14, were to the currency value of $3,741,808.

At the annual election at the Stock Exchange, early this week, the following was the successful ticket: For President, Edward King; for Chairman, M. A. Wheelock; for Vice-Chairman, James Mitchell; for Secretary, B. O. White; for Treasurer, D. C. Hays. The New York Stock Exchange on Tuesday paid the well-deserved compliment to the retiring President, Mr. Clerke, of a unanimous vote of appreciation of his official services, rendered in a firm, faithful and dignified manner. The further mark of approbation in a service of plate has also been voted.

Government securities have been generally in good request, closing strong and buoyantly in price, on comparative limited offerings.

U. S. sixes of 1881 closed here on Wednesday of the current week at 118⅝@118¾; U. S. Five-Twenties of 1862, (other than the bonds called in) ex May coupon 113¼@113½; U. S. Five-Twenties of 1864 at 113¼@113½; U. S. Five-Twenties of 1865, 113⅞@114⅛; U. S. Five-Twenties of 1865 consolidated, 115⅛@115¾; U. S. Five Twenties of 1867, 116⅜@116½; U. S. Five-Twenties of 1868, 116¼@116½ U. S. Ten-forties at 111⅛@111⅜; U. S. Fives of 1881 (Funding Loan) 111⅞@112; Six per cent. currency bonds, 116¼@116½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	April 30.	May 7.	May 15.
Consols	93¼	92⅞	93⅛
U. S. 5-20's of 1862..	*90¼	89¾	——

" 10-40s	——	88½	89
New Fives of 1881...	90½	89¼	89½
Erie.	55½	53½	55¼

State bonds have been in fair investment demand and quoted steadier in price, closing with some show of buoyancy.

In the better classes of Railway Bonds a livelier investment business has been reported at stronger prices, with the favorites of the older issues offering less freely. Central Pacific Sixes have been in more demand. Chesapeake and Ohio have been in good request at 94 per cent. and accrued interest.

Railway and Miscellaneous share property, has been quoted stronger as to price, on an active business in the speculative favorites. Pacific Mail and Panama Railway shares having been particularly brisk and buoyant.

In the Metal line, Ingot Copper has been moderately active but quoted lower, with sales reported at 38c.@39c. per lb. Pig Iron has been lightly dealt in, the firm views of owners operating to some extent against free movements. Of the 2,500 tons Scotch received within a few days, the bulk had been disposed of previous to arrival. The latest reports are of a further rise abroad of 5s. per ton, which tended to strengthen the local market. Sales were reported at 300 tons Glengarnock Pig, from second-hands, at $50@$52 per 100 tons; Eglinton at a shade under $50. From first hands, values of all kinds of Pig were quoted up to former figures. Of Wrought Scrap-iron 200 tons were sold on private terms, with $55@$57, as the current quotations. Nothing really new in Lead, Spelter, or Zinc, which were quoted as before. Pig-tin has been quiet and depressed, with Straits quoted at 39c.@39¼c. gold, and sales reported of 500 slabs on private terms. Of tin plates, which were quoted steady, sales were made of 1,000 boxes Charcoal at $13 75, and 500 boxes 14x20 Coke at $12 25@$12 37½ gold per box.

General business has been fairly active in the leading kinds of domestic produce, but prices of Breadstuffs and Provisions have shown less buoyancy, Flour, Wheat, Corn, and Butter closing in favor of buyers. Middling upland cotton closed on Wednesday at 23⅞ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,592,160 bales, against 3,678,804 bales same time in the preceding year; exports 1,791,522 bales against 2,758,626 bales in the previous year; stock at the ports at latest dates, 259,688 bales against 407,884 bales same date 1871.

At the Live Stock Markets, Beeves have been in moderate demand at 10@13½ cts.; Veals at 4@7¾ cts.; Sheep at 6½@10¾; Lamb 12@8 cts. Swine, dull at 4¼@4½ cts. per lb., all live weight. The week's receipts were 8,811 Beeves, 4,572 Veal Calves, 13,303 Sheep and Lambs; and 43,499 Swine.

In foreign goods, a fair movement has been noted and values have been generally quoted steady. Sugar, Coffee, and Teas, stronger. The week's imports of foreign goods reached the amount of $7,425,926 including $2,197,005 of dry goods.

Ocean freights have been quoted rather steadier as to rates, on a moderate call for accomodation, mostly for Grain, Tobacco, Provisions Naval Stores, and Petroleum.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The estimated earnings of the Erie Railway for the week ending May 7, 1872, were $407,448; against $320,749 for the corresponding period of 1871—an increase of $86,694. Total earnings since April 1, 1872, $2,004,041—an increase over the same time in 1871 of $429,337.

☞ The earnings of the Harrisburg City Passenger Railway for 1871, were $6,489 31, and the expenses $5,922, leaving a surplus of $567 31.

HARVEY FISK. A. S. HATCH.

☞ FISK & HATCH, BANKERS,
No. 5 NASSAU-ST., New York.

The magnitude and importance of the CHESAPEAKE AND OHIO RAILROAD, as a short, low-grade, economical line of transportation between tide-water navigation and the principal cities of the Western States, is becoming more apparent as it approaches completion. Less than 100 miles of track remain to be laid to unite the Eastern and Western Divisions, upon which over 5,000 men are employed; the opening of the Through Line by Autumn next is, therefore, assured. The development of traffic on this thoroughfare will be immediate and very large, and within a few years the mineral traffic alone, furnished by iron and coal deposits along the route, will be sufficient to render it one of the most prosperous and profitable lines of communication in the country.

THE SIX PER CENT. BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY.

are entirely safe and satisfactory Securities for investment. Price, 94 and accrued interest. Interest payable May and November. Principal and interest payable in Gold in the City of New York. Denominations $1,000, $500, and $100, Coupon or Registered. Full information furnished on application.

We buy and sell GOVERNMENT BONDS; receive deposits, and allow interest on balances; make collections, issue certificates of deposit, and do a general banking business.

FISK & HATCH.

St. Joseph and Denver City Railroad.

The advices from the St. Joseph and Denver City Railroad to their agents in this city are very favorable, and confirm previous estimates that the entire line will be completed early in August, thereby shortening the great continental route from the Atlantic to the Pacific 230 miles. The St. Joseph *Gazette* says:

"But little idea of the magnitude of the work being performed can be conceived. The line of operations extends not only from the Missouri river to the end of the track, but thirty-six miles beyond the latter point. Nearly five thousand men and eight hundred teams are employed on the entire work, or, in other words, nearly six regiments of infantry and one of cavalry. There is one thing we can say of the St. Joseph and Denver City Railroad, and that is, that it is the best constructed road west of the Missouri. The ties are of good solid oak, the iron is of the very best English, and it is well spiked down, the bridging is of the very best material, and the grading has been done thoroughly."

Messrs. TANNER & Co. report a renewed demand for the first mortgage 8 per cent. gold land grant and sinking fund bonds at 97½ and accrued interest in currency.

Vicksburg and Meridian Railroad.

At the annual meeting of the stockholders of the Vicksburg and Meridian Railroad Company held in Vicksburg on the 6th May, the following officers and managers were elected for the ensuing year: President, Morris Emanuel; Vice President, Thos. Rigby; Treasurer and Secretary, N. G. Bryson. Managers: M. Emanuel, P. Anderson, T. Rigby, W. Crutcher, A. B. Reading, W. E. Morris, John A. Klein, Thomas M. Smedes, Thomas S. Dabney, James R. McDowell, J. C. Stanton.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Secured as they are by a first mortgage on the Road, Land Grant, Franchise and Equipments, combined in one mortgage, they command at once a ready market.

A Liberal Sinking Fund provided in the Mortgage Deed must advance the price upon the closing of the loan. Principal and interest payable in *gold*. Interest at eight (8) per cent. per annum. Payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000, $500 and $100, Coupon or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

Can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.,
BANKERS,
NO. 11 WALL STREET.

WASHINGTON FIRE INSURANCE COMPANY—172 BROADWAY.

This office was organized in this city December 14, 1850, and reorganized December 26, 1871, with a capital of $200,000, paid in cash. It has always been one of the leading fire insurance corporations of the country. It is now, as heretofore, prepared to issue policies on buildings, merchandize, furniture rents, leases, and other insurance property, and on inland navigation and transportation risks, at the lowest rates compatible with first-class indemnity.

The officers and gentlemen composing the board of directors are favorably known in business circles. The president, Mr. GEORGE C. SATTERLEE, is a veteran underwriter, while the secretary and assistants are experienced, courteous officers. The company is eminently deserving of public confidence and patronage, and we can conscientiously recommend it to the attention of the insuring classes generally.

☞ The Wheeling *Register* of 10th inst. says: The work of grading the Pittsburgh, Wheeling and Kentucky Railroad, was commenced on Monday last, both in this and in Brooke county. It is the intention of the company to push the work forward with all the force it can command.

Journal of Railroad Law.

RAILROAD COMPANIES—COMMON CARRIERS—SUITABLE CARS—SUBORDINATE OFFICERS.

The facts in the late case of The Great Western Railway Company *vs.* Hawkins and ors (18 Mich., 427,) are fully and clearly stated in the following opinion by

CHRISTIANCY, J.—The first point raised by the plaintiff in error (the question of the sufficiency of the declaration to warrant a recovery on the ground of the defectiveness of the cars furnished by the company, without declaring specially upon the contract, &c.,) was involved, and must be considered as decided in this case when before us, upon the same declaration, in 17 Mich. 57. (See RAILROAD JOURNAL, March 9, 1872.) For though the point was not raised, and could not, as the case was then presented, have been assigned for error, the case having been brought here by the plaintiffs below to reverse the judgment for a charge adverse to them, yet if the objection now taken be well founded in law, the plaintiffs in that case could not legally have been injured by the charge, since they could not have recovered under their declaration, whatever the charge upon the points to which it related might have been; and the judgment should not, therefore, have been reversed.

The company in this case must be regarded as common carriers, and liable as such, except so far as that liability was qualified by the special contract. The contract was silent as to the fitness of the cars to be furnished by the company. As properly held in the case when formerly before us, the contract did not exempt the company from the duty or obligation to furnish suitable cars; but the common law liability as to this point, and to this extent, remained substantially the same as if no special contract had been made. The reception of the property for transportation, whether under the special contract, or as carriers of such property generally, created the same liabilities in this respect, and the company must be considered as common carriers in reference to this particular duty, for the breach of which alone the recovery was had.

The evidence in the case tends to show that the injury to the horses occurred in the course of their transportation, and in consequence of the cars being unfit for the purpose. The wrong or negligence, therefore, in this respect, may properly enough be alleged as a breach of the duty to carry safely. We are aware, there are some cases of this kind, which have required a more special mode of pleading; as under the modern system of pleading in England, which requires more precision in stating the exact nature of the breach of duty, than under the former common law rules. But we see no beneficial purpose to be subserved by a more specific form of declaration.

We think the declaration is sufficient to admit the proof of the negligence or breach of duty which the evidence tended to prove.

The second point raised by the plaintiff in error is, "that while the special contract might not excuse negligence on the part of the company or its chief officers, it might well protect them from the negligence of subordinate agents of the company, if its chief officers had no knowledge of the use of defective cars, and employed proper agents," &c.

We must regard this point also, as fully and correctly settled in the case as formerly decided, and no longer open to controversy. The obligation of the company to furnish suitable cars under or notwithstanding this contract, was then held to be absolute on reception of the property, without reference to the fitness or fidelity of agents or officers, subordinate or otherwise, unless some showing was made, that the plaintiffs, with proper opportunities of observation, and with notice of their actual condition, assented to the use of the cars on which their horses were shipped. We see no reason to doubt the correctness of this decision, and think it fully covers the point now raised.

There is no error in the record. The judgment of the Circuit Court must be affirmed.

Judgment affirmed.

Cairo and Fulton Railroad.

At a recent election at Little Rock (Ark.) for four new Directors of the Cairo and Fulton Railroad of Arkansas, (extension of the St Louis and Iron Mountain Railroad), the following gentlemen were chosen: Thomas Allen, St. Louis; George C. Ward, New York; W. R. Donaldson, St. Louis, and James M. Loughborough, St. Louis. The board is composed of thirteen members.

Mr. Thomas Allen, the President, has let the contract for the erection of bridges on this road, over the White river, Black river, and Little Red river, to the "Baltimore Bridge Company," of which Mr. C. SHALER SMITH is the President.

Mr. Allen has also let out to contractors 45 miles of the Cairo and Fulton road south of Little Rock running from that place to Rockport near the Hot Springs. This is to be constructed immediately, and the work will go on as rapidly as possible. The iron for that portion of the road is already at Little Rock.

Delaware Railroad.

The earnings of this road for the years ending December 31, 1870 and 1871, were as follows:

	1870.	1871.
From passengers	$127,443 02	$137,744 78
" freight	248,025 43	296,127 32
" mails, etc	8,394 15	7,548 76
	$383,862 60	$441,420 81
Operating expenses	323,188 27	326,651 41
Net earnings	$60,674 33	$114,769 40
Interest and dividends paid by lessees	101,617 36	120,647 41
Showing a loss of	$40,943 03	$5,878 01

The gain in the receipts, as compared with 1870, is $57,558 21. The first three months of 1870 the lessees charged the cost as heretofore for operating the road; the last nine months, they operated the road under the new agreement of 75 per cent. of the gross earnings. The first three months the charges were $102,004 60; the last nine months they were $221,183 67—total, as above, $323,188 27. At 75 per cent. of gross earnings for the whole year the expenses would have been $287,396 95. Operated at 75 per cent. for the whole year the loss would have been only $5,651 71.

The road has been well kept up and considerably improved during the past year, as will be apparent from the following statement of materials used in repairs, to wit: 635 tons new iron rails; 39,595 new cross ties; 666 long cross ties for switches; 8,149 joint blocks on old track. The new track has been laid with 57 lb. rails and fish bars, a great improvement on the old superstructure.

The sinking fund at the close of 1870 was $105,508 08. It is now $118,131 18, both sums reckoned at par for the securities.

The bonded debt, not provided for by a sinking fund, becomes due as follows:

$500,000 mortgage and guaranteed bonds, July 1st, 1875.

$100,000 guaranteed bonds, July 1st 1875.

$100,000 extension mortgage bonds, January 1st, 1880.

It will be well soon to adopt some plan for the funding of these several amounts, at maturity, into a long loan, secured by a mortgage on the whole road. This will have to be done by the aid and co-operation of the lessees, who are the guarantors of the securities, excepting the last.

BALANCE SHEET, December 31, 1871.

Railroad		$1,764,838 00
Smyrna Branch		29,999 90

President.—S. M. FELTON.

Directors.—Isaac Hinckley, A. C. Gray, Charles Warner, Joseph Bringhurst, Jesse Sharpe, Isaac Jump, H. B. Fiddeman, Manlove Hayes, Alexander Johnson, William H. Ross, Albert Curry, J. Turpin Moore.

Secretary and Treasurer.—M. HAYES.

Portland and Ogdensburg Railroad.

A letter to the Boston *Journal*, dated Portland, May 7, says:

The directors of the Portland and Ogdensburg Railroad have made a contract with Messrs. Fuller Harding of New York for the completion of the road from North Conway through the White Mountain Notch to the Connecticut River, forty miles. President S. J. Anderson and civil engineer John F. Anderson arrived from New York last night, were the negotiations were arranged, and the directors this morning confirmed the contract. The contract in substance is as follows: Messrs, Fuller & Harding are to complete the road for $2,300,000; one-half is to be paid in cash, and one-half in the bonds of the road. The sum of $270,000 is reserved for land damages, fencing, stations, water tanks, engine houses, turn tables and equipments, to be built at either's option. The road is to be constructed as thoroughly as the present portion from Portland to North Conway, sixty miles. The rails are to be equal in quality to those of the Portland Rolling Mill. Messrs Fuller & Harding constructed the road from Portland to North Conway, and are experienced and skillful in the business.

In this connection it may be stated that a new road is to be built from Swanton, the western terminus of the Portland and Ogdensburg road, to Montreal, and another from Swanton to Ogdensburg, going through Canada, the rich agricultural regions of Northern New York, between the present Lake Champlain and Ogdensburg road and the St. Lawrence River, making a saving

of several miles. A new bridge will cross the St. Lawrence at the rapids, and at Montreal connection will be made with the proposed Canada Pacific road, and thence via the Northern Pacific to the Pacific ocean, by which the distance will be some one hundred miles shorter. In about two weeks measures will be taken for a survey of the new Swanton and Ogdensburg road, and the bonding of the towns on its line. We understand that Sir Hugh Allan is largely interested in the new route from Swanton to the West, and it is probable that a line of steamers to Liverpool will be established here in connection with the Portland and Ogdensburg road, to run the year round. The awarding of the above contract is a great relief to the public, as it assures the successful completion of the enterprise.

East Boston Company.

At the recent annual meeting of the stockholders of this company, the following gentlemen were chosen directors: Silas Pierce, J. S. Farlow, T. B. Hall, C. Allen Browne, M. D. Ross, John Pearce, Nathan Cushing, J. Noble, G. N. Macy, John M. Clark. The sales of the last year have amounted to $84,136 50. The company has no debts. The floating assets and cash amount to $5,983 88; mortgage notes, $27,521 15; other receivables, $15,010 50; totol floating assets, $48,515 53; basin lands bonded to sell, $1,152,500; land left as follows: Upland, 2 857,000 feet; marsh, 4,355,000 feet; wharf and flats, 13,000,000 feet. In addition to these there is a large amount of land lying outside of the Harbor Commissioners' lines.

☞ The Baltimore *Sun* of May 9th says that the interest due May 1st on Orange and Alexandria and James River and Kanawha Companies bonds is being paid promptly; the interest due May 9th on the James River and Kanawha Company bonds, 2d mortgage, will also be duly paid. Under the tax bill, passed at the late session of the Virginia Legislature, the State tax on the interest of all railroad and canal companies in that State is at the rate of fifty cents on the one hundred dollars of the market value of such bonds, and the same upon Virginia State bonds, whether funded or unfunded. It is estimated that the tax on this indebtedness will amount to $250,000 per annum. The interest due May 1st is subject to this State tax, as well as to the United States tax of five-sixths of one per cent.

☞ The first meeting of the corporators of the Bangor and Calais Shore Line Railroad Company will be held at Cherryfield (Me.) on the 29th inst. for the acceptance of the charter granted by the last legislature, the organization of the company, and to take measures to further the location and construction of the road.

☞ The officers of the Sparta and Neillsville (Wis.) Railroad Company, recently elected, are: President, Chauncy Blakeslee; Vice President, Eli O. Rudd; Secretary, L. S. Fisher; Treasurer, W. W. Allis; Attorney, J. M. Morrow.

☞ James H. Williams, Esq., of Bellows Falls, Vt., has been chosen President pro tem. of the Rutland Railroad company, to act during the absence of Ex-Gov. Page in Europe.

☞ The Pennsylvania canal has been abandoned between Williamsburg and Holidaysburg.

☞ The Holidaysburg and Williamsburg railroad is under contract.

Lake Shore and Michigan Southern Railroad.

The annual meeting of the stockholders of this company was held in Cleveland, on the 1st inst. From the President's report, which was submitted to the meeting, the following facts are gathered:

The whole number of miles of railroad owned and leased by this company is 1,074. The company also has 92 miles of double track between Buffalo and Toledo, and 259 miles of side track. During 1871 the equipment was increased to the extent of 47 new engines and 1,151 new cars, of various classes, at a cost of $1,203,747 87.

The bonded debt of the company amounts to $2,490,900. The annual charge for interest on this debt is $170,436 30.

The total net earnings for 1871 were $5,018,168 84; amount paid out in interest on funded debt, dividends and Government tax on dividends, $4,887,214 51, making a surplus for the year of $130,914 23.

The earnings from freight compared with 1870, show an increase of $1,492,691 12, or 17¼ per cent.

The passenger traffic for 1871, as compared with 1870, shows a diminution of $203,638 28. The earnings from other sources than freight and passengers show an increase in 1871 over 1870, of $51,381 37. The company estimates its actual and ascertained pecuniary loss, directly resulting from the Chicago fire, at $325,000. The following were elected Directors for the ensuing year: Horace F. Clark, Augustus Schell, Henry B. Payne, Stillman Witt, John A. Tracy, Albert Keep, Charles M. Reed, James H. Banker, William Williams, Amasa Stone, Jr., Wm. L. Scott, Azariah Boody, and Wm. D. Bishop.

A New Railroad in Maryland.

Negotiations are now pending between the Baltimore and Ohio Railroad Company and several of the large Coal Companies in the George's Creek region, touching the construction of a railroad from the Main Stem of the Baltimore and Ohio at Piedmont to Lonaconing. The distance is a trifle over eight miles, and the construction of the road is sought by the companies to give them an outlet for their product independent of the railroad owned and operated by the Consolidation Company, the heavy freights they are compelled to pay on this route forcing them to look for transportation to another quarter. The companies on their part ask the Baltimore and Ohio Company to build and equip the road, they guaranteeing to ship all their coal for the canal and railroad traffic over it at a rate per ton per mile to be mutually agreed upon.—*Cumberland Times.*

☞ The surveying party of the Kentucky and Great Eastern railroad is beyond Augusta, and pushing rapidly forward toward Newport. The route is unusually favorable, and the engineers are in high spirits.

☞ Sylvester Marsh, J. E. Lyon, Onslow Stearns, W. A. Tower, Walter Aiken, E. Raymond and Nathaniel White, have been elected directors of the Mount Washington Railway Company.

☞ The Cincinnati and Baltimore Railway Company has filed a certificate in the Ohio Secretary of State's office increasing its capital stock from $500,000 to $800,000.

☞ The Detroit *Post* says that Andrew Watson, of Jackson, has been appointed General Superintendent of the Detroit and Milwaukee Railroad, in place of Thomas Bell resigned.

THE

CANADA SOUTHERN

RAILWAY COMPANY

Are now offering through the undersigned the

REMAINING $5,000,000

OF THEIR

First Mortgage Sinking Fund

30 Years

7 PER CT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

THE ROAD runs from Buffalo to the Detroit River, connecting there with the Chicago and Canada Southern, now being built to Chicago, and will thereby form the

SHORTEST TRUNK LINE BETWEEN BUFFALO AND CHICAGO, or, in other words, will be the SHORTEST LINK IN THE GREAT LINE OF TRAFFIC BETWEEN THE EAST AND WEST, connecting the GREAT SYSTEM OF RAILWAYS which diverges from Buffalo, Toledo and Chicago.

A branch also runs from St. Thomas to St. Clair, where it forms connections with the various roads leading into the lumber and mineral regions of Michigan.

THE MAIN LINE from Buffalo to the Detroit River is 229 miles long. The branch from St. Thomas to St. Clair is 61 miles, and runs through the great Canada oil region.

OF THE entire line (290 miles) *Two hundred and twenty* miles are *graded, bridged, and ready for the superstructure.* The remaining 70 miles are under contract to be ready for the superstructure early in the Summer.

OF THE 800,000 ties required, 600,000 are on hand and the remainder are coming in daily.

SIX THOUSAND FIVE HUNDRED TONS of rails are delivered and paid for, and the balance contracted to be delivered early in the Summer, those for the main line being STEEL, all 60 lb. to the yard.

ALL the materials for the stations, and a part of the equipment are purchased.

TRACK LAYING will be begun as soon as the frost is out of the ground.

The entire line will be ready for business on or before Dec. 31, 1872.

THE ROAD is being built by the most experienced railroad men in the country, who are confident of a profitable business for it from the day of its opening.

THE ROAD will be

33 Miles Shorter than any other Road,

either BUILT or in contemplation between Buffalo and Chicago.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety-six per cent. of the road IS STRAIGHT.

The Canada Southern (including its branch of 61 miles to St. Clair) and the Chicago and Canada Southern, with their light grades, direct alignment, being the shortest route between Buffalo and Chicago, will admit of the most speedy, economical, and safe transit attainable for both passengers and freight.

The road thus far has been built by cash subscriptions, and the proceeds of the bonds now offered will complete and fully equip it. The principal and interest of the bonds are payable either in New York, London, or Frankfort.

We have no hesitation in recommending the bonds AS A PERFECTLY SAFE as well as a PROFITABLE INVESTMENT.

LEONARD, SHELDON & FOSTER,

No. 10 Wall-St.

Foreign Indebtedness.

We extract from the Mercantile Agency Annual, published by Dunn, Barlow & Co., New York, an article on the above subject, evidently prepared with great care. According to the writer our foreign indebtedness is only about $300,000,000, a sum sufficiently large, but much less than the usual estimate.

The question as to the amount of our foreign indebtedness, and the annual burthen of the interest charge, is one which often excites attention, and is made the basis of many arguments in regard to our fiscal policy. In the last report of Hon. D. A. Wells, special commissioner of the revenue (1869), our foreign debt was thus estimated:

National securities	$1,000,000,000
State, Railway, Municipal and other securities	465,500,000
Total	$1,465,500,000

The opinions, however, held on this subject by those who have given it examination greatly vary.

The estimates of the best informed bankers, whose business makes it necessary for them to follow the state of the foreign exchanges as closely as possible, vary from $860,000,000 (say $560,000,000 United States bonds, and $300,000,000 of State, Municipal, Railroad and other securities) to $1,200,000,000; the several estimates of State, Municipal and Railroad bonds, being substantially the same, and the variation being on the amount of United States bonds.

The elements of this question are somewhat difficult to specify with certainty.

In the first place it is necessary to estimate the adverse balance of trade upon the actual exports and imports of merchandise, including specie.

The declared values of the imports and exports for the last eight years, as made up by the Bureau of Statistics, are used in the following statement:

Imports of merchandise during the eight fiscal years 1864 to 1871, inclusive	$3,103,777,394
Add five per cent. for smuggling and undervaluation	155,188,870
Of specie and bullion	137,381,718
Total	$3,396,347,982

Exports—(Gold values):

Domestic produce	$2,234,206,864	
Foreign merchandise	123,861,795	
Specie and bullion	628,171,140	
		2,986,239,799
Adverse balance		$410,108,183

From this statement it would appear that we have bought $410,000,000 of goods more than we have sold, but it will not do to accept even this estimate without some allowances.

We have added five per cent. to the sum of the imports for undervaluation and smuggling; it is not believed by experts in the Treasury department, however, that over three per cent. should be allowed for this item. On the other hand some addition ought to be made for the profit upon exports, and also for such exports as are not reported, it being much more difficult for custom house officials to obtain accurate statements of the values of exports than of imports. And even up to a recent period, it is well known that considerable quantities of domestic produce, shipped from New York in foreign steamships, have not been entered on the outward manifests.

The fact that domestic products of very considerable value are annually exported from this country, which do not appear in the published statistics of commerce, is evident from the following official statement of the value of imports into Great Britain from the United States, as compared with a similar statement of our exports to that country:

Calendar Year.	Imports into Gt. Britain from the U. S. (£ sterling computed at $4 86.)
1866	$227,712,957
1867	199,483,725
1868	209,283,181
1869	206,905,008
1870	242,051,498
T'l in 5 y.	$1,085,436,369
Av. p.ann.	$217,087,274

Fiscal Year.	Exports from the United States to Gt. Britain (£ sterling comput'd at $4 86.)
1866	$205,596,779
1867	161,144,273
1868	136,912,609
1869	139,745,538
1870	202,546,723
Jl.1 to D.31.	105,209,738
T'l in 5½ yrs.	$951,155,660
Av. per ann.	$172,937,393

If the value of products imported into Great Britain from the United States be computed at rates similar to those used in our export valuation, it follows that merchandise to the value of $44,149,881 is exported to that country annually of which we have no official cognizance. And even if in the British mode of estimating the value, the cost of freight be included, there still remains during the last five years an annual excess of thirty millions. If, therefore, as some suppose, a larger allowance than five per cent. should be made for smuggling and undervaluation, the under-estimate of our exports, as above shown, will fully offset an additional allowance of five per cent.

It is often claimed that a large sum should be added to the adverse balance of trade, as exhibited upon the merchandise statement, for the freight paid to foreign ship owners, who now do most of the ocean transportation.

In the absence of correct data in regard to the total value of freight on imports, the Chief of the Bureau of Statistics has estimated the amount to be eight per cent. on the declared value of the merchandise; and as about sixty-eight per cent. of the whole was carried in foreign ships, this item amounts to $169,000,000.

Another item often added to our supposed foreign debt is the annual expenditure of Americans residing or traveling abroad, estimated by Mr. Wells at twenty millions per annum. But this is now partially counterbalanced by the expenditures of foreigners traveling for business or pleasure in the United States, the number of whom, both from Europe and Asia, is already very considerable, and is every year increasing. There is, however, another source from which we receive a much larger accession of wealth than from foreign travel, viz: immigration. The lowest estimate of the amount of money brought into the country by immigrants is $68 per capita, at which rate a sum of nearly $22,000,000 must have been added to our national wealth by the 321,350 immigrants who arrived on our shores during the fiscal year ended June 30, 1871, an amount which would far outweigh the loss sustained through the somewhat lavish expenditures of wealthy Americans traveling in foreign lands.

The last item to be added to our estimate is the interest which has become due upon the debt while it has been accruing, and upon the supposition that the whole amount of our foreign debt does not now exceed $909,000,000, this item would comprise about $240,000,000, of it, say eight years' interest at an average of $30,000,000 per annum. (We did not begin to borrow upon Federal securities until the year 1864.) As about one-half of the amount received as interest on American securities has been re-invested, this item will amount to $120,000,000.

We have now the following items:

Adverse balance of trade for eight years	$410,000,000
Freights to foreign ship-owners	169,000,000
One-half interest accrued	120,000,000
Contingencies	3,000,000
Aggregate	$702,000,000

From the above statement it appears that the debt we owe to Europe, incurred during the past eight years, should aggregate about $702,000,000. But owing to the fact that our credit abroad during a part of that period was not assured, our securities sold considerably below par. A careful estimate made by the chief of the bureau of statistics establishes the fact that the average discount during the period named was not in excess of twenty-two per cent. In computing the aggregate of this debt, the par value of these securities must be ascertained; and as they sold at an average rate of seventy-eight cents on the dollar, it follows that our debt to foreign nations amounts to nine hundred millions ($900,000,000), and our annual interest charge to fifty-four millions ($54,000,000).

It is proper to add here that several leading bankers, as well as some of the ablest financial editors, are firm in the belief that the value of federal securities alone, held in Europe, exceeds nine hundred million of dollars, and that the total amount is about one thousand two hundred millions. A part or the whole of the discrepancy may be accounted for by the fact that the computation of nine hundred millions as the value of all United States securities includes only those which are owned in Europe, and not those which are held as collaterals. It is well known that the low rates of interest, about one-half those of New York, have attracted from this country borrowers for large amounts on the security of United States bonds.

The most important question is, What have we received from this indebtedness? The reply is, foreign merchandise, chiefly European products, ranging from one-sixth to one-fourth of the value of our total importations.

Upon the common assumption that our imports consist mostly of luxuries, this would not be a pleasant exhibit; but such is far from being the fact. We have borrowed a large part of the total import, and, in order to tell of what it consists, it is necessary to consider a rule which has been proved by experience, viz.,—that the most constant element in our transportation, that which varies least per capita, consists of articles of luxury or comfort—wines, silks, tobacco, tea and coffee, fancy goods and the like; it therefore follows that the excess of imports which we have borrowed consists of articles of necessity, such as metals, lumber, leather, hides, wool, dyestuffs, and other articles which enter into the processes of domestic industry, and most of which are reproductive in their nature.

And this is doubtless the fact; the war diverted men from the accumulation to the destruction of capital, and what we have borrowed is in some respects simply a replacement of the capital destroyed. It has, therefore, been a force without which we should have been hampered and crippled. Had we not thus been able to borrow these articles of prime necessity, our railroads, mills, and works of every kind, and the opening of new lands, would have been far less. In one sense it may be said that by thus borrowing a portion of our tools of production and distribution abroad, we have placed ourselves in a position which will make it easier for us to pay our debt owed both at home and abroad. We have borrowed productive power; and the possession of this power, by enabling us to employ labor on a large scale, has attracted to us productive power of another kind—that of human intelligence and muscle, as represented in the scores of thousands of able-bodied immigrants who flock annually to our shores. This influx constitutes a permanent addition to our wealth-producing forces as well as to our national strength.

As to this debt being due on demand, and the alleged danger of fiscal trouble from the sudden return of bonds, little need be said; the fact that they have been taken when our credit was doubtful makes it certain that they will be held, now that our credit is assured. It is believed that our danger is greater from too great facility in borrowing yet more, than from any sudden collapse of credit and an imperative demand for payment of what we now owe. The export of United States bonds has partly ceased, but we are now borrowing railroads, by exporting their bonds; it be-

hooves us to see that we do not borrow railroads faster than we can profitably use them.

☞ The Paris Citizen, in the course of its remarks upon the prospects of the Paris and Big Sandy road, says: "The directors will now make immediate application for the submission of the proposition in the counties of Bath and Franklin. The former will be asked to subscribe $150,000 and the latter $100,000. After the election in these counties, the city of Louisville will be applied to for a subscription of $500,000. It is expected that within the next thirty or forty days the sum required, as a basis upon which to build the road, will be raised."

☞ The Bangor *Whig* says that a large number of prominent railroad men from the States have recently been in consultation with the Canadian authorities, and it is rumored that as a result of the conference the Lake Megantic road is to be surveyed, located and built at an early day, as a link of the Canadian Pacific Railroad.

☞ Ten miles of the Houghton and Ontonagon Railroad, between L'Anse and Summit, are now completed and trains running over it. It will be extended from Champion to Ishpeming this season, and form part of the through line from Chicago to the head of Keweenaw Bay on Lake Superior.

NOTICE TO CONTRACTORS.

Sealed proposals for the clearing and grubbing and graduation and masonry upon the Nashua and Rochester Railroad, from Nashua to Rochester (48 miles), will be received till FRIDAY, May 31, 1872, at 12 o'clock M., at the office of the President of the Company, F. H. Kinnicutt, Worcester, Mass., to whom all proposals must be addressed, and indorsed "Proposals for Graduation and Masonry."

On and after May 15, 1872, the plans, profiles and specifications may be seen and further information obtained at the office of the Engineer of the Company, in the Telegraph Building, Nashua, N. H.

The directors reserve the right to reject any and all bids.

By order of the Directors,

C. O. DAVIS, Engineer N. and R. R. R.

Nashua, N. H., May 10, 1872.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.
NEW YORK, May 2, 1872.

THE ANNUAL MEETING OF THE SHAREholders of the Illinois Central Railroad Company for the election of directors and the transaction of other business will be held at the office of the Company, in the city of Chicago, on Wednesday, the 29th day of May instant, at 11 o'clock A. M.

The transfer books of the Company will be closed after the fourteenth instant until the first day of June next.

L. A. CATLIN, Secretary.

THE WATSON MANUFACTURING CO.

PATERSON, NEW JERSEY.

CAIRO AND FULTON RAILROAD CO.

First Mortgage, Sinking Fund

Land Grant Bonds,

Due 1891 in Gold.

INTEREST 7 PER CENT. GOLD, FREE OF GOVERNMENT TAX.

Payable January 1st and July 1st, in New York.

THE CAIRO AND FULTON RAILROAD IS the main artery for travel across the State of Arkansas. It is the continuation of the St. Louis and Iron Mountain Railroad, and under the same management. It will connect the St. Louis Railroads and the Illinois Central Railroad with the International Railroad, the Southern Pacific Railroad and the Texas system of roads. Its length is 301 miles, and it deviates from a straight line but six miles. It has no grades over 15 feet to the mile. It passes through the most thriving counties and the Capital, Little Rock. The Land Grant of 1,926,400 acres "is one of the most extensive and valuable ever made to any road by Congress." The whole road is under contract for building, 52 miles are now operated, and tracklaying will go on at the rate of about half a mile a day until the connection of Little Rock with St. Louis is completed. The First Mortgage Bonds, $8,000,000, are the first lien upon the road, rolling-stock and lands, and are recommended as a safe investment. The officers are:

THOMAS ALLEN, (St. Louis) ..... President.
H. G. MARQUAND, (120 Broadway) .. Vice-Pres.
D. W. McWILLIAMS, (120 Broadway). Treasurer.
W. R. DONALDSON, (St. Louis) ..... Secretary.

NEW YORK DIRECTORS.

WM. H. SWIFT, HENRY G. MARQUAND,
WM. T. BLODGETT, JOHN H. SWIFT,
H. M. ALEXANDER, ALANSON TRASK.

The Union Trust Company, Trustee of the Bonds. Price 90 and accrued interest in currency. The Company reserves the right to advance the price at any time. Marketable securities received in exchange at full market rates and Express charges peid. Maps and pamphlets may be obtained on application to

H. G. MARQUAND, 120 Broadway.

Francis C. Bowen,

PATENT LAWYER,

No. 7 Warren Street,

TRAUTWINE'S

CIVIL ENGINEER'S POCKET-BOOK.

SECOND EDITION REVISED.

THE CIVIL ENGINEER'S POCKET-BOOK OF MENSURATION, TRIGONOMETRY, SURVEYING, HYDRAULICS, HYDROSTATICS, INSTRUMENTS AND THEIR ADJUSTMENTS, STRENGTH OF MATERIALS, MASONRY, PRINCIPLES OF WOODEN AND IRON ROOF AND BRIDGE TRUSSES, STONE BRIDGES AND CULVERTS, TRESTLES, PILLARS, SUSPENSION BRIDGES, DAMS, RAILROADS, TURNOUTS, TURNING-PLATFORMS, WATER STATIONS, COST OF EARTHWORK, FOUNDATIONS, RETAINING WALLS, etc., etc. In addition to which the elucidation of certain important principles of construction is made in a more simple manner than heretofore. By John C. Trautwine, Civil Engineer, 648 pages, with nearly one thousand illustrations, executed expressly for the work; forming, altogether, the most complete and concise work of the kind ever published.

The well-known ability of the Author, and his wide-spread reputation as a Civil Engineer, is a sufficient guarantee of the completeness of the work, and renders further recommendation unnecessary.

Bound in Morocco, Tucks, Gilt Edges. Price, $5.

[From the London Builder, Feb. 10, 1872.]

"This work elucidates some important principles in construction. It is a very valuable little book—a cyclopædia in miniature."

Leather Belting.

We have the pleasure of calling the attention of our readers to the advertisement of Messrs. J. B. HOYT & Co., 28 and 30 Spruce St., N. Y., which appears on our last page. This firm is extensively engaged in tanning White Oak Leather, to which, by its durability and the handsome finish it gives unto whatever it is adapted, they are no doubt indebted for their great success. While at their office our attention was directed to a large diagram of a tanned hide which showed from what parts the short lap belting and long lap belting are made; and is an admirably clear and concise manner presents even to the comparatively ignorant observer convincing proof of the superiority of what they term their "Short Lap Belting." Curiosity prompting, we were informed that the hides are selected with much care, especially these to be used for this purpose. To those interested in good machinery and its accessories we take pleasure in referring them to the belting made by J. B. HOYT & Co.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Secured as they are by a first mortgage on the Road, Land Grant, Franchise and Equipments, combined in one mortgage, they command at once a ready market.

A Liberal Sinking Fund provided in the Mortgage Deed must advance the price upon the closing of the loan. Principal and interest payable in *gold*. Interest at eight (8) per cent. per annum. Payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000, $500 and $100, Coupon or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and rust Company of New York.

Can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.,

BANKERS,

NO. 11 WALL STREET.

☞ The traffic receipts of the European and North American Railway for the month of April, 1872, were $24,259 22, against $18,575 28 in April, 1871, and $14,488 80 in April, 1870.

Meeting of Southern and Western Railway Officers.

We are in receipt of a pamphlet containing the "proceedings of the first quarterly meeting of the Western and Southern Railway Association," held at Atlanta, Georgia, April 10th last. Mr. THOMAS ALLEN, of St. Louis, presided; and Mr. O. Chanute, officiated as Secretary and Treasurer *pro tem.*, and L. J. Fleming, of Mobile, was chairman of the Executive Committees. The meeting agreed to a report in favor of "abolishing the practice of paying commissions on the sale of tickets."

A long elaborate report was submitted upon the subject of the "responsibility of railway companies for injuries to employees and others." The report contained much valuable information, but after an extended discussion, which developed some differences of opinion as to the legal questions presented, action thereon was postponed.

A committee, consisting of Messrs. Albert Fink, A. Mitchell, and J. E. Brown, was appointed to report upon the subject of sleeping cars, contracts, interchange, repairs, and compensation for them.

The report of the committee to draft rules to govern railroads in the interchange of cars, &c., was received, and after a slight amendment was adopted, as follows:

1st. Each road should keep a car inspector, at all transfer or junction stations, and reject all cars offered that are not in safe running order.

2d. If cars are out of repair, but still in safe running condition, and loaded with freight that should not be transferred, they may be received, after being marked and noted by the inspector, in such a manner that the car may be received back in the same condition, ordinary wear and tear excepted.

3d. When foreign cars are broken, they shall be made good by the road on which they are broken, except as hereinafter provided.

4th. The road breaking the car to have the option of repairing it, or allowing the road owning the car to repair the same at their expense, it being understood that they shall make the car as good as when they received it, ordinary wear and tear excepted.

5th. When a car is broken so as to require a new body, the road on which the accident occurs, will settle with the owner of the car, by paying the value of the same, at the time the accident occurred, or if requested by the owner thereof to rebuild the car, shall do so, the owner paying the

difference in value between the new and the old.

6th. In case of breakages of wheels or axles, or renewals of brasses in ordinary usage, the party owning the car will furnish the necessary wheels, axles and brasses, to replace those broken or worn out, without charge. But the road on which the damage occurs will furnish the labor, and make the other repairs incident to such breakage.

7th. In case new brasses are furnished by the company on which it becomes necessary to renew them, they shall be charged by the company putting them in at 35 cents per pound, and the old brasses shall be credited at half price.

8th. In the absence of specific agreements a charge of 1½ cents per mile each way, both loaded and empty, is recommended as the proper mileage charge for freight cars run on foreign roads.

9th. The adoption of these rules by the Association, is understood as not interfering with special contracts.

The following resolutions were also adopted:

Resolved, That the Executive Committee take steps to codify a general system of rules to govern railroads in their adoption of signals, in moving trains by telegraph, in the precedence and rights of trains, and in the government of employees.

Resolved, That the experience of the railroads in this country, justifies this Association in recommending the adoption of such brakes upon engines and cars of passenger trains, as can be operated by the Engineer of the train; and the use of platforms on passenger and baggage cars, level with the floors of these cars, to prevent telescoping in case of accidents.

Resolved, That this Association recommends to the manufacturers of automatic brakes, that they adopt such connections and interchangeable parts for their machinery, as shall permit cars variously equipped and used by different companies, to be made up and used in the same train.

It was agreed to confer with the New England Railway Association upon the subject of adopting a uniform system of National time for time tables.

The Association adjourned to meet in Cleveland on the 9th of July next, when a number of important questions will come up for discussion and action.

Pittsburg and Connellsville Railroad.

When Allegheny county subscribed $750,000 to the stock of the Pittsburg and Connellsville Railroad Company and issued her bonds for the same, the company guaranteed the payment of the interest up until the completion of the road. When judgment was had against the county on these bonds the stock was seized by process of the courts, and sold at Marshal's sale for a mere song —$7,500. Subsequently suit was entered against the company by the county authorities to compel payment of the guaranteed interest. After tedious litigation, in which the case was taken a second time before the Supreme Court, the liability of the company was finally determined, and a judgment finally entered in favor of the county for $265,000. Since then the interest and costs have increased the amount to $280,000. Various propositions for settlement have been made, but no conclusion was arrived at until within a day or two past, when the County Commissioners agreed to accept second mortgage six per cent. bonds of the city of Baltimore for the whole amount due.

In 1868 the Pittsburg and Connellsville Railroad Company was indebted to the city of Baltimore for money loaned about $2,000,000, which was secured by a first mortgage. To enable the company to complete the road the city retired her first lien and took a second, permitting a new first mortgage of $4,000,000 to precede her claim. This entitled her to a second mortgage exclusively to secure her debt; but to enable the company to raise money to pay off floating debt and equip the road, she agreed to have the second mortgage enlarged so as to raise the amount needed, and to receive of this enlarged second mortgage, bonds at par for the entire amount of her debt, funding the interest, so that the first payment will be made July 1, 1873. Allegheny county was asked to make a like settlement of her comparatively small claim, and the proposition has been accepted, under the advice of counsel. The Baltimore authorities regard the security as ample, and this being the case, Allegheny county will be fully protected. Had an execution been issued, and payment in money insisted upon, it would have seriously interfered with the business of the road. —*Pittsburg Commercial.*

Milwaukee and St. Paul Railway.

We have been favored with a copy of the report of this company for the year ending December 31, 1871, from which we learn that the number of miles of road owned and operated by the company is the same as for the year 1870, viz: 1,018 miles, exclusive of side and double tracks. The terminal points and distances are as follows:

	Miles.
Milwaukee to Prairie du Chien	193
McGregor (opp. Pr. du Chien) to St. Paul	212
Milwaukee, via Watertown, to La Crosse	196
Milwaukee, via Horicon, to Portage	95
Horicon to Berlin and Winneconne	58
Watertown to Madison	37
Milton to Monroe	42
Calmar to Algona	126
Conover to Decorah	10
Austin to Mason City	40
Mendota to Minneapolis	9
Total length of track Dec. 31, 1871	1,018

In addition to the above 1,018 miles of road, the company own $2,001,000 of the capital stock of the Western Union Railroad Company, being a majority of the capital stock of that company.

The cost of this 1,018 miles of road including its equipment and supplies, elevators and bridges, was at the close of the year 1871 as follows:

Mortgage bonds	$18,130,500
Preferred stock	10,825,000
Common stock	11,823,500
	$40,779,100
Less cost of Western Union	1,500,000
Cost of 1,018 miles ($38,580 per mile)	$39,279,000

The equipment of the road at the close of 1870 and 1871 compares as follows:

	1870.	1871.
Locomotives	155	155
Passenger cars, 1st class	77	81
" " 2d class	10	11
Sleeping cars	9	11
Baggage, mail and exp.	58	62
Box freight and caboose	2,373	2,470
Flat and stock	580	590

In the following table are shown the mileage of trains, the passenger traffic and the freight traffic on all the roads collectively for the years 1870 and 1871:

	1870.	1871.
Passenger trains	963,802	1,023,376
Freight trains	2,371,454	2,296,027
Wood and gravel trains	424,918	365,336
Total mileage	3,760,174	3,684,739
Passengers carried	810,060	849,631
Do. carried one mile	43,918,671	45,729,478
Freight (tons) carried	1,522,753	1,463,155
Do. carried one mile	181,428,573	173,676,258
Pass. revenue per mile	3.88 cents	3.65 cents.
Freight revenue per mile	2.82 cents	2.54 cents.

The following is a comparative statement of the earnings and expenses during the years ended December 31, 1870 and 1871:

Earnings from:	1870.	1871.
Freight	$5,148,855 86	$4,444,568 11
Passengers	1,735,158 91	1,698,469 28
Mail service	80,866 06	121,585 24
Express service	158,870 58	144,356 78
News services	4,950 00	5,350 09
Rents	8,067 01	7,169 40
Telegraph	6,518 15	5,691 48
Extra baggage	7,435 45	7,057 68
Sleeping cars	32,053 50	40 960 00
Elevators, "A"	97,513 57	89,841 37
Elevators, "B and C"	106.407 88	97,992 90
Elevator, "D"	23,997 97	11,259 27
Stock yards	10,871 49	16,487 96
Total	$7,421,061 43	$6,690,695 56
Expenditures (ordinary)—		
Repairs of track	$684.024 53	$640,774 29
" bridges	39,248 15	50,009 16
" fences	2,475 20	17,421 76

" loco'tives	275,088 26	242,710 54
" cars	522,537 73	876,560 53
" tools, etc.	39,332 49	38,312 40
Management and general office	114,025 67	115,515 56
Foreign agency & advertising	24,370 11	26,217 98
Station service	506,720 44	454,281 41
Conductors, baggage and brakeman	246,521 19	233,415 59
Engineers, firemen & wipers	305,988 40	295,839 34
Train and station supplies	123,712 80	106,639 05
Fuel consumed	660,675 60	519,094 61
Oil and waste	69,599 57	52,895 53
Personal injuries	5,800 63	11,184 81
Damage to property	23,949 87	14,718 62
Loss and damage of freight & baggage	8,219 08	9,547 08
Legal expenses	20,614 02	20,140 14
New York office exp.	9,758 70	19,360 57
Taxes	200,333 67	197,414 72
Insurance	26,092 78	12,751 64
Miscellaneous	17,431 76	16,856 64
Expenses (extraordinary)—		
Renewal of track	364,541 06	220,156 67
New bridges	42,849 82	20,062 85
New buildings	32,596 08	35,237 80
New fences	80,828 56	.....
New locomotives	17,222 50	.....
New tools & mach'ry	10,554 99	1,454 01
U. S. Gov. taxes	38,651 78	810 62
Rebuilding loco'tives	5,775 36	.....
Mississippi ferry	38,444 82	41,348 81
Stock yard expenses	3,972 48	6,253 54
Total	$4,653,274 29	$3,850,354 56
Gross earnings	$7,421,061 43	$6,690,695 56
Total expenses	4,653,274 29	3,850,354 56
Net earnings	$2,767,787 14	$2,840,341 00

The gross earnings of 1871, as compared with those of the previous year, show a decrease of $730,365 87, and the expenses a decrease of $802,919 73. The net revenue shows an increase of $72,553 86. The per centage of expenses in 1870 was 63, and in 1871, 58 per cent. Expenses are divided as follows:

	Ordinary.	Extraordinary.	Total.
1870	$4,017,826 44	$635,447 85	$4,653,274 29
1871	3,525,030 26	325,324 30	3,850,354 56
Decrease	$492,796 18	$310,123 55	$802,919 73

The earnings and expenses by operating divisions for the two years were as follows:

Gross earnings—	1870.	1871.
La Crosse division	$2,188,279 99	$1,906,896 18
Northern division	793,778 76	720,586 60
Prairie du Chien div.	2,477,226 93	2,139,116 75
Iowa and Minnesota and Iowa and Dakota divisions	1,957,780 75	1,924,096 08

Expenses—		
La Crosse division	$1,380,519 59	$1,082,274 42
Northern division	430,843 38	441,023 68
Prairie du Chien div.	1,487,820 49	1,129,902 11
Iowa and Minnesota and Iowa and Dakota divisions	1,354,090 83	1,197,154 40
Net revenue—		
La Crosse division	$807,760 40	$824,621 76
Northern division	366,930 38	279,562 97
Prairie du Chien div.	989,406 44	1,009,214 64
Iowa and Minnesota and Iowa and Dakota divisions	603,689 92	726,941 63

The earnings, expenses and net revenue per mile of road in the two years compare as follows:

	1870.	1871.	Decrease.
Gross earnings	$7,674 82	$6,571 89	$1,101 93
Operating exp	4,812 08	3,782 27	1,029 81
Net revenues	$2,862 24	$2,790 12	$72 12

It will be observed that there is a decrease in the gross earnings of $730,365, owing to a comparatively light wheat crop and the reduced rates for the transportation of freight and passengers. There was a decrease of 81,073 tons of eastward bound freights and an increase of 21,475 tons of western bound freights.

The company earned 7 per cent. net on their preferred stock, and a fraction over 6 per cent. on their common stock. They paid the 7 per cent. in cash to the preferred stockholders, and deferred the dividend on the common stock, having used the remainder of the net earnings for improving and acquiring additional property, as below shown.

The expenditures made by the company during the year 1871, not charged to operating account, amount to $717,012 82, all of which the directors believe to be either absolutely necessary or very desirable to be made for the benefit of the company. They are are as follows, viz:

Sinking fund—second mortgage b'ds, (cancelled this year)	$53,000 00
New locomotives and cars	152,113 60
Boats, barges and transfer tracks, Prairie du Chien	21,820 37
Mississippi river bridge, at La Crosse	6,626 28
New buildings, turn tables, etc., in Iowa	3,376 83
New connecting railroad at Minneapolis	6,889 93
New fences in Iowa and Minnesota	23,530 54
Depot grounds, wharfs, etc., at Milwaukee and St. Paul	34,801 69
New buildings at La Crosse	14,256 65
New embankment at Mendota and Fort Snelling	19,716 40
Right of way	15,891 12
New elevator at Grand Haven	8,485 60
North Western telegraph company	13,877 40
Bonds and shares in connecting roads	140,271 13
Temporary loans to connecting roads	202,355 28
	$717,012 82

The Milwaukee and St. Paul Railway Company now operate, by lease, the following railroads:

The Oshkosh and Mississippi River Railroad (from Ripon to Oshkosh) 20 miles, commencing January 1, 1872, paying as a rental therefor 35 per cent. of the gross earnings.

The Hastings and Dakota Railroad, now in operation from Hastings to Carver, 48 miles, but under contract to be finished to Glencoe by July 1st, 1872, making 75 miles in all, paying as rent therefor $1,500 per mile per annum of finished road.

The Milwaukee and St. Paul Railway Company have since January 1st 1872, but as of that date, purchased from the Chicago and St. Paul Railroad Company, the line of road extending from St. Paul to Winona and La Crescent. It is in operation from St. Paul to Winona, 103 miles; and is to be completed from Winona to La Crescent, about 30 miles, previous to October 1st, 1872. The purchase was made by giving their bonds to the amount of £300,000, payable in London in A. D. 1902, at 7 per cent. interest.

This purchase, in connection with their former line of railroad from La Crosse to Milwaukee, and a road now being constructed by the Wisconsin Union Railroad Company from Milwaukee to Chicago, gives the Milwaukee and St. Paul Railway Company the best practical route in every respect from Chicago to St. Paul.

GENERAL ACCOUNT, December 31, 1871.

Cost of road and equipment	$39,700,788 97
Western Union Railroad stock	1,500,750 00

WESTERN UNION RAILROAD.

This road extends from Milwaukee and Racine, on Lake Michigan, to Savannah and Port Byron on the Mississippi River, 196½ miles; and is continued by a 10 mile branch (which is operated but not owned by the Western Union Co.,) to Rock Island and Davenport, making the total miles operated, exclusive of side tracks, 206½ miles. That part of it from Eagle to Elkhorn (15½ miles) gives it a direct Milwaukee connection. The cost of the road represented by stock and bonds (196½ miles) is as follows; mortgage bonds, $3,275,000; shares, $4,000,000—total cost, $7,275,000, or, say, $37,000 per mile. Three millions of the mortgage debt bears but 3 per cent. interest until July, 1873, after which it, like all the other bonds, bears 7 per cent interest.

The earnings and expenses of the road for the years 1870 and 1871, compare as follows:

	1870.	1871.
Gross earnings	$766,937 85	$842,169 22
Total expenses	617,982 51	638,373 20
Net earnings	$148,955 34	$203,796 02

This shows an increase in gross earnings of $75,231 37, with an increase in expenses of $20,390 69, making the increase in net earnings $54,840 68. The interest on the mortgage bonds is $106,697 02—an increase over the previous year of $45,202 42. Tons of freight moved, 234,867, against 203,328 in 1870—an increase of 31,539. Tons of freight carried one mile in 1871, 24,675,225. Number of passengers carried in 1871, 190,059, do., carried in 1870, 200,800—decrease, 10,741. Number of passengers carried one mile in 1871, 5,231,322.

The equipment of the road consists of 28 locomotives, 11 first-class passenger, 1 sleeping, 1 business, 4 baggage, mail and express, 8 baggage and second-class, 402 box freight and caboose, 32 stock, 35 flat and 51 coal cars. Miles run by passenger trains, 198,303; by freight trains, 323,391 by wood and gravel trains, 6,689—total, 528,383. Earnings per mile run: on freight $1.85; on passengers, $1.18. Expenses per mile run, $1.22. Per centage of expenses to earnings, 76. Receipts per ton per mile, 2.4 cents; per passenger per mile, 3.96 cents. Gross earnings per mile of road, $4,078 30; net do., $986 91.

GENERAL ACCOUNT December 31, 1871.

President.—ALEXANDER MITCHELL, Milwaukee.

Vice President.—RUSSELL SAGE, New York.

Directors.—Alexander Mitchell, Russell Sage, Fred. P. James, N. A. Cowdrey, Walter S. Gurney, Selah Chamberlain, S. S. Merrill, Julius Wadsworth, James Buell, James G. Garner, Levi P. Morton, F. de Billier and F. A. Mueller.

General Manager.—S. S. MERRILL, Milwaukee.

Sec. and Treas.—R. D. JENNINGS, Milwaukee.

Asst. Sec. and Transfer Agent.—JAS. M. M'KINLAY, New York.

Auditor.—J. P. WHALING, Milwaukee

Purchasing Agent.—ROBERT WASON, Jr. Milwaukee.

Boston and Albany Railroad.

The Boston and Albany Railroad have made a survey of the proposed railroad route from Westfield to Lee, with reference to making a connection with the Lee and Hudson Railroad, and reducing the distance by rail between this city and Albany. The results are quite favorable to the project, the highest grade being sixty-five feet to the mile, while on the present line, in Washington, there are grades of eighty five and eighty-seven feet. The reduction of distance between Westfield and State Line is 14½ miles—a saving which the road may well think worth its while to make. It is surmised that this will eventually become the main line, though the existing road will, of course, continue to be run for the accommodation of way travel, but, even in that case, Pittsfield and some of the other towns will feel somewhat out in the cold.—*Springfield Republican.*

The Canada Pacific Railroad Project.

The Pacific Railroad scheme of the Dominion Government is now before the country. Briefly stated, it consists of a proposal to grant fifty million acres of land, in alternate blocks twenty miles wide, on either side of the line, supplemented by a bonus of thirty million dollars. Lake Nipissing is to be the starting point of the line in Ontario, and its total length will be 2,700 miles. As the amount of land to be granted on the plan above mentioned would fall somewhat short of the fifty million acres, which the Government proposes to give, the deficiency is to be made up by allotting about sixteen million acres in other parts of the Dominion. It order to secure the desired improvement the Government is authorized in the bill to enter into arrangements with any company or amalgamated companies to build and work the road, provided said company or companies shall have a capital of not less than ten millions, one-tenth of which shall be deposited in the hands of the Receiver-General before they shall be qualified to accept the contract. But a further clause is appended, to the effect that, if the Government shall make no contract with any existing company or companies, they shall have power to create such a company by a simple order in council. This latter provision would appear to empower the ministry to make almost any arrangements they may choose.—*Boston Advertiser.*

The Grain Trade of Baltimore.

The St. Louis *Democrat*, of 14th instant, commenting upon her cereal market, says:

While St. Louis is deeply sensible that the position New Orleans occupies is one of the utmost importance to the future of St. Louis, yet the total lack of co-operation evinced by New Orleans has driven St. Louis to seek an outlet to the sea board for the cereals which were pressing upon her market through some willing and appreciative city. It was therefore proposed that the Ohio and Mississippi Road should change to the prevailing gauge between this city and Cincinnati and form, with the Baltimore and Ohio Road, a cheap through line to Baltimore for our grain. Both Companies embarked in the enterprise with spirit, and the Baltimore and Ohio Road built a grain elevator at Locust Point, Baltimore, and established a line of steamers to Europe to facilitate the movement of Western produce by this route. The Baltimore grain dealers entered into the business of purchasing Western grain with a zest which New Orleans will not, perhaps, command for a decade yet. They did not ask or expect St. Louis grain men to consign their corn to Baltimore for a market, but they sent telegrams ordering 20,000 to 100,000 bushels at a time at a given price. These orders were filled by our St. Louis merchants at ½ cent per bushel, and so the trade throve, until now it is the steadiest and best trade in corn we have. The *Price Current* errs when it states that we ship corn by rail to Baltimore in preference to giving it to our own steamers to carry. We ship nothing only as ordered by the Baltimore buyers. When our grain dealers consign corn to any point for a market it goes to New Orleans, and by water, too. But if New Orleans would do by us as Baltimore does, buy the grain outright of us for delivery, there would be no doubt that grain in abundance would flow into New Orleans. But New Orleans will take few chances outside of cotton and sugar. These two commodities at present seem to fill up the measure of her commercial ambition and fully occupy her time and capital.

New York and New Haven Railroad.

The income of this company for the fiscal year ending September 30, 1871, was as follows:

From passengers		$1,764,175 28
" freight		442,027 01
" mails and express		112,887 46
" other sources		89,837 13

Leaving		$848,665 62

The resources for the past year and the disposition of the same have been as follows:

RESOURCES.

Cash on hand October 1st, 1870	$520,124 16
Materials on hand October 1st, 1870	308,544 70
Second installment on additional capital (25 per cent.)	750,000 00
Transportation earnings	1,144,632 82
Apparent profit, Shore Line Division, 11 months	51,451 63
Total	$2,774,753 31

PAYMENTS.

Dividends, (two of 5 per cent. each,)	$712,500 00
Taxes	141 105 52
Interest	63,570 00
Aditional real estate	7,361 69
On account of new bridge over Housatonic River, new bridge at South Norwalk, new depots, engines houses, &c.	179,535 42
Decrease in accounts payable	190,609 81
Materials for coming season	209,433 22
Materials for Shore Line Division	59,140 57
Cash on hand, and due from agents & corporations, October 1st, 1871	1,208,497 08
Total, as above	$2,774,753 31

The following is an exhibit in condensed form of the business of the year ending September 30th, 1871.

Receipts for transportation		$2,358,926 88
Transportation exp.	$1,214,294 06	
Taxes	144,105 52	
Interest	63,570 00	
Loss W. Bement	88,291 68	
		1,510,261 26
To profit and loss		$848,665 62

EXPENDITURES ON ACCOUNT OF NEW CAPITAL.

Additional real estate	$255,516 58
Steel rails	282,353 29
New land and shops, New Haven	392,859 57
Bridgeport Bridge	46,499 21
Cos Cob Bridge	76,279 63
New equipment	68,775 00
On account of new depots and depot grounds at New Rochelle, Rye, & Port Chester, and new bridges at South Norwalk and Housatonic River	141,815 03
Total	$1,364,098 31

In order to have the time for the annual report of this company, correspond with the time when, by the laws of the States of New York and Massachusetts, the annual reports of railroad companies are required to be made to those States, the Board of Managers of the New York and New Haven, and the Hartford and New Haven Railroad Companies, advised the board of directors of said two companies hereafter to close their fiscal year on the 30th day of September.

For that reason, the accompanying report gives the business of this company for the year ending September 30th, 1871.

Since the last annual meeting of this company, the Legislatures of the States of Massachusetts and Connecticut, have enacted laws, authorizing the complete consolidation of the New York and New Haven and Hartford and New Haven Railroad Companies, into one corporation, under the name of the New York, New Haven and Hartford Railroad Company. As the contract, under which the two companies are now acting, requires such consolidation to be made as soon as the necessary Legislative authority for that purpose is obtained, the stockholders will doubtless be called upon, at an early day, to take action upon an agreement of consolidation to be submitted by the board of directors.

The improvements to your road and equipment have been carried steadily forward. Since the close of the fiscal year the new double track bridges at the Housatonic River and Norwalk Harbor have been completed. The relaying the road with steel rails will be completed during the summer of 1872.

Your road, depots, bridges, and equipments are in better condition than ever before, for which you are greatly indebted to your superintendent, and the faithful men at the various departments of repairs.

The company have 38 engines, of which 33 are in good order, 1 in running condition, and 4 in the shop for repairs. The number of miles run by engines during the year has been 839,426, at a cost of 10 cents per mile run for repairs, which includes the cost of building one new engine in the company's shops; and 12½ cents per mile run, for coal consumed by the engines. Two new engines have been purchased from the Rogers Locomotive and Machine Co., of Paterson, N. J., and two old ones have been sold during the year.

The company have also 80 passenger, 16 baggage, 434 freight, and 50 gravel cars, besides 74-234ths of 45 passenger cars, (of which 12 are sleeping, and 8 are drawing room cars,) 8 baggage, 2 express freight, and 4 postal cars, belonging to the New York and Boston Express Line; and 74-232nds of 7 passenger and 4 baggage cars, be-

longing to the New York and Boston Shore Line, all of which are in excellent condition. The superintendent in his report says:

There have been placed in the track during the past year, about 54,000 cross-ties, and about 2,000 tons steel rails. The steel rails, under contract for delivery the coming year, will be sufficient to lay the entire length of your road with steel rails. Two gravel trains have been run during the season, and the tracks at present are all you have promised they should be, equal to any in our country.

The new bridges at the Housatonic and Norwalk Rivers are rapidly approaching completion, and will both be finished about January, 1872. These will make our bridges all in fine condition, and well worthy of examination.

The new depot building at Stratford has been completed, and another is now being built at Rye which will be finished early in the Spring of 1872. All other depot buildings and engines houses are in good order.

The passenger and freight trains have been run with the usual regularity and safety. There have passed over the road during the year, 9,531 passenger, and 2,608 freight trains, exclusive of gravel or construction trains. The number of passengers transported during the same time is 2,512,840, which is equal to carrying one passenger 75,313,493 miles; and during the past sixteen years, ending September 30, 1871, 25,405,708 pasengers have been transported over the New York and New Haven Railroad, without an accident to any train, while on that road, that caused the loss of a single life or limb to any passenger so transported.

CONDENSED BALANCE SHEET, SEP. 30TH, 1871.

Railroad, including the franchise, right of way, grading, masonry, bridging, fencing, superstructure, iron, station houses, shops, fixtures, machinery, engineering, interest, discount on bonds, &c	$6,143,480	04

President.—WM. D. BISHOP.

Directors.—Wm. D. Bishop, Bridgeport; George B. Carhart, George N. Miller, Abraham R. Van Nest, Horace F. Clark, Wilson G. Hunt, New York; Ezekiel H. Trowbridge, New Haven; Jonathan Godfrey, Southport; Nathan A. Baldwin, Milford; Nathaniel Wheeler, Bridgeport;

Treasurer.—JOHN T. SHELTON.

Secretary.—EDWARD I. SANFORD.

Superintendent.—JAMES H. HOYT.

☞ Track-laying on the extension of the railroad from Lancaster to Northumberland (N. H.) will be completed by the first of July.

Improvements in Artillery.

By no process have the capabilities of iron and its products been more successfully developed than in the experiments looking to improvements in artillery, and we take pleasure in noting every work of this kind. A new steel gun now demands attention. The Prussans have long been foremost in the development of artillery. Years ago, the long brass 24-pounder of the Prussian army was pronounced a weapon of wonderful accuracy for seige operations, and now we have from the Cast Steel Works of Fried. Krupp at Essen in Rhenish Prussia, a cast steel gun even more formidable. The Krupp system of Breech Loading Steel Guns is now used by many of the European Governments with much success, and the accuracy of range and great penetrating power of these guns is indeed wonderful.

The largest Krupp Guns used at the siege of Paris were twenty-four pounders, or as they are now called, fifteen centimetres (about six inches). The weight of this gun is about six thousand pounds; charge of powder, four and a half to five and a half pounds; weight of projectile, fifty-five to sixty pounds. The French forts were armed with the largest marine guns of the French fleet, but the accuracy of the twenty-four pounders soon dismounted them, piercing the casemates and reducing Fort d'Issy to a heap of ruins. The agency of Krupp's Works in the United States is with THOMAS PROSSER & SON, 15 Gold St. N. Y.

Cements.

The use of cement in the erection of structures of stone, dates from the earliest historic ages. In pre-historic times, it does not seem to have been generally known. The remains of edifices which are left to us from those remote periods, present the appearance of stones of Cylopean dimensions fitted closely to each other, and depending upon their size and weight to maintain them in the position to which they are placed. In building break-waters, there has been no improvement upon the art of the Pelasgian races. Seventeen centuries ago, the harbor of Joppa was formed by casting weighty stones into the sea in 20 fathoms of water to prepare a foundation, the greater number of them 50 feet long, 9 feet deep, and 10 feet wide. But with the construction of aquaducts and bridges, the use of cement became necessary, and those employed by the ancients enjoyed great reputation for their excellence. Among the best known in this country are the "Kingston" and "Rosendale," which are manufactured on the banks of the Hudson, but many good cements are also produced on the banks of the Potomac, and at one or two points in Kentucky. The Rosendale Cement is offered to constructors of Railroad works, through the columns of the Journal, by Messrs. Delafield & Baxter, 54 Pine Street; the Lawrence Cement Co., 67 William Street; F. O. Norton, 90 Broadway; the Lawrenceville Cement Co., 96 Wall Street; the Hudson River Cement Co., 95 Liberty St., and the James Cement Co., 24 Dey St., New York. The product of the Newark Lime and Cement Co., is on sale at the foot of Bridge Street in that city. All these cements may be regarded as perfectly reliable: It should be borne in mind that cement is liable to adultration, and it is therefore important to procure it of reliable and first class houses or companies like those above named.

Union Pacific Railroad.

From the report of this company for the month of April it appears that the number of acres of land sold during the month was 12,446.37, for $51,000 05—an average per acre of $4 09. Land Grant bonds were cancelled during the same period to the amount of $10,000. The total sales to April 30, 1872, were 530,433.91 acres for $2,194,008 57—an average per acre of $4 13. Lands belonging to the company remaining unsold, 11,549,566.09 acres.

The total amount of Land Grant Bonds issued is $10,400,000—less bonds cancelled by Land Department, $976,000; bought by Trustees, $251,000; total, $1,227,000—leaving bonds outstanding, $9,183,000. Land notes on hand, April 30, 1872, (interest not included) $1,056,827 21.

The earnings of the road for March, and for three months from January 1, have been as follows:

	March, 1872.	March, 1871.
Earnings	$562,861	$499,899
Expenses	366,668	275,483
Net earnings	$199,193	$224,416
	Jan. 1 to Mar. 31, 1872.	Jan. 1 to Mar. 31, 1871.
Earnings	$1,373,912	$1,353,396
Expenses	1,138,764	905,305
Net earnings	$235,148	$448,091

Net earnings 1872 compared with 1871 show:—

For March, decrease	$25,223
For two months previous	187,720
And for three months	$212,943

Stock and Bonds of Consolidated Companies.

An act relating to the stock and bonds of railroad and canal companies, merged or proposing to merge, and held by executors, guardians or trustees, passed the last Pennsylvania Legislature, and provides that it shall and may be lawful for any executor, guardian, or trustee holding the stock and bonds, or either, of any railroad or canal company which may be authorized to merge and consolidate with, or which has become merged and consolidated with any other railroad or canal company, to agree for and in respect to the said stock and bonds, or either, held by them, to the terms or conditions of such proposed or actual merger, and to accept in lieu or exchange for said stock and bonds, or either (but to be held in like trusts), the stock and bonds, or either, of the company so merging or formed by such merger and consolidation.

☞ The bill authorizing a subscription of $600,000 by the District of Columbia to the capital stock of the Piedmont and Potomac Railroad was passed by the House on the 20th inst., and, having previously passed the Senate, awaits the president's signature. This road will unite with the Chesapeake and Ohio at Staunton, Va., 130 miles from Washington, and will shorten the distance between St. Louis and Washington 127 miles. The president is Chas. H. Sherrill, who says the road will be completed within three years.

☞ It is officially announced that the New Jersey Southern Railroad Company will increase its capital stock by an issue of ten thousand additional shares of $100 each—making the whole capital stock $5,000,000. The money is wanted to purchase steamboats and pier accommodations.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, May 25, 1872.

Stock Exchange and Money Market.

Money has in much better supply, and lenders have been more liberal in offering accommodation to the leading borrowers, whose wants have been generally less urgent, outside of the demand for aid, from the Stock Exchange firms, which has been quite active, but promptly met at the ruling figures. The range of call loans has been from 5@7, with the main business reported on the basis of 5 per cent. to the Government houses, and 6 per cent. on railway and mixed bond and stock collaterals. The discount applications have been on a moderate scale, and the offerings of all strictly choice to very good grades of commercial paper have found a ready market within the range of from 7@9 per cent. per annum. The city banks have been strengthening their reserves, while the Government office has made a further reduction of its cash balances. The U. S. Sub-Treasury office reduced its coin balance about 4½ millions and its currency reserve nearly $200,000. The city banks added to their loan and discount average nearly ¾ths of a million during the week, and again reduced their outstanding circulation slightly. The U.S. Sub-Treasury held a currency balance at the close of business on Tuesday of $5,274,146, and a coin reserve, of $58,500,751.

The city banks, in their latest return, show an increase of $1,500,500 of legal tender notes, $304,700 of specie, and $2,000,100 of deposits, also an addition of $711,600 to their loan and discount averages, with a reduction of $75,800 in their item of circulation. The city bank exchanges, last week, averaged 119¼, and thus far, this week, about 117 millions daily. The banks now hold $7,389,200 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $20,809,800, against $15,262,813 same time last year. The city bank deposits are now $219,267,600 against $233,594,016, week ending May 21, 1871. The legal tender reserve amounts to $48,805,800, against $66,521,822 same time last year. The circulation now stands at $27,638,400 against $31,204,966 same time last year. The loans are now $285,713,600 against $289,436,531 at this date last year.

The coin reserve of the city banks is now a little over 20¼ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 48⅞ millions against $46,616,000 on the statement of February 10th.

The U. S. Sub-Treasury reduced its currency balance $199,983, and its coin reserve $4,511,176 as the result of the week's business. The receipts of the office were $2,983,366 in coin, and $5,464,885 in currency; payments, $7,494,541 in coin, and $5,664,868 in currency. The office received $2,780,000 in coin or its equivalent, from customs; and disbursed $1,799,232, of coin interest.

Government revenues have been yielding moderately, since our last. The excises yielded within the week about 2½ millions, and thus far since July 1, 1871, $113,863,156. The customs at the port of New York last week were $2,622,092; at the outports, equal to about $850,000 all in coin, or coin certificates.

Under the May programme of the Treasury Department, Government proposes to sell during the month, Gold as follows: Thursday, May 30, $2,000,000. And to buy in Five Twenty bonds as follows: Wednesday, May 29, $2,000,000.

There has been a less confident speculative inquiry noted for Gold, and the price has shown less buoyancy, though the export drain has been unusually large (exceeding, last week, 3¼ millions), while the customs call has been up to a fair average. The less exciting reports relative to the pending *Alabama* negotiations have been against the speculative movement. The specie exports on Wednesday of this week were $1,058,000, including $208,000 in silver.

The range of the price during the week has been from 113½@114⅜ and the closing quotation on Wednesday was 113⅞ against 113¾@113⅞ the preceding Wednesday. The specie outflow, last week, was $3,268,085. The Gold Exchange Bank clearances have averaged about 57 millions per day during the week.

The cash balances of the Treasury Department on Monday were: Currency, $12,019,942; coin $100,618,340. Certificates were outstanding for $25,578,000.

The customs demand for Gold last week, averaged $468,340 a day; thus far, this week, it has averaged $570,000 a day, or equal to a weekly aggregate of $3,520,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $1,100, and since Jan. 1, 1872, $640,712 against $3,024,530 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, has been $142,096,515 against $182,912,922 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to May 18, 1872, $72,306,268, against $80,054,605 same time in 1870-'71.

The export drain of specie was $3,268,085 last week, against $2,417,998 same week preceding year. The shipments since July 1, 1871, have been $40,607,238 against $72,092,235 same time in 1870-'71.

Foreign Exchange has been in fair request and generally firm as to price. Bankers' sixty day bills on London closed on Wednesday at 109⅛@109¾; sight bills on London, 110⅜@110⅝.

The produce exports from this port, week ending with May 21, were to the currency value of $3,936,595.

Government securities have been offering quite sparingly and have been quoted firmer, though the dealings in most issues have been comparatively moderate, due in most part, to the difficulty of promptly executing orders for sound lots of bonds, because of their scarcity in the open market.

U. S. sixes of 1881 closed here on Wednesday of the current week at 118⅞@119; U. S. Five-Twenties of 1862, (other than the bonds called in) ex May coupon 113⅝@113¾; U. S. Five-Twenties of 1864 at 113⅝@113¾; U. S. Five-Twenties of 1865, 114¼@114½; U. S. Five-Twenties of 1865 consolidated, 115⅞@116; U. S. Five-Twenties of 1867, 116⅛@116⅜; U. S. Five-Twenties of 1868, 116⅜@116⅝ U. S. Ten-forties at 111¾@111⅞; U. S. Fives of 1881 (Funding Loan) 112⅜@112⅝; Six per cent. currency bonds, 116⅜@116⅞.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	May 7.	May 15.	May 22.
Consols	92⅞	93⅛	93¼
U. S. 5-20's of 1862	89¾	—	90¼
U. S. 5-20s, 1865	90¾	91¼	91¼
" 1867	93	93¼	93¼
" 10-40s	88½	89	89½
New Fives of 1881	89¼	89½	89⅞
Erie	53½	55¼	—

State bonds have been moderately sought after, closing with more steadiness.

Railway and Miscellaneous share property, has been more freely and confidently dealt in, and prices have been quoted decidedly stronger for all the speculative favorites. The growing ease in Money tended to stimulate operations, and to strengthen values.

There has been a good demand noted for the better class of Railway Bonds, prices of which have been well maintained. The older issues have been comparatively scarce. Central Pacific Sixes have been in more request at 108⅜@108⅝. Chesapeake and Ohio have been inquired for, to a fair extent, for investment purposes, at 94 per cent. and accrued interest.

General business has been moderately active in the leading kinds of domestic produce. Flour, Wheat, Pork, Lard and Petroleum closed in favor of buyers. Corn and Oats, Butter, Cheese, Naval Stores and Cotton strong. Middling upland cotton closed on Wednesday at 24¼ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,604,744 bales, against 3,722,146 bales same time in the preceding year; exports 1,812,501 bales against 2,838,625 bales in the previous year; stock at the ports at latest dates, 256,288 bales against 359,816 bales same date 1871.

At the Live Stock Markets, Beeves have been in fair supply and moderate demand at 10@13½ cts.; Veals in good request at 5@8¾ cts.; Sheep at 6@9; Lambs 12@18 cts. Swine, at 4¾@5 cts. per lb., all live weight. The week's receipts were 8,535 Beeves, 4 743 Veal Calves, 14,660 Sheep and Lambs; and 28,058 Swine.

There has been a comparatively limited movement reported in most kinds of Metals buyers having been reluctant to operate with the freedom at asking rates. Iron has been in better supply, but generally held with confidence, though the demand has been very moderate; sales have been reported at 300 tons Glengarnock Pig at $50; 320 tons Eglinton Pig at about $48; 50 tons Gartsherrie at $52; and 200 tons old double-headed Rails on private terms. Lead, Spelter and Zinc nominally as before, and quite dull. Pig Tin dull, with Straits and English quoted at 39c., gold. Of Tin plates, sales were reported at only 500 boxes Charcoal at $13 75; market unchanged. Of Ingot Copper, only 50,000 lbs. were reported, sold at 28c. per lb.; market dull.

In foreign goods, generally there has been a restricted movement at less buoyant prices, the main exceptions having been Coffee, Larger Raisins, and Currents which were quite active and much firmer. The week's imports of foreign goods reached the amount of $10,793,826 including $2,198,633 of dry goods

Ocean freights have been somewhat brisker, and quoted stronger, with the main call for accommodation for Grain, Petroleum, Provisions, Tobacco, Naval Stores and Lumber.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The estimated earnings of the Erie Railway for the week ending May 15,1872, were $445,949; against $374,208 for the corresponding period of 1871—an increase of $71,741. Total earnings since April 1, 1872, $2,449,990—an increase over the same time in 1871 of $501,078.

Transportation of Goods in Bond.

AN ACT to amend the thirty second section of "An act entitled an act to reduce internal taxes, and for other purposes," approved July fourteenth, eighteen hundred and seventy.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That section thirty-two of an act entitled "An act to reduce internal taxes, and for other purposes," approved July fourteenth, eighteen hundred and seventy, be, and the same is hereby, amended to read as follows: Section 32. *And be it further enacted.* That merchandise transported under the provisions of this act shall be conveyed in cars, vessels or vehicles, securely fastened with locks or seals, under the exclusive control of the officers of customs; and inspectors shall be stationed at proper points along the designated routes, or upon any car, vessel, vehicle, or train at the discretion of the said Secretary, and at the expense of the said companies respectively. And such merchandise shall not be unladen or transhipped between the ports of the first arrival and the final destination unless authorized by the regulations of the Secretary of the Treasury, in cases which may arise from a difference in the gauge of railroads, or from accidents, or from legal intervention, or from low water, ice, or other unavoidable obstruction to navigation; but in no case shall there be permitted any breaking of the original packages of such merchandise.

Approved April 5, 1872.

Erie Railway.

We learn from a source, usually well informed on such subjects, that the rumor recently put in circulation to the effect that Colonel Thomas A. Scott, President of the Southern (Texas) Pacific Railroad, and first Vice President of the Pennsylvania Railroad Company, with its numerous branches and connections, had been offered the Presidency of the New York and Erie Railroad, is likely to prove a fact, if it be not already accomplished. Such proposition to him has been made by the leading interests in Erie, and the answer returned by the Colonel, we are informed, was acknowledged as satisfactory. Our informant says it is expected that Col. Scott will be elected President of the Erie, and that Gen. Diven will lend his aid in the management as Vice President. —*Phila. Ledger.*

Great Rise in the Price of Iron.

Our Wolverhampton correspondent telegraphs that the highest prices ever quoted in South Staffordshire in the present generation were demanded yesterday afternoon at the meeting of ironmasters in Wolverhampton. Best sheets were declared to 20s.; hoops, 10s.; and fencing wire, 10s.; singles were raised to £16 10s.; Welsh bars were put up to £11 5s.; and best Welsh foundry pigs, £9. Coke and coal were all scarce and rising. Welsh coke is 24s. 6d.; Wigan, 25s., yet none to be had, and gas coke is 18s., with an enormous inquiry.—*London News, 9th.*

Milwaukee and Northern Railroad.

Under a change recently made, the officers and directors of the Milwaukee and Northern Railroad are as follows; President, Jesse Hoyt; Vice President, Angus Smith; General Manager, E. B. Greenleaf; Attorney and Counselor, O. H. Waldo; Secretary and Treasurer, Wm. Taintor; Chief Engineer, B. H. Edgerton. The Directors are: Jesse Hoyt, A. H. Barney, New York; Guido Pfister, Angus Smith, Jas. Ludington, O. H. Waldo, E. B. Greenleaf, David Ferguson, Milwaukee; H. H. Smith, Plymouth.

☞ At a meeting of the directors of the Knox and Lincoln Railroad, held in Rockland, Me., on the 15th inst., it was voted to extend the road to tide waters, and proposals will be advertised for without delay.

Virginia Valley Railroad.

The following sections of this road have been let to contract: No. 9, including North River bridge, to McCabe; Nos. 10 and 11, including second North River bridge, to Cavan; No. 21, including Middle River bridge, to Smith, and Nos. 25 and 26, near Staunton, to Kelly and O'Connor. Two corps of engineers are now being organized by the company's engineer, Major Richard Randolph, to commence the location of the road between Staunton and Buchanan, the first to commence the location at Buchanan, and the second to commence at Staunton. It is expected that this portion of the road will be put under contract as soon as possible after it is located.

☞ The following gentlemen have been elected directors of the Texas and Pacific (successor to the Texas Pacific) Railroad Company: Thomas A. Scott, H. G. Stebbins, Edwards Pierrepont, George W. Cass, W. T. Walters, H. B. Plant, J. Edgar Thomson, J. N. McCullough, W. C. Hite, H. D. Newcomb, E. W. Rice, Henry S. McComb, John W. Forney, John McManus, Wm. R. Travers, Wm. C. Hall, J. C. Harris and J. W. Throckmorton; President, Thomas A. Scott; Vice President, Henry G. Stebbins; Treasurer and Counsel, Edwards Pierrepont; Secretary, E. B. Hart. The office of the company is at 177 West St., Cor. of Warren, N. Y.

☞ The Baltimore *Sun*, of 17th inst., says that among the arrivals on the previous day, were the ship Confidence, from New York, Norwegian bark, Garibaldi, from Boston, British bark Dells, from New Haven, and British brig Sea Gull, from Boston, all in ballast, to load grain and produce for Europe. This is quite in contrast with the period in the past, when a vessel arriving there with cargo had to go elsewhere to find return freight.

☞ The Pennsylvania Railroad Company having obtained an injunction some time ago to prevent the New York and Long Branch Railroad Company bridging the Raritan Bay, applied to the Court of Chancery to make the injunction perpetual. Chancellor Zabriskie gave the decision. The injunction was refused. The Court holds that the right granted to railroad companies to use land under water gave them the right to build bridges without compensation to the State.

☞ The Charleston (S. C.) *Courier* says that the recent action of the Georgia Railroad Company in granting sufficient aid to complete the Port Royal Railroad has caused an advance in Savannah and Charleston Railroad shares from $5 (at which sales were made in April) to $25, with sales—now held at $27.

☞ The Conecticut River Railroad Company has voted to buy the Mount Tom and Easthampton branch, paying for it a sum not to exceed $120,000.

☞ The American Society of Civil Engineers, which numbers upwards of two hundred leading representatives of the profession in this country, is to hold its annual convention in Chicago June 5.

☞ The earnings of the Midland Railway of Canada for the first four months of 1872 were $55,929 43, against $37,642 23 in 1871, an increase of $18,287 20.

Railroads of Wisconsin.

AN ACT to authorize municipal corporations to aid in the construction of railroads.

The people of the state of Wisconsin, represented in Senate and Assembly, do enact as follows:

Section 1. Any county, town, incorporated city or incorporated village in this state, is hereby authorized and empowered in the manner herein provided, to aid in the construction of any railroad in this state to be constructed by any railroad company for public use by authority of any law of the state, in which company any such municipality shall become a stockholder, in the manner hereinafter provided, and which will promote the general prosperity and welfare of the tax-payers of such municipality; and the mutual agreement hereinafter referred to, when the same shall be arrived at, shall be conclusive evidence that such railroad will so promote the general prosperity and welfare of the tax-payers of such municipality. But no bonds shall be issued by any city, village or town under the provisions of this act, to an amount exceeding together with its then existing indebtedness, ten per centum upon the valuation of the taxable property therein, as the same shall appear upon the last previous assessment roll; by any county to an amount exceeding together with its then existing indebtedness, ten per centum upon the valuation of the property therein, as fixed by the last previous state board of equalization: *provided*, that no county shall issue bonds under the provisions of this act, in which any town, city or village shall have previously issued bonds in aid of railroads to an amount which shall cause the proportionate indebtedness of any such town, city or village on account of such county bonds, together with its own bonds outstanding, to exceed ten per centum on the valuation of the taxable property of such town, city or village, fixed as aforesaid, nor shall any town, city or village issue any bonds under the provisions of this act, so that the amount of such bonds, together with its proportion of indebtedness on account of the bonds, if any, previously issued by the county in aid of railroads shall exceed ten per centum upon the taxable property within such town, city or village, fixed as aforesaid: *and provided further*, that no city shall incur indebtedness or issue bonds under this act in excess of any limit of indebtedness provided for such city by any existing law.

Sec. 2. The aid to be contributed to the construction of any such railroad by any such county, town, city or village, shall be by the bonds of such municipality, to be issued to or for the use of such railroad company, in consideration of which such municipality shall receive from such railroad company such number of shares of its capital stock as will at the par value of such stock correspond with the principal sum of such bonds.

Sec. 3. No such bonds shall be issued to or for the use of any such railroad company, and no such stock shall be issued to any such municipality until a mutual agreement in relation thereto shall have been arrived at in the mode hereinafter specified; and when such mutual agreement shall have been arrived at (in either one of such modes,) the proper officers of such municipality shall be authorized and required to issue and deliver such bonds, in conformity with the mode so agreed upon; and the stock of such railroad company shall also be issued in conformity therewith.

Sec. 4. Whenever any such railroad company, specified in the first section of this act, shall desire aid in the construction of its railroad, from any county, town, city or village, specified in said first section, it shall make and deliver to the county clerk of such county, the town clerk or clerk of such incorporated city or village, as the case may be, a definite proposition in writing, signed by the president and secretary of said railroad company, and sealed with its seal, which proposition shall contain a statement of the amount of bonds desired, the time when payable, and whether payable before maturity, at the option of such municipality, the rate of interest which they shall bear, and such proposition shall contain a statement specifying when said bonds are to be delivered, with reference to the time of the entire or partial construction of said railroad, and may contain a statement that such bonds may be deposited in escrow prior to delivery to the railroad company; and such proposition shall also contain a statement that the said railroad company will, in consideration of said bonds, issue to the municipality from which it is to receive the same, such number of the shares of its capital stock as will at the par value of such stock correspond with the principal sum of such bonds; in case such bonds are proposed to be deposited in escrow, as aforesaid, the proposition shall also state that the certificates of the stock to be exchanged therefor, shall be placed with the same depository, at the same time, and in that case the proposition shall set forth the full name and residence of the trustee or trustees, who shall be the custodians of the stock of said company and of the bonds of such city, village, town or county; the clerk with whom any such proposition shall be filed, shall immediately endorse thereon the date of its receipt by him, and transcribe the same into the record book of the county, town, city or village, as the case may be, of which he is such clerk.

Sec. 5. The mode of arriving at such mutual agreement as is hereinbefore specified, shall be as follows:

1st. Upon receiving such proposition, the county clerk of such county, the town clerk of such town, or the clerk of such incorporated city or village, as the case may be, shall immediately publish a notice of an election to be held by the legal voters of such county, town, incorporated city or village, at the usual place or places of holding elections therein, and at such time as such clerk may designate, not less than thirty nor more than sixty days from the date of such notices, which notice shall contain a substantial statement of the proposition made by said railroad company for the issue of the bonds of such municipality, and shall notify the legal voters thereof to deposit a ballot upon which shall be written or printed, "for the railroad proposition," or the words, "against the railroad proposition." and such notice shall be posted in three public places in each election precinct in the district in which aid is desired, at least twenty days before the day of such election, and shall also be published at least three times before such election, in one newspaper in each city, village or town, if any is published therein, and if the aid is asked of a county, in one newspaper in each village and city in such county in which a newspaper is published; and if there is no newspaper published in such city, village, town or county, then such notice shall be so published in a newspaper published at the nearest place thereto in which one is published.

2d. Such election shall be held and conducted in the same manner that general elections in such counties, towns, incorporated cities or villages are by law required to be held and conducted, and the votes cast at such election shall be counted, canvassed and returned in the same manner as the votes at such general election, and the canvassers shall make, certify, sign and deposit with the county clerk, town clerk or clerk of such incorporated city or village, as the case may be, a statement of the result of such election, and such certified statement shall be *prima facie* evidence of the number of votes cast for or against such proposition, and also of the fact that such election was regularly held and conducted according to law.

3d. If in any of said counties, towns, cities or villages, any election shall fail to be held on the day appointed therefor, or if the majority of votes cast at any such election shall be against the railroad proposition, such county clerk, town clerk or clerk of such city or village, shall at the written request of the president of such railroad company, at any time thereafter, call another election or elections in the manner provided in this act, upon the same or different proposition of such railroad company, and such other election or elections shall be conducted in like manner and upon like notice as is provided in this act for the first election: *provided*, that not more than two elections authorized by this act, shall be held in any one calendar year, in the same town, county, village or city.

4th. If a majority of the legal voters who shall vote upon the question, at any election to be held in any such county, town, city or village, in pursuance of the provisions of this act, shall, as indicated by the official returns of any such election, vote "for the railroad proposition," then such mutual agreement for the issue of bonds by such municipality, and of stock by such railroad company, as provided in this act, shall be deemed and considered to have been arrived at and perfected, and thereupon such bonds and stocks shall be issued and delivered by the proper officer, in conformity with the true intent and meaning of such proposition, and with the provisions of this act; *provided*, that if such bonds are to be issued by a county, there shall also have been a majority of votes cast in favor of the railroad proposition, at a majority of the election precincts within such county at such election.

Sec. 6. No bonds shall be delivered to the company under such proposition until the road, branch, or extension thereof, for the construction of which the aid has been granted, shall have been completed, ready for the passage of cars, continuously from one terminus through, or to the district granting the aid, or to the nearest point in its line to such district, or from such terminus to such point as such company in its proposition shall have proposed to construct said road, where the line of the road shall not lie through the district.

Sec. 7. The stock received by any such county, town, city or village, in pursuance of any such mutual agreement, shall be entitled to all and the same rights, benefits and privileges as the stock of the same class held by any other person or persons, and the municipality receiving any such stock shall, so long as it shall hold the same or any part thereof, be a part owner of such railroad and its franchises, and the proper authorities of the municipalties holding such stock shall appoint a person to vote thereon in behalf of such municipality, and such authorities may also sell and dispose of the said stock in such manner as shall to them seem best for the interest of such municipalties.

Sec. 8. Every county, town, city or village which shall issue any bonds in pursuance of the provisions of this act, shall be severally liable in law, faithfully, promptly and at maturity, to pay and discharge the principal and interest

upon every such bond issued by it, and the faith of every such county, town, city or village shall, by the issue of such bond or bonds, be and stand irrevocably pledged to the prompt discharge of every such liability, and every such county, town, city or village shall annually levy and collect a tax on all taxable property therein, as indicated by the assessment roll or rolls for the payment of all moneys to become due upon such bonds, whether for principal or interest, in addition to all other taxes, and the money so raised shall be kept as a separate fund, and strictly applied to that purpose; and it may, in the discretion of the proper authorities, raise a greater sum in any one year than is needed to pay what shall become due in that year, and apply the same to the purchase and discharge of such bonds at the lowest practicable rate or price.

Sec. 9. If any officer, upon whom any duty is imposed by this act, shall willfully fail, faithfully and promptly to discharge the same, as by this act required, he shall be liable to the party or parties aggrieved for all actual damages suffered by such party or parties by reason of such failure.

Sec. 10. For the purposes of this act, the term, "proper officers," shall be construed and held to intend and mean, in the case of a county, the chairman of the board of supervisors and the county clerk of such county; in the case of a town, the chairman of the town board and the town clerk; in the case of a city, the mayor or the officer performing the duties of mayor and the city clerk, and in the case of a village, the president and clerk of the village; and the term, "proper authorities," shall be construed and held to intend and mean, in the case of a county, the county board of supervisors; in the case of a town, the town board of supervisors; in the case of a city, the common council or other authorities possessing the usual powers of the common council of cities; and in the case of a village, the board of trustees or other local governmental board, by whatever name it may be called, which is vested with the power to levy taxes, and any and all bonds issued under this act, by any county, town, city or village, shall be officially signed by the proper officers thereof as aforesaid, and sealed with its corporate seal, if it have one, and in the case of a town, it shall be the duty of the county clerk of the county in which such town is situated, if requested to do so, to add to each of such bonds a certificate under the seal of the county, to the effect that the town officers subscribing the bonds are in fact such officers, and that he believes their signatures thereto to be genuine.

Sec. 11. If any county, town, city or village shall issue and deliver to any railroad company any bonds in pursuance of the provisions of this act, it shall not thereafter issue or deliver any bonds or incur any liability in aid of the construction of the railroad of such company by virtue of the authority of any other law of this state.

Section 12. It shall be lawful for any town, county, city or village which shall have voted aid to any railroad company, or which shall hereafter vote aid to any railroad company, without limiting the time when such aid shall be earned by the company, by the authorities thereof, to fix the time when such aid shall be earned; *provided*, that the time so fixed shall not be less than one year from the date of giving notice to such railroad company, of the fixing such limit, and if the aid shall not be earned in accordance with the conditions upon which it was voted, within the time so fixed by such authorities, then such aid shall be forfeited.

Section 13. Any county, town, city or village is hereby authorized, instead of issuing bonds in aid of railroads, as hereinbefore provided, by agreement to be arrived at as herein provided for the issuing of bonds, to subscribe to the capital stock of such company, the subscription to be paid in money in one or more instalments, at such times not exceeding three years from the time of entering into such contract as may be agreed upon, and after such parts of the work of constructing the railroad aided shall be done as shall be agreed upon, the last instalment not however to be paid until the railroad shall have been completed, ready for the passage of cars to the place to which it is agreed to be built, in consideration of the aid so granted. If such an agreement shall be arrived at in the manner herein provided, it shall be the duty of the proper officers of such county, town, city or village, from time to time, to levy and collect a tax in the same manner as general taxes are levied, of sufficient amount to pay the instalments as the same shall fall due, according to the terms of such agreement.

Section 14. This act shall take effect and be in force from and after its passage and publication.

Approved March 25, 1872.

☞ The Philadelphia *Ledger*, of 20th inst., reports the net anthracite coal tonnage for the week ending on the 11th inst., from all sources, at 396,295 tons, and for the year 5,779,699 tons, against 1,814,583 tons to the same date last year, being an increase in the tonnage of anthracite coal of 3,965,116 tons. The production of bituminous coal for the week was 59,910 tons, and for the year 745,365 tons, against 653,693 tons to the corresponding time last year—an increase of 91,672 tons. The total production of all kinds of coal for the week was 456,205 tons, and for the year 6,525,064 tons, against 2,468,276 tons to corresponding time last year, showing an increase of 4,056,788 tons.

☞ At a meeting of the stockholders of the New Orleans, Little Rock and St. Louis Railroad Company at Little Rock on the 10th inst., the following gentlemen were elected directors: Tom P. Dockery, David Snow, M. M. Duffie, Henry Page, James Lawson, J. F. Fagan, J. N. Smithee. At a subsequent meeting of the directors the following officers were elected: Tom P. Dockery, president; Gordon N. Peay, secretary; D. F. Shall, treasurer; R. C. Newton, attorney. At a meeting of the directors on the following day, Mr. Thomas Allen, of St. Louis was elected a director to fill a vacancy.

☞ At the recent meeting of the International Bridge Company at Buffalo, the following directors and officers were elected: C. J. Brydges, Esq., president; Hon. E. G. Spaulding, vice-president; Hon. A. Walsh, James Ferrier, E. C. Sprague, J. Bell, and R. P. Jarvis, directors; Joseph Hickson, Esq., secretary and treasurer. The contractor, Mr. C. S. Gzowski, stated that the International Bridge would be open for traffic by December 1 of this year.

☞ Lewis county, West Virginia, voted on the 6th instant in favor of a subscription of $150,000 to the Northern and Southern West Virginia Railroad. The majority was 91. The engineers are now surveying the route for this road between Clarksburg and Weston.

THE

CANADA SOUTHERN

RAILWAY COMPANY

Are now offering through the undersigned the

REMAINING $5,000,000

OF THEIR

First Mortgage Sinking Fund

30 Years

7 PER CT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

THE ROAD runs from Buffalo to the Detroit River, connecting there with the Chicago and Canada Southern, now being built to Chicago, and will thereby form the

SHORTEST TRUNK LINE BETWEEN BUFFALO AND CHICAGO, or, in other words, will be the SHORTEST LINK IN THE GREAT LINE OF TRAFFIC BETWEEN THE EAST AND WEST, connecting the GREAT SYSTEM OF RAILWAYS which diverges from Buffalo, Toledo and Chicago.

A branch also runs from St. Thomas to St. Clair, where it forms connections with the various roads leading into the lumber and mineral regions of Michigan.

THE MAIN LINE from Buffalo to the Detroit River is 229 miles long. The branch from St. Thomas to St. Clair is 61 miles, and runs through the great Canada oil region.

OF THE entire line (290 miles) *Two hundred and twenty* miles are *graded, bridged, and ready for the superstructure.* The remaining 70 miles are under contract to be ready for the superstructure early in the Summer.

OF THE 800,000 ties required, 600,000 are on hand and the remainder are coming in daily.

SIX THOUSAND FIVE HUNDRED TONS of rails are delivered and paid for, and the balance contracted to be delivered early in the Summer, those for the main line being STEEL, all 60 lb. to the yard.

ALL the materials for the stations, and a part of the equipment are purchased.

TRACK LAYING will be begun as soon as the frost is out of the ground.

The entire line will be ready for business on or before Dec. 31, 1872.

THE ROAD is being built by the most experienced railroad men in the country, who are confident of a profitable business for it from the day of its opening.

THE ROAD will be

33 Miles Shorter than any other Road,

either BUILT or in contemplation between Buffalo and Chicago.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety six per cent. of the road 18 STRAIGHT.

The Canada Southern (including its branch of 61 miles to St. Clair) and the Chicago and Canada Southern, with their light grades, direct alignment, being the shortest route between Buffalo and Chicago, will admit of the most speedy, economical, and safe transit attainable for both passengers and freight.

The road thus far has been built by cash subscriptions, and the proceeds of the bonds now offered will complete and fully equip it. The principal and interest of the bonds are payable either in New York, London, or Frankfort.

We have no hesitation in recommending the bonds AS A PERFECTLY SAFE as well as a PROFITABLE INVESTMENT.

Journal of Railroad Law.

RAILROAD COMPANIES—ACTION FOR DAMAGE FOR PERSONAL INJURIES—RULES OF EVIDENCE AS TO ADMISSION OF TESTIMONY.

The facts in the recent case of Reed *vs.* The New York Central Railroad Company (45 N. Y., 574,) are fully and clearly stated in the following opinion by

ALLEN, J.—The plaintiff received the injury complained of in June, 1865. The claim was that the spinal column was effected, and that the plaintiff was disabled in a great degree from labor or bodily exercise. As a witness, he testified that he had not, at the time of the trial, September, 1866, recovered from the effect of the injuries; that he had not been able to labor except for a short, time, or to do any effective labor; that riding in the cars affected him, causing pain in the back, as also did sitting in a chair at the trial; that mental labor produced similar effects, and that labor for a short time exhausted him and caused severe pain. The defendant proved by other witnesses that in the fall and winter after the injury the plaintiff did perform certain labor requiring health and strength of body, such as able-bodied men usually perform, and the evidence tended to prove that at the time referred to, he was in perfect health, and that his strength was unimpaired. Under objection and exception by the defendant, the plaintiff was allowed to prove that, at the same time, he complained to a person whom he casually met, or who was casually present, of not feeling well. The physical condition of the plaintiff up to the time of the trial was a material injury as it bore directly upon the question of damages and the amount of the recovery, and whether in the fall and winter following the injury the plaintiff was in the enjoyment of full health and strength of body, was a material fact in issue. The plaintiff was permitted to prove his own declaration to the fact that at that time his health and strength were impaired. The evidence was permitted to go to the jury as competent evidence, and we cannot say that it did not influence the result. It could be influential in one of two ways; either as proving or tending to prove, the fact as alleged, or as corroborating the testimony of the plaintiff, by showing that his declarations out of court were consistent with his statements on the witnessess' stand, and it may have had its effect with the jury in both ways. It is not competent in corroboration of a witness or confirmation of his evidence, to prove that on other occasions he has made statements consistent with his testimony (Robb *vs.* Hackley 23 W. R. 50). If there are exceptions to the rule, they are very limited in number in their special character, and this case does not fall within them. They are referred to by Bronson, J. in the case cited. It is suggested that as a part of the *res gestae*, the declarations were admirable for what they were worth. They were nearly and possibly quite simultaneous with the acts proved by the defendant, but they were not made in reference to these acts, or in explanation of them, and did not tend to qualify them or detract from their force as evidence. They were made to a person casually present or meeting the plaintiff. The party to whom the declarations were made had no business relation with the plaintiff connected with the acts proved on coincidence in point of time is the only connection between the declarations and those acts. They were in no sense a part of the *res gestae*.

Declarations are sometimes admissible in evidence as part of the transaction, when they qualify or give character to it. These declarations did neither. The fact of ill health and impaired bodily strength was the material fact and that could not be proved by the unsworn statement of the plaintiff. Hearsay evidence, as a rule, is excluded, and the declarations and statements of the parties, or of third persons, are not received except under peculiar circumstances and as a necessity. Statements made out of court, and without the sanction of an oath are dangerous as evidence, and the rights of suitors ought not to be put in peril by them. The instances are few in which declarations and unsworn statements made out of court have been permitted to be given in evidence as proof of the facts sought to be established. Statements and representations of a sick person, of the nature, symtoms and effects of his malady, have been received as original evidence, and especially when made to a medical attendant, to enable him to minister to the patient, they have been regarded as competent evidence, and entitled to weight. (1 Greenl. Ev. § 102.) There is good reason for their admission when made to the attending physician or surgeon, as upon them, in connection with the manifestations and symptoms of injury or disease the opinion of the expert is based and the treatment governed. But in every other case the admission of testimony so exceptional, as a departure from the established rules of evidence must be referred to the necessities of the case, and the inability of the party to give evidence of a higher and more satisfactory nature. The general rule is that the best evidence of which the fact is susceptible must be adduced, and secondary or inferior evidence will not be received, so long as the higher and better evidence can be had. The plaintiff was a competent witness to prove the state of his health at the time he handled the bags of clover seed and performed the other labor mentioned, and it was not necessary to resort to other and inferior evidence; and so long as his sworn statements were admissible, his unsworn declarations should not have been received. Averon *vs.* Lord Kininard (6 East. 188) was an action upon a policy of insurance upon the life of the plaintiff's wife, and the declaration of the wife made soon after the making of the policy, when lying in bed apparently ill, stating the condition of her health at the period of her going to Manchester for examination by a surgeon, preparatory to the insurance, was held admissible because the fact was material, and that was "the best evidence which the nature of the case afforded," and in addition to this, the plaintiff having proved the declarations of the wife to the examining surgeon, the subsequent statements made by her were regarded as in the nature of a cross-examination by the plaintiff's own witness, within the principle of Wright *vs.* Littler (3 Burr. 1255) where the statements of a deceased subscribing witness to a bond were allowed to be given in evidence to impeach the bond. From the necessity of the case, the statements of parties who could not be examined as witnesses in their own behalf as to bodily suffering and pain and personal injuries, when made soon after an alleged injury, or made while apparently ill to a physician or nurse, or other person, have been received in evidence and permitted to go to the jury for what they were worth. Goodwin *vs.* Harrison (1 Root. 80,) is an early case, and there in an action by a young lady for a bodily injury, she was allowed to prove the complaints made to her mother the morning after the injury. The court placed the admission upon the ground of necessity, there being no other method of proving the facts. The same rule of evidence was approved, and for the same reason, in Caldwell *vs.* Murphy (1 Ker. 416). But by the amendment of the Code in 1869 (§ 398) there is no longer a necessity for giving in evidence the declarations of a party if he is living and able to be sworn and examined as a witness, and the reason of the rule ceasing, the rule itself, adopted with reluctance and followed doubtingly and cautiously, should cease The admission of this evidence was erroneous, and entitles the defendant to a new trial. There was other evidence admitted that should have been excluded, if it were covered by the objection of the defendant. The fact that new ties were put upon the road after the accident, and especially the next summer, in the vicinity, did not tend to prove that the road was out of repair and dangerous at the time of the injury to the plaintiff. If the evidence tended, legitimately to prove the imperfect and dangerous condition of the defendants' road, and was competent, the defendants should have been permitted to explain the act by their superintendent, and show that it did not necessarily prove, or tend to prove that the road was in an unsafe condition, and that the taking out of old ties and substituting new, was a continual process for the preservation and keeping up the road, and prevent its becoming imperfect and out of repair, a preventive and precautionary rather than a restorative measure.

The judgment must be reversed and a new trial granted. Costs to abide the event.

☞ The Marlboro' (Md.) *Prince Georgian* reports that grading has commenced on the lower end of the Washington City and Point Lookout (Md.) railroad. Mr. Tippett, of St. Mary's, who made the survey for the Southern Maryland Company, is completing the location of the route. Hall & Shea, of Prince George's county, have also taken a contract on the Washington and Point Lookout line.

☞ The manufacturers of railway supplies in Boston will raise $12,000 to entertain properly the members of the American Railway Master Mechanics' Association, which will hold its annual meeting at Horticultural Hall on the 11th of June. The programme will include a steamboat trip down the harbor, the expenses of which will be borne by the Bay State Iron Company.

☞ The Texas Pacific Railroad Company have confirmed the purchase of the Southern Transcontinental Railroad, and elected General G. M. Dodge, formerly engineer of the Union Pacific, engineer in chief. The road is expected to be completed to Fort Worth, Kansas, by the first of January.

☞ A survey for a railroad from Claremont, N. H., to White River Junction, via Cornish Flat and Meriden, has been completed, and a feasible route of easy grade has been found.

Riviere du Loup Railway.

We have always regarded the Riviere du Loup Railway enterprise in itself considered with great favor. Its early achievement has seemed to us on many grounds exceedingly desirable. As tending to open up to settlement a section of the Province possessed of much excellent land, it appeared to merit public support. As being necessary to the proper development of the resources of a valuable region, it seemed to deserve general approval. And as offering the shortest practicable line of railway communication over Dominion territory between the waters of the chief Harbor of the Bay of Fundy and those of the St. Lawrence, it seemed entitled to a high degree of regard on broad patriotic grounds.

This important and necessary public work is now fairly under way. It has been commenced at the right spot, on the eastern side of the River St. John, opposite Fredericton. There is no longer just reason to fear that the route along which the road is to be built is one chosen regardless of the interests of this city.

We trust the Company having charge of this enterprise will find itself in a position to push on with it most vigorously and successfully. We regret that the company has not seen its way clear to adopt the medium gauge for the road. This gauge is almost sure to be the one which will generally prevail on all the chief lines with which by-and-bye our lines will intersect. It will be found most economical, however, to make the Riviere du Loup Railroad bed sufficiently wide at first to admit of the use thereon of the medium gauge ultimately, even if experience proves that for many years the narrow gauge will do.—*St. John News.*

Port Royal Railroad.

The following is the present organization of this company: President, James Appleton; Superintendent, S. G. Millett; Chief Engineer, George Gagie. The directors are: James Appleton, R. E. Robbins, D. T. Appleton, H. A. Robbins, L. Marx, H. H. Thayer, Josiah Sibley, J. B. Campbell, S. G. Millett, B. W. Lawton, H. H. Cooke, H. W. Willingham.

☞ The books of subscription to the capital stock of the Union Bridge Company were opened at Clinton, Iowa, on the 2nd inst., and the entire capital of $1,200,000 was taken. Plans and specifications are in course of preparation, and the bridge is to be built at once. It will be constructed of iron, and similar to the bridges at Quincy and Dubuque.

☞ The grading on the Shepaug Valley extension to Danbury is nearly completed, and the track is being put down, and the road-bed from Litchfield to Hawleyville is now in good condition for regular trains, and it is expected that through trains from Litchfield to Norwalk will run about the first of June.

☞ Bourbon County, Ky., has voted the subscription of $400,000 to the Frankfort, Paris and Big Sandy railroad, by about 1,200 majority. The vote in Paris stood 1,103 for and 303 against the subscription. The majority in the county was about 450.

☞ The estimated earnings of the Kansas Pacific Railway from May 1st to May 8th, inclusive, were $83,227 12, viz: from passengers, $38,280 40; from freight, $44,996 72.

☞ The Chicago, Dubuque and Minnesota Railroad has been completed to Lansing, Iowa.

Railroads and Canals Revolutionized.

While narrow-gauge railroads are being projected in all directions, a Mr. Burrus, of Wisconsin, comes before the public with a scheme for a railroad from the Atlantic to the West, to be built with a gauge of thirty feet. The road is to run from the East by the most direct line to Lake Erie. When it reaches the lake the road is to be built out into the water about twenty-five feet below the surface for some distance, and there end. It is to be operated with a machine which is even more wonderful than the road, and which will navigate the water as well as traverse the land. When this amphibious locomotive arrives at the jumping off place at Lake Erie it is to glide gracefully into the water, and by a slight transposition of its machinery become a steamboat. When it has arrived at Monroe it resumes its character of locomotive, and rolls off on another broad-gauge road to Lake Michigan, whence it is to take water for Chicago. The machine is to be sufficiently large to carry a vessel of five hundred tons, so that all necessity for ship canals will be done away with. The inventor expects to attain a speed of one hundred and twenty-five miles per hour on land and twenty-five miles in water. Probably no one will doubt that a great reduction in the price of freights may be expected when Mr. Burrus gets his broad-gauge road and amphibious locomotive in successful operation.—*Baltimore American.*

☞ A large number of men are now engaged in grading the road-bed for the Milwaukee and Northern Railway between Plymouth and Chilton.

TRAUTWINE'S
CIVIL ENGINEER'S POCKET-BOOK.
SECOND EDITION REVISED.

THE CIVIL ENGINEER'S POCKET-BOOK OF MENSURATION, TRIGONOMETRY, SURVEYING, HYDRAULICS, HYDROSTATICS, INSTRUMENTS AND THEIR ADJUSTMENTS, STRENGTH OF MATERIALS, MASONRY, PRINCIPLES OF WOODEN AND IRON ROOF AND BRIDGE TRUSSES, STONE BRIDGES AND CULVERTS, TRESTLES, PILLARS, SUSPENSION BRIDGES, DAMS, RAILROADS, TURNOUTS, TURNING-PLATFORMS, WATER STATIONS, COST OF EARTHWORK, FOUNDATIONS, RETAINING WALLS, etc., etc. In addition to which the elucidation of certain important principles of construction is made in a more simple manner than heretofore. By John C. Trautwine, Civil Engineer, 648 pages, with nearly one thousand illustrations, executed expressly for the work; forming, altogether, the most complete and concise work of the kind ever published.

The well-known ability of the Author, and his wide-spread reputation as a Civil Engineer, is a sufficient guarantee of the completeness of the work, and renders further recommendation unnecessary.

Bound in Morocco, Tucks, Gilt Edges. Price, $5.

[From the London Builder, Feb. 10, 1872.]

"This work elucidates some important principles in construction. It is a very valuable little book—a cyclopædia in miniature."

American Railroad Journal.

New York, Saturday, June 1, 1872.

Lynchburg and Danville Railroad.

At the recent meeting of the Lynchburg and Danville directors the financial condition of the company and the progress of construction were reported to be satisfactory. A contract for laying the track was let. A conference was held regarding the proposed consolidation with the Orange, Alexandria and Manassas Railroad Company, which was recently authorized by the Virginia Legislature. Nineteen car loads of iron for the road were taken to Lynchburg on the 23d ultmo by way of the Orange road, and one hundred and sixty car loads are still in Alexandria, awaiting transportation. This will complete the track for the distance of twenty six miles.

☞ It is stated that work will soon be commenced on the West Point tunnel on the West Shore Railroad. The tunnel will be completed within two years, when it is expected the road will be opened as far north as Newburgh.

☞ The Governor has signed the bill for a bridge across the Hudson at Poughkeepsie. The structure is to be 130 feet above high water mark, and is to have five spans of 500 feet each.

A STANDARD SECURITY.

We are offering the Northern Pacific 7-30 Gold Bonds at Par and accrued interest in currency They are issued in denominations from $100 to $1,000 Coupon, and $100 to $10,000 Registered, and are at all times interchangeable, at the pleasure of the holder, without charge.

They are secured by a First and Only Mortgage on the Road, its Equipments, Earnings, and Franchises, and also on a Land Grant which, on the completion of the Road, will exceed 23,000 acres to each mile of track, or 500 Acres of Land to secure each $1,000 bond.

These Bonds are at all times receivable by the Trustees, at Ten Per Cent. Premium, in payment for any lands purchased from the Company.

The Lands are now on the Market, and the proceeds of sale constitute a SINKING FUND for the REDEMPTION OF THE BONDS.

Holders of United States 5-20 Bonds can now convert them into

Northern Pacific 7-30's,

Realizing an immediate handsome profit, and an increase of about one-third on their annual income.

The semi-annual Interest on the Registered Bonds is paid with GOLD CHECKS, sent to the Post Office address of the holder.

With the same entire confidence with which we recommended the Government Loans to Capitalists and people, we now, after the fullest investigation, recommend these Northern Pacific Railroad Bonds to our friends and the general public.

All marketable securities received in exchange, without expense to the investor, at their highest current value.

JAY COOKE & CO.

New York, Philadelphia & Washington.

FOR SALE BY BANKS AND BANKERS GENERALLY THROUGHOUT THE UNITED STATES AND CANADA.

Intrinsic Value of Shares in Leading Railroads.

One of the facts most clearly obvious to men who have studied the railroad system of the United States, its history and progress, and the actual condition which has been reached by most of these works, is that their substantial value as means of investment has become fully established, and yet is not well appreciated by the general public. With a security, a doubt, or even a suspicion of doubt, is depreciation. The direct losses to the great body of small investors in railroad shares previous to 1865, although counterbalanced to a large extent by the indirect benefit which was derived therefrom, have not been forgotten. But it should be remembered, with reference to those losses, that in all great public enterprises a similar experience has been incurred. The infancy of our railroads has been not unlike the infancy of other things; various difficulties peculiar to the situation assailed them, with about the usual result. Latterly, troubles in single instances have been given great prominence with a corresponding effect upon the public mind as regards the general management of our railroads. In the face of such examples as the Camden and Amboy Railroad, many of the railroads of New England, and the Chicago and Rock Island Railroad at the West, the impression had gotten abroad, that there has been some chronic disorder in the management of our railroads, and that it were hopeless to expect from them certain returns to the shareholders; the managers and the bondholders absorbing in commissions and interest all surplus over the running expenses.

But that many railroads have been through all the difficulties to which we have alluded, and have reached a foundation of substantial prosperity, ought to prompt in their behalf the perfect confidence of capitalists. The experience of Com. Vanderbilt with the Harlem Railroad, then with the Hudson River road, and then with the New York Central, was of the most convincing character. The two first named of these roads had paid no dividends, and their shares were much depreciated; Com. Vanderbilt soon proved their substantial value; and he did so when the cost of operating them was fully a hundred per cent. more than when they paid no dividends.

The enormous appreciation of the value of the property of the New York Central road, is another tribute to Commodore Vanderbilt's genius and integrity. The Harlem Railroad has paid dividends of eight per cent. per annum during the last five years. The Hudson River road has been consolidated with the New York Central; their net earnings last year were $8,260,817, upon 842 miles of road, and the aggregate debt is only about fifteen millions of dollars. Among other roads which have secured substantial and continued prosperity, is the Baltimore and Ohio, whose earnings per mile are nearly as great as the New York Central and Hudson River road. The Boston and Albany Railroad is another which may be favorably mentioned. The Camden and Amboy, to which we have already alluded, has recently entered upon a new phase of its existence, being leased to the Pennsylvania Railroad at 10 per cent. on the stock, and freed from all liabilities. The Central Pacific is a most important combination, operating nearly 1,200 miles of road, and having land grants to the extent of 12,000 acres per mile. Its net earnings last year were nearly ten per cent. on its capital stock, and it evidently approaches a position in the front rank of American Railroads, for the regularity and largeness of its dividends, to say nothing of the absolute security of its bonds. The Chicago and Northwestern is a mystery. It is one of the most extensive and best managed corporations any where; the veteran Samuel J. Tilden, whose success in restoring depreciated railroad property has been equal to Com. Vanderbilt's, is connected with its management. The road is 1,223 miles long, besides controlling 500 miles more, and the corporation owns nearly two million acres of public lands. Its bonds are in very good repute among intelligent capitalists, and for many years there has been paid a dividend of from 7 to 10 per cent. per annum on its common and preferred stock; and yet its shares have long been selling below par. During last October the common stock declined to 54—a seven per cent. stock actually brought but little more than fifty cents on the dollar. Why this stock should continue so much below par as it now is, would be difficult to explain. The Chicago, Rock Island and Pacific Railroad formerly paid ten per cent. dividends, but latterly there has been a reduction to eight per cent. Its prosperity seems to rest on such substantial basis as to justify the relatively high value put upon the shares in the stock market. The Hartford and New Haven Railroad has paid for many years thirteen per cent. on its shares, and they command a high premium. The Illinois Central Railroad unites substantial value, great prosperity, good management, and a just estimate of these advantages by the public—circumstances which do not, by any means uniformly go together. Its shares and bonds are alike securities of the most undoubted character. The Lake Shore and Michigan Southern Railroad has achieved a position of reliable value, in the face of much competition. It operates 1,074 miles of road, and has paid dividends regularly for many years. The Michigan Central is a road, whose former experience and present value may be compared with the Lake Shore and Michigan Southern. The Pennsylvania Railroad has become one of the most gigantic corporations in any country, and there is no reason to doubt that its dividends of ten per cent. will be continued. The Philadelphia and Reading Railroad (known as "Reading" in the stock list) has recently entered upon some new enterprises, and declines to register its stock; there is, however, so far as we know, no reason to regard these circumstances in an unfavorable light. Its property is of great value and rapidly appreciating. The Pittsburgh, Fort Wayne and Chicago road is leased at 7 per cent. net, and its shares may be regarded as a sound security. The Union Pacific Road, though so recently built, has, from its location, and other advantages, a secured value.

There are many other roads which are doubtless deserving of favorable mention. But our purpose has been to show that most of the great railroads of this country, and especially of the North and West, have gone through such processes of re-organization and consolidation, and have drawn to them such a large and steady employment, that their steady prosperity, and therefore the continuation of dividends upon their shares, may be anticipated with as much certainty as any thing of the sort can be; and that therefore many of them ought to stand higher in the market than they now do.

Other roads, which make little or no returns to their stockholders, have bonds upon the market whose value as securities are every where admitted and appreciated; and it is noted as matter for congratulation, that notwithstanding the rapid extension of our railroad system, the many new roads which have been projected, and the vast amount of bonds that have been placed upon the market, default in the payment of interest thereon has been extremely rare.

Canada Southern Railway.

Work upon this great line of railway has so far progressed that the grading is completed over the whole distance except upon the western 40 miles. That is being hurried forward and will soon be finished. It is expected that the whole road will be ironed with at least a single track of steel rails by September 1, and communication will thus be opened between Fort Erie and Trenton. The second line of track will be laid down as rapidly as possible after the first shall have been finished, and the line will then be ready for fast running and for moving a large number of trains with great rapidity. It is expected to run expresses 40 and even 50 miles an hour after the rails shall have become smooth, and the grand idea of the whole project is, of course, despatch between Chicago and New York. The contract for building the bridge across the American channel of the river between Trenton and Grosse Isle has been let to an Eastern firm, and sub-contracts have also been placed for materials, etc. The bridge will be of wood and iron, and will easily be completed by the time of the completion of the road. The passage across the Canadian channel will be by means of a ferry, and it is probable that before the setting in of winter the company will construct a very strong boom across the stream from the Canadian shore to Grosse Isle, placed at a great angle, so as to withstand, if possible, the force of the ice pressing from above. If the boom does not prove effectual then the bridge or tunnel will have to be built, as authorized by the bill reported to the Canadian Parliament. Legislation from Congress would, of course, be required, too.

It is well settled that a branch will be constructed from a point on the Canada Southern to Windsor, and a line is to be built from Trenton to Toledo. From the latter point a new road is soon to be commenced, running to St. Louis. Some of the gentlemen who have taken part in building the Canada Southern are contractors on the St. Louis line. Finally the Chicago and Canada Southern Railroad is already well under way, and will be pushed forward as rapidly as possible. This line will, like the Canada Southern proper, be nearly an air line with easy curves and grades, so that great speed can be attained upon it. It is also estimated that freight can be transported at much lower rates than are usually charged now, and yet the through line prove profitable. The whole enterprise is one of great importance and will constitute a grand trunk line to the East.—*Detroit Tribune.*

Charged trustee sinking fund	24,731 03	
		298,707 73
Balance, transferred to contingent fund		$35,009 46

The gross earnings are $108,611 79 in excess of last year. This excess has mostly been expended in increasing the equipment and in running additional miles for the accommodation of the business of the road. Besides keeping the rolling stock in repair, and making good all depreciation, there has been purchased or built, and added during the year, to the equipment of the joint roads, three locomotives, seven passenger and baggage cars, and one hundred and twenty-seven freight cars. All of which have been paid for from earnings. The increased tonnage and greater number of miles run have added materially to the cost of operation, but we have been enabled to make the usual dividends, to provide for the increased interest accounts upon investments in the new works, and to carry to the sinking fund and surplus account the accustomed balances. The steady annual increase of receipts would seem to warrant our confident expectations of being able to keep up full dividends and meet the interest upon the expenditures now making and to be

made for permanent improvements and increasing facilities at the Boston terminus.

The treasurer's balance sheet, hereto appended, exhibits a working capital of $4,614,779 07, derived from the following sources:—

Capital stock	$2,679,900 00
Bonds	237,000 00
Notes	884,600 00
Credits to dividend & interest account	112,280 22
Credit to scrip dividend of 1866	366,000 00
Credit to contingent fund	334,998 85
	$4,614,779 07

Invested in—

Road, lands, buildings & equipment	$2,732,666 69
Branch roads	775,462 48
Boston improvements	293,758 99
Working materials	167,595 28
Sinking fund	441,236 23
Cash and accounts	204,059 40
	$4,614,779 07

These investments must be looked upon as representing much more than merely a railroad from Boston to Lowell.

We are obliged to furnish, for a consideration paid, very extensive and costly terminal grounds and buildings for nearly a thousand miles of connecting roads. The amount already charged on the books, to real estate and land damages, and buildings, is nearly two million of dollars. Its actual present value is much greater. As business increases, these lands will all be wanted for the use of the road, and further outlays will have to be made on them. The investments in branch roads amount to three-quarters of a million more. If we deduct from the sum total of the balance sheet the investments above named, and the amount of the sinking fund and other cash accounts, it brings down the actual cost of the road and its equipment to not far from a million dollars, or not exceeding $40,000 per mile.

In carrying out the projected improvements now commenced, and adverted to in this report, more money will be required than is now authorized by the stockholders to be raised. The capital stock now established by vote of the corporation is $3,008,000, on which $291,100 is yet to be paid on assessments not now due. The total amount of capital stock authorized by the Legislature is $3,380,000.

We recommend that, at the annual meeting, the directors be authorized to increase the capital up to the full legal standard as above, and to dispose of the same as wanted for the improvements, in the manner prescribed by law.

We also recommend that authority be further given the directors to issue not exceeding one million dollars of bonds of the corporation, to be disposed of at their discretion, and the proceeds be appropriated as wanted from time to time in paying for new structures, and in retiring, as far as may be practicable or profitable, the notes payable now or hereafter outstanding. Many of these notes were given for property purchased, and, having several years to run, at reasonable interest, cannot be advantageously exchanged at present. Others might well be retired whenever bonds can be used for the purpose. If the matter of issue is left to the discretion of the board of directors, action can be taken by them from time to time, as the interests of the corporation may seem to require.

BOSTON IMPROVEMENTS.

Since the last annual meeting, the commissioners appointed by the court, have passed upon the value of all the property taken for depot purposes between Andover and Nashua streets, except that previously purchased, and in most instances settlements have been made in accordance with their report. It is hoped that the very few claims remaining unadjusted may be settled without further litigation. During the past season the work of removing the dwelling houses and other buildings from the new depot location, has been substantially accomplished. A temporary structure about four hundred feet long and sixty feet wide, has been erected for a train-house, to be used during the construction of the permanent building. The new train house, five hundred and thirty feet long and one hundred and twenty feet wide, has been put under contract and is now well advanced. It is to be built almost wholly of brick, iron and glass. The foundations are of heavy masonry, on piles driven from thirty to forty feet, and cut off at half tide, so as to be always wet with salt water.

The roof is of wrought iron, in a single span of one hundred and twenty feet, without support, and lighted with glass at the top. It covers four lines of tracks, and two broad platforms of thirty-five feet width each. Plans are also made, and space left, for the future erection, as needed, of two additional side roofs, forty feet wide and five hundred and thirty feet long each, so that the train-house, when finally completed, will cover six lines of tracks, four platforms, and two carriageways.

The head-house, which is to stand between the train-house and Causeway streets, is not yet under contract, but is to be let out at an early day. It will contain ample waiting-rooms and other conveniences for passengers, and also the offices of the company. Its proposed extreme outside dimensions are about two hundred feet on Causeway street, by one hundred and thirty feet in depth.

This station, when completed, will, it is believed, be entirely satisfactory to our patrons, whose patience has been sorely tried by the former limited accommodations of the Andover street house, and will, in all respects, be sufficient to meet the wants of the road for many years to come.

THE NEW DEEP-WATER TERMINUS.

On the 17th of February, 1870, this corporation was authorized by the Legislature to construct a branch from its main line, near the Milk Row Station in Somerville, to the Mystic River Railroad, at a point near the crossing of the Boston and Maine and Eastern Railroads in the same town. It was further authorized by the same act "to purchase the Mystic River Railroad, and also to purchase and improve such lands, wharves, and buildings upon the line of said Mystic River Railroad, or near the terminus thereof, as may, from time to time, be deemed necessary to establish a freight and shipping depot near the deep waters of Boston Harbor."

This act was accepted at the last annual meeting; and in accordance with its provisions, a purchase has been consummated, from the Mystic River Corporation, of about thirty acres of land and not less than twenty acres of dockage. In this purchase is included a solid wharf, fronting on Boston Harbor, below all bridges, about eight hundred feet long by four hundred feet wide, and connected on three sides with broad docks.

The property and franchise of the Mystic River Railroad has also been conveyed to this corporation, and a bridge, three-fourths of a mile long, has been constructed from the Charlestown shore to the wharf. It is expected that the railroad now under construction from our main line to this property will be completed in May next. Upon its completion, and the erection of suitable structures upon the wharf, our facilities for the reception and delivery and transportation of water borne freight will not be excelled by those of any road in New England. In this wharf purchase the Nashua and Lowell Railroad hold a joint ownership of 31 per cent.

TARIFFS AND FACILITIES.

During the past year there has been an unusual demand for increased facilities for handling and moving freight, and much dissatisfaction has grown out of the inability of railroads to handle their coal traffic in such manner as to avoid demurrage to vessels. So far as we know, the difficulty in regard to coal has existed on other roads to fully as great an extent as on our own. The large increase of rolling stock which we annually make, has been counterbalanced by strikes at the mines, and other causes, by reason of which the coal has come to us in unmanageable fleets. The dry and cold seasons have also produced a demand for largely increased quantities of fuel. We hope, however, by continued effort, in furnishing more cars and more extended wharf accommodations, to remove this cause of complaint.

TREASURER'S BALANCE SHEET, SEPT. 30, 1871.

Road bed	$453,117 14
Superstructure	367,824 62
Land and land damages	560,047 46
Real estate and buildings	922,049 31
Bridges and culverts	119,557 16
Engineering	47,359 07
Engines	92,801 76
Passenger cars	34,204 75
Merchandise cars	56,388 85
Cash	126,456 38
Notes receivable	4,354 38

President.—F. B. CROWNINSHIELD.

Directors.—F. B. Crowninshield, J. G. Abbott, Wm. Minot, Jr., Hocum Hosford, Edward W. Codman.

Manager.—GEORGE STARK.

Superintendent.—John B. WINSLOW.

Treasurer.—C. E. A. BARTLETT.

☞ The Philadelpeia *Ledger*, of 27th ult., reports the net anthracite coal tonnage for the week ending on the 18th ult., from all sources at 421,448 tons, and for the year 6,287,475 tons, against 2,063,314 tons to the same date last year, being an increase in the tonnage of anthracite coal of 4,224,161 tons. The production of bituminous coal for the week was 57,882 tons, and for the year 803,247 tons, against 690,582 tons to the corresponding time last year—an increase of 112,665 tons. The total production of all kinds of coal for the week was 470,330 tons, and for the year 7,090,722 tons against 2 743,896 tons to corresponding time last year, showing an increase of 4,346,826 tons.

☞ The Chesapeake and Ohio Railroad is finished two hundred and twenty seven miles from Richmond, Va., to White Sulphur Springs, and on the west end one hundred miles from Huntington to Gauley Bridge; the remaining part of the road, one hundred miles, is now being vigorously pushed through by a force of 5,000 men, and will be completed by October, 1872.

Commerce of New York.

The foreign imports at New York for the month of April, 1871 and 1872, are officially stated as follows:

	1871.	1872.
Entered for consumpt'n.	$18,516,940	$22,863,493
Do. for warehousing	12,023,501	20,310,346
Free goods	2,094 332	3,206,479
Specie and bullion	332,888	63,619
Total entered at port	$32,967,661	$46,443,937
Withdrawn fr. wareh'use	10,029,482	11,136,287

The foreign imports at New York for the four months from January 1, were:

	1871.	1872.
Entered for consumpt'n.	$72,321,008	$82,616,870
Do. for warehousing	49,400,058	65,371,388
Free goods	10,978,476	10,921,755
Specie and bullion	3,247,569	637,881
Total entered at port	$135,947,111	$159,547,844
Withdrawn fr. wareh'se.	44,416,476	46,268,490

The foreign imports at New York for the ten months ending April 30, were:

	1871.	1873.
6 months ending Jan. 1.	$156 339,208	$183,028,276
January	28,792,062	35,679,196
February	35,491,324	38,206,143
March	38,696,064	39,218,268
April	32,967,661	46,443,937
Total	$292,286 319	$342,576,120
Deduct specie	7,949,254	2,244,387
Total mdse	$284,337,065	$340,331,738

The duties received at New York for ten months ending with April, were:

	1871.	1872.
6 mos. ending Jan. 1.	$67,729,184 75	$74 078,181 75
January	12,010,020 67	13,317 086 82
February	12,258,147 69	14,710,928 08
March	15,305,799 14	14,095,994 24
April	12,535,090 06	13,948,999 00
Ten months	$119,838,242 31	$130 151,189 89

The exports from New York to foreign ports in the month of April, were:

	1871.	1872.
Domestic produce	$17,923,694	$16,118,266
Foreign free goods	97,823	64,958
Do. dutiable	908,557	906,560
Specie and bullion	9,593,029	4 499,518
Total exports	$28,523,103	$21,589,302
Do. exclusive of specie.	18,930,074	17,089,784

The exports from New York to foreign ports for four months from January 1, were:

	1871.	1872.
Domestic produce	$75,765,888	$66,647,319
Foreign free goods	292,138	544,846
Do. dutiable	2 588 998	3,293,811
Specie and bullion	23,334,186	9,726,141
Total exports.	$101,981,210	$80,212,117
Do. exclusive of specie.	78,647,024	70,485,976

The exports (exclusive of specie) from New York to foreign ports for ten months ending with April, were:

	1871.	1872.
6 months ending Jan. 1.	$107,654,919	$119,604,290
January	18,837,876	18,951,004
February	18,739,742	17,915,169
March	22 139,332	16,530,019
April	18,930,074	17,089,784
Total produce	$186,301,943	$190,090,266
Add specie	64,685,061	32,037,065
Total exports	$250 987,004	$222,127,331

☞ The western extension of the Winona and St. Peter Railroad is to be finished this year to the Big Sioux river, 144 miles from New Ulm.

Pennsylvania Railroad Company.

The aggregate receipts of this company from the operations of its works, including the Philadelphia and Erie Railroad, for the years 1870 and 1871, have been as follows:

	1870.	1871.
Pennsylvania R. R. and branches	$17,531,706 82	$18,719,836 85
Philadelphia & Erie R. R.	3,144,044 71	3,542,263 73
Pittsb'g, Ft. Wayne & Chicago Railway	8,118,595 60	
Erie and Pittsburg Railway 10 m'ths	870,859 23	
Total gross earnings	$29,665,206 36	$22 262,100 58
Deduct expendit's.	23,265,317 51	15,365,697 07
Net earnings	$6,399,888 85	$6,896,403 51

The following exhibits the earnings and expenditures of the Pennsylvania Railroad and branches for the same years:

Earnings:	1870.	1871.
From first class passengers	$3,595,371 20	$3,719,264 36
From emigrant passengers	162,671 92	156,392 12
From U. S. mail	146,743 45	147,893 12
From express	310,785 78	362,349 90
From freight	12,793,160 47	14,052,204 51
Rent of property	126,999 08	77,411 79
Miscellaneous	395,974 92	204,221 05
Gross earnings	$17 531,706 82	$18,719,836 85
Expenditures for—		
Conducting transp.	$2 562 084 69	$4,039,751 60
Motive power	3 240,606 69	3 049,027 28
Maintenance of road	3 058 685 78	3,302,286 95
Maintenance of cars	1,186,945 17	1,202,521 74
General expenses	211,762 82	229,845 77
Total expenses	$11,260,085 15	$11,823,433 34
Earnings less exp.	$6,271,621 67	$6,896,403 51

The number of miles of single track in use on the road and branches, including sidings, at the close of each year was as follows:

	1870.	1871.
Main Line, including sidings	889.10	912.70
Branches owned	58.20	100.30
" leased	227.10	277.80
Private sidings and branches	51.60	57.50
Total length in miles	1,226.00	1,348.30

The number of locomotives on the road at the commencement of the years 1870 and 1871, was | 477 | 482
And at its termination | 482 | 514

The mileage of engines in each year, was as follows:

	1870.	1871.
Passenger engine mileage	2,472,434	2,601,502
Freight "	7,358,537	8,879,144
Distributing "	354,262	423,671
Total mileage	10,185,233	11,904,317

The number of cars on the road at the end of each year was as follows:

	1870.	1871.
Passenger	251	255
Baggage, mail and express	103	108
Freight and coal	7,392	8,232
Other cars (in maintenance department)	707	810
Individual cars	4,786	5,619
Total	13,239	15,024

The number and mileage of passengers carried was as follows:

	1870.	1871.
Passengers	4,352,769	4,699,985
Miles traveled	150,850,087	152,918,042

The tons of freight and the miles each ton was carried, was as follows:

	1870.	1871.
Merchandise	2,877,012	3,414,402
Coal	2,550,389	3,161,441
Fuel and other material	376,650	524,451
Total (tons)	5,804,051	7,100,294
Total tonnage moved one mile	825,979,682	1,011,892,207

General Account.

The General Account, showing the financial condition of the company December 31, 1870 and 1871, presents the following balances:

	1870.	1871.
Capital stock	$33,850,000 00	$41,339,475 00
Funded debt, viz:		
1st mort. 6 per ct. due in 1880	4,972,000 00	4,972,000 00
2d mort. 6 per cent. due in 1875	4,866,840 00	4,866,840 00
General mort. 6 per ct. due in 1910	15,784,500 00	18,604,500 00
Bonds due State 5 per cent.	5,924,716 63	5,758,905 40
Mortgages and ground rents	102,809 32	215,959 32
Short bonds 6 per ct. due in 1871	1,109,224 00	
Total capital and debt	$66,610,089 95	$75,757,679 72
Bills and accounts payable	4,962,733 83	11,060,503 33
Contingent fund	1,000,000 00	2,000,000 00
Balance	524,391 91	1,253,886 77
Total debit side	$73,097,215 97	$90,072,069 82
Cost of road and appurtenances	$14,217,968 11	$15,237,965 03
Philadelphia and Columbia R. R.	5,375,733 43	5,375,733 43
Equipment	6,974,191 22	7,458,101 14
Real estate and telegraph line	4,726,419 55	5,258,612 55
Extension of road to the Delaware River	2,482,594 69	1,279,718 55
Total	$33,806,907 00	$34,610,160 70
Harrisburg & Lancaster Railroad stock	829,750 00	808,406 05
Connecting Railway stock	1,277,350 00	1,277,350 00
Pennsylvania canal stock	1,101,156 00	1,101,156 00
Pennsylvania Company stock		6,317,902 55
Stock and bonds upon the line of railway between Pittsburg & Columbus	6,808,153 88	
Philad'lphia & Erie R. R. stock	779,637 26	779,637 26
Bonds and stocks of municipal and other railroad companies	13,438,740 03	22,312,885 72
Bills and accounts receivable	8,568,549 10	13,030,858 29
Bond and stock in sinking fund	2,433,433 35	2,433,433 35
Bonds representing contingent fund.		2,000,000 00
Fuel and materials on hand	2,221,146 33	1,794,619 33
Advanced to Philadelphia and Erie R. R.	225,534 14	627,165 93
Balance in hand of agents and treasurer	1,576,858 60	2,978,494 64
Total credit side	$73,097,215 69	$90,072,069 82

The following summary exhibits the condition of the capital account for the past seventeen years embracing the whole period since the completion of the line:

	Share Capital.	Bonds and Mortgages.	Total Amount.	Cost of Property.
	$	$	$	$
1855.	12,355,525	7,519,096	19,874,621	18,483,489
1856.	12,646,625	8,516,841	21,163,466	19,048,968
1857.	13,206,625	14,929,940	28,136,565	27,266,981
1858.	13,240,225	14,094,451	29,334,676	27,670,672
1859.	13,349,125	16,469,159	29,818,284	28,484,321
1860.	13,261,960	16,680,804	29,942,764	28,846,442
1861.	13,264,100	16,936,764	20,200,864	29,587,678
1862.	13,274,100	16,696,764	29,970,864	29,888,552
1863.	13,430,250	16,949,124	30,379 374	30,592,298

* 11 months.

The officers and directors of the Pennsylvania Railroad Company, for the years 1872 and 1873, are as follows:

President.—J. Edgar Thomson.

Directors.—By the Stockholders; J. Edgar Thomson, Josiah Bacon, Wistar Morris, Washington Butcher, George Black, Pittsburgh, Samuel T. Bodine, Joseph B. Myers, Edward C. Knight, John M. Kennedy, John Rice. By the City of Philadelphia; William Anspach, G. Morrison Coates, Alexander M. Fox. By the Board; Thomas A. Scott, Edmund Smith, Herman J. Lombaert, George B. Roberts.

Vice Presidents.—Thomas A. Scott, Edmund Smith, H. J. Lombaert, Geo. B. Roberts.

Treasurer.—Thomas T. Firth.

Secretary.—Joseph Lesley.

Philadelphia and Erie Railroad.

The operations of the Philadelphia and Erie Railroad for the years ending December 31, 1870 and 1871, have been as follows:

Earnings:	1870.	1871.
From freight	$2,459,154 52	$2,800,358 31
" passengers	606.438 31	607,878 94
" expresses	33,111 95	38,030 10
" mails	25,000 00	24,974 16
" incidentals	20,339 93	71,022 22
	$3,144,044 71	$3,542,263 73
Expenses viz:		
Conducting transp	$712,179 28	$751,360 36
Motive power	736,926 66	741,272 21
Maintenance of way	867,912 25	995,192 16
Maintenance of cars	260,710 23	295,148 07
	$2 577,728 42	$2,782,972 80
Net earnings	$566,316 29	$759,290 93

The Philadelphia and Erie proportion of earnings, being the difference between that charged to operating the road and the gross receipts, amounts to $759,290 93.

Compared with the previous year, the gross earnings of 1871 show an increase of $398,219 02; with an increase in expenses of $205,244 38—making the increase in net earnings $192,974 64. The increase in earnings has been as follows: freight, $341,203 79; passengers, $1,440 63; expresses, $4,918 15; incidentals, $50,682 29; with a decrease in mails of $25 84. The expenses increased as follows: conducting transportation, $39,181 08; motive power, $4,345 55; maintenance of way, $127,279 91; maintenance of cars, $34,437 84—the expenses being 78.2 per cent of the earnings.

The receipts of the Lewisburg, Centre, and Spruce Creek Railroad (included in the gross earnings of the Philadelphia and Erie Railroad) were: from passengers, $6,872 59; freight, $8,402 97—total, $15,275 56.

The expenses in maintenance of way department amount to $995,192 16, or 35.8 per cent. of gross expenses, and are in excess of those of 1870, $127,279 91, the increase being made up by cost of materials used in repairs of track. The following materials have been used during the year in construction and renewals: 8,929 tons iron rails; 1,115 tons steel rails; 217,115 pounds spike; 9,960 chairs; 40,108 stops chairs; 33,591 iron splices; 426 steel do.; 37 wooden do.; 193,162 cross ties; 131 sets switches; and 193 frogs. The extension of sidings has been 47,231 feet, or 8.945 miles.

The length of main line in use is 287.510 miles; sidings, 104.762 miles; private sidings, 13.007 miles—total, 405.279 miles.

The renewals of bridge superstructure for the year amount to 465 lineal feet of Howe truss, 66 feet of stringer bridges, 238 feet arching, and 114 feet of iron girder bridges.

The amount charged to conducting transportation is $751,360 36, an increase of $39,181 08 over that expended in 1870, and equal to 27 per cent. of total expenses. The increase of freight tonnage is 3.10 per cent. over that of 1870. The loaded cars passing Renovo show an increase of 17,752, and at Kane of 16,273 over those moved in 1870. The total tonnage moved one mile was 232,436,009, against 188,673 278 in 1870, an increase of 23.19 per cent. over that of previous year, equivalent to 807,069 tons over the whole length of road. The number of passengers carried one mile was 19,759.982, against 19,162,897 in 1870, an increase of 597,085, equal to 68,728 over the whole road, the total number carried during the year being 684,884. The average distance travelled by each person was 28.85 miles.

The motive power expenses for 1871 were $741,272 21, or 26.7 per cent. of gross expenses, an increase of $4,345 53 over that of previous year. The engine mileage in 1871 was as follows: passenger, 562,946; freight, 1,867,260; distributing, 108 205—total, 2,528,411, against 2,228,683 in 1870, an increase of 309,728, or 13.9 per cent. the cost per mile run was 29.2, against 33 06 cents in 1870. The freight engines show for each mile run 119.85 tons of paying freight to 111.10 tons in 1870. The engines in service number 126. The total average cost per 100 miles run was; for repairs, 7.94; for fuel, 7.32; for stores, 0.76—total, 16.02.

The amount charged to maintenance of cars is $295 148 07, or 10.5 per cent. of gross expenses, and are $34,437 84 in excess of previous year's expenses. The number of cars, on hand December 31, 1871, was: 40 passenger, 7 emigrant, 15 baggage, 5 express, 811 box, 43 cabooses, 100 stock, 1,615 gondola and 70 coal cars, and 307 cars in maintenance of way department—total, 3,014. The General Superintendant in his report says:

Shipments of coal from Robert's Run Mines, on the Danville, Hazleton, and Wilkesbarre Railroad, to points on Philadelphia and Erie Railroad, commenced February 27, 1871.

In August, 1871, the Dunkirk, Warren, and Pittsburgh Railroad was completed from Dunkirk, New York, and a connection was made with Philadelphia and Erie Railroad at Warren.

In September its through business, between the oil regions and the east, was passed over the Philadelphia and Erie Railroad between Warren and Irvington.

The Lewisburg Centre and Spruce Creek Railroad was extended to Mifflinburg, nine and two-tenths miles from Lewisburg, and was opened for business to that point November 1, 1871.

The Danville, Hazleton, and Wilkesbarre Railroad was completed, and road opened to Hazleton December 11, 1871, making a direct connection from the Lehigh coal fields with the Philadelphia and Erie Railroad.

Balance Sheet for 1871.

Amount of road and shop stock on hand, January 1, 1871	$432,907 14
Amount bills during 1871	2,278,025 38
Amount pay rolls during 1871	1,700,567 92
	$4,411,500 44
Conducting transportation (including amount due Philadelphia and Erie Railroad Comp'y)	$1,510,651 29
Motive power	741,272 21
Maintenance of way	995,192 16
Maintenance of cars	295,148 07
Individuals and Co,'s (Gen'l Supt's account)	484,723 02
Road and shop stock on hand, Jan. 1, 1872	384,513, 69
	$4,411,500 44

President.—Edward F. Gay.

Directors.—Edward F. Gay, J. Edgar Thomson, Wistar Morris, Joseph W. Gaskill, Jacob P. Jones, Josiah Bacon, Saml. T. Bodine, John M. Kennedy, Washington Butcher, Samuel G. Thompson.

Secretary and Treasurer.—George P. Little.

Gen'l Sup't.—William A. Baldwin.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, June 1, 1872.

Stock Exchange and Money Market.

Money has been more urgently sought after, especially by speculative borrowers, and call loan rates were quoted firmer, ranging from 5@7; while in the discount line, a fair inquiry has been noted for accommodation, with strictly choice to good commercial paper quoted at from 7@9 per cent. per annum. Toward the close, the offerings of funds were again quite liberal, and the advantage was in favor of responsible borrowers. The city banks further strengthened their reserves, while diminishing their liabilities during the week. The U. S. Sub-Treasury reduced both its coin and currency balances materially, particularly its coin reserves.. The U. S. Sub-Treasury office reduced its coin balance about 3⅛ millions and its currency reserve nearly half a million. The city banks contracted their loan and discount average nearly 2⅛ millions during the week, and again reduced their outstanding circulation slightly. The U. S. Sub-Treasury held a currency balance at the close of business on Tuesday of $4,869,824, and a coin reserve, of $53,892,821.

The city banks, in their latest return, show an increase of $2,801,300 of legal tender notes, $398,800 of specie, and $3,187,200 of deposits, with a reduction of $2,112,500 to their loan and discount averages, of $93,100 in their item of circulation. The city bank exchanges, last week, averaged 117⅜, and thus far, this week, about 121 millions daily. The banks now hold $9,815,675 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $20,708,600, against $15,380,114 same time last year. The city bank deposits are now $222,454,800 against $238,490,760, week ending May 28, 1871. The legal tender reserve amounts to $51,607,100, against $68,280,418 same time last year. The circulation now stands at $27,545,300 against $31,071,244 same time last year. The loans are now $283,601,100 against $291,441,638 at this date last year.

The coin reserve of the city banks is now about 20¾ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 51⅝ millions against $46,616,000 on the statement of February 10th.

The U. S. Sub-Treasury reduced its currency balance $493,505, and its coin reserve $3,172,571 as the result of the week's business. The receipts of the office were $4,153,255 in coin, and $4,308,360 in currency; payments, $7,325,826 in coin, and $4,801,865 in currency. The office received $2,571,000 in coin or its equivalent, from customs; and disbursed $2,362,075, of coin interest.

Government revenues have shown a moderate yield, during the week. The excises yielded within the week about 2¼ millions, and thus far since July 1, 1871, $116,098,283. The customs at the port of New York last week were $2,573,954; at the outports, equal to about $825,000 all in coin, or coin certificates.

Gold has been fairly active, and generally quoted stronger as to price, during the week. The speculative and customs demand was good, and the export drain unusually heavy, placing the May export about $4,500,000 ahead of last year, while the April export was $5,000,000 less than last Spring. A considerable part of the May outflow of specie has grown out of the reimbursement of the principal of the public debt of 1862, called in for redemption some months ago, and of which the sum of $16,000,000 was outstanding on the first of the month. This operation, as well as the collection of May interest for foreign account, is now closed up. The specie export on Wednesday was $787,000.

The range of the price during the week has been from 113½@114¼ and the closing quotation on Wednesday was 114⅛ against 113⅞ the preceding Wednesday. The specie outflow, last week, was $4,378,679. The Gold Exchange Bank clearances have averaged about 31½ millions per day during the week.

The cash balances of the Treasury Department on Monday were: Currency, $6,644,270; coin $97,157,152. Certificates were outstanding for $25,510,700.

The customs demand for Gold last week, averaged $423,824 a day; thus far, this week, it has averaged $385,000 a day, or equal to a weekly aggregate of $2,310,000. The arrivals of specie from Europe, Havana and other foreign ports

last week were $43,457, and since Jan. 1, 1872, $684,169, against $3,025,208 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, has been $144,670,479 against $135,585,438 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to May 25, 1872, $74,668,343, against $82,833,144 same time in 1870-'71.

The export drain of specie was $4,378,679 last week, against $1,913,071 same week preceding year. The shipments since July 1, 1871, have been $45,482,732 against $73,653,173 same time in 1870-'71.

Foreign Exchange has been in moderate demand and less buoyant as to price. Bankers' sixty day bills on London closed on Wednesday at 109½@109¾; sight bills on London, 110⅜@110⅝.

The produce exports from this port, week ending with May 28, were to the currency value of $3,702,647.

Government securities have been offering with unusual reserve and have been in more active request, mainly on investment account, at decidedly firmer prices, closing buoyantly.

U. S. sixes of 1881 closed here on Wednesday of the current week at 119¾@119⅞; U. S. Five-Twenties of 1862, (other than the bonds called in) ex May coupon 114@114⅛; U. S. Five-Twenties of 1864 at 114@114⅛; U. S. Five-Twenties of 1865, 115⅛@115¼; U. S. Five-Twenties of 1865 consolidated, 116¼@116⅜; U. S. Five Twenties of 1867, 117⅜@117½; U. S. Five-Twenties of 1868, 117¼@117½ U. S. Ten-forties at 111¼@111½; U. S. Fives of 1881 (Funding Loan) 112⅞@113⅛; Six per cent. currency bonds, 117¼@117⅜.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	May 15.	May 22.	May 29.
Consols	93⅛	93¼	93⅝
U. S. 5-20's of 1862..	——	90¼	90½
U. S. 5-20s, 1865....	91¼	91¼	91¾
" 1867	93¼	93¼	93¾
" 10-40s	89	89½	89¾
New Fives of 1881...	89½	89⅞	——
Erie.	55¼	——	——

State bonds have been in moderate demand closing irregularly as to price.

A more active investment business has been reported in the better class of Railway Bonds. Few round lots of the older issues have been available to buyers. Prices have been strong and buoyant. The investment inquiry for Central Pacific Sixes has been good at 104⅛@104⅜. Chesapeake and Ohio have been selling to a fair extent at 94 per cent. and accrued interest.

The Northern Pacific Railroad 7-30 Gold bonds are selling readily at par and accured interest in currency. They are issued in denominations of $100 to $1,000 coupon, and $100 to $10,000 registered. They are secured by a first mortgage upon the road and its appurtenances, and also on a land grant which will exceed 23,000 acres to each mile of track, upon the completion of the road—or 500 acres to secure each $1,000 bond—and are receivable at all times at ten per cent. premium, in payment of any lands purchased from the company; the proceeds of the sale of the lands constituting a sinking fund for the redemption of the bonds. By the conversion of U. S. 5-20s into these bonds, holders can realize not only a handsome profit at once, but add about one-third to their annual income.

Railway and Miscellaneous share property, has been quite active, but prices have been unsettled, and toward the close, depressed on the speculative favorites. Pacific Mail, and Erie Railroad Shares fluctuated most widely, under the manipulations of operators for lower values, at the Stock Exchange.

In the Metal line, Ingot Copper has been moderately dealt in on the reduced basis of 33c.@34c. per lb., with sales of 100,000 lbs.; also 500,000 lbs for forward delivery, on private terms. Scotch Pig Iron has been heavy and irregular, influenced by the free arrivals and a moderate demand; sales 600 tons Glengarnock, reported at about $48, with $48@$50 given as the current quotations, and for Eglinton, $47@$47 50; American Pig quiet, but quoted about as before. Of English Rails, 5,000 tons were sold on private terms, and 75 tons old Rails also on private terms. Lead and Spelter dull but steady. Of Zinc, 25 casks Ahasselman sold at 8¼c. per lb. Tin dull, weak and irregular in view of the pending tariff legislation; no dealings of moment reported. Straits quoted nominal at 38¼c.@38c., gold.

General business has been fairly active, with Cotton quoted decidedly stronger, and most kinds of Breadstuffs, Provisions, Wool, Petroleum, Hayseed, Naval Stores and Tobacco closing less buoyantly. Middling upland cotton closed on Wednesday at 26¼ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,616,087 bales, against 3,761,108 bales same time in the preceding year; exports 1,841,411 bales against 2,892,482 bales in the previous year; stock at the ports at latest dates, 230,109 bales against 324,853 bales same date 1871.

At the Live Stock Markets, Beeves have been in good demand at 10@13 cts.; Veals at 5¾@8¾ cts.; Sheep in less request at 6@8¼; Lambs 11@14 cts.; Swine, at 4¾@5 cts. per lb., all live weight. The week's receipts were 7,573 Beeves, 4,830 Veal Calves, 16,970 Sheep and Lambs; and 31,067 Swine.

Foreign goods, have been less freely dealt in, and prices have shown rather less firmness. The week's imports of foreign goods reached the amount of $9,859,023 including $1,916,107 of dry goods

Ocean freights have been more active, and quoted stronger, for Grain, and Provisions, and about steady for most other kinds of produce.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—South Carolina 6s, new, Jan. and July, 32; Georgia 7s, 89; New York State 7s, B. L. coupon, 109⅛; Texas 10s, 1876, 84; Louisiana 8s, 1910, 81½; Arkansas 7s, issued to L. R. and Ft. S. R. ☞ The Baltimore and Potomac railroad will be completed its entire length and be turned over to the officers of the road by Seabrook, contractor, on the 1st of June.

☞ The first rail on the Lake Ontario Shore Railroad was laid at Oswego on the 28th ult.

HARVEY FISK. A. S. HATCH.

☞ FISK & HATCH, Bankers,
No. 5 Nassau st., New York.

The **CHESAPEAKE AND OHIO RAILROAD,** connecting tide-water ports with the principal cities of the Western States, is now nearly completed and will soon be in thorough operation as one of the great Trunk lines of the country.

Among the *New York Directors of the Company* are

A. A. Low, Wm. H. Aspinwall,
David Stewart, Jonas G. Clark.
President, C. P. HUNTINGTON.

Trustees for the Bondholders,
Wm. Butler Duncan,
Philo C. Calhoun.

We have for sale on behalf of the Company, the remainder of their **SIX PER CENT. BONDS,** secured by mortgage on the whole railroad line, equipment, franchises, &c., worth $30,000,000. Principal redeemable, in coin, 1899; interest payable also in Gold, May and November. Denominations $1,000, $500, and $100, Coupon or Registered. Price, 94 and accrued interest. Full information furnished on application.

We buy and sell Government Bonds and the Bonds of the Central Pacific Railroad Company, receive deposits, and allow interest on balances, make collections, issue certificates of deposit, and do a general banking business.

FISK & HATCH.

Steeled Wheels.

This novel title is given to railway wheels made by a process which must rank among the great improvements recently made in the working of metals, by W. G. Hamilton, Engineer of the "Ramapo Wheel and Foundry Company," which, after four years of experimental trials, is now brought prominently before the public.

Mr. Hamilton, who is well known to the railway profession through his *Manual of Useful Information to Railway Men*, has worked out the problem of making chilled car-wheels out of non-chilling irons, and at the same time increasing the strength of the mixture above that of the most expensive charcoal irons.

The process consists in part in melting scrap-steel with the ordinary charge of pig-metal in the cupola, by which an increase of strength of from 20 to 50 per cent. is given to the metal.

A. Whitney & Sons the extensive wheel-founders of Philadelphia, have been testing the practical utility and value of the process; they have made some 15,000 wheels during a continuous working in the last three months, and report it a most complete success.

That this process will enable them, by adding to their usual chilling charcoal irons a portion of non-chilling soft charcoal irons or anthracite metal, to produce a car-wheel of greater strength, and at a much less cost than with high-priced chilling charcoal irons alone.

To the railway community the value of this improvement will be understood when it is known that the supply of charcoal irons is yearly diminishing and the cost increasing, and that the steeled metal gives greater security to their rolling stock.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Secured as they are by a first mortgage on the Road, Land Grant, Franchise and Equipments, combined in one mortgage, they command at once a ready market.

A Liberal Sinking Fund provided in the Mortgage Deed must advance the price upon the closing of the loan. Principal and interest payable in *gold*. Interest at eight (8) per cent. per annum. Payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000, $500 and $100, Coupon or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and rust Company of New York.

Can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.,

BANKERS,

NO. 11 WALL STREET.

The Duanesburg Railroad.

The Schenectady *Union*, of 22d ult., says: "The track of this road is now laid through the city. That across State street will be laid to-day or to-morrow. The road has been completed a distance of nine miles out from the sand bank, and eighty men are now employed just this side of Duanesburgh Corners, leveling up the track and putting the road in running order. The track will be completed through the city in about two weeks, when it will be ready for the running of trains. Two tracks will be laid through the city as far as the Troy road. A committee of the directors of the road, among whom is Col. Campbell, are now in New York to lease the road to the Delaware and Hudson Canal Company. That company are no doubt anxious to obtain the road and the committee will doubtless complete the transfer of the road to said company before they return."

☞ The directors of the Duanesburg Railroad have leased their road to the Delaware and Hudson Canal Company. The lessees are to supply the motive power and rolling stock, and to receive sixty per cent of the net proceeds of the road.

Journal of Railroad Law.

RAILROAD COMPANIES—AGENCY—RESPONSIBILITY FOR EXTRA SERVICES.

The facts in the recent case of Nichol *vs.* The Grand Trunk Railway, (18 Mich., 170,) are fully and clearly stated in the following opinion by—

GRAVES, J.—In the fall of 1861, Nichol, the defendant in error, was in the service of the company as station agent at Port Huron, and was receiving $60 per month.

While thus engaged, he was requested by two agents of the company, Bailey and Christie, to take charge of the Sarnia station also, and complied.

Neither Bailey nor Christie had or pretended to possess any authority to fix or change the salaries of station agents, and their want of power in this respect was well known to Nichol.

When it was proposed to him to act at Sarnia as well as Port Huron, some conversation took place respcting an enlargement of his salary, but nothing definite was said about it, nor did any one assume to guarantee any change in his compensation.

Under these circumstances, Nichol proceeded to act as agent for Sarnia as well as Port Huron, without any stipulation beforehand for an increase of pay. He continued, however, to agitate the subject of enlarging his salary, and obtained the intercession of Bailey and Christie; and finally the company, in January, 1862, raised his wages $6.66 per month.

After this change of wages and for about ten months, at the end of which time he was discharged by the company, the defendant in error regularly made out and receipted his monthly pay roll, in which he charged the company $66 66 for his months' services at both stations, one half for each, and receipted the same.

After his discharge he sued the company to recover an additional compensation for his ten months' service, and obtained judgment for $596 62, and the company now seek a reversal of that judgment. There are but two points in the case. On the trial, the counsel for Nichol asked the latter, while testifying in his own behalf, what the agent, Christie, said to him about taking the Sarnia Station, which was objected to as calling for hearsay testimony, but the objection was overruled, and this presents the first question.

When this ruling was made, Nichol had testified that Christie, at the time of the conversation referred to, was an officer of the road, but it had not been shown in any way that his agency extended to those affairs to which the talk inquired about, related. Subsequently, it was conclusively established by the testimony of Nichol and Jamison, that Christie had nothing to do with the adjustment of the salaries of station agents. It seems, therefore, that the question was open to the objection made to it, and should have been disallowed.

After the evidence had been given, the Court was requested, by the counsel for the company, to instruct the jury that the testimony failed to make a case of liability against the defendants within the issue, and that the verdict must be for the defendants.

The refusal to give this instruction present the second, and only remaining question in the case.

It appears by the record that all the evidence given on the trial is embodied in the bill of exceptions, and an inspection of that evidence is sufficient to show that there was nothing whatever to prove that an express contract was made with the company for any greater compensation than Nichol received. While there was no testimony tending to prove an express engagement, the evidence it so far from justifying an inference that the company were to pay anything beyond $66 66 per month, actually repels such an inference, and emphatically excludes the idea of an implied contract for additional wages. Being in the service of the company for a fixed compensation, his duties were enlarged and he asked for an increase of pay and obtained it.

He continued at work thereafter until dismissed by the company, and every month stated his demand according to the increased rate, and, on getting the money, receipted the claim.

He may have beguiled himself with an expec tation of further compensation, but there was no ground for anything more substantial than an expectation according to this evidence. As there seems to have been no conflicting evidence, nor any dispute as to what actually occurred, and no view which the jury were at liberty to take, could have supported the case of the plaintiff, I think there was error in refusing to charge as requested, and that the judgment should be reversed, with costs.

The other justices concurred.

Augusta and Hartwell Railroad.

At the Annual Meeting of the Stockholders of this Company held at Augusta, Ga., on the 21st ult., the Secretary read the Annual Report of the Directors, as follows:

To the Stockholders of the Augusta and Hartwell Railroad Company.

GENTLEMEN—The Directors respectfully submit their third annual report:

At the time of holding your last annual meeting you were led to believe that negotiations had been successfully closed with an English party to build and equip your road; these hopes, through some reason, failed to be realized. In August last the Board of Directors were called together to act upon a contract made by the Building Committee of this body, with E. Hanford, of New York, for building and equipping this road; and from the recommendations and endorsements of the contractor, we thought by this time at least fifty miles of your road would be in running order. This our last hope has failed, and our enter prise to day is no nearer a success than it was two years ago.

The company at this time is sadly in debt, and which debt is owing almost entirely to its employees, who have suffered during the past eight months from the want of the money justly due them, and it becomes necessary that measures be at once adopted by the stockholders by which their just demands can be settled and the company placed once more in a position to make an effort for its completion.

The people of that portion of the State interested in the success of this enterprise are the proper ones to step forward at this time and make it a success. No railroad enterprise can enlist capitalists unless it presents some basis of its own by which the capitalist can see a return for the money advanced. Your company, unfortunately, has had no such basis to work upon; consequently your directors, in their endeavor to make it a success, have unfortunately been delayed by men whom they were led to believe were capitalists, but were not.

It is often urged as a reason why men could be induced to embark their capital in building this road, that the charter gives the State authority to endorse the bonds of the company to the extent of $15,000 per mile. This is true; but this endorsement can only be had after ten miles of road is completed. The question then to be answered is, where is the money to build that first ten miles to come from? It seems as if such a question should be useless—that the people to be benefited and whose property will be increased in value by its construction should, or rather, ought to be willing to come forward at once, and pledge themselves for its success.

While adjoining States, like Tennessee, Kentucky, Alabama and North Carolina are alive to the great advantage of railroads, it seems that the people of that portion of our State requiring this road are supine and indifferent.

The money required to build the road can readily be furnished by the people upon its proposed route, and with a systematic and proper appeal, we feel they will respond.

Most all the money expended has been furnished by outside parties, who, however anxious for the success of the road, as a means to remunerate them for their advances, have failed to furnish sufficient to pay what work was done under their direction, and the company to-day presents itself to its proprietors as a bankrupt.

Is there any way to remedy this? We answer, yes. And will endeavor to show that by the hearty co-operation of every stockholder it can be made a success, and by the time of your next annual meeting present to the world an enterprise in successful operation, and on the road to an early completion.

From the report of the Chief Engineer and his estimate, we have for data, that the cost of building and equipping 120 miles of the road will not exceed, say $17,500 per mile, amounting to $2,100,000

For which the endorsed bonds for $15,000 per mile will give $1,800,000, which will produce, at 70 per cent... 1,260,000

Leaving for stock subscriptions..... $340,000

This sum is so insignificant in comparison to the benefit to be derived from the success of the road that it seems almost superfluous to add a word.

With that length of road in operation, its earnings will not only meet expenses, but will pay the interest upon its bonds, and contribute towards the completion of the road to Rabun Gap, when it will be the shortest and nearest to an air-line that can be built between the Great Northwest and Atlantic coast. In making these estimates your Directors have endeavored to be safe, rather exceeding what they believe will be its cost than under-estimating.

As was stated in the outset of our report, that if we can present a basis of local subscriptions sufficient to make the building of the road a success, no trouble will be experienced in having the aid of first-class railroad men to assist in its completion.

We, therefore, recommend that a strong local board of directors be selected—men who will be willing to give time and energy to the enterprise and road at once. Not to-morrow, but to-day, put it before the public in a such position that its success will be secured.

The following gentlemen were then elected directors for the ensuing year: John Thompson, John L. Wilkes, John D. Butt, James Hope, Robt. H. May, E. Lockhart, James A. Clarke, Thos. A. Barksdale, N. A. Crawford, Nathan Bussey, James A. Edwards. Subsequently the Board organized by the election of John L. Wilkes, President; James Hope, Treasurer; and Charles R. Abbott, Secretary. The following resolutions were adopted:

WHEREAS, E. Hanford, to whom was awarded a contract for building the Augusta and Hartwell Railroad, having failed to carry out many of the

provisions of said contract, and has signally failed to commence the work as required; therefore,

Resolved, That the stockholders, in their annual meeting convened, do hereby solemnly declare said contract violated, and therefore abrogated.

Resolved, That the Board deem it unnecessary, at this time, to require the services of a financial agent, and that the services of such an officer be discontinued. That the Secretary notify the parties heretofore acting in that capacity of this resolution.

Resolved, That the Secretary be instructed at once to make demand on H. A. Underwood, the late President of the Augusta and Hartwell Rail road, for the immediate return to the company of all papers and other property in his possession.

Resolved, That the Secretary be instructed at once to make demand on E. Wilson, Esq., Cashier American Exchange National Bank of New York, trustee under the contract with E. Hanford, for the return to the company of all papers and other property of the company in his possession.

Louisville, New Albany and Chicago R. R.

To the Bondholders and Stockholders of the Louisville, New Albany and Chicago Railroad Company:

On the first day of December, 1870, the Circuit Court of the United States for the District of Indiana, appointed me "receiver of the property, franchises, rights and credits of the Louisville, New Albany and Chicago Railroad Co." On the day following I took possession of the railroad and other property belonging to said corporation, by virtue of a delivery and surrender made to me by George L. Schuyler, Esq., president of an organization at that time holding control of said railroad and other property.

During the month of December such legal complications and misunderstandings arose as resulted in a disturbance of the possession of the receiver, which continued until the last day of the month, when the receiver was again put in possession of the railroad and other property, by the United States Marshal, under a "writ of assistance," as directed by the court. The undisturbed possession of the receiver dates from this last day.

This report of the operations of the railroad for the year ending December 31, 1871, is submitted to those having an interest in the property.

The annexed statement will show the earnings and the expenditures made in connection with the operation and management of the road during the period named:

Earnings from passenger traffic.....		$288,271 41
" freight traffic		439 569 87
" mails, express, etc....		59,470 31
Total earnings		$787,311 59
Amount of operating expenses.....		639,140 80
Net earnings for 1871		$148,170 79
From which deduct—		
Amount expended in new work or permanent betterment of the road....	$101,477 72	
Amount paid in settlement of old claims and judgments, by order of Court, and for stock killed prior to 1st January, 1871...	9,148 91	
		110,626 63
Balance unexpended.....		$37,544 16

At the close of the year 1870, that portion of the road between Juliett and Lafayette, 130 miles, was in bad condition, and many of the bridges and culverts on the entire length of the road, but more especially on the north division (Maple Grove to Michigan City), were absolutely unsafe to run over.

During the year 67,367 new ties were put into the road at a cost of $19,000, exclusive of cost of labor in putting them in. Twelve hundred tons of new iron (paid for during the year, except about $12,000), have been laid; and one hundred and ten tons of iron were repaired at forges at Michigan City, and relaid upon the road.

Fifteen new bridges were built at a cost of $19,974, and, in addition thereto, $10,650 were expended in the betterment and repairs of other bridge structures.

Two new locomotives for freight service were purchased at a total cost of $21,743 00; and $47,-212 79 were expended in rebuilding and repairing locomotives.

Two first-class passenger coaches were built in the company's shops, at a cost of $12,000, and three baggage and mail cars at a cost of $9.000; and $39,269 52 were expended in car repairs and renewals.

A remarkably dry summer and autumn, and a winter which has been without precedent in many years for severity and duration, have contributed, in no small degree, towards making the operating expenses much in excess of what they would have been, had the seasons proved more favorable. Wells and streams that never failed before, failed this year, leaving us short of water at almost every point on the road, while during the cold weather, which came on late in November, wheels and axles have given way in large numbers. But the repairs of cars and locomotives having been prosecuted throughout the year with the utmost energy and thoroughness, we enter upon the present year with our equipment in a far superior condition to what it was in at the opening of the year 1871.

In considering the figures submitted, and judging of the success which has attended the management of the road, it should be borne in mind that more than two hundred miles, out of the two hundred and eighty-eight which constitute its entire length, is ironed with iron which has been long in use, and is badly broken down. How badly, it may be just as well not to particularize. It will be easily understood that the expense of operating is necessarily largely increased in almost every department, by reason of bad iron. I think it is manifest that it would have been wise policy to have put into new iron all the net earnings of the road during the year or two prior to the receivership, instead of dividing the same as dividends. Any management which should withdraw any portion of the earnings of the road, and dispose of the same as dividends, might, in so doing, consult the present advantage of the shareholders, but would certainly disregard the future value of the property.

The present prospects of the road for business are very flattering. The freight receipts for the month of February (just closed), are considerably in excess of those for the same period of last year, with every indication of a continued increase of traffic. It has been the policy of the present management to foster and increase the coal carrying, and with the limited transportation belonging to the company, much success has attended the effort. Fifty new cars for this branch of trade have been purchased and delivered this year, and are about paid for out of the earnings of the road. At this time, when the coal measures of Indiana, by reason of their extent and their peculiar value, are attracting the public attention in so large a degree, and the market for the coal is so rapidly increasing throughout Indiana, Illinois, and Michigan, it is manifestly the true interest of the road to develop and secure as much of the traffic as possible, by giving, as rapidly as needed, the increased facilities required, and by forming with such connecting roads (built or projected), as traverse the coal fields, such traffic contracts as shall secure the desired result. I have traveled in this direction as rapidly as the revenues of the road would permit me to go.

GEO. H. CHAPMAN, *Receiver*.

Indianapolis, March 5, 1872.

☞ The estimated earnings of the Erie Railway for the week ending May 23, 1872, were $439,-720; against $374,207 for the corresponding period of 1871—an increase of $65,513. Total earnings since April 1, 1872, $2,889,710—an increase over the same time in 1871 of $566,591.

THE

CANADA SOUTHERN

RAILWAY COMPANY

Are now offering through the undersigned the

REMAINING $5,000,000

OF THEIR

First Mortgage Sinking Fund

30 Years

7 PER CT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

THE ROAD runs from Buffalo to the Detroit River, connecting there with the Chicago and Canada Southern, now being built to Chicago, and will thereby form the

SHORTEST TRUNK LINE BETWEEN BUFFALO AND CHICAGO, or, in other words, will be the SHORTEST LINK IN THE GREAT LINE OF TRAFFIC BETWEEN THE EAST AND WEST, connecting the GREAT SYSTEM OF RAILWAYS which diverges from Buffalo, Toledo and Chicago.

A branch also runs from St. Thomas to St. Clair, where it forms connections with the various roads leading into the lumber and mineral regions of Michigan.

THE MAIN LINE from Buffalo to the Detroit River is 229 miles long. The branch from St. Thomas to St. Clair is 61 miles, and runs through the great Canada oil region.

OF THE entire line (290 miles) *Two hundred and twenty* miles are *graded, bridged, and ready for the superstructure*. The remaining 70 miles are under contract to be ready for the superstructure early in the Summer.

OF THE 800,000 ties required, 600,000 are on hand and the remainder are coming in daily.

SIX THOUSAND FIVE HUNDRED TONS of rails are delivered and paid for, and the balance contracted to be delivered early in the Summer, those for the main line being STEEL, all 60 lb. to the yard.

ALL the materials for the stations, and a part of the equipment are purchased.

TRACK LAYING will be begun as soon as the frost is out of the ground.

The entire line will be ready for business on or before Dec. 31, 1872.

THE ROAD is being built by the most experienced railroad men in the country, who are confident of a profitable business for it from the day of its opening.

THE ROAD will be

33 Miles Shorter than any other Road,

either BUILT or in contemplation between Buffalo and Chicago.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety six per cent. of the road IS STRAIGHT.

The Canada Southern (including its branch of 61 miles to St. Clair) and the Chicago and Canada Southern, with their light grades, direct alignment, being the shortest route between Buffalo and Chicago, will admit of the most speedy, economical, and safe transit attainable for both passengers and freight.

The road thus far has been built by cash subscriptions, and the proceeds of the bonds now offered will complete and fully equip it. The principal and interest of the bonds are payable either in New York, London, or Frankfort.

We have no hesitation in recommending the bonds AS A PERFECTLY SAFE as well as a PROFITABLE INVESTMENT.

LEONARD, SHELDON & FOSTER

No. 10 Wall-St.

Northern Pacific Railroad.

The St. Paul *Pioneer* gives particulars of the negotiations on the part of the Northern Pacific Railroad Company, whereby work on the State Line railroad from Superior ity has been stopped. It says:

The principal features of the pending negotiations are the suspension of the work on the State Line Road, that has been actively progressing during the past winter, under a contract with Capt. J. Starkey, of this city, the Northern Pacific agreeing to build a road from their main line along Rifle's Point, across the entry to St. Louis Bay, thence along the Bay Shore of Superior to the Nemadgi River, the whole to be completed by the 1st day of January, 1873, and locomotives, cars, &c., running thereon: rates of fares and freight to be equal to the same from Duluth, for which the Superior people are to donate to the Northern Pacific an equal amount of lots and lands in and around Superior to the amount of 3,000 acres—turn over the $350,000 of Douglas county bonds to the Northern Pacific, but no interest to be paid on them until eighteen months from the 1st of August next, but to aid in the construction of what may be justly called the Rice's Point and Bay Shore line, they may use some of the bonds not to exceed the rate of $14,000 per mile. The Northern Pacific further agree to finish the State Line Road during the year 1875, and as a part of the above named arrangements the charter of the St. Croix and Superior Railroad is turned over to the Northern Pacific Railroad Company.

Lehigh Coal and Navigation Co.

We gave in our issue of May 18th an abstract of the Report of the President of this Company for the year ending December 31, 1871. The Balance Sheet of the Company in detail, January 1, 1872, is as follows:

Lehigh and Susquehanna R. R. Planes and Branches		$11,988,888 45
Lehigh Navigation and Shipping Pockets		3,000,000 00
Shipping Improvements— Hazardville		27,411 35
Coal Lands— Lehigh Region	$5,000,000 00	
Wyoming Region	3,000,000 00	
		8,000,000 00
Coal Improvements— Lehigh Region	1,026,750 48	
Newport Region	148,174 78	
Sugar Notch	196,666 67	
		1,371,591 93
Landed property and improvem'ts.		968,206 16
Canal equipment		217,211 06
Mining Equipment— Lehigh	$224,440 23	
Newport	74,571 95	
		299,012 18
Supplies on hand		57,529 66
Tools and stock in mines— Lehigh	$151,055 02	
Newport	44,752 19	
		195,807 21
Coal on hand		206,535 21
Contingent fund		949,873 58
Bills receivable	$161,130 93	
Bonds and mortgages	88,593 81	
Ground & water rents	175,202 54	
		424,927 28
Cash on hand		235,003 28
Balances due by agents, and rents due the company		21,227 78
Sinking fund under mortgage, 25-year gold loan		547 68
Gold loan of 1897, assumed by C. R. R. Co		2,310,000 00
Debit balances, individual ledger		740,264 77
Suspended debts		5 000 00
Gold loan of 1894 on hand		1 020,000 00
		$32,040,037 58

Capital stock		$8,739,850 00
Loan of 1877 (convertible)	$1,496,879 18	
Loan of 1884	5,566,276 70	
Loan of 1884 (convertible gold)	1,942,000 00	
Loan of 1897 (gold)	4,944,500 00	
Loan of 1897 (railr'd)	2,000,000 00	
Loan of 1881 (Nanticoke)	9,000 00	
Loan of 1911 (consolidated mortg'ge)	100,000 00	
		16,058,655 88
Bills payable	1,911,283 33	
Mauch Chunk drafts unpaid	127,732 34	
		2,039,015 67
Due to individuals		1,172,761 61
Pay rolls for labor in December, charged to the various accounts in 1871, but not payable until January, 1872		89,476 88
Vouchers for supplies purchased in 1871, charged in the various accounts in 1871, but not payable until January, 1872		66,711 26
Unclaimed wages		6,155 26
Dividends, due and unpaid		719 20
Profit and loss		3,755,341 97
Interest due January 1, 1872, and arrears		111,349 85
		$32,040,037 58

At an election held May 7, 1872, the following persons were chosen officers of the company for the ensuing year:

President.—E. W. Clark.

Managers.—Francis R. Cope, Francis C. Yarnall, Fisher Hazard, Charles Parrish, George F. Tyler, Philip C. Garrett, Charles Wheeler, George Whitney, Alexander Biddle, John Leisenring, Samuel Thomas.

General Agent.—J. P. Ilsley.

Treasurer.—Solomon Shepherd.

Secretary.—F. Mitchell.

Erie and Niagara Railway.

Last week we announced the re-opening of the Erie and Niagara Railway on the 18th instant, from Fort Erie to Niagara, but from information received to day we are inclined to doubt the correctness of the assertion, so far as that end of the road is concerned running from Clifton westward. It is generally known that quite a contest has been going on between two rival corporations for the possession of this line of road, which resulted in favor of the Canada Southern. But there is yet a bone of contention between it and the Great Western, and that is the branch running from the junction to the depot at Clifton. To make eastern connections the Southern must use this branch, which it finds a difficult matter to accomplish. The claims of the Western, we understand, have been pronounced valid, so that in order to run between Clifton and Niagara, with reasonable claims for patronage, the Southern has yet to make terms with the former, or open a new cut for a mile and a-half. The authorities of the two roads met at Clifton this week to remove the "little unpleasantness," if possible, but it is quite probable that in order to connect with the Erie, which the Southern is very anxious to do, it will be obliged to do that which will involve no small expense and the loss of considerable time, and thus lose the greater part of the summer travel.

At Suspension Bridge the Erie is making extensive improvements. Grounds have been recently purchased, and will be put into immediate use. The new passenger depot will be located on the south side of the road. The cattle yards, which are already commenced, will be contiguous to the offices of the railroad and custom-house officials, which will be a good feature in the estimation of drovers. A building formerly occupied as a schoolhouse is entirely remodelled in offices, in keeping with the other equipments. The Bridge people are not quite so hard on the Erie as they were a year ago; but time and facts usually dispel prejudices.—*Buffalo Commercial.*

Port Royal Railroad.

Our readers will recollect that at the convention of the stockholders of the Georgia Railroad, held last week, the Port Royal Railroad endorsement question was referred back to the Board of Directors with power to act. The first meeting of the Directory since the convention was held in this city yesterday. There was a very full attendance, and great interest felt in the result. The endorsement came up, and a long and elaborate discussion upon it ensued. It finally terminated in the Board passing a resolution to endorse the bonds of the company to the amount of half a million of dollars. When finished, the Georgia Railroad is to control and operate it, and is also to have a controlling interest in the Savannah and Charleston Railroad. This settles the question. The endorsement is all that the Port Royal Company desires; and—knowing now, as they do, that they will have the hearty co-operation of the Georgia Railroad—the success of their line is assured. A large force of hands is now employed on both ends of the line, and additional labor is being rapidly secured. President Millette stated yesterday that forty-eight miles of track have been laid and the cars running that distance. The cars now run to a point twenty-two miles this side of Yemmassee. Ten miles of track have been laid since April 24th, which will give some idea of the rapidity with which operations are being pushed. Passenger trains are running every day and doing a good business. Seven saw mills have been erected on the line, and over 5,000,000 feet of lumber carried to Port Royal since August. It is believed that the road will be open by the 15th of next October.—*Augusta Chronicle, May 22.*

Belvidere Delaware Railroad.

The Norristown (Pa.) *Herald* says that the Pennsylvania Railroad Company having leased the Belvidere Delaware Railroad, extending from Manunka Chunk, N. J., to Trenton, N. J., a distance of 67 miles, have made arrangements for through trains and established a through line between the North and South and West, connecting at Philadelphia for Washington without change of cars, and at the same depot for Pittsburg and the great West, while at Easton connecting with the Morris and Essex, Central of New Jersey, Lehigh Valley, Lehigh and Susquehanna, and at Manunka Chunk with the Delaware, Lackawanna and Western Railroad. Very valuable passenger connections were thus established. But the great value of the Belvidere road is in its coal connections, which enable the Pennsylvania Railroad to tap the Wilkesbarre district. For the last few days the coal shipments of the Lehigh and Susquehanna and Lehigh Valley Railroads have been together about 3,000 cars, and of this nearly one-third goes to the Pennsylvania Railroad at Easton, whence it goes to Philadelphia. These large shipments of coal give the Pennsylvania Railroad an immense advantage, since it can thus drain two districts without suffering from competition. The Belvidere Delaware Railroad also operates, under lease, the Flemington Branch, extending from Lambertville to Flemington, 13 miles—making the whole length of line operated 79 miles. The share capital of the company is $995,800; funded debt, $2,214,500; special loans about $182,338; and floating debt about $1,030,287. No dividends have ever been paid. The cost of road and equipment has been about $3,784,387. The gross earnings in 1871 were $887,

537, and the net $200,414—out of which $140,341 were paid for interest. The net loss in operating the Flemington Branch in that year was $29,111.

Transportation of Goods in Bond.

AN ACT to amend section second, act of August thirtieth, eighteen hundred and fifty-two, in relation to the transportation and exportation of imported goods, wares, and merchandise in bond through certain ports in the State of Texas.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That section second of the act of August thirtieth, eighteen hundred and fifty-two, entitled "An act authorizing imported goods, wares, and merchandise, entered and bonded for warehousing in pursuance of law, to be exported by certain routes to ports and places in Mexico," be so amended that imported merchandise, duly entered and bonded at a port of the United States, and withdrawn from warehouse in accordance with existing law, for exportation for San Fernando, Paso del Norte, and Chihuahua, in Mexico, shall pass through Indianola, the port of entry for the district of Saluria, in the State of Texas, under such regulations as the Secretary of the Treasury shall prescribe, as well as through the port of Lavacca, in said district, as required by said section.

Approved April 30, 1872.

☞ The Atchison, Topeka and Santa Fe Railroad is now in operation for 180 miles of main line and 26 miles of branch. It has been built for cash and owes no floating debt. The charter under which it acquires its land grant does not expire until March, 1873, and the Company having decided to complete the road before that time, in order to avoid any question of its rights, have raised by subscription to the stock $3,000,000, bought the iron for the whole line, and will finish the road probably before winter. The earnings of that portion already built, with the sales of the lands, more than meet the interest upon the whole bonded debt, and the road is regarded in Kansas as a strong and popular enterprise, well calculated for success.

☞ The London *Railway Times* of 18th ult. says that according to statements from Wolverhampton the dearth is fast approaching a famine of all iron-making materials, and complaints of non-deliveries were made upon every hand. Even when the highest quotations had been given, the materials could not be got; hence mills are standing for puddled iron, and forges cannot be kept going for want of pig-iron. Even founders are impeded by the scarcity. Excessive prices could not secure in the stipulated time what is wanted. Extensive foreign demands and the short time worked by the men are the causes.

☞ A continuance of the St. Joseph Valley Railroad from South Bend to Plymouth, Ind., has been surveyed. This is the only link wanting to complete a chain of railroad communication leading from the Michigan pineries to Indianapolis, thence to Louisville, Ky., and Nashville, Tenn.

☞ The Pennsylvania Railroad Company has purchased the Western North Carolina Railroad. This purchase gives to the Pennsylvania Railroad the important lines in North Carolina, and the control of all the connecting lines north and south of that State. The Western road extends from Salisbury to Old Fort, 125 miles. This road has cost the State $6,000,000.

☞ The annual meeting of the stockholders of the Peterboro Railroad (otherwise known as the Wilton extension) was held at Nashua, N. H., on the 27th ult., and the following board of directors elected: James Scott, P. Felt, George A. Ramsdell, Solomon Spalding, Gilman Scripture, Josiah C. Graves, and Albert McKean. Albert Smith of Peterboro,' was chosen clerk. The lease of the road to the Nashua and Lowell, executed on the sixth ult., by the directors was ratified. The contract for building the road has been awarded David Cram of Boston.

☞ The Knox and Lincoln Railroad has been graded to the water in Rockland, Me., and proposals are invited for grading, and also the building of a wharf 615 feet long.

☞ The President has signed the bill giving the assent of Congress to the subscription of the District of Columbia to the stock of the Piedmont and Potomac Railroad Company.

☞ Whitehall has completed the contract to bond for the New York and Montreal Railroad from Whitehall to Ticonderoga, running on the west side of the lake.

☞ The railroad from May's Landing to Egg Harbor City, on the Camden and Atlantic railroad, will be completed and the cars running by the first of June.

RAILROAD IRON.
THE UNDERSIGNED HAVE FOR SALE 1,060 tons 30-pound fish pattern rails, now on the way to New Orleans.
PERKINS, LIVINGSTON & POST,
No. 31 New-St., New York.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.
NEW YORK, May 2, 1872.

THE ANNUAL MEETING OF THE SHAREholders of the Illinois Central Railroad Company for the election of directors and the transaction of other business will be held at the office of the Company, in the city of Chicago, on Wednesday, the 29th day of May instant, at 11 o'clock A. M.

The transfer books of the Company will be closed after the fourteenth instant until the first day of June next.

L. A. CATLIN, Secretary.

TRAUTWINE'S
CIVIL ENGINEER'S POCKET-BOOK.
SECOND EDITION REVISED.

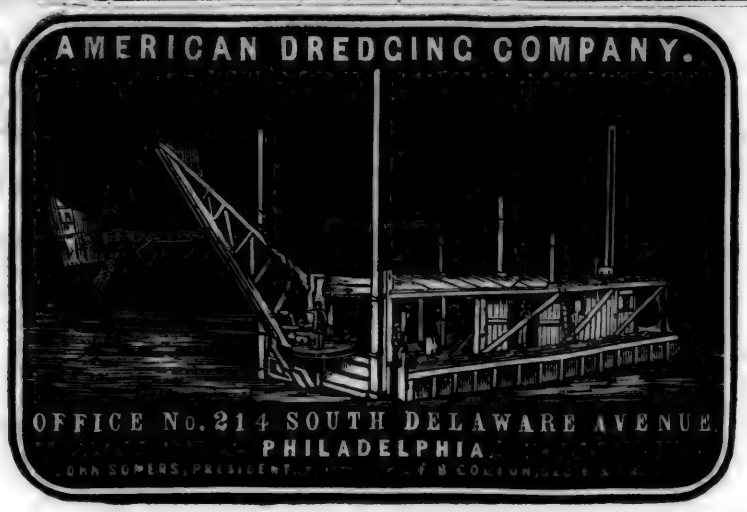
THE CIVIL ENGINEER'S POCKET-BOOK OF MENSURATION, TRIGONOMETRY, SURVEYING, HYDRAULICS, HYDROSTATICS, INSTRUMENTS AND THEIR ADJUSTMENTS, STRENGTH OF MATERIALS, MASONRY, PRINCIPLES OF WOODEN AND IRON ROOF AND BRIDGE TRUSSES, STONE BRIDGES AND CULVERTS, TRESTLES, PILLARS, SUSPENSION BRIDGES, DAMS, RAILROADS, TURNOUTS, TURNING-PLATFORMS, WATER STATIONS, COST OF EARTHWORK, FOUNDATIONS, RETAINING WALLS, etc., etc. In addition to which the elucidation of certain important principles of construction is made in a more simple manner than heretofore. By John C. Trautwine, Civil Engineer, 648 pages, with nearly one thousand illustrations, executed expressly for the work; forming, altogether, the most complete and concise work of the kind ever published.

The well-known ability of the Author, and his wide-spread reputation as a Civil Engineer, is a sufficient guarantee of the completeness of the work, and renders further recommendation unnecessary.

Bound in Morocco, Tucks, Gilt Edges. Price, $5.

[From the London Builder, Feb. 10, 1872.]

"This work elucidates some important principles in construction. It is a very valuable little book—a cyclopædia in miniature."



☞ For sale by Booksellers generally.

The Northern Pacific Trade.

The great prize of the world's commerce in future is the control of the Northern Pacific trade and that of its dependencies on both continents. By a glance at a map of Mercator's projection, it will be seen that the continents of Asia and America converge towards the north, till at Behring's Straits they are only forty miles asunder; and as the bulk of the population of both continents is projected far to the north, it is obvious to the most casual observer that in the not remote future the commerce of the Northern Pacific Ocean is to overshadow in its extent and importance all others. The impulse that has been given to the public mind is this direction is chiefly due to the construction of the Union Pacific road, happily for the whole country already completed; and to the Northern Pacific road, now in rapid process of construction, under auspices that will ensure like, if not surpassingly, auspicious results. Few, however, comprehend in the remotest degree even the results that are to flow from the completion of the Northern Pacific road. By this route the two continents are brought about sixteen hundred miles nearer to each other than at any Southern point, and, considering the relative centres of population in each, it is clear to the dullest apprehension that the northerly route is in the end to be the controlling one.

SEVEN-THIRTY GOLD BONDS.

THE NORTHERN PACIFIC 7-30 GOLD BONDS are issued in denominations from $100 to $1,000 Coupon, and $100 to $10,000 Registered, have 30 years to run, bear interest 7.30 per cent. in gold, and are exempt from United States tax to the holder.

They are secured by a First and only Mortgage upon the Railroad, its franchises, earnings, and all the lands and property possessed by the company.

These Bonds are now selling at par and accrued interest in currency, and, with their ample security and high rate of interest, we believe there is no investment accessible to the people which is more profitable or safe. They furnish to the public an investment security which combines the ready negotiability, the convenience and high credit of a first-class Railroad Bond, with the solidity and safety of a Real Estate Mortgage on land worth at least twice the amount loaned.

JAY COOKE & CO.,

New York. Philadelphia & Washington.

☞ JOSEPH U. ORVIS, Esq., formerly President of the Ninth National Bank, and late of the Security Bank of this city, respectfully announces to his friends and the public that, associated with his son HENRY P. ORVIS, he has opened an office at 96 Broadway, under the name of JOSEPH U. ORVIS & Co., for the transaction of a General Banking Business. Stocks, Bonds, Gold, Foreign Money and Exchange bought and sold. Deposits received subject to check. Four per cent. interest paid on balances. Collections made on any part of the United States and Canadas. Prompt attention and quick returns. Commercial paper negotiated accounts solicited, correspondence answered promptly, and personal attention given to business entrusted to them. They are also special agents for 7-30 Northern Pacific Railroad Bonds, and can furnish all other Railroad Bonds at the lowest market price.

Railways in Upper Egypt.

Herapath's Railway Journal, of May 25th, says that a survey for a railway of about 600 miles in length has just been completed, under the direction of Mr. John Fowler, C. E., acting on the directions of the Khedive; the line is to commence at Essouan on the first cataract, and to terminate at Khartoom near the sixth cataract; the junction of the Blue and the White Nile being also in that locality. At Edab, in 18° north latitude the Nile commences a long detour, enclosing a desert. The proposed line will leave the valley near Edab and cross the desert, keeping pretty closely to the camel track. From Khartoom there will probably be extensions hereafter, forking from that point, one line taking Sonaar and the rich valley of the Blue Nile and its tributaries, and the other proceeding to the north-west to Cordogan and Darfur. The portion of the line across the desert will be about 150 miles in length; and other portions of the proposed line will be at distances varying from half a mile to a mile from the river. Mr. Fowler's staff have completed their survey, and are now on their way home. There is no doubt, we hear, that this great project will be executed, to the great advantage of Egypt in the development of its resources and increase of its rapidly-extending commerce.

New Railroads in Massachusetts.

Middlesex county has several railroad projects on the tapis. The railroad from Lowell to Ballardvale is under consideration, the corporation having been organized. The Acton and Nashua road is being built to our State line and perhaps beyond, commencing on the Framingham and Lowell Railroad in Concord. There is a movement to build a new railroad from Boston, through Somerville to Woburn or Stoneham, or perhaps more easterly to Reading. The project is under consideration for extending the Arlington branch through Bedford to Concord and thence to Groton, and perhaps to Ashburnham, there connecting with the Vermont and Massachusetts Railroad, and the Cheshire Railroad. It is reported, also, that our neighbors in Lawrence are about to have a new route to Boston, by building about two miles of new road from just below Tewksbury station to the Lowell and Lawrence Railroad. It will be singular if at the same time Lowell gets a new route to Boston over the Boston and Maine, Lawrence should also get a new route to Boston over the Boston and Lowell Railroad. Both of these projects are said to be

possible, and supported by friends in each city, who will carry out their plans when they have made up their minds to do so.—*Lowell Courier.*

Lake Shore and Michigan Southern Railway.

The company is a consolidation of the following roads:

The Buffalo and State Line Railroad—extending from the city of Buffalo, in the State of New York, westward, to the State line of Pennsylvania.....68 miles.

The Erie and North East Railroad—extending from the State line of Pennsylvania to the city of Erie, in the State of Pennsylvania .....20 miles.

These two roads were consolidated, under the name of the Buffalo and Erie Railroad Company, in the year 1867, in pursuance of laws of the States of New York and Pennsylvania.

The Cleveland, Painesville & Ashtabula Railroad—extending from the city of Erie, in the State of Pennsylvania, to the city of Cleveland in the State of Ohio..... 95 miles.

The Cleveland and Toledo Railroad—extending from the city of Cleveland, in the State of Ohio, to the city of Toledo, in the State of Ohio..... 113 miles.

With a branch (or Northern Division,) extending from Elyria, twenty six miles west of Cleveland, *via* the city of Sandusky, in the State of Ohio, to Millbury, (Junction with Main Line near Toledo)..... 74¼ miles.

These two roads last mentioned were consolidated, under the name of the Lake Shore Railway Company, in March, 1869, pursuant to the laws of the States of Ohio and Pennsylvania.

The Michigan Southern and Northern Indiana Railroad—extending from the city of Toledo, in the State of Ohio, to the city of Chicago, in the State of Illinois .....244 miles.

This road was consolidated with the Lake Shore Railway Company, under the name of the Lake Shore and Michigan Southern Railway Company, in May 1869, pursuant to the laws of Pennsylvania, Ohio, Michigan, Indiana and Illinois.

In August, 1869, the Buffalo and Erie Railroad Company was consolidated with the Lake Shore and Michigan Southern Railway Company, under the name of the Lake Shore and Michigan Southern Railway Company, pursuant to the laws of the States of New York, Pennsylvania, Ohio, Michigan, Indiana and Illinois, thus forming a continuous line of railway, five hundred and forty miles in length, between the cities of Buffalo, in the State of New York, and Chicago, in the State of Illinois.

The company owns branches as follows:

Ashtabula, Ohio, to Jamestown, Pa	36 miles.
Elyria, Ohio, *via* Sandusky, to Millbury, (Junction with Main Line,)	74¼ miles.
Toledo, Ohio, to Elkhart, Indiana, (Air Line,)	133 miles.
Adrian, Michigan, to Jackson, Michigan	46 miles.
Adrian, Michigan, to Monroe, Michigan	33 miles.

The following roads are under separate organizations, but the capital stock thereof is owned wholly by this company:

The Detroit, Monroe and Toledo Railroad—extending from Toledo, in the State of Ohio, to the city of Detroit, in the State of Michigan..... 65 miles.

The Kalamazoo and White Pigeon Railroad—extending from White Pigeon, Michigan, to Kalamazoo, Michigan...37 miles.

The following roads are operated by this company under leases:

The Jamestown and Franklin Railroad—extending from Jamestown, Pennsylvania, (where it connects with the Ashtabula Branch,) to Oil City, Pennsylvania.51 miles.

This company has a large proprietary interest in this road, and operates it under a lease for sixty per cent. of the earnings.

The Kalamazoo, Allegan & Grand Rapids Railroad—extending from Kalamazoo, Michigan, to Grand Rapids, Michigan.68 miles.

The terms of this lease are, the payment of interest on bonds and stock amounting to $103,800 per annum.

That portion of our Main Line, from Toledo, Ohio, to Adrian, Michigan, thirty-three miles, was acquired by a perpetual lease from the Erie and Kalamazoo Railroad Company, by the terms of which this company pays the sum of $30,000 per annum.

The whole number of miles of Railroad owned and leased by this company is one thousand and seventy-four.

The company also has ninety-two miles of double track, between Buffalo and Toledo, and two hundred and fifty nine miles of side tracks.

During the year 1871 the equipment was increased to the extent of forty seven new engines and eleven hundred and fifty-one new cars, of various classes, at a cost of $1,203,747 87.

The authorized capital stock is $50,000,000. Of this sum there was issued to the stockholders of the various companies entering into the consolidation, $35,000 000. Under the provisions of the consolidation agreement, (printed in connection with the Annual Report of 1870, page 41,) a previous vote of the stockholders was necessary to authorize the issue of the remaining $15,000 000.

A meeting of the stockholders was held at the city of Cleveland, Ohio, July 27, 1871, at which, by a vote nearly unanimous, the issue of the $15,000,000 of stock was authorized, and the Board of Directors were empowered to sell and dispose thereof in such manner as they should deem most conducive to the interests of the company.

In pursuance of this authority, the Board of Directors sold to the holders of the common stock, as of October 7, 1871, $14,000,000 at thirty three and one-third per cent. This allowed each common stockholder to purchase forty per cent. of the amount of stock held by him. The terms of the sale were ten per cent. payable November 1, 1871; ten per cent. payable December 1, 1871; the remainder being thirteen and one-third per cent. to be called on thirty days previous notice on or before August 1, 1872. The two called installments amounted to the sum of $2,757,320, of which but $25,582 remains unpaid.

Upon the payment of the thirteen and one-third per cent., not yet called, the capital stock of the company will stand as follows:

Common stock	$49,466,500
Guaranteed (ten per cent.) stock	533,500
Total	$50,000,000

Of the $50,000,000 of stock issued, the sum of $533,500 is claimed to have been guaranteed by the late the Michigan Southern and Northern Indiana Railroad Company, as entitled to dividends at the rate of ten per cent. per annum. A claim is being preferred by holders of a portion of the guaranteed stock for dividends from 1857 to 1868, when the regular payment of dividends was commenced, which claim is controverted.

The claim for back dividends has been released on three thousand five hundred and six shares, leaving one thousand eight hundred and twenty-nine shares unassented.

The bonded debt of the company (not including the debt of the Detroit, Monroe and Toledo Railroad Company, and the Kalamazoo and White Pigeon Railroad Company, the stock of both of

which roads is owned by this company) amounts to $24,909,000.

The annual charge for interest on this debt is $1,743,630.

Of this debt fourteen classes of bonds are secured by mortgages on distinct portions of the several roads entering into the consolidation.

On July 1, 7871, the company executed a consolidated mortgage, (a copy of which is hereto appended,) with a provision for a sinking fund to secure the payment of bonds registered and coupon, to the amount of $25,000 000, bearing interest at the rate of seven per cent. per annum.

The interest on the registered bonds is payable quarterly (January, April, July and October), and on the coupon bonds semi-annually (January and July), both at the office of the Union Trust Company of New York.

Of the bonds secured by this mortgage, a sufficient amount has been set apart to secure the payment of the bonded debt at maturity, and the proceeds of the residue have been appropriated to the double tracking of the Main Line, and to the procurement of additional equipment.

The earnings from freight, compared with 1870, show an increase of $1,492,691 12, or, seventeen and one-fourth per cent.; but we moved an increased tonnage of twenty-six and one-half per cent., or seven hundred and seventy nine thousand six hundred and fifty-one tons.

During the last six months of 1871 a ruinous competition existed on westward bound freights between the Trunk Lines, (the Pennsylvania Railroad, the Erie Railway and the New York Central and Hudson River Railroad), in the course of which the prices of freight transportation were reduced to a point almost without precedent.

By the arrangements between this company and the seaboard Trunk Lines, the rates on westward bound freights are made by the latter.

This company, from its relation to the several Trunk Lines, was compelled either to submit to a most extraordinary reduction of rates or to abandon the traffic. The first alternative was accepted, as a matter of sound policy in the interests of the stockholders of this company.

It may be well in this connection to state that, while we moved an increased westward bound tonnage of twenty-nine per cent., (equal to two hundred and seventy thousand and ninety-five tons, and equivalent to twenty-seven thousand car loads, or one thousand entire freight trains), in 1871 over 1870, the gross earnings therefrom exhibit a decrease of $60,503 90.

On eastward bound freights, on this road, the rates were maintained in 1871 at the figures of 1870.

We carried an increased tonnage in 1871 over 1870 of five hundred and nine thousand five hundred and fifty six tons, being twenty-five and one-half per cent., and we received an increased earning from that source of $1,529,566 19, being twenty-seven and one-half per cent.

The average rate per ton per mile on all freights carried was:

In 1871	1.39 Cents.
In 1870	1.50 "
Decrease	.11 "

This fraction of eleven one-hundreths of one cent per ton per mile caused a diminished earning of $800 000, or over two per cent. upon our capital stock in 1871. This $800,000, being a loss of net earnings, carried the per centage of operating expenses from sixty-three to sixty-six per cent.

We congratulate the stockholders upon the fact that reasonable rates are now being maintained on westward bound freights, and that our earnings for the months of January, February and March, 1872, show an increase of gross receipts of $635,000.

We have reason to hope that better counsels will prevail, and that our eastward Trunk Line connections will hereafter be slow to renew the warfare which worked such disastrous results, to them as well as to ourselves, in 1871.

Our passenger traffic for 1871 as compared with 1870 shows a diminution of $203,638 28. This diminution is about equal on local and through business. The rates for passenger transportation have been maintained, but the movement of passengers has been diminished, and the fact is believed to be the same as to all the great Railroad lines of the country.

This diminution of passenger earnings, there being none in the expense of train service, further explains the increased per centage of operating expenses in 1871 over 1870.

The earnings from other sources than freight and passenger transportation show an increase in 1871 over 1870 of $51,381 37.

Great progress was made in 1871 in the work of constructing the double track between Buffalo and Toledo. The reconstruction of the Northern Division of the late Cleveland and Toledo Railroad (from Elyria, Ohio, to the Junction with the Main Line at Millbury, near Toledo, via the city of Sandusky,) has also been vigorously prosecuted.

On the first of January, 1872, we had in operation ninety two miles of double track, exclusive of the Northern Division. For account of this construction there was expended in 1871 the sum of $828,319 19. It is expected that the entire double track between Buffalo and Toledo will be fully completed in 1872. The Northern Division, seventy-four and one half miles, is now completed and in operation. The unusual severity of the winter has, in some measure, delayed this work. There was expended in reconstruction of the Northern Division in 1871 the sum of $632,734 22. But little remains to be done on that Division beyond the construction of several station houses between Sandusky and Toledo, and the requisite fencing.

In the years 1865-6, the Cleveland, Painesville and Ashtabula Railroad Company commenced the construction of a branch Railroad, extending from Ashtabula, Ohio, to Jamestown, Pennsylvania—thirty-six miles. Upon this work the sum of $364,000 had been expended prior to 1869, and for some reasons, not now essential to be stated, the further prosecution of the work was suspended. During the year 1871 the work was resumed and the line is just completed and ready for operation. This secures, in connection with the Jamestown and Franklin branch, a direct line of our own, extending from our main line at Ashtabula, Ohio, eighty-seven miles, to Oil City, Pennsylvania.

There was expended on the Ashtabula branch in 1871 the sum of $573,097 18. A new and large traffic will be secured to this Company by the completion of this line.

During the year 1871 very considerable additions have been made to the machine shops at Elkhart, Indiana. There was expended, in 1871, in new construction in connection with these shops, and in the erection of other new structures on the line, the sum of $269,387 05.

The Elkhart shops are now complete and are acknowledged to be equal to the best establishments of their description in the country. A great saving of expenditure and largely increased facilities for the transaction of the business has resulted from their construction.

In addition to the items of construction, previously mentioned, there has been expended on construction account, in 1871, as follows, viz;

Substituting stone structures for wooden bridges and culverts	$651,833 36
For additional side tracks, 23 miles	233,795 91
Real estate purchased, iron bridges and other miscellaneous construction	154,216 79

It is the policy of the Company, as far as practicable, as rapidly as the track requires renewal, to substitute steel rails on those portions of the road carrying a heavy traffic. Four thousand tons of steel rail were used in repairs in 1871.

We have now in operation eighty miles of track laid with steel rail, and have contracted for the purchase of a sufficient amount of steel rail to lay two hundred miles in addition, in 1872.

The steel rail used in repairs in 1871 has been charged to operating expenses, and has contributed to their increased per centage.

The great fire at Chicago, in October, 1871, resulted in considerable interference with our business, and subjected us to losses and expenses which have also largely contributed to the increased per centage of operating expenses. In addition it destroyed the valuable Passenger Depot at Chicago, owned conjointly by this Company and the Chicago, Rock Island and Pacific Railroad Company, and the Pacific Hotel, in which we had an interest amounting to $125,000. The losses resulting from the derangement of our business, from the destruction of baggage and freight, and from the aid which the circumstances required us to render in transportation of sufferers, and of supplies for the relief of the thousand rendered homeless and helpless by that extraordinary catastrophe, have been charged to operating expenses, and, in conjunction with other facts herein before referred to, have contributed to the increase of their per centage.

Aside from this class of losses, which cannot be conveniently specified, we estimate our actual and ascertained pecuniary loss directly resulting from the Chicago fire at $325,000.

The plans for the reconstruction of the Passenger Depot have been completed and the work will be immediately commenced. The foundations, filling, sewerage, &c., of the depot are unharmed, and it is believed that the building can be replaced in better state than before for about $350,000. The Chicago, Rock Island and Pacific Railroad Company contribute one half of the cost of this reconstruction.

The Cincinnati and Springfield Railway Company have completed the construction of their Railroad from the city of Dayton to the city of Cincinnati, and it is expected that it will be ready for operation in the month of May next.

In conjunction with the Cleveland, Columbus, Cincinnati and Indianapolis Railroad Company we rendered the aid to that enterprise authorized by the vote of the stockholders of this Company. We have no doubt that the advantages to this Company and its business, which the construction of that Road promised, will be fully realized.

The construction of the Lake Shore and Tuscarawas Valley Railway, extending from Elyria southwardly through the Tuscarawas coal fields towards the Ohio river, was commenced during the year 1871, and is now in operation forty miles south of Grafton.

Favorable traffic arrangements have been made with that Company which cannot fail to result in a large increase of business, and in reducing the cost of our coal supply.

The construction of the Mahoning Coal Railroad, extending from Andover, on our Ashtabula branch, to Youngstown, Ohio, has also been commenced, and a new and large traffic will flow from that Road upon our Ashtabula Branch and upon our main line. Satisfactory arrangements for the interchange of business have also been made with this Company.

The Dunkirk, Warren and Pittsburgh Railroad, extending from Dunkirk, N. Y., to Warren, Pa., was completed and opened for traffic in 1871, and it has become a valuable and friendly connection.

Several other railroad enterprises connected with our system are fast approaching consummation, and give assurance of a large increase of business for our line.

The increased facilities afforded by the double track, and by the additional equipment already secured, are contributing to an increase of earnings unexpectedly large. We have no reason to doubt that the year 1872 will witness the further development of the great resources of our Line, and give renewed assurance of the permanent and substantial value of the property.

The number of engines on the road December 31, 1871, was 346. Miles run by engines, 10,178,603. Cost per mile run, 6.08 cents. The cars are classified as follows: first-class passenger 118,

second class and smoking 14, emigrant 29, railroad postal 7, baggage and postal 10, baggage 47, directors' 2, paymsters' 2, box freight 4,042, stock and oil 1,115, platform 1,466, coal 436, caboose, derrick and dumper 262.

Tons of through and way eastward bound freight, 2,516,827; do., westward, 1,208,598—total freight movement, 3,725,425. Tons carried one mile eastward, 524,143,071; do., westward, 196,515,742—total, 720,658,813.

Number of through passengers carried, (between Buffalo and Chicago only)1st class, 54,259; 2d class, 9,094; 3d class, 4,550—total, 67,883. Way passengers, 1st class, 1,832,256; 2d class, 24,212; 3d class, 18,811—total, 1,875,279. Total through and way, 1,943,162. Passengers carried westward, 1,004,700; do., eastward, 938,462. Miles traveled by through passengers, 36,656,820; do., way passengers, 104,918,246—total mileage of passengers, 141,575,066.

Tons of eastward bound freight carried on the Jamestown and Franklin Railroad, 63,874; do. westward, 247,274—total, 311,148. Tons carried one mile, 13,011,883. Through passengers carried, 6,280; way do., 96,896—total, 103,266. Total mileage of passengers, 1,629,841.

Auditor.—C. P. LELAND.

General Manager.—J. H. DEVEREUX.

Gen'l Superintendent.—CHARLES PAINE.

☞ The Philadelphia *Ledger* of 3d inst., reports the net anthracite coal tonnage for the week ending on the 25th ult., from all sources, at 420,009 tons, and for the year 6,691,828 tons, against 2,351,485 tons to the same date last year, being an increase in the tonnage of anthracite coal of 4,340,343 tons. The production of bituminous coal for the week was 61,905 tons, and for the year 854,254 tons, against 772,912 tons to the corresponding time last year—an increase of 81,342 tons. The total production of all kinds of coal for the week was 490,014 tons, and for the year 7,546,082 tons, against 3,124,397 tons to corresponding time last year, showing an increase of 4,421,685 tons.

☞ The Georgia Western Railroad Company have contracted with Messrs. Grant, Alexander & Co., for the graduation, clearing and grubbing of the entire track from Atlanta to the Alabama Line—a distance of about 70 miles. The work will be commenced without delay, and will be continued without cessation until the road bed is ready for the cross ties and rails.

☞ President S. G. Boyd, of the Peach Bottom Railway Company, advertises for proposals for the graduation and masonry of the western division of the road, extending from the Northern Central Railway to the Susquehanna river.

The St. Joseph Bridge.

AN ACT to amend an act entitled "An act to authorize the construction of a bridge across the Missouri river at or near St. Joseph, Missouri," approved March fifth, eighteen hundred and seventy-two.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first section of the act entitled "An act to authorize the construction of a bridge across the Missouri river at or near St. Joseph, Missouri," approved March fifth, eighteen hundred and seventy-two, be, and the same is hereby, amended so as to read as follows: Section 1. That it shall be lawful for the St. Joseph Bridge Building Company, a corporation organized for that purpose under the general corporation laws of the State of Missouri, or its assigns, to construct a bridge across the Missouri river at or near St. Joseph, Missouri, and to lay on and over said bridge railway tracks for the more perfect connection of any and all railways that are now, or which may hereafter be, constructed to the Missouri river at or near St. Joseph, or to the river on the opposite side of the same, near St. Joseph, and build, erect, and lay on and over said bridge ways for wagons, vehicles of all kinds, and for the transit of animals, and to provide ways for foot passengers, and to keep up, maintain, and operate said bridge for the purposes aforesaid; and that when said bridge is constructed, all trains of all railroads terminating at said river, and on the opposite side thereof, at or near St. Joseph, Missouri, shall be allowed to cross said bridge for reasonable compensation, to be made to the owners of the same, under the limitations and conditions hereafter named. The owners of said bridge may also charge and receive reasonable compensation or tolls for the transit over the said bridge of all wagons, carriages, vehicles, animals, and foot passengers.

Section 2. That the fifth section of the act of which this is amendatory be and the same is hereby amended so as to read as follows: Section 5. That the St. Joseph Bridge Building Company, after the passage of this act, shall not have the right to assign the charter which said company now holds by assignment from the St. Louis and Denver City Railroad Company, and which was granted to said last named company by virtue of an act of Congress, approved July fourteenth, eighteen hundred and seventy, to any other company, person or persons; nor shall said bridge building company be permitted, under the said charter so obtained as aforesaid from the St. Joseph and Denver City Railroad Company to construct any other bridge than the one now being constructed at St. Joseph, Missouri: *Provided however,* That nothing in this section contained shall prevent the said bridge building company from mortgaging said charter and franchises held by it by assignment from the said railroad company, with the bridge constructed or to be constructed thereunder, in the manner and for the purposes to and for which the said bridge building company is or may be authorized by or under the laws of the State of Missouri to mortgage its property.

Approved May 1, 1872.

☞ The citizens of Wheeling, W. Va., have voted, by large majorities, to authorize: first, a subscription by the city of $300,000 to the capital stock of the Wheeling and Lake Erie Railway Company; second, a subscription by the city of $300,000 to the capital stock of the Wheeling and Ohio Union Railway Company (Bridge); third, a subscription by the county of $100,000 to the capital stock of the latter company.

☞ The Utah Southern Railroad is designed to reach the south end of Great Salt Lake, 75 miles from Salt Lake City. The portion already in operation is doing a good business especially in freight.

Horse or Street Railroads of the State of New York.

A tabular statement of their length and Cost, Stocks, Bonds, and Debts, and Earnings, Expenses and Dividends for the year ending September 30, 1871.

American Railroad Journal.

Saturday, June 8, 1872.

Stock Exchange and Money Market.

The offerings of Money have been gaining on the demand for accommodation, giving borrowers the advantage as to rates, which have been quoted at from 5@7, generally 6@7 per cent. on call, and 6@8 per cent. per annum, in the discount line. The inquiry for aid, from speculative sources, has been less urgent, especially in view of the tamer movement at the Stock and Gold Boards. There has been a freer currency for strictly prime to good commercial paper within our quoted range. The city banks have added largely to the reserve of legal tender notes, and have also enlarged their specie average. Their deposit line has been materially increased. The loan and discount item shows a considerable addition. The U. S. Sub-Treasury office reduced its coin balance nearly 3½ millions and enlarged its currency nearly a fourth of a million. The city banks added to their loan and discount average nearly 1⅛ millions during the week, and again reduced their outstanding circulation slightly. The U. S. Sub-Treasury held a currency balance at the close of business on Tuesday of $4,749,301, and a coin reserve of $51,786,365.

The city banks, in their latest return, show an increase of $2,173,400 of legal tender notes, $560,200 of specie, and $3,616,100 of deposits, with an addition of $1,073,700 to their loan and discount averages, and a reduction of $23,300 in their item of circulation. The city bank exchanges, last week, averaged 104½, and thus far, this week, about 123½ millions daily. The banks now hold $11,650,525 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $21,268,800, against $13,789,880 same time last year. The city bank deposits are now $226,070,900 against $241,383,519, week ending June 3, 1871. The legal tender reserve amounts to $53,780,500, against $70,900,838 same time last year. The circulation now stands at $27,522,000 against $30,968,723 same time last year. The loans are now $284,674,800 against $291,802,148 at this date last year.

The coin reserve of the city banks is now about 21¼ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 53¾ millions against $46,616,000 on the statement of February 10th.

The U. S. Sub-Treasury added to its currency balance $246,287, and reduced its coin reserve $3,453,515 as the result of the week's business. The receipts of the office were $2,295,768 in coin, and $7,013,731 in currency; payments, $5,749,283 in coin, and $6,767,444 in currency. The office received $1,739,000 in coin or its equivalent, from customs; and disbursed $260,112, of coin interest. The receipts of the office in May were $64,117,619, including $11,436,504 from customs; the payments were $80,252,413, including $12,077,882 of coin interest on the public debt.

Government revenues yielded moderately in the line of excises, during the week, but were much lighter, in the customs form. The excises yielded within the week about 2¾ millions, and thus far since July 1, 1871, $118,899,678. The customs at the port of New York last week were $1,562,427; at the outports, equal to about $550,000 all in coin, or coin certificates.

The Secretary of the Treasury has directed the assistant treasurer at New York to withdraw $1,300 000 of three per cents, being those of the denomination of $5,000, numbering from 3,811 to 3,856, inclusive, and those of $10,000, numbering from 3,952 to 4,150, inclusive, dated from August 1, 1864, to August 15, 1868. The interest is to cease July 31, 1872. Assistant Treasurer Hillhouse has accordingly given formal public notice that the notes will be paid on presentation at his office.

Under the June programme of the Treasury Department, Government proposes to sell at New York eight millions of Gold, as follows: Thursday, June 6—Two Millions. Thursday, June 13—Two Millions. Thursday, June 20—Two Millions. Thursday, June 27—Two Millions. And to buy in at least eight millions of bonds as follows: Wednesday, June 5—Two Millions. Wednesday, June 12—Two Millions. Wednesday, June 19—Two Millions. Wednesday, June 26—Two Millions.

The specie export on Tuesday of this week was $312,000; and on Wednesday $1,497,891.

Gold has been in fairly active demand, chiefly

on speculative account and for export purposes, at firmer prices. The customs drain has been quite moderate.

The range of the price during the week has been from 113¾@111⅝ and the closing quotation on Wednesday was 114⅝ against 114⅛ the preceding Wednesday. The specie outflow, last week, was $4,243,064. The Gold Exchange Bank clearances have averaged about 31⅜ millions per day during the week.

The customs demand for Gold last week, averaged $289,834 a day; thus far, this week, it has averaged $297,500 a day, or equal to a weekly aggregate of $1,785,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $21,957, and since Jan. 1, 1872, $706,126, against $3,048,880 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, has been $146,414,424 against $137,779,659 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to June 1, 1872, $74,938,455, against $84,014,789 same time in 1870-'71.

The export drain of specie was $4,243,064 last week, against $2,038,500 same week preceding year. The shipments since July 1, 1871, have been $49,725,796 against $75,691,673 same time in 1870-'71.

Foreign Exchange has been quoted stronger, on a moderate offering and fair inquiry for prime bills. Bankers' sixty day bills on London closed on Wednesday at 109⅝@109⅞; sight bills on London, 110½@110⅝.

The produce exports from this port, week ending with June 4, were to the currency value of $3,831,742.

The outstanding circulation of United States currency on the 1st inst. was $400,725,816 in all forms.

Government securities have been decidedly stronger in price, on limited offerings of bonds of the favorite issues, and a more confident investment inquiry. The public debt statement for June 1, shows a further liquidation of $4,226,062 in May. On Wednesday, Government bought in $825,950 of Five-Twenties at 114 30@114 49 out of an aggregate offering of only $1,360,450.

U. S. sixes of 1881 closed here on Wednesday of the current week at 120¼@120½; U. S. Five-Twenties of 1862, (other than the bonds called in) ex May coupon 114⅞@115; U. S. Five-Twenties of 1864 at 114⅞@115; U. S. Five-Twenties of 1865, 115⅝@115⅞; U. S. Five-Twenties of 1865 consolidated, 117¼@117⅜; U. S. Five Twenties of 1867, 117⅞@118; U. S. Five-Twenties of 1868, 117¾@118 U. S. Ten-forties at 112⅝@112⅞; U. S. Fives of 1881 (Funding Loan) 113¼@113½; six per cent. currency bonds, 114⅝@117⅞.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	May 22.	May 29.	June 5.
Consols	93¼	93⅝	92½

" 10-40s	89½	89¾	89½
New Fives of 1881...	89⅞	——	89¾
Erie.	——	——	50⅛

State bonds have been in less confident demand closing heavily as to price, particularly in the instances of Southern State obligations.

The better class of Railway mortgages have been in good request for investment purposes at rising prices for the older issues, which have been quite scarce. The inquiry for Central Pacific Sixes has been moderate at the advanced figure of 105@105¼; The very favorable exhibit for May of the earnings of the road tended to stimulate purchase of the bonds. Chesapeake and Ohio have been more sought after at 94 per cent. and accrued interest.

The Central Pacific Railroad earned $1,221,625 in May, against $892,341 in May 1871, showing an increase of $329,284 in May this year. The earnings of the road for the first five months of the current year were $4,212,647 against $3,249,706 same time last year, and $2,698,090, in the corresponding period of 1870.

Railway and Miscellaneous share property, has been moderately active, with prices quoted irregular, closing less buoyantly.

In the Metal line, there has been a moderate business reported in Ingot Copper at easier prices; sales 600,000 lbs. at 33c., cash, and 33c.@33½c. for forward delivery. Pig Iron has been held with more firmness, but has been quiet, with Glengarnock, quoted at $50, here, and $48@49, to arrive, and American as before. Iron Rails steady, but not active. Lead, Spelter and Zinc, dull at old quotations. Pig-Tin dull, and weak at 37½c. @38c., gold, for Straits, on increasing offerings. Tin Plates very quiet, and tending downward: sales, 500 boxes Charcoal Plates at $13 25, gold, and 500 boxes Charcoal Terne at $11 75, gold, per box.

General business has been on a restricted scale in most kinds of domestic produce. Breadstuffs, and Provisions favored buyers. Naval Stores, lower. Middling upland cotton closed on Wednesday at 27¼ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,626,211 bales, against 3,792,230 bales same time in the preceding year; exports 1,864,418 bales against 2,945,476 bales in the previous year; stock at the ports at latest dates, 206,869 bales against 392,717 bales same date 1871.

At the Live Stock Markets, Beeves have been in fair demand at 10@13½ cts.; Veals at 5¾@8¾ cts.; Sheep in less request at 6@8¼; Lambs 10@14 cts.; Swine, at 4⅝@4⅞ cts. per lb., all live weight. The week's receipts were 8,033 Beeves, 2,074 Veal Calves, 19,740 Sheep and Lambs; and 48,936 Swine.

Trade in foreign goods, has been quite tame, with values quoted less firm. The week's imports of foreign goods reached the amount of $12,235,782 including $2,423,108 of dry goods.

Ocean freights have been quite active, and rates have been quoted higher, especially for Grain, and Provisions on a restricted supply for room.

At the meeting of the directors of the Baltimore and Ohio Railroad Company, held on the 18th ultimo, it was resolved, upon authority granted by Acts of the Legislatures of Maryland, West Virginia and Pennsylvania, to issue bonds, negotiable in Great Britain, for a loan amounting to two million pounds sterling, or nearly $10,000,000 United States money. The bonds are to be in sums of $100 each, and to bear 6 per cent. interest from March 1st, 1872, and are payable in twenty years after that date, the interests to be paid semi-annually. The entire line of road of the Baltimore and Ohio Company, from Baltimore to Wheeling, including branches, is mortgaged for payment of the bonds, and Messrs. John W. Garrett and Johns Hopkins, of Baltimore, and James Tinker, of New York, are named as trustees.

A similar mortgage, for one million pounds sterling, or nearly $5,000,000 United States money, is given by the Pittsburg and Connellsville Railroad Company, and names Messrs. Robert T. Baldwin, Charles J. Baker and William Keyser, trustees. This loan is to be in 5,000 bonds, of $1,000 each, payable in thirty years, from the 13th day of April, 1872, with 6 per cent. interest, payable semi-annually, same as above. The amount of $5,000,000 hereby provided for is made up of $2,000,000 due the city of Baltimore, $1,000,000 due the Baltimore and Ohio Railroad Company, while the remaining $2,000,000, which is the only really new loan, is to be used in laying double track, extending the equip-ment, etc., on the road.

The National Gold Bank and Trust Company of San Francisco has been authorized to commence business with a capital of one million dollars.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

HARVEY FISK. A. S. HATCH.

☞ FISK & HATCH, Bankers,
No. 5 Nassau-st., New York.

The **CHESAPEAKE AND OHIO RAILROAD,** connecting tide-water ports with the principal cities of the Western States, is now nearly completed and will soon be in thorough operation as one of the great Trunk lines of the country.

Among the *New York Directors of the Company* are

A. A. Low, Wm. H. Aspinwall,
David Stewart, Jonas G. Clark.
President, C. P. HUNTINGTON.

Trustees for the Bondholders,
Wm. Butler Duncan,
Philo C. Calhoun.

We have for sale on behalf of the Company, the remainder of their **SIX PER CENT. BONDS,** secured by mortgage on the whole railroad line, equipment, franchises, &c, worth $30,000,000. Principal redeemable, in coin, 1899; interest payable also in Gold, May and November. Denominations $1,000, $500, and $100, Coupon or Registered. Price, 94 and accrued interest. Full information furnished on application.

We buy and sell Government Bonds and the Bonds of the Central Pacific Railroad Company, receive deposits, and allow interest on balances, make collections, issue certificates of deposit, and do a general banking business.

FISK & HATCH.

THE
St. Joseph & Denver City
RAILROAD COMPANY'S
First Mortgage Bonds

are being absorbed by an increasing demand for them.

Secured as they are by a first mortgage on the Road, Land Grant, Franchise and Equipments, combined in one mortgage, they command at once a ready market.

A Liberal Sinking Fund provided in the Mortgage Deed must advance the price upon the closing of the loan. Principal and interest payable in *gold*. Interest at eight (8) per cent. per annum. Payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000, $500 and $100, Coupon or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and rust Company of New York.

Can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.,
BANKERS,
NO. 11 WALL STREET.

☞ The estimated earnings of the Erie Railway for the week ending May 31, 1872, were $436,099; against $374,208 for the corresponding period of 1871—an increase of $61,891. Total earnings since April 1, 1872, $3,325,809—an increase over the same time in 1871 of $628,482.

☞ Geo. W. Cram, of Norwalk, Conn., has taken the contract for building the Peterboro' Railroad of New Hampshire, and will receive proposals at Wilton, N. H., for the graduation, rock work, etc., on the same.

☞ The Erie Railway Company has declared a dividend from the earnings of the road for the current six months of 3½ per cent on the preferred stock, payable July 15.

☞ W. Bailey Lang & Co., 54 Cliff St., this city, have for sale Rails of superior quality made by the Park Gate Iron Co., of Rotherham, Eng.

☞ The Panama Railroad Company will pay a dividend of 2½ per cent. July 1, out of the earnings of the past three months.

☞ D. W. Parker has been elected Superintendent of the Iowa Division of the Illinois Central railroad, in place of J. P. Farley, resigned.

The Coal and Iron Resources of Virginia.

The great Alleghany coal field is beyond all comparison the richest in the world. It consists of the mountain range between the Mississippi Valley and the Atlantic coast, and following the configuration of our continent almost due north and south. It comprises an area of 55,000 square miles, equal to the entire territorial extent of the States of New York and New Jersey. It extends along the Alleghany mountains, through the States of Pennsylvania, Ohio, Maryland, Virginia, West Virginia, Kentucky, Tennessee, Georgia and Alabama. The coal seams are of varying richness and extent in these States, but those included in Virginia and West Virginia, though only one third of the whole, surpass all the others in value and importance. Scientific research shows that the coal supply of England is limited, and that at the ratio of consumption of the last fifty years, they must be exhausted within a couple of hundred years. But it is calculated that the coal and iron fields of the Virginias alone can supply all the demands of our entire continent, and with a population increased a hundred fold, through all generations. The supply is apparently limited to the capacity of man to develop and realize the incalculable wealth that nature has stored up for his comfort and enjoyment.

To add to the value and importance of this inexhaustible supply of commodities that are of all others the most necessary and conducive to civilization and progress, the richest and most valuable portion of it is so situated as to be the most accessible in the world. The solid mountain of coal is cleft from its summit to its base, and all rich seams varying from two to fourteen feet in extent are disclosed and opened to human industry. Nor is this all. The bases of these seams are washed by navigable streams which afford a natural means for the transportation of the mineral treasures that stand revealed in the strata, which are above the surface level of the earth in place of being miles below it as in England. On a very moderate estimate it is calculated that in the comparatively small belt washed by the Great Kanawha river and its tributaries—the Gauley, New River, Elk and Coal rivers—there is a supply of thirty-four thousand millions of tons above the water level. This magnificent coal belt, undoubtedly the richest in the world, is divided diagonally and almost in two equal parts so as to be equally open to the markets of the Mississippi valley and the Atlantic seaboard.

The coal of the Kanawha Valley consists of three kinds known to commerce—Cannel, Splint and Bituminous. Of these the Cannel is equal to the best Scotch Cannel, and is so rich in mineral oils that it yields sixty gallons to the ton and it only costs $2 50 per ton to mine the coal and extract the oil, which at, say, 10 cents per gallon would yield a profit of $3 50 for an outlay of only $2 50. These figures show that the business of extracting oil is destined to become an important branch of industry in the Kanawha district. The Bituminous coal is equal to the best found in Pennsylvania; and the Splint coal is especially valuable for iron smelting on account of its freedom from sulphur and other impurities. What is of especial importance is the fact that this coal is situated centrally to the great natural highways of commerce in our country, and is almost equally accessible to all the great places of consumption. The coal supply in the Kanawha division of the great Alleghany coal bed is ten times larger than the entire coal fields of Great Britain.

But if Virginia has the best, richest, and most easily accessible coal fields in the world, it has also in immediate proximity the richest iron beds on the continent. On the eastern edge of the great Alleghany coal range there is an inexhaustible supply of iron ore, lying like the coal fields, within the area of water transportation. These ores are a continuation of the formation that constitute the chief iron-producing regions in Pennsylvania, New York, Lake Superior, Iron Mountain, and Pilot Knob in Missouri, and extend along the Blue Ridge from Harper's Ferry to Bristol. The oxides are unsurpassed in richness and quality, and are singularly free from impurities. The New River, which constitutes the chief source of the Great Kanawha cuts through successive ranges of these mineral deposits, and renders them as accessible as the coal ranges to human industry. Of course the seams are of variable quality and quantity; but it is an important fact that the richest of them—yielding 60 per cent of metal in the furnace—are on the surface. For fifty miles the New River runs through a limestone country, abounding in iron and lead. In fine, for richness, variety and economy of production and transportation, the coal and iron beds of Virginia and West Virginia must be regarded as the most valuable in the world.

It will be seen that the proximity of the coal and iron fields and their perfect accessibility by means of railroad and water communications constitute advantages which must in due time render Virginia and West Virginia the centre of a vast manufacturing industry. The future great iron furnaces of our continent will be located in the Kanawha valley. Their establishment must exercise an important influence on the future of the State. Heretofore, these treasures have been virtually sealed both to Virginia and the world. But the completion of the Chesapeake and Ohio Railroad, a few months hence, will open them to the millions of consumers both in the East and West. This railroad penetrates the richest mineral regions in the Virginias. It follows the passage way which nature herself has made between the Ohio valley and the Atlantic. The New River seems to plunge madly into the very heart of the iron mountains, and literally forces its way for itself through the solid rocks. On either side of the mad foaming torrent the tall mountains rise almost perpendicularly in grandeur to the skies. In the clefts of these mountains and just above the foaming torrent within reach of its spray, a passage is cut for the Chesapeake and Ohio Railroad. In some places the grading affords the grandest triumphs of engineering science on our continent, and presents another remarkable evidence of the human genius and perseverance that seem to conquer impossibilities. The Chesapeake and Ohio passes through a region heretofore regarded as inaccessible, and brings within reach of human needs the stores that have been treasured through all time in the most valuable mineral deposits on our continent.—*Daily Bulletin.*

The Production of Iron.

We give below the admirable address of Mr. ABRAM S. HEWITT delivered at the quarterly meeting of the American Institute of Mining Engineers recently held in this city:

Mr. President and Fellow Members of the American Institute of Mining Engineers:—To me is assigned the honor of bidding you welcome to the City of New York, on this, the occasion of our first annual meeting, and I am sure that you will find yourselves made welcome by all who have the honor and prosperity of the city at heart. For New York, although far from being the cherished home of science and art, comprehends that its growth and its future greatness depends upon the development of the natural resources of the country of which it is the commercial metropolis; and it is sufficiently enlightened to understand the necessity of scientific knowledge and trained experience for the attainment of the most useful and profitable results from industral enterprise. No body of men can understand better than you that capital is essential to the development of natural resources on the scale demanded by modern civilization; but capital does not always comprehend as fully that science and experience are essential for the profitable use of money in the vast industrial undertakings of our day, and hence result great waste of resources and disastrous failures. A few considerations may serve to shed some light on this subject, of such material consequence to science and capital, and at the risk of overstepping the conventional limits of a formal welcome, I venture briefly to suggest them as the means of establishing a common ground of sympathy and fellowship between the men of science and the men of business, and I am sure that you will pardon me if I draw my illustrations from that subject with which I am most familiar—the production of iron.

THE DEVELOPMENT OF IRON MANUFACTURE.

In 1856 I had occasion to trace the history of the manufacture of iron, and established what may be termed its law of development, rather rude indeed, but plainly dependent upon the growth of population and the spread of civilization throughout the world. At that time the annual production of iron had reached about 7,000,000 tons, of which Great Britain produced 3,500,000 tons, and the United States about 1,000,000 tons. The consumption of Great Britain was 144 pounds, and of the United States 84 pounds, while the average consumption of the world was only 17 pounds, per head, of population. It was shown that the consumption per head was steadily on the increase, and that consequently the annual production was enlarging so rapidly as to double once in 14 years; and it was predicted after making due allowances for all drawbacks, such as the wars which have unhappily taken place in the interval beyond any possible expectation, that in 1875 the production of iron would surely reach 14,000,000 tons. The actual returns show that in 1871 the production amounted to 13,500,000 tons, and in 1872, the limit 14,000,000 will undoubtedly be passed, so that the estimate made in 1856 is more than realized. Meanwhile the consumption has risen in England to 200 pounds, in the United States to 150 pounds, and in the whole world to 30 pounds per head. It is not possible to convey a more striking idea of the progress of the world, during the last 17 years, than this statement affords. The consumption of iron measures the progress of civilization, and it is impossible not to believe that the whole world will ultimately require as much iron per head as we now use in the United States, when a total annual production of over 70,000,000 tons will be required. But if these figures seem to be at all wild, no one can for a moment doubt that the next 17 years will double the present annual production of iron; bringing it up to 28,000,000 tons per annum; and I feel quite safe in asserting that the beginning of the 20th century, which some among you may hope to see, will witness an annual production of over 40,000,000 tons.

BRITISH IRON.

You need not be told that iron is produced at less money cost in Great Britain than in any other quarter of the globe. This has enabled her to produce about one half of the total annual make. Of the 7,000,000 tons made in 1855, Great Britain produced 3,585,906 tons, and of the 13,500,000 tons produced last year, she turned out nearly 7,000,000 tons. It is evident, however, that there are limits in the way of raw material and labor, beyond which Great Britain cannot go. While I see no reason to doubt that there will be a steady increase in production, it is evident that she will not be able to supply hereafter, as heretofore, so much as half the annual wants of the world for iron. But allowing this proportion to Great Britain, there will still remain 14,000,000 tons to be made by the rest of the world. The history of the trade, as well as the natural resources of the several nationalities, prove that the bulk of this additional product can only be made in the United States. We are in fact the only people who have kept pace with Great Britain in the ratio of increase. In 1855, when Great Britain produced 3,500,000 tons we produced 1,000,000 tons. In 1872, when Great Britain will produce 7,000,000 of tons, we produce 2,000,000 tons—the quantity produced in Great Britain in 1847, showing that we are only 25 years in arrear of her magnificent production. At the same rate, therefore, we could make 7,000,000 tons in 1897. But as Great Britain cannot possibly maintain her rate of increase, there does not seem room for a doubt that our annual production will reach at last 10,000,000 and will probably amount to 15,000,000 tons before the close of the present

century. This means that 25,000,000 to 40,000,000 tons of iron ore shall be annually extracted from our mines, and that our coal production will exceed 100,000,000 tons per annum, required for iron and other branches of industry. It means that an investment of capital to the amount of $500,000,000 at least, and probably $1,000,000,000 shall be made in opening mines, erecting works, and supplying the requisite machinery of production. New York is already the financial centre of the American Continent, and is destined to be the main distributor of capital for the world. This vast sum of money will therefore be drawn from the accumulations of capital controlled in New York and its productive results will depend mainly upon the judgment and skill displayed in its expenditure. Here then is the common ground on which capital and science must meet and shake hands, and be henceforth inseparable friends. But if it be the mission of science thus to reconcile capital with industry, it is the still higher and nobler mission of science to reconcile industry with capital. The world is full of the conflict between capital and labor. Where there should be peace there is war. Where nature intended an absolute harmony there is utter discord. For one, I am free to say, after the most careful investigation, and very extensive observation, that iron has heretofore been made at too low a cost in foreign countries to allow the workmen engaged in its production a fair share of the necessaries and comforts of life. This is due to the fact that the possession of virgin resources in coal and iron made it easy to increase production beyond the present wants of society. The resulting competition has had the effect to reduce prices to so low a point that proper wages could not be paid, and mankind has been enabled to get cheap goods at the expense of humanity itself.

I thank God, reverently and with gratitude unspeakable, that this day has passed, I trust, forever. These virgin resources are mainly exhausted, and it is no longer possible, in Europe, at least, to produce more iron than the world requires; prices have risen; the workmen are demanding and receiving a more reasonable reward for their labor, and it now only remains for them to fit themselves and their families for a rational use and enjoyment of the fruits of their toil. In looking back over the sad and gloomy fields of suffering among the European mines and works which I have traversed so often, and in looking forward to the more cheerful prospect now spread out before the sons of toil, I am tempted to exclaim with the Patriarch: "Lord, now lettest thou thy servant depart in peace, for mine eyes have seen thy salvation."

THE BLESSINGS OF CHEAP IRON.

But cheap iron is a blessing to mankind, and to deprive the world of it is a calamity so serious that no one can contemplate it without a feeling of reluctance. Here, again, science steps in to reconcile high wages with cheap iron. It is the mission of science to cheapen processes, which enables wages to be raised without enhancing the cost of the product of the world. The history of industry is full of examples of the truth of this proposition, but for our purpose the Bessemer process affords its best illustration. By the genius of one man the whole world is enriched, its comforts enlarged, its progress promoted, and new fields of art and industry opened to its enterprise and energy. The annual saving in carrying on the business and transportation of the world can only be measured by millions; and when equal genius is applied to the proper distribution of the saving produced by the Bessemer process, by the Danks puddler, and other economical processes that have been and will be invented, the laboring classes all over the world will be lifted out of the depths, and this earth become the paradise it was intended to be, when the Great Giver of all endowed it with so much beauty and such boundless sources of wealth, and made the forces of nature to be the servants of man, whenever he learns how to use and govern them. You, gentlemen, have limited yourself to the study of physical laws and their application to industry, but I hope to see the day when all over this land, and throughout the world, there will be similar associations devoting themselves with equal zeal and intelligence to the discovery of the laws upon which society should be organized, and to the application of these laws to the proper distribution of the fruits of industry among those who labor for their production; so that nowhere in the world, and least of all in this land of boundless resources, shall it be said that there are idle hands because there is no work to be done, or that there are want and misery because there is not a just division of the proceeds of industry. If, then, my views in regard to the dignity and importance of your mission be correct, you have not associated yourselves together one day too soon. You can derive encouragement from the magnificent results already achieved by your sister association, the British Iron and Steel Institute, only two years your senior, which has already given to the world several volumes of papers of inestimable value, and among them that admirable treatise of J. Lowthian Bell, on "the Chemical Phenomena of Iron Smelting," wherein the laws governing the operation of the blast furnace are placed upon settled foundations, and two continents have been made his debtor, a debt which you will gladly join with me in recognizing on the first suitable public occasion which has occured since the completion of his great work.

Having thus briefly traced out the mission of science in our day to bring capital into productive relations with labor, and to remove the just grievances of labor, not against capital, but against its ignorant administration, and to make commodities cheap for the benefit and not at the expense of humanity, let me, in conclusion, sketch the picture which will be presented at the beginning of the next century, when our mining interests will be developed on a scale somewhat commensurate with the area of the country and the extent of its resources. As New York will be the centre of capital, so will it be the initial point of our iron and steel industry. On the shores of the Hudson river, the ores of Lake Champlain, of the valleys of Connecticut, and of the highland ranges of New York and New Jersey will meet the anthracite coals of Pennsylvania upon conditions so favorable that New York and its vicinity must become a great metallurgical centre. Thence the chain of fire, extending across New Jersey, and following the banks of the Lehigh and Schuylkill to the Susquehanna, will lead us by the margin of the coal fields, along the outcrop of the magnetic, hematite, and fossiliferous ores which extend through Pennsylvania, Maryland, Virginia, North and South Carolina, Tennessee, Georgia, and Alabama, nearly to the Gulf, so that the light of furnace answering to furnace will never be lost sight of in the long line of over 1,000 miles. Thence, turning to the West, Missouri, Kentucky, Western Tennessee, Ohio, Indiana, and Illinois will be all aglow with furnaces, forges, and mills, fed by the admirable fuel of the inexhaustible coal fields of the West, and the superb ores of Missouri and Lake Superior. The waters of the great lakes will reflect the flames which will light up their margin, while to the West, along the line of the various Pacific Railways, the newly found coal and iron of that hitherto trackless region, will form an enduring basis for the growth of industrious communities, busy cities, and teeming farms. The west coast will not be behind in the race, but an iron industry, more valuable than its mines of gold and silver, will yet supply its growing millions with the fundamental basis upon which modern civilization rests. The growth of this vast industry will be accompanied by the schoolmaster, the preacher, and the physician. Homes of which human nature may be proud will be established in its wake, labor and Christianity will march hand in hand, binding all interests and all classes so harmoniously and so indissolubly together, that peace and good will between capital and labor shall prevail throughout the land forever. Gentlemen, you are welcometo New York.

THE

CANADA SOUTHERN

RAILWAY COMPANY

Are now offering through the undersigned the

REMAINING $5,000,000

OF THEIR

First Mortgage Sinking Fund

30 Years

7 PER CT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

THE ROAD runs from Buffalo to the Detroit River, connecting there with the Chicago and Canada Southern, now being built to Chicago, and will thereby form the

SHORTEST TRUNK LINE BETWEEN BUFFALO AND CHICAGO, or, in other words, will be the SHORTEST LINK IN THE GREAT LINE OF TRAFFIC BETWEEN THE EAST AND WEST, connecting the GREAT SYSTEM OF RAILWAYS which diverges from Buffalo, Toledo and Chicago.

A branch also runs from St. Thomas to St. Clair, where it forms connections with the various roads leading into the lumber and mineral regions of Michigan.

THE MAIN LINE from Buffalo to the Detroit River is 229 miles long. The branch from St. Thomas to St. Clair is 61 miles, and runs through the great Canada oil region.

OF THE entire line (290 miles) *Two hundred and twenty* miles are *graded, bridged, and ready for the superstructure.* The remaining 70 miles are under contract to be ready for the superstructure early in the Summer.

OF THE 800,000 ties required, 600,000 are on hand and the remainder are coming in daily.

SIX THOUSAND FIVE HUNDRED TONS of rails are delivered and paid for, and the balance contracted to be delivered early in the Summer, those for the main line being STEEL, all 60 lb. to the yard.

ALL the materials for the stations, and a part of the equipment are purchased.

TRACK LAYING will be begun as soon as the frost is out of the ground.

The entire line will be ready for business on or before Dec. 31, 1872.

THE ROAD is being built by the most experienced railroad men in the country, who are confident of a profitable business for it from the day of its opening.

THE ROAD will be

33 Miles Shorter than any other Road,

either BUILT or in contemplation between Buffalo and Chicago.

THE MAXIMUM GRADE on the entire line does not exceed FIFTEEN FEET to the mile—and Ninety six per cent. of the road IS STRAIGHT.

The Canada Southern (including its branch of 61 miles to St. Clair) and the Chicago and Canada Southern, with their light grades, direct alignment, being the shortest route between Buffalo and Chicago, will admit of the most speedy, economical, and safe transit attainable for both passengers and freight.

The road thus far has been built by cash subscriptions, and the proceeds of the bonds now offered will complete and fully equip it. The principal and interest of the bonds are payable either in New York, London, or Frankfort.

We have no hesitation in recommending the bonds AS A PERFECTLY SAFE as well as a PROFITABLE INVESTMENT.

RAILROAD COMPANIES—DUTIES AND OBLIGATIONS OF, AS INTERMEDIATE CARRIERS—WHEN THEY BECOME WAREHOUSEMEN—WHAT IS REASONABLE NOTICE OF READINESS FOR DELIVERY TO NEXT CARRIER.

The case of Mills *vs.* The Michigan Central Railroad Company, (45 N. Y., 622,) was an action brought to recover the value of 298 bags of wheat, which were shipped on the defendant's road at Kalamazoo, Michigan, on the 16th of October, 1865, to go to Detroit by rail, and thence to Buffalo, N. Y., by propellors on the Lakes, thence to Albany N. Y., by the N. Y. Central Railroad. The bags were consigned to Mills and McMartin, Albany, N. Y., by lake and rail, but no way bills of shipping receipts were delivered to the plaintiff's agent at Kalamazoo. The property duly arrived at Detroit, one car load on the 17th, and the other on the 18th, of October, where it was destroyed by fire, which burned the freight warehouses of the defendant on the evening of the last mentioned day.

The Special Term gave a judgment in favor of Plaintiff, and the General Term affirmed the same.

The following is the opinion of the court delivered by—

FOLGER, J.—Unless the defendans were relieved from their liability as common carriers by the provision in their charter to be noticed hereafter they could only be discharged therefrom by a delivery of the wheat to the next carrier in the line of transportation, or by a notice to him that it was ready for delivery, and the lapse of a reasonable time for him to take it away, and in the event of his neglect so to do, the proper storage of the same, or by the doing of some act indicating a renunciation of the relation of carrier. (McDonald *vs.* West. Trans. Co. 34 N. Y. 497). The wheat was not actually delivered nor is it shown that notice of its arrival was actually brought home to the next carrier in the line of transportation. Notice was given, however, according to a custom prevalent with the defendants and carriers who were used to take goods from them. The custom was to deposit a written notice of the presence of freight in a letter-box appropriated to the particular carrier by whose line the freight was to go. To this box the succeeding carrier had constant access. The custom was uniform and fully reorganized by all connecting lines. But it is not shown that the plaintiffs and their agents who shipped the wheat from the initial point of carriage knew of this custom. If the plaintiffs are to be considered as contracting with a reference to this custom of the defendants and their connecting lines, then it must be held that the deposit in the proper box of the notice to the succeeding carrier was all the notice to him, which the law required of the defendants. And the rule seems to be, in this state, that the shipper of goods, where there is no express contract, is held to have agreed with the carrier for the transportation and disposal of them in the way usual and customary with the carrier. (St. John *vs.* Van Santwood, 6 Hill 157.) But there needed not only notice to the carrier next in line, of the arrival of the wheat, but a lapse of reasonable time for him to take it away, and in his neglect so to do, some disposition of it by the defendant, indicating its intention no longer to be charged as carriers of it. What shall be a reasonable time is also to be determined by the circumstances of each case. It appears from the testimony, that this wheat was received by the defendants to be delivered by them to a propeller of the N. Y. Cent. R. R. Line of propellers on Lake Erie, and that in such case, the defendants shipped the goods by the first vessel of that Line which could take them after their arrival in Detroit. Here, then was a question to be determined in their favor, before the defendants could claim that they were discharged from their liability as common carriers. And we think that, as it was the custom of the defendants to bring forward to Detroit merchandise designed to be shipped through the Lake by this propeller Line and to then ship it by the first vessel of the line, which could take it after its arrival, the reasonable time, which after notice to propeller line, that line had to take away the goods, did not expire until there was a vessel, which in the ordinary course of business could take the goods away. The custom of the defendants should operate against them in this respect, as well as for them in respect to the giving of notice. And it is to be held that they made their contract affording this reasonable time to the shipper and the succeeding carrier, just as the shippers made their contract that notice deposited in the box should be a good notice of the arrival of the goods. There is no proof in the case, but that the wheat would have gone forward, had it not been destroyed by the first vessel of the line of propellers which could take it. And the defendants having contracted to take it from Kalamazoo, and so to ship it forward from Detroit, were not from anything which appears in this case discharged from their liability as common carriers of the wheat. For though notice was given of its arrival, reasonable time for taking from the custody of the defendants had not elapsed, nor had the defendants done any act of storage or otherwise which changed their relation to the plaintiff of common carriers of the wheat.

Neither do we think that the section from the charter of the defendants, which was produced at the Circuit, and to which our attention has been called, has the effect to relieve them. The design of that section is to accord a right to the defendants, to wit, that of charging a price for the storage of goods after certain notice and after holding the goods for a certain time. The proviso which the section contains, and which is relied upon by the defendants to limit their liability in this case, does not act independantly of the rest of the section, and of itself give to the defendants another privilege right or exemption. It is on the other hand, restrictive or explanatory merely of the affirmatively enacting part of the section, and limits its effect favorably to the defendants. So that the section and proviso together do no more than declare that when goods have arrived at the warehouse of the defendants in Detroit, they may charge storage upon them, after notice of their arrival and a lapse of twenty-four hours therefrom; but the availing themselves of this right so to charge shall not continue their liability as common carriers; but that in all cases where they have chosen to exercise this right, they shall be held only to the liability of warehousemen for goods thus awaiting delivery. In other words, the section was to apply only to goods which had reached their place of final destination and there awaited delivery, and not to goods on their way from the possession of the defendants to that of another connecting carrier. The judgment should be affirmed, with costs.

Judgment affirmed.

☞ The delegation from California, recently in Boston, negotiating an alliance with the Atlantic and Pacific Railroad Company for the construction of the thirty-fifth parallel road, having concluded satisfactory arrangements, will meet at St. Louis on the 10th inst. to advise with the people of that city on the subject.

☞ The formal opening of the new railroad from Egg Harbor city to May's Landing took place on the 1st inst. On the 3d inst. regular passenger trains commenced running.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, May 31, 1872.

GEO. S. BOUTWELL,
Secretary of the Treasury.

Kingston and Hanover Railroad.

The proposed railroad from Kingston to Hanover is designed to open up for development an important section of Plymouth county, and to form one of the several important routes which may diverge from Kingston as a railroad centre. The preliminary line begins at Lucas Crossing, so called, in Kingston, at a point on the Old Colony Railroad, about a mile to the westward of the Kingston Station. It runs in as nearly an air line as may be through a portion of Northwest Kingston and Pine Brook Valley to High street in West Duxbury, and between Center Pembroke and North and East Pembroke to connect with the Hanover Branch Railroad at the station near Curtis' Forge, Hanover.

The exact distance between the termini is eight and three tenths miles, over a route mostly level, or of easy grades, and with but few and slight curves. At the ordinary price of iron, it is the opinion of competent judges, that the cost of the road can be brought within the amount of capital stock required to be subscribed under the law of 1872, which is $15,000 per mile.

The Kingston and Hanover Railroad Company is being organized under the new general law, with the full conviction that the road is a public necessity, and that there will be sufficient business to handsomely support it.—*Plymouth Rock.*

☞ Initiatory steps have been taken to lay a double track on the main line of the Chicago and Alton Railroad between Chicago and St. Louis with steel rails.

☞ The directors of the New York Bridge Company, recently elected, are: Henry C. Murphy, Abram S. Hewett, Seymour L. Husted, Loyd Aspinwall, Jas. S. T. Stranahan, Alex. McCue, Wm. H. Appleton, Henry W. Slocum, Issac Van Anden, Wm. H. Vanderbilt, Wm. C. Kingsley, John H. Prentice, Demas Barnes, John W. Lewis and Wm. Marshall.

☞ The first sod of the Rivier du Loup Railway was turned at St. Mary's near Fredericton, N. B., the 8th of May by Lieut.-Governor Wilmot. The work will be proceeded with at once. 1,000 tons of iron for the road will arrive about July 1st. R. Robinson, Esq., is President of the company, and Julius Inches Secretary.

☞ Work on the Wolfboro' (N. H.) Branch Railroad is now in a rapid state of progression. About 800 men are employed on the remaining eight miles to be completed. Messrs. Wilson & Tennent, the contractors, say that the cars shall be running the entire length by the 4th of July.

☞ A. P. Gorman has been elected President, and George S. Brown, Jas. G. Berrett, Gilmor Meredith, Greenbury M. Watkins, Daniel S. Biser and Michael Bannon, directors of the Chesapeake and Ohio Canal Co.

☞ Charles J. Pusey has been elected President, John Q. Hoyt Vice President, A. W. Humphreys Treasurer, and Edward W, Serrell Chief Engineer of the Hudson River Bridge and New England Railroad Company.

☞ The road bed of the East St. Louis, Cahokia and Falling Springs Railroad is nearly completed.

☞ The New York and New Haven Railroad Company have declared a dividend of $5 on each full paid share, and $2 50 on eachscrip share of stock, payable July 1.

☞ A convention of narrow gauge railroad men will assemble at St. Louis on the 19th of June. The advantages and the disadvantages of the two systems will be thoroughly discussed.

☞ The Helena (Ark.) *World* says that work on the Mobile and Northwestern Railroad is being pushed ahead with astonishing rapidity.

American Railroad Journal.

New York, Saturday, June 15, 1872.

New York, West Shore and Chicago R. R.

At the annual meeting of the stockholders of this company held at No. 20 Nassau St., this city, on the 11th inst., the following gentlemen were elected directors: John M. Courtenay, Leonval T. Guthrie, Wm. M. Richards, Joseph A. Beardsley, Augustus W. Greenleaf, J. Alder Ellis, John C. Wyman, Wm. W. Carson, Levi Parsons, Hezron A. Johnson, L. H. Meyers, John Horatio Lloyd and Daniel D. Brodhead. Mr. Lloyd is of London, Mr. Brodhead of Boston, Mr. Ellis of Chicago, Mr. Carson of Newburg, and the others of New York. At a subsequent meeting of the directors the following officers were chosen: President, John M. Courtenay; Vice President, J. Alder Ellis; Treasurer, Leonval T. Guthrie; Secretary, L. M. Guthrie. The executive committee consists of the President, Vice President, and Treasurer. We learn that an agreement has been entered into between this company and the W[illegible] Shore Hudson River Railroad Company, [illegible] former agrees to take up the bonds of [illegible] at the rate of fifty cents on the dollar on or before the 26th day of January, 1873, and to give in exchange bonds of $1,000 on the New York, West Shore and Chicago Railroad Company, secured by its first mortgage, or cash; and that Mr. Courtenay has appointed Messrs. C. D. Van Wagenen, John Van Ness and Allan Hay trustees to receive the bonds of the West Shore Hudson River Railroad Company on the above terms. The office of the trustees is at No. 33 Broad Street, this city.

INVESTMENT SECURITIES.

We are selling the Northern Pacific 7-30 Gold Bonds at par and interest in currency. They are issued in denominations from $100 to $1,000 Coupon, and $100 to $10,000 Registered, and are at all times interchangeable, at the pleasure of the holder, without charge.

They are secured by a First and only Mortgage on the road, its Equipments, Earnings, and Franchises, and also on a Land Grant which, on the completion of the road, will exceed 23,000 acres to each mile of track, or 500 acres of land to secure each $1,000 bond.

These Bonds are at all times receivable at Ten Per Cent. Premium, in payment for any lands purchased from the Company.

A portion of the Company's Lands are now on the market, and the proceeds of sale constitute a SINKING FUND for the REDEMPTION OF THE BONDS.

Holders of United States 5-50 Bonds can now convert them into

NORTHERN PACIFIC 7-30's,

Realizing an immediate handsome profit, and an increase of about one-third on their annual income.

The semi-annual interest on the Registered Bonds is paid with GOLD CHECKS, sent to the Post-Office address of the holder.

All marketable securities received in exchange, without expense to the investor, at their highest current value. JAY COOKE & Co.,

New York, Philadelphia and Washington.

For sale by Banks and Bankers generally throughout the United States and Canada.

☞ The proposed bridge over the Hudson River at Poughkeepsie will be composed of five spans of 500 feet each, and will be 120 feet in hight. This bridge will connect New England with the coal fields of Pennsylvania, by the building of only nine miles of railroad.

Arkansas Central Railway.

The Credit Foncier of England, one of the largest financial institutions in London, in conjunction with Messrs. Lion, Hertz & Co., of Amsterdam, have introduced upon the English and Dutch markets the first mortgage 8 per cent. gold bonds of the Arkansas Central Railway Company. The bond is for only $8,000 per mile on completed road, and was readily subscribed for by the public, obtaining a premium in the London market of 4 per cent. above the issue price, which was £166 10s per bond of $1,000 or 80 per cent. gold. This is the first Arkansas loan successfully placed upon the European market, and as the Central is one of the best lines of the Southwest, we are confident that the sale of these securities will open the way for the introduction abroad of other valuable enterprises in the progressive Southwest.

Central Railroad of New Jersey.

The Directors of the Central Railroad Company of New Jersey, present to the Stockholders their report for the year 1871.

The usual comparisons are made of the receipts, expenses, &c., of the past year with those of the one that preceded it, though they are of less value than usual, as on the first of April this company took possession of the Lehigh and Susquehanna Railroad and its branches, under the lease heretofore reported; and since that time the whole 180 miles of main line, and 111 miles of branches have been operated as one concern. The last nine months, therefore, show the receipts and expenses of the Lehigh road combined with those of the roads previously the property of this company.

The entire Lehigh equipment having passed by purchase, into the hands of this company, is included in the general statement of equipment, which also includes that of all the branches; and the repair of the same are included in the general expense accounts.

SERVICE OF THE ROAD AND FERRY.

The service of the whole road, as compared with that of the Central Division the previous year, has been as follows:

	1871.	1870.
Miles run by passenger trains.	1,164,823	876,049
" merchandise " .	808,795	574,208
" coal trains.....	1,556,905	828,971
Total by transport'n trains.	3,530,523	2,278,228
Miles run by wood, gravel and construction trains.....	171,850	66,817
Total miles run by trains.	3,702,373	2,345,045

The ferry boats have made 39,993 trips between New York and Jersey City, against 36,336 trips the previous year. The ferry between New York and Elizabethport has been regularly kept up.

PASSENGERS, FREIGHT AND COAL.

The passenger business of the past year, including that of the Lehigh Road for nine months, is as follows, compared with Central Railroad receipts the previous year:

	1871.	1870.
Number of passengers	3,944,103	3,291,034
Miles traveled by passeng'rs.	44,808,654	40,499,888

A similar comparison of merchandise business gives as follows:

	1871.	1870.
Number of tons carried	990,591	702,529
Tons carried one mile	59,557,173	42,792,171

A similar comparison of the coal business gives the following results:

	1871.	1870.
Number of tons carried	2,958,046	2,052,184
Tons carried one mile	229,342,245	115,304,381

There was an increase in Lehigh Coal of 247,494 tons, and a decrease in Lackawanna coal of 422,614 tons, on the Central Division.

The coal tonnage over the Central Division, since the transportation of coal was commenced, has been as follows:

	Lehigh Tons.	Lackawanna Tons.	Total Tons.
1856	33,325	98,670	131,995
1857	84,841	209,950	294,791
1858	122,923	417,726	540,649
1859	183,277	455,681	638,958
1860	263,906	590,863	854,769
1861	254,345	568,869	823,214
1862	314,195	502,375	816,570
1863	435,927	613,954	1,049,881
1864	474,221	675,743	1,149,964
1865	509,819	494,687	1,004,506
1866	511,076	778,173	1,289,249
1867	513,425	855,620	1,369,045
1868	765,657	853,188	1,618,845
1869	733,435	822,567	1,556,052
1870	997,504	1,054,680	2,052,184
1871	1,244,998	632,066	1,877,064
Total	7,442,924	9,624,812	17,067,736

EQUIPMENT.

The company received with the Lehigh and Susquehanna Railroad 72 engines, 15 passenger cars, 10 baggage cars, 554 freight cars, 10,442 coal cars and 263 other cars.

The company now own 262 engines, of which 193 burn hard coal and 9 wood. The condition of these engines is reported as follows: 134 in first-class order; 31 in good working order; 1 requires ordinary repairs, 6 general repairs, and 22 are now in shop repairing. During the year 9 new passenger engines, 4 new freight and 5 new shifting engines have been added to the equipment, besides the purchase of the Lehigh engines. Six engines have been condemned and cut up.

The equipment of cars is as follows: 103 first-class and 16 second-class passenger, 29 baggage and smoking, 10 baggage and mail, 3 express, 326 8-wheel and 12 4-wheel, house freight, 28 8-wheel stock, 9 8-wheel and 73 4-wheel, caboose, 198 8-wheel platform, 311 8-wheel gondola, 10 8-wheel, 149 6-wheel and 14 4-wheel iron and lime, 876 8-wheel and 11,975 4-wheel coal, 122 8-wheel and 163 4-wheel gravel, 19 6-wheel and 5 4-wheel wood rack, 4 8 wheel derrick, and 2 8-wheel tool.

During the year the following additions have been made to the car equipment, besides the Lehigh car purchase: There have been purchased 10 passenger cars, 1,000 4-wheel coal cars, 50 gondola cars, 12 house cars, 25 platform cars and 48 iron cars. There have been built in the company's shops, 1 caboose, 43 house, 7 stock, 24 platform, 6 gondola and 2 tool cars, all 8-wheeled; also, 8 4-wheeled caboose and 43 4-wheeled coal cars. The following changes were made: 3 second-class passenger cars were converted to combination cars, 2 6-wheel wood racks to iron and lime cars, 1 8-wheel coal car to work train caboose, and 10 8-wheel coal cars to lime cars. Also 180 4-wheel coal cars were rebuilt during the year. Also 5 passenger cars, 2 caboose, 69 coal, 1 stock, and 9 lime cars have been broken up or destroyed.

TRANSPORTATION ACCOUNT.

The following is a statement of the ordinary receipts and expenses of both roads for the year 1871, compared with those of Central Division in 1870.

Receipts:	1871.	1870.
Passengers	$1,275,091 82	$1,118,147 20
Merchandise	1,562,947 54	1,172,870 63
Coal	3,900,571 71	1,954,550 56
Mail	15,809 90	15,772 40
Express	28,429 55	28,786 10
Rents	26,516 49	80,900 86
Miscellaneous	17,424 59	22,486 87
Car service	15,687 59	....
Total receipts	$6,841,379 19	$4,393,514 12
Expenses:		
Running expenses	$1,266,095 94	$799,906 85
Wood consumed	46,619 75	47,961 66
Coal consumed	281,817 23	240,117 18
Repairs of road	896,395 97	405,522 17
Repairs of engines	150,388 82	216,211 73
Repairs passeng'r cars	68,717 29	89,657 80
Repairs of fr'ight cars	51,605 52	28,150 99
Repairs of coal cars	235,240 84	40,705 50
Repairs docks, Elizabethport	10,503 84	20,262 13
Repairs buildings, bridges, &c.	178,047 87	175,486 25
Repairs tools and machinery	34,639 47	18,875 89
Expense account	121,823 14	103,811 10
Miscellaneous exp.	71,979 59	105,341 58
Ferry running exp.	88,595 50	106,556 33
Ferry boat repairs	34,895 67	41,995 62
Car service	....	126,654 68
Exp. Ashley Plains	68,878 04	....
Total expenses	$3,706,144 48	$2,512,216 64
Balance net earnings	$3,135,234 71	$1,881,297 48

The gross receipts per mile run have been as follows: From passenger trains, $1.09 against $1.28 in 1870; from merchandise trains, $1.93 against $2.04; from coal trains, $2.55 against $2.36. The average receipts per mile run from all trains have been $1.85 against $1.87 the previous year.

The gross expenses per mile run have been $1.00 against $1.07 the previous year.

The following table shows the receipts, expenses and net earnings, from the beginning of the annual reports to the Legislature, to the present time:

	Receipts.	Expenses.	Net Earnings.
1853	$349,018	$197,629	$151,389 or 48 p.c.
1854	378,145	197,349	180,796 or 48 "
1855	393,729	208,856	184,873 or 47 "
1856	553,479	258,308	295,171 or 53 "
1857	682,314	340,502	341,812 or 51 "
1858	836,934	345,614	491,320 or 58 "
1859	971,702	385,716	585,986 or 61 "
1860	1,185,848	475,457	810,391 or 60 "
1861	1,201,895	522,452	679,443 or 57 "
1862	1,397,586	623,245	774,341 or 56 "
1863	1,941,976	814,782	1,127,244 or 58 "
1864	2,537,185	1,231,554	1,305,631 or 51 "
1865	3,036,390	1,748,434	1,287,956 or 43 "
1866	3,581,244	1,963,976	1,617,268 or 45 "
1867	3,350,398	1,878,022	1,472,376 or 44 "
1868	3,729,412	2,379,192	1,350,220 or 36 "
1869	4,010,121	2,642,163	1,367,958 or 34 "
1870	4,393,514	2,512,217	1,881,297 or 43 "
1871	6,841,379	3,706,144	3,135,235 or 46 "
Tot.	$41,372,269	$22,431,562	$18,940,707 or 46 "

FINANCIAL CONDITION.

The balance sheet will be found at the end of the report. The following is a statement of the financial operations during the year:

Credits:	
Balance cash January 1st	$5,540 02
Gross earnings Central Division	4,470,729 74
Gross earnings L. & S. Div., 9 mos.	2,370,649 45
Mortgage bonds of 1890, issued	1,987,000 00
Lehigh Coal and Nav. Co., Gold Loan of 1897, assumed	2,310,000 00
Railroad Car Trust of Philadelphia, assumed	498,568 76
Scrip stock, $5,000,000, received	1,182,150 00
Accounts receivable, decrease	411,068 16
	$13,235,706 13
Debts:	
Ordinary expenses, both roads	$3,706,144 48
First mortgage bonds paid	188,000 00
Second " " "	80,000 00
Grading	114,758 58
Masonry	37,852 09
Railway superstructure	218,562 76
Bridge superstructure	18,945 66
Land damage	69,622 84
Engineering	13,127 96
Station houses	27,574 87
Engines	1,021,063 20
Passenger cars	122,572 00
Freight cars	462,000 31
Coal cars	2,611,923 97
Wilkesbarre Coal and Iron Co. stock	757,600 00
Lehigh Coal and Navigation Co. loan of 1911	90,000 00
Lands, material, &c., increase	697,319 48
Interest account for year, balance	578,867 52
State taxes for year	62,748 05
United States taxes	39,350 03
Rent of Lehigh and Susquehanna Railroad	775,040 24
Dividends for year, 10 per cent.	1,500,000 00
Balance cash, December 31, 1871	96,542 09
	$13,235,706 13

The profit and loss account has been credited:

Gross earnings during the year	$6,841,379 19

It has been debited as follows:

Ordinary expenses	$3,706,144 48	
Rent of Lehigh and Susquehanna R. R.	775,040 24	
Interest account	578,867 52	
State taxes	62,748 05	
United States taxes	39,350 03	
Dividend account	1,500,000 00	
Union R. R. Co. stock charged off	23,010 90	
		6,685,161 22
Balance to renewal fund		$156,217 97

The cost of the Central Railroad, double tracked, with its ferry houses, ferry boats, coal wharves, station houses, shops, and other appendages, stands at $11,736,639 19, and that of the equipment of both roads at $6,891,559 48.

BUSINESS OF THE YEAR.

For the first quarter of the year the coal traffic was almost entirely suspended by the universal strike in the coal regions. When trade recommenced, simultaneously with this company taking possession of the Lehigh and Susquehanna Railroad and branches, under the lease on the 1st of April, a very heavy business at remunerative prices was done for a number of months. The latter part of the year prices fell, under a severe competition among producers and transporters to get large quantities to seaboard. The year closed with very satisfactory results however, the receipts from coal on the Central having slightly exceeded those of the previous year, notwithstanding the fact that the receipts of the previous year had been exceptionally large.

Passenger and merchandise receipts showed also a large increase on the Central Division, while the business of the Lehigh and Susquehanna Division, under the stimulus of passing into hands able and willing to increase its traffic, has largely developed, and shows a healthy growth likely to increase.

The division of the business between the two roads has been as follows:

	Central.	Lehigh & Sus.
Passengers	$1,134,829 42	$140,262 40
Merchandise	1,274,927 06	288,020 48
Coal	1,960,026 54	1,940,545 17
Other receipts	100,946 72	1,821 40
Total	$4,470,729 74	$2,370,649 45

CONSTRUCTION.

The graduation and masonry for the third and fourth tracks between Elizabeth and Somerville, generally of an easy character, was carried on during the season, and is now nearly completed, ready for laying the new tracks where required, and correcting the old ones where out of the true line. The new piece of road to straighten the line between Fanwood and Plainfield is progressing very satisfactorily. The right of way for the tangent line between Somerville and Raritan has been purchased, but work has not yet been commenced on it; so also on the Bound Brook part of the line, where the present tracks require raising two feet, and the filling in of the new tracks is heavy, no work has yet been done.

A third coal wharf is building at Port Johnson, and nearly ready for occupation. Another wharf is almost completed at Jersey City, and the adjoining wharf is to have a coal trestle placed on it for city and harbor trade.

Extensive but not expensive improvements have been made at Roselle and Dunellen stations, and neater and more ornamental stations and grounds are not to be found in the country. It is intended by degrees to improve all the stations, on different plans, as required by the extent and nature of the ground, and by the enterprise shown by the inhabitants.

A large and handsome station-house, of iron and brick, has been built at Ferry Street, on the Newark road, and already the effect is visible in the start given to improvements in the neighborhood. The stores on the ground floor at once pay the interest on the cost of the building.

The filling in at Jersey City, partly on the lands of the company and partly on those of the American Dock and Improvement Company, has advanced very satisfactorily. Two connections with Jersey City, by Jersey Avenue and Washington Street, have been filed in, and for use await only the building by Jersey City of the necessary bridges over the Morris Canal, &c. These bridges are understood to be ready for contract.

The bulkheads sunk round the large basin north of the station grounds have been further perfected by additional stone ballast. This basin when completed will be an advantage which Jersey City would not lose for a large sum, and the Dock Company propose to proceed with its construction with the addition of two smaller basins to the north, at right angles with main basin.

STEEL RAILS.

The relaying the road with steel rails is steadily advancing month by month. On the 1st January 45¼ miles single track had been relaid, and the rails for 12 more miles were on hand. Orders for 15 miles more were in the course of delivery. On the Lehigh and Susquehanna road over 10 miles were laid. The total will be 6,000 tons. For the present year, in addition to the above, 8,500 tons have been ordered, sufficient to relay 85 miles of road. It is gratifying to add that the steel rails have continued to give perfect satisfaction, and also that the iron rails recently received from our American works, where not composed of re-rolled iron, have been lasting much better and promise much more satisfactory results than those received for a number of years previously. The company will continue to relay with steel until the main tracks are all changed.

COAL LANDS.

In the general competition for sources of coal supply, it became indispensable for the company to place this, their most important branch of traffic, beyond the reach of contingency of any sort. They, therefore, took active steps during the past year to secure coal lands in their interest, giving the preference to the very best lands, even if higher-priced, and also securing large contiguous blocks rather than scattering their interests. By purchase or lease, through the Lehigh Coal and Navigation Company or otherwise, they own the fee or control the traffic of 21,500 acres of the best coal lands in the Lehigh and Wyoming coal fields, besides 14,000 acres of timber or arable lands under which no coal is as yet known to exist. This statement includes the lands of the Lehigh Coal and Navigation Company, but not those of the Lehigh Valley Railroad Company, or of the Delaware, Lackawanna and Western Railroad Company. With such a body of lands to be certainly relied on, they feel as if they were in no danger, and driven to no particular course which they might not otherwise take.

NEWARK AND NEW YORK RAILROAD.

There is nothing new in the business of this branch, which continues to grow in popular favor. The reduction of grade through Bergen Hill to 30 feet to the mile is advancing satisfactorily.

The branch across the meadows, from the Central road near Elizabethport to the road on the Brill farm, is completed and ready for use. No trains have been run over it during the winter, it being more economical to wait until the frost is out of the ground and surface the road properly before beginning its use. It is expected to give great impetus to the Newark passenger business on the Central Road, as through cars will be run in connection with all the principal trains.

ROAD TO PERTH AMBOY AND LONG BRANCH.

Roads have been chartered extending from the junction of the Newark branch and the Central Road at Elizabethport, directly across a level in expensive country to Perth Amboy; thence by a double track bridge across Raritan Bay to South Amboy, and thence by tangent lines passing through Mattawan and Red Bank to Long Branch. At present these roads are independent of the Central, but they will pass under their control.

The "all rail" distance from New York to Long Branch, will be 45 miles. The country is rich and anxious for an outlet, and the business is expected to be remunerative on its cost, which will be very moderate.

The bridge across Raritan Bay is the only costly structure, and will be constructed in a permanent manner, as it will, in time, become the channel of a large business.

LEHIGH AND SUSQUEHANNA RAILROAD.

This road has been worked, for nine months of the fiscal year, as a division of the Central Road, to the great advantage and profit of both parties. Possession was taken without difficulty or jar of any kind, and the business operations of the road have been eminently satisfactory and harmonious. The construction of the second track between Easton and Allentown, and also at the most important points on the upper part of the road, has been steadily and economically pushed, and many miles will be added during the present season. The new portions of track, like the older, will be laid with steel rails, now under contract; station-houses will be built, sidings and freight-houses provided, moderate rates of toll maintained, and everything possible done to develop and expand the business. The Central policy will as far as possible be extended into Pennsylvania, and already the good effects are visible.

STOCK AND BONDS.

During the year an addition to the capital has been made by the issue of $5,000,000 scrip stock, on which $1,182,150 had been paid at the close of the year. When this is all paid in, it will make the capital stock twenty million of dollars. The issue of new bonds, due 1890, is $4,824,000, while the old bonds outstanding are $176,000, making together five millions. Of floating debt, as usual, there is little or none.

DIVIDENDS.

A semi annual dividend of four per cent. was made, then a quarterly dividend of two and a half per cent., and then one of three and a half, to make the dividends of the year up to ten per cent.; at which point of ten per cent. it is expected to maintain them.

CONCLUSION.

There seems little prospect of any check to the prosperity of the road. The country along the line is flourishing greatly. Business is flowing in, and while competition is from time to time threatened, or branches of business withdrawn, new sources of supply are always ready to take the vacant places.

The faithfulness and energy of all the officials, from the General Superintendent and other high officers, downwards, has contributed, is contributing, and will contribute largely to this result

BALANCE SHEET, JANUARY 1st, 1872.

Railroad		$8,231,072 14
New York station and ferry houses		344,556 21
Jersey City station		960 297 50

Superintendent and Engineer.—R. E. RICKER.

Consulting Engineer.—JAMES MOORE.

Russian Railways.

An official Russian report states that the traffic of the Russian railways for 1871 as compared with 1870 shows the subjoined results:—

	1871.	1870.
Passengers	18 046,718	14,526,915

☞ The Logansport, Crawfordsville and Southwestern Railway Company of Indiana have leased on extremely favorable terms, and will operate that portion of the Evansville and Crawfordsville Railroad lying between Rockville and Terre Haute, being about twenty-three miles, thus securing as its southwestern terminus this large and important railway centre.

Mobile and Ohio Railroad.

The earnings of this road for the years ending December 31, 1870 and 1871, were as follows:

	1870.	1871.
From freight.....	$1,760,072 29	$1,954,217 76
" passengers....	695,224 16	681,460 92
" express.....	54,750 00	54 750 00
" mail.....	49,294 47	49,020 00
	$2,559,340 92	$2,739,448 68
Expenses, viz:		
Repairs of roadway.	$535,502 32	$582,386 10
Repairs of machinery	449,326 10	512,779 48
Conducting transp...	925,180 23	799,002 28
	$1,910,008 65	$1,894,167 86
Net earnings....	$649,332 27	$845,280 82

Compared with the previous year the gross earnings of 1871 show an increase of $180,107 76 In the expenditures of the year there is included the sum of $30,260 48 in the roadway department for construction of the passenger building at Mobile, filling up station grounds and other necessary improvements on the road; and in the machinery department there is charged the sum of $88,941 89 for the construction of new cars—making together the sum of $119,202 37. Deducting these items, which have heretofore been charged to construction account, and the actual operating expenses will amount to $1,774,965 49, and the absolute earnings over operating expenses to the sum of $964,483 19. The president in his report says:

This is the largest earnings in the history of your company, and would have been increased but for three causes:

1st. The unfortunate break down of the Alabama and Chattanooga Road, which occurred in July, just as it was completed, and deprived us, to a great extent, of the business which we had the right to expect from that connection.

2d. The vigorous opposition between the New Orleans steamers and the New Orleans, Mobile and Texas road, reducing the rates of western freights to Mobile via New Orleans to a point that was unremunerative, and forcing us to retire.

3d. The freshet in May, which derived us of 10 days earnings and involved an expense of thousands of dollars.

It is a source of great satisfaction that since the last meeting we have been able to meet the interest of 2d mortgage bonds, making a full resumption of interest payments on all your securities. Thus the company, after pressing through the terrible ordeal of a four years war, which involved the loss of sixty-five per cent. of the original cost of the enterprise, stands before the world to-day without the taint of commercial dishonor. This should assure you of the inherent strength of the enterprise.

With pleasure we are able to report that the debt due the State of Tennessee has been paid by the substitution of a similar amount of our bonds thereby relieving in the hour of her need a State that generously aided you in the days of her greater prosperity, by a liberal loan of credit.

Nogotiations have been made with the Kentucky and Tennessee Railroad Company, by which that company will build their road from a poin opposite to the city of Cairo to some point of intert section with your road, and lease it to this company in perpetuity. The early completion of this extension will place you in rail connection with the entire railroad system north of the Ohio River.

The road and machinery is in better order than at any previous time, while its equipment is greater than ever before.

You will require more rolling stock in the autumn to meet the increase of business, and at some few points station houses are needed, for which arrangements are being made.

The sale of lands have been on a restricted scale, and must so continue until the tide of immigration sets Southward, which will sooner or later be the case.

The labyrinth of difficulties surrounding the Alabama and Chattanooga road has hitherto prevented the realization of the benefits to us which were expected, but it is hoped that a satisfactory solution will soon be reached. In the meantime this company is operating a portion of it by consent of the parties in interest.

The competition between the New Orleans steamers and the New Orleans, Mobile and Texas Railroad has ceased, and this connection promises to be one of mutual benefit.

The Cairo and Vincinnes road, it is believed, will be completed in the coming autumn; and a narrow gauge road from Cairo to St. Louis is being rapidly built and will probably reach completion during the next winter.

A narrow gauge road is being built extending from Okolona, on your line, to Grenada, on the line of the Mississippi Central road, and the first twenty-eight miles from Okolona is now under contract.

The Selma, Marion and Memphis road, which crosses your road at Okolona and connects again at Columbus, Mississippi, has made but little progress since your last meeting, but we are advised that active operations are soon to be commenced at Okolona looking Southward.

With all connecting lines our relations are harmonious, and it is believed that the policy of friendly relations with all and entangling alliances with none will best subserve your interests.

The gradual increase of mechanical pursuits along the line is tending not only to an increase in your earnings, but is slowly changing the character and course of the traffic, and tending to the equalization of tonnage in opposite directions; this fact will be apparent when it is seen that with a less bulk of cotton the general receipts have been increased.

Complaint is made of us in common with all Southern Roads, that the rates of freight and passage are high. That prices are high as compared with rates on Eastern and Northern Roads, is not denied, but a moments examination of facts will show that they are not only justified, but required by the necessities of the case. Your road traverses for the most part, an undeveloped country, sparsely populated, and utterly prostrated by an exhausting war. The volume of business is necessarily small, and can only be increased but by the gradual development and restoration of the country.

The cost of your road, the expense of keeping it up, and its consequent interest account is the same, whether the business done over it is large or small—thus it will be seen that high prices must obtain, until this condition of things is changed. It is confidently believed that the time is not far distant, when prices can be reduced, and yet do justice to both creditors and stockholders. It will be remembered that the latter have not as yet received one dollar for their investments made long years since, and they cannot for some time to come.

The vexed question for discriminating rates it is argued, are contrary to good faith, and oppressive and disastrous. It would be a source of great satisfaction to all, and to none more than your directors, if this course could be abandoned. But let us examine the question and see the case as it is. Your road passes through an agricultural region, producing an annual crop—the transportation of which, taxes to its utmost capacity during four months in the year, all your rolling stock; while for the other eight months, the larger portion of it must lie idle, so far as local traffic is concerned. What shall be done with it? The work is has done is not sufficient to answer the demands upon your treasury. Shall we refuse to employ it because we cannot use it at regular prices, or shall we make it earn something, and thereby enable us to sustain the enterprise—if the latter course is adopted, we must compete in

price with other routes and modes of transportation—if the former is adopted, the local tariff must be increased above what is now complained of as high and oppressive, inasmuch as that business alone would thus be required to sustain you.

Again, the want of equalization of tonnage as between North and South bound freight presents another difficulty. The proportions of South bound is at least two tons for one bound North. Now shall we send empty cars North because we cannot get full prices? If the answer is in the affirmative, a higher price must be demanded for South bound freight, as upon it the whole burden of operating is to be levied.

The slow but steady diversity in the pursuits of our people will in time remedy this evil, and thereby harmonize conflicting local interests.

The steady increase in your receipts, which were, in 1868 $1,850,601 59, in 1869 $2,115,286 93, in 1870 $2,559,240 92, and in 1871 $2,739,448 68, assures us that the country is steadily improving, and that your enterprise is partaking of that improvement. That your prospects for the future are cheering none can doubt.

The road is 472 miles in length, extending from Mobile, Ala., to Columbus, Ky., with branches from Artesia, Miss., to Columbus, Miss., 14½ miles, and from Junction, Miss., to Aberdeen, Miss., 9 miles—making a total of 495½ miles, of which 63 are in Alabama, 293½ in Mississippi, 118½ in Tennessee, and 20½ in Kentucky. The company also operate under lease 21 miles of the Mississippi, Gainesville and Tuscaloosa Railroad—making the total length of road operated 516½ miles.

The company have 116 locomotives. The number of miles run by locomotives was as follows: passenger, 524,122; freight, 638,080; gravel and construction, 218,046; switching, 52,575—total 1,432,823. The earnings per mile of road were: from passengers, $1,320; freight, $3,485; mail and express, $201—total, $5 006, against $4,746 19 in 1870. The average earnings per train mile was $2.32.

The number of passengers carried was 385,300; do., carried one mile, 15,792.459. Tons of freight carried, 333,638; do., carried one mile, 47,006,-987. Bales of cotton transported, 182,854, against 225,165 the previous year. There was a decrease in the receipts at Mobile of 11,076 bales, and in shipments northward of 17,447 bales. The superintendent in his report says:

A survey for the Kentucky and Tennessee Railroad, extending from Columbus to Cairo, was made under the joint direction of the Illinois Central Railroad, and this company. Two lines were run, the first leaving the main line four and a-half miles south of Columbus, and the other passing through the town. Other instrumental examinations are now being made, preparatory to making the final location. The early construction of this road is rendered important by the speedy construction of the Cairo and Vincennes Road, and the Short Line from Cairo to St. Louis. These roads will concentrate a large traffic at Cairo, which will force a Southern connection by rail, and the Mobile and Ohio Railroad should be the first to make it.

The completion of the New Orleans and Texas Railroad to New Orleans, gives this company the opportunity to compete for through Northern and Western business. Until the extension of the Mobile and Montgomery Road to this city, close connections were made with that road, and a large part of the through travel came by this route. On the completion of that road, however, the connections were broken, and travel has gone by other routes. This company must, therefore, decide upon relying entirely upon its local business, or to run a double daily passenger train, at a higher rate of speed than heretofore. The improved condition of the track will justify this, but it will require five engines, three passenger and three additional baggage cars.

A careful review of the earnings and expenses since the war, shows a steady and gratifying increase in the former, and a great improvement in the condition of the company's property. The fact is now fully established if there ever was any doubt upon the subject that the local business is sufficient to pay the interest on its indebtedness, and to leave a margin for the purchase of additional rolling stock necessary to meet the increased business. Notwithstanding the very short crop of the past year, and the expenditure of $138,608 for new cars, depots, &c., the loss of business from an extraordinary freshet and the cost of repairing the damage, the net earnings are more than sufficient to pay the interest on the bonded indebtedness.

CONDENSED BALANCE SHEET.

Cost of road and equipment	$17,156,145 31
Gainesville Branch	147,016 19
Supplies on hand	595,384 26

President.—ABRAHAM MURDOCK.

Vice President.—CHARLES E. RUSHING.

Second Vice President.—JOHN J. WALKER.

Directors.—W. P. Halliday, Ills.; Thomas Brown, Ky.; A. S. Humphreys, C. E. Rushing, A. Murdock, Miss.; James Crawford, W. D. Dunn, Charles Walsh, John Reid, Jr., John J. Walker, Francis B. Clark, Robert W. Smith, Ala.; Wm. Butler Duncan, New York.

Secretary & Treasurer.—A. L. WILLOUGHBY.

Chief Eng. & Gen'l Sup't.—L. J. FLEMING.

Louisville and Nashville R. R.

At a recent meeting of the stockholders of this company in Louisville, resolutions were adopted to extend the Lebanon branch to the state line. It was also resolved that the President and Directors be authorized to execute the bonds of this company for $2,500,000, or £500,000 sterling and to execute a mortgage upon the Memphis, Clarksville and Louisville Railroad, provided, that so much of the proceeds of these mortgage bonds as may be necessary to complete the South and North Alabama Railroad shall be applied to that object.

Since the last annual meeting of the directors, the construction of the South and North Alabama road has been continued, and it is expected to have it finished some time in the month of September next, and under the contract with that company for the construction of the road, the Louisville and Nashville Company will receive and hold about $3,600,000 of eight per cent. gold mortgage bonds of said company, endorsed and guaranteed by the State of Alabama. It was resolved that the Louisville and Nashville Company endorse the bonds of the South and North Alabama Railroad Company, and negotiate the same; and that if the latter company should conclude to substitute other bonds of lower rate of interest, the Louisville and Nashville Company should accept the same.

Northern Pacific Railroad.

FAVORABLE REPORT ON THE NORTHERN PACIFIC RAILROAD.

WASHINGTON, June 11.

The Committee on Pacific Railroads of the House made a report yesterday upon the resolution of February 13, to investigate and report upon the actual condition of the Northern Pacific Railroad Company. The statement is voluminous, embracing all the evidence adduced before the committee. The following is a brief synopsis:

There are no charges of any kind whatsoever made against the management of the company, and in order to meet the suggestions made in any communications referred to the committee or any of its members, as well as all questions of a general character, the committee put interrogatories to the Company which were answered under oath. The range of the inquiries was designed to cover the actual condition of the Northern Pacific Railroad Company and to be exhaustive.

The evidence shows that the affairs of the company are in a sound and clean condition. Thus far the road has been constructed by contractors, to whom the work has been let after public competitive bidding. No director, officer or engineer of the company has been in any way pecuniarily interested in the construction contracts or the purchase of material or supplies.

The building of the road has progressed as rapidly as prudent financial management and the permanent interest of the road permitted. The work throughout is shown to be of the best quality. The iron is all of American manufacture, and from American ores.

There will be in operation at the end of this year five hundred and seventeen (517) miles of the main road. Surveys entirely across the continent have developed an excellent route with easy grades and through a country of much average fertility. In addition to the portion already completed there is now under construction and preparing for contract, east and west of the Rocky Mountains, ten hundred and thirty-one (1031) miles of track. Grading is in progress in Dakota and Washington Territories.

The company has examined, platted, appraised and prepared for market, 1,578,890 acres of its lands in Minnesota and Washington Territory, at a cost of one cent per acre, and of these lands applications are on file for the purchase of 140,204 acres.

The company's policy is to sell its lands cheap to actual settlers. The lands are held by trustees as security for bonds sold by the company, and no portion of the grant can be diverted from this purpose.

Four million two hundred and forty-one thousand six hundred dollars worth of capital stock has been issued, and is held by one hundred and seventy-four different shareholders, whose names are given.

☞ The grading, masonry and bridging of the entire line of the Montpelier and Wells River Railroad will be completed, ready for the iron, by the middle of July, with the exception of the two bridges at Montpelier. The work of ironing the road will occupy about two months with a force of forty hands, working night and day. The road will be completed before the opening of the legislature next fall.
